United States deposits.....	1288
Bonds and money borrowed.....	1288
Bank acceptances.....	1289
Total resources and liabilities.....	1289
Classification and amount of loans by national banks in the central reserve cities, etc., June 30, 1920.....	1289
Comparative statement of loans by national banks during the past three years.....	1290
Rate of interest paid by national banks on deposits and number of banks reporting each rate on May 4, 1920.....	1291
Rates of interest charged by national banks on loans and number of banks reporting each rate on May 4, 1920.....	1296
Classification of loans by national banks in the city of New York for five years, June, 1916, to June, 1920, inclusive.....	1300
Paper eligible for rediscount with Federal reserve banks, held by national banks, in country and reserve cities, by geographical districts.....	1300
Statement showing the amount of paper eligible for rediscount with Federal reserve banks, November 17, 1919, as compared with June 30, 1920, classified by Federal reserve cities and States.....	1301
Classification of rediscounts, together with the total of loans and discounts, as shown by the reports of national banks, May 4, June 30, and September 8, 1920.....	1304
Loans made by national banks for their correspondents, May 4 and June 30, 1920.....	1312

REPORT OF THE COMPTROLLER OF THE CURRENCY—Continued.	Page.
Amount of money loaned by national banks, either by direct loans or through bought paper, to parties who keep no deposit accounts with the banks, and number of such loans, February 28, 1920.....	1314
Rediscounts of national banks with Federal reserve banks, classified by States (country banks) and reserve cities, November 17, 1919.....	1318
Principal items of national-bank resources and liabilities on September 8, 1920, arranged by States.....	1319
Loans and discounts and investments of national banks.....	1321
Domestic and foreign bonds, securities, etc., owned by national banks, May 4, 1920.....	1322
Classification of foreign Government bonds owned by national banks on June 30, 1920.....	1326
Classification of investments made by national banks.....	1326
Domestic and foreign securities held by national banks.....	1327
Balances due national banks from Federal reserve banks.....	1328
Specie and gold and silver certificates in national banks.....	1328
National-bank charters applied for, granted, and refused.....	1329
Increases and reductions of capital stock of national banks.....	1329
Liquidation of national banks.....	1329
Consolidation of national banks.....	1329
National banks consolidated under act of November 7, 1918, their capital, surplus, undivided profits, and aggregate assets, year ended October 31, 1920.....	1330
Growth in number and capital of national banks.....	1330
National banks organized since 1900.....	1331
State banks converted or reorganized into national banking associations since 1900.....	1331
Organization and liquidation of national banks.....	1331
Number and authorized capital of national banks organized and the number and capital of banks closed in each year ended October 31, since the establishment of the national banking system, with the yearly increase or decrease.....	1332
Number of national banks organized, in liquidation, consolidated under act of November 7, 1918, insolvent, and in operation, with amount of bonds on deposit, and circulation issued, redeemed, and outstanding on October 31, 1920.....	1333
Number of national banks organized, in voluntary liquidation, consolidated under act of November 7, 1918, insolvent, and number and capital of associations in active operation on January 1 of each year from 1864 to 1920.....	1334
National banks chartered during the year ended October 31, 1920.....	1335
Number of national banks chartered in each month from March 14, 1900, to October 31, 1920.....	1342
Number of national banks increasing their capital, together with the amount of increase monthly, January 1, 1916, to October 31, 1920.....	1342
Number and classification of national banks chartered during the year ended October 31, 1920.....	1342
Conversions of State banks and primary organizations as national banks since 1900.....	1343
Number and capital of State banks converted into national banking associations in each State and Territory from 1863 to October 31, 1920.....	1343
Capitalization of national banks classified by States.....	1343
Summary by States, geographical divisions, and classes of national banks organized from March 14, 1900, to October 31, 1920, and the paid-in capital stock of all reporting national banks on September 8, 1920.....	1344
Expirations and extensions of charters of national banks.....	1345
Number of national banks in each State the charters of which were extended under act of July 12, 1882, to October 31, 1920.....	1345
Reextension of national-bank charters.....	1346
Changes in capital stock of national banks, increases and reductions.....	1346
Changes in title of national banks.....	1347
Changes of title incident to consolidations of national banks.....	1348
Failures and suspensions of national banks.....	1348
Causes of national-bank failures.....	1351
Principal causes of failure of national banks in past 57 years.....	1351

REPORT OF THE COMPTROLLER OF THE CURRENCY—Continued.

Failures and suspensions of national banks—Continued.	Page.
National-bank failures since inauguration of the system.....	1352
National-bank failures by years, 1864 to 1920, showing each year, number of failures, capital of failed banks, capital and total resources of all national banks, and percentage of capital of failed banks each year, to total capital of all national banks.....	1353
National banks organized, failed, and reported in voluntary liquidation during the year ended October 31, 1920.....	1354
Bank investments in United States securities.....	1355

ANNUAL REPORT ON THE FINANCES.

TREASURY DEPARTMENT,
Washington, November 20, 1920.

SIR: I have the honor to make the following report:

Transition and adjustment have marked the course of the country's business during the last 12 months. Forces of broad sweep and intensity have operated. They have been world-wide and consequently beyond the possibility of control by any industrial group or even by nations. During the war forces were set in motion which no Government could or did control. No Government succeeded, for instance, in checking the rising tide of costs and prices. After the armistice, with the return of millions of men to productive activities, with the beginnings of more normal conditions everywhere, with the restoration of better transportation on land and sea, and with the fuller contribution of nations once more to the world's stock of goods, reverse forces were set in operation which no Government can thwart. These forces were the natural aftercurrents of a World War and resulted in a financial and industrial cycle typical of periods immediately following great struggles, but of unparalleled intensity. They set up very complex problems, which have sorely taxed the best thought of private and public leaders everywhere; but this Nation faced them with characteristic calmness; dealt with them for the most part with marked effectiveness; proceeded in orderly fashion; and is now slowly and cautiously, but confidently, feeling its way to more sound and stable conditions.

That a Nation which so splendidly withstood the greatest financial strain of history can now satisfactorily cope with the much less serious situation confronting it and attain its objective would seem to admit of no reasonable doubt. Its failure to do so would be a reflection on the patriotism as well as on the intelligence of its people. It emerged from the war incomparably strong. It has immense liabilities; it has great debts; but it has enormous resources, and the only question is whether it will utilize and direct them wisely. The need of the exercise of plain common sense, of patience, of the effective realization that burdens of war do not end with the fighting, of hard work, of thrift and of economy, private and public, Federal, State, county, and municipal, is so obvious as to render emphasis and discussion of it unnecessary.

The industry of this Nation during the period to which reference has been made passed through several fairly well-defined stages. The first, extending through last winter, was marked by a continuance of business and credit expansion, great commercial activity, high and rising wages and prices, and free and extravagant spending on the part of many, coupled with general growing restlessness and anxiety over high prices and the cost of living. Indications of a change appeared toward the end of February. Hints of a possible reduction in the volume of business began to be thrown out; recognition of an undue credit expansion was manifested; and there was a waning of speculation in commodities. This was followed by a few weeks of hesitation and of lessening extravagance and by a period of care in buying, of slight declines of prices here and there, of attempts to hold goods for higher prices, of added credit strain resulting in part from efforts to hold goods off the market and intensified by an exceptional congestion of railroad traffic, and of cancellation of orders, first for shoes and woollens and later for cotton goods. In July these movements were very noticeable. It was a month of unmistakable transition. Transportation continued to be inadequate, reckless spending decidedly declined, cancellation of orders increased, further indications of falling prices appeared, a pronounced check of speculation in financial centers occurred, liquidation of stocks held on a speculative basis proceeded, a number of manufacturing establishments were closed, some unemployment developed, and a halt had been called to undue credit extension.

These conditions called for care on the part of all financial agencies, but this was taken and business began to adjust itself to the new basis and to feel its way with due confidence.

Scarcely had this point been reached when problems, in part, of an opposite sort were presented for consideration by the Treasury and the banks of the Nation. The harvest season came on and the Nation was confronted with the task of marketing one of its record crops at a time when transportation facilities were still unsettled and when Europe's demand for food and raw materials was lessened partly by reason of her own larger self-sufficiency arising from the return of millions of her people to productive efforts, partly because of the lack of security and credit in some of her nations, and partly because of the restoration of more normal conditions in marine transportation and the consequent reappearance of the products of distant countries in the markets of the world.

The banks of the Nation were called upon to finance the marketing of crops in a gradual and orderly manner. And more than that: they and the Treasury were insistently called upon by a considerable number of individuals to facilitate the holding of commodities off

the market for an indefinite period so that a predetermined price might be realized. The latter was impracticable; the former was feasible, but not easy. It was rendered difficult by the very abundance of the crop yields, by disturbed conditions existing particularly in Central Europe, by reduced buying power in most parts of that continent, and by the failure of our people heretofore to develop more adequate storage facilities for farm products and of the farmers particularly more satisfactorily to solve their marketing and financial problems by larger resort to legitimate cooperative undertakings.

The beginning of the crop-moving season found the banks with credits still largely extended. The expansion of credit which was marked during the war did not end with the armistice. When the fighting ceased, there was a real apprehension everywhere that there might be industrial stagnation, unemployment, and reduced production. The appeal was that business should go forward. Business men and the banks in whose hands the initiative lay responded and liberal credits were extended. Between the armistice and October 1, 1920, the loans and investments of all banks increased, it is estimated, more than \$7,000,000,000 and Federal reserve notes more than \$740,000,000. In January, 1920, on the recommendation of certain Federal reserve banks, steps were taken, partly through higher rates, to control the undue credit expansion; but it persisted. We were threatened with a continuance and extension of the cycle of rising prices, of demands of labor for additional wages, and with a situation which might make it difficult for the banks to give adequate aid in emergencies. Further steps were taken and for a few weeks in the early summer the brakes worked and something like an equilibrium was established. Still in the period from January 23, 1920, when the advance was made in the discount rates of the Federal reserve banks to 6 per cent for commercial paper, to the end of September, the loans and investments of all the banks in the country expanded, it is estimated, approximately \$1,000,000,000, and the Federal reserve note circulation \$460,000,000. But what is more important is the fact that accommodations extended to agriculture, industry, and commerce increased, it is estimated, in the same period more than \$3,000,000,000 and possibly nearer \$4,000,000,000, this large growth in the accommodations for agricultural, industrial, and commercial purposes being made possible by the shifting of funds following the reduction of loans on Government paper and against stock and bond collateral. In the period from the beginning of the crop-moving season in July of this year to October 16 the bills discounted and purchased by the Federal reserve banks gained at an average rate of \$22,000,000 a week and the Federal reserve note circulation at the rate of \$20,000,000.

The banks of the Nation generally recognized their obligation to see that the fundamental activities of their several communities were supported. As indicated, they largely increased their accommodation for agriculture, industry, and commerce. Loans for speculative purposes were discouraged and largely reduced. Where discrimination had to be exercised loans for essential purposes were given preference; and Federal reserve banks in the industrial sections rediscounted in large volumes for those in crop-moving sections. There was not only no contraction, as was asserted in many quarters, but an actual considerable expansion of credits. But still, for reasons beyond the control of banking establishments, or of the Government, prices of farm products fell, and fell suddenly; and those who were distressed began to look in other directions for relief.

The first impulse of many who were searching for a way out was to turn to the Government, and especially to the Treasury, as the sole instrumentality for full economic salvation. This disposition, well developed before the war, was reinforced during hostilities by practices of the Government which became necessary for the successful prosecution of the war and for the preservation of national life. It is the same disposition which causes resort to the Government for appropriations for all sorts of enterprises, many even of a purely local character. It is this disposition, rather than self-aggrandizing efforts of Federal departments to extend their functions, which is the main explanation of mounting Federal budgets and of centralizing tendencies frequently criticized. If there is a fault, and that there is one there is little doubt, the blame must rest largely on the public which remains quiescent while interested groups are clamorous. When the people appreciate this fact there will be a remedy, and not until then.

This attitude so extremely manifested is unwholesome and menacing, and it is of the highest importance that individuals and communities return to a normal degree of self-help and self-reliance. We have demobilized many groups, but we have not demobilized those whose gaze is concentrated on the Treasury. In the circumstances producers whose products could not be satisfactorily marketed and whose prices were falling demanded that the Treasury intervene. They asked either that it deposit money in certain sections or that the activities of the War Finance Corporation be resumed.

Neither of these things was feasible. The Treasury had no money to lend and no money to deposit except for Government purposes. It is not in the banking business and should not be. It is borrowing money periodically to meet current obligations at a cost of about 6 per cent. On several occasions before the Federal Reserve System was instituted the Secretary of the Treasury, at a time when the

Treasury had a surplus, did deposit small sums of money in banks in various sections of the country to meet emergencies; but this necessity is obviated by reason of the existence and practices of the Federal Reserve System, and it is interesting to note that during the recent strain Federal reserve banks in certain sections of the country rediscounted for banks in crop-moving sections approximately six times as much as was ever deposited for crop-moving purposes by the Secretary of the Treasury.

Furthermore, the War Finance Corporation was a war agency and was created to help win the war. It was clearly desirable that war agencies should cease to function as quickly as possible. The only power of the corporation which had any possible bearing on the situation is one which was inserted after the armistice with a particular possible state of facts in view. Fearing that with the cessation of exports for military purposes after the armistice, exports might not go forward, Congress empowered the corporation, in order to promote commerce with foreign nations, to make advances under certain conditions. The War Finance Corporation had no money of its own. It or the Treasury would have had to borrow the money, and borrow it at a cost of about 6 per cent. And they were called upon to do this to stimulate exports which were going forward in such volume as to continue the already existing derangements of international exchange. Exports did not decline; they increased at an astounding rate.

While the prewar exports had risen to about two and one-half billions of dollars, and while in 1918, the last year of the war, they were valued at \$6,000,000,000, they rose in 1919 to 7.9 billions and are going forward this year at the rate of over 8 billions, and approximately 50 per cent of these consists of agricultural products. It is clear that the condition contemplated by the Congress did not arise. Exports have gone forward in enormous volume and are being privately financed. Individuals or firms have not been unable to obtain funds with which to finance exports. But there are limitations imposed by an unfortunate situation. This country has not yet found itself able to join the other civilized nations of the world in establishing a prompt peace, upon the full restoration of which, as the recent Brussels conference correctly stated, improvement of the financial position of the world largely depends. And, furthermore, as the same body pointed out, borrowing countries of Europe lack sufficient satisfactory securities. This is the chief obstacle in the way of their securing credit, and this obstacle the Government of this country can not remove.

In the midst of such forces and happenings the Treasury pursued its course and discharged the duties imposed upon it by law. Tasks

under its care have been heavy, but they have yielded to patient treatment, and for the most part the various services have developed satisfactorily. The Nation's finances in particular have shown marked improvement. The total ordinary receipts of \$6,694,565,-388.88 for the fiscal year 1920, on the basis of the daily Treasury statements, exceeded those for 1919 by \$1,542,308,252.45, while the total net ordinary expenditures decreased from \$18,514,879,955.03 to \$6,403,343,841.21.

The gross public debt, which reached its highest point on August 31, 1919, amounting to \$26,596,701,648.01, had dropped on October 31, 1920, to \$24,062,509,672.96, on the basis of daily Treasury statements. Of very particular significance is the marked disappearance from member banks of Government war securities held by them and the reduction of their loans on such paper. On May 2, 1919, holdings by 771 member banks in selected cities of Government war securities and loans on such paper, exclusive of rediscounts, aggregated \$4,083,193,000, while on October 29, 1920, those of 823 member banks in the same cities stood at only \$1,750,638,000. On May 2, 1919, the bills held by Federal reserve banks secured by Government war obligations amounted to \$1,788,068,000 and all other bills to \$373,999,000, while on October 29, 1920, the former had been reduced to \$1,203,905,000 and the latter had increased to \$1,895,767,000. This fortunate result was brought about in part by the reduction of the public debt, especially of the floating debt, but more particularly by the distribution of the securities among permanent investors.

The cessation of the Treasury's borrowing, except through short-time certificates of indebtedness, was also a matter of consequence to the people of the country as a whole as well as to the holders of Liberty bonds and Victory notes, and has had an important bearing on the matter of effective credit control. The year has been characterized by the progressive relative withdrawal of the Treasury from the domestic credit market and from a position of dominant influence. By the beginning of the fall this withdrawal had reached the point where the influence of Treasury borrowing was comparatively limited. The future course will necessarily depend upon the extent to which economies are practiced and the amount of the burdens placed upon the Treasury, as well as upon the industrial developments and the maintenance of tax receipts on a sufficiently high level.

The action of the Treasury Department on matters of importance, its financial program, and its proposals on the several matters within its province, are set forth at some detail in the following discussion:

TREASURY CERTIFICATES OF INDEBTEDNESS.

The chief financial operations of the Government during the year have been in Treasury certificates, which were sold to meet in part the current requirements of the Government. They were either short-term loan certificates or certificates in anticipation of income and profits taxes. These certificate operations have been particularly noteworthy because of the increased interest rates which it became necessary to pay in order to secure the distribution of the securities among real investors and to avoid lodging them in the banks. Since the Victory loan campaign efforts to procure the distribution of both tax and loan certificates among investors have been increased and have had marked success. The banking institutions of the country have been asked to buy the certificates and sell them to their customers; and their efforts to that end have been supplemented by the Federal reserve banks and by circulars mailed by the Treasury in connection with each issue to a selected list of taxpayers and bond subscribers. The success of these efforts is evidenced by the fact that on October 29, 1920, the 823 reporting member banks of the Federal Reserve System (which are believed to control about 40 per cent of the commercial banking resources of the country and to have subscribed in the first instance to nearly 75 per cent of the outstanding issues of Treasury certificates) held only \$295,000,000 of loan and tax certificates out of a total of about \$2,337,000,000 then outstanding. On the same date the Federal reserve banks reported only \$240,000,000 of Treasury certificates pledged with them to secure loans and discounts, notwithstanding the preferential rates still maintained in favor of Treasury certificates in some Federal reserve districts.

As the result of the year's operations there was also a marked decline in the total volume of Treasury certificates outstanding. On June 30, 1920, there were outstanding loan and tax certificates unmatured in the amount of \$2,485,552,500 as against \$3,267,878,500 on June 30, 1919, a reduction of \$782,326,000, while on October 31, 1920, there were outstanding \$2,337,203,500 as against \$3,462,258,000 on October 31, 1919, a decrease of \$1,125,054,500 in the 12 months and of \$930,675,000 from June 30, 1919. These reductions were not effected uniformly; for the course of the floating debt is determined very largely by the relation between current receipts and current expenditures, and the Treasury has no control over appropriations or expenditures, nor, for example, over the salvage operations of other Government agencies. The reductions have been accomplished chiefly at the periods of the heavy income and profits tax payments, and the largest decreases coincide roughly with the months in which the quarterly tax payments are received. As frequently pointed out

by the Treasury, and as generally understood in the business and financial world, it is inevitable, in view of the fact that the large installments of income and profits taxes are payable quarterly, that there will be more or less substantial fluctuations in the floating debt in the intervals between the heavy tax payments. It is the Treasury's expectation that each quarterly payment of income and profits taxes henceforth will witness an important progressive decline in the floating debt, and that any increases which may occur in the intervals between quarterly tax payments will be more than overcome each time by the decrease effected as the result of the quarterly payment. This has been the history of the floating debt during the fiscal year 1921, as is well illustrated by the following comparative statement by months from June 30, 1920, to September 30, 1920:

Date.	Loan and tax certificates outstanding.	Date.	Loan and tax certificates outstanding.
June 30, 1920.....	\$2,485,552,500	Aug. 31, 1920.....	\$2,571,201,000
July 31, 1920.....	2,433,546,500	Sept. 30, 1920.....	2,347,791,000

The course of the certificate operations for the period under review can be shown best by reference to the circular letters and public statements issued from time to time during the year concerning the Treasury certificate program. The previous annual report of the Secretary of the Treasury covered the situation through the offering of September 15, 1919, which was described in detail in the circular letter of September 8, 1919, to banks and trust companies. The success of this issue, to which there were total subscriptions of \$758,600,500, coupled with unexpectedly heavy receipts from salvage, made it possible for the Treasury to postpone the next offering till late in November, 1919, when two issues, both dated December 1, 1919, and bearing $4\frac{1}{2}$ per cent interest, were made, one of loan certificates, maturing in two and one-half months, on February 16, 1920, and the other of tax certificates, maturing in three and one-half months, on March 15, 1920. The $4\frac{1}{2}$ per cent interest rate was the same as the rate on the certificates of six months maturity which had been sold on September 15, 1919. The situation existing at the time of this resumption of offerings, and the terms of the December 1 issue, were described in detail in the following letter to the banks and trust companies of the country:

WASHINGTON, November 24, 1919.

DEAR SIR: In my letter of September 8, I stated that, while it could not be said definitely when semimonthly issues of loan certificates would be resumed, such issues would certainly not be resumed before October 15. Though most

factors in the general situation since that letter was written have been adverse, the position of the Treasury has developed more favorably than then there seemed any reason to hope. The great success of the issue of tax certificates then announced, the reduction in current expenditures, and the increase of receipts, notably from sales of war materials and supplies, have made it possible to avoid until now the resumption of the issue of certificates.

On the basis of Treasury daily statements, in the month of October the net current deficit (excess of disbursements over receipts, exclusive of transactions in the principal of the public debt) was \$319,239,450.35, the lowest figure for any month since April, 1917, excluding the months in which income and profits taxes were payable, and for the first half of the month of November the net current deficit was \$118,630,787.30, indicating the likelihood of a further important reduction for that month.

On the basis of Treasury daily statements the total gross debt, which on June 30, 1919, amounted to \$25,484,506,160.05 and on August 31, 1919, had reached the peak at \$26,596,701,648.01, had been reduced by September 30 by more than \$400,000,000, and, notwithstanding the increase resulting from the Victory loan installment payments in October and November, when the final payment was made, stood on November 15 at \$26,210,905,795, a net reduction of about \$385,000,000 from the high mark at the end of August, and a net increase since June 30 of only \$726,399,634.95, although in that period only one quarterly income and profits tax installment had been received. The total amount of loan certificates outstanding and unmatured, which, on June 30 was \$2,478,317,500 and on August 31 \$2,012,387,500, was reduced in September to \$1,634,671,500, at which figure it stands; while the total amount of tax certificates outstanding and unmatured, which on June 30 was \$789,561,000 and on August 31 was \$1,925,837,500, was reduced in September to \$1,827,586,500, at which figure it stands. Of the latter, certificates to the amount of \$746,869,500 mature December 15, 1919, and are amply provided for by the income and profits tax installment payable on that date.

Very gratifying progress has been made in the absorption by investors of Government securities. During the period of five months from June 6 (when holdings of Victory notes were first reported separately) to November 7 (the last date for which reports are available) all reporting member banks (about 783 member banks in leading cities, which are believed to control about 40 per cent of the commercial bank deposits of the country) have, according to Federal Reserve Board reports, reduced their holdings—

Of Liberty bonds from.....	\$646, 273, 000	
To.....	633, 950, 000	
Or.....		\$12, 323, 000
Of Victory notes from.....	438, 589, 000	
To.....	292, 410, 000	
Or.....		146, 179, 000
Of United States certificates of indebtedness from..	1, 514, 462, 000	
To.....	847, 558, 000	
Or.....		666, 904, 000
Making a total reduction in all reporting member banks'		
holdings of United States war securities of.....		825, 406, 000

Loans by all reporting member banks secured by United States war securities, after deducting those rediscounted with Federal reserve banks, are reported as

reduced in the same period by \$221,450,000 (from \$1,420,581,000 to \$1,199,131,000), this reduction being partly offset, however, by increased rediscounts of such paper with Federal reserve banks.

The long intermission in the issue of certificates of all kinds makes it possible, upon resuming, to issue loan certificates, bearing 4½ per cent interest and having only two and one-half months to run, instead of five months as heretofore, while fixing the maturity one-half month later than that of the last issue of loan certificates. Along with the issue of these loan certificates it has been thought wise, in order to make it possible and convenient for taxpayers to prepare further for the large tax payments which fall due on March 15, 1920, to offer an issue of 4½ per cent tax certificates of that maturity.

The Treasury again confidently appeals to the banking institutions of the United States for their continued support and asks them not only to subscribe liberally to the certificates of one or both issues now offered but also to use their best efforts to secure the widest possible distribution among investors of the certificates so subscribed for.

Cordially yours,

CARTER GLASS.

TO THE PRESIDENT OF THE BANK OR TRUST COMPANY ADDRESSED.

The response was so satisfactory that the subscription books were closed on the first day for the loan certificates and on the second day for the tax certificates. The total subscriptions for the tax series were \$250,942,500 and for the loan series \$162,178,500. The result was announced in the following public statement on December 3, 1919:

Secretary Glass announced that subscriptions for the issue of Treasury certificates of indebtedness of Series T M-3, 1920, dated December 1, 1919, maturing March 15, 1920, closed at the close of business on Tuesday, December 2. The subscriptions for Treasury certificates of indebtedness of Series D 1920, dated December 1, 1919, and maturing February 16, 1920, closed at the close of business on Monday, December 1. Both of these series of certificates bear interest at the rate of 4½ per cent. No specific amount of certificates of either series was offered. It will be noted that the subscription books for the one series remained open for only one day, and for the other series for only two days. Final reports of subscriptions have not yet been received, but preliminary reports indicate that the aggregate subscriptions for both series up to the time of closing exceed \$400,000,000, a result very gratifying to the Treasury.

In response to the continuing demand for tax anticipation certificates, and in order to make further provision for the payment without inconvenience of the installment of income and profits taxes due March 15, 1920, the Secretary of the Treasury has authorized the Federal reserve banks, until further notice, to issue 4½ per cent Treasury certificates of indebtedness of Series T M-3, 1920, at par, with an adjustment of accrued interest, in exchange for Treasury certificates of indebtedness of any issue now outstanding, not overdue, maturing on or before February 16, 1920, with any unmatured coupons attached.

Additional certificates of Series T M-3, 1920, to the amount of \$9,379,500, were issued on exchange pursuant to this announcement.

The next offering was made in connection with the heavy maturity of certificates on December 15, 1919, which was also the last quar-

terly tax payment date for the calendar year 1919. Six months tax certificates, dated December 15, 1919, maturing June 15, 1920, bearing interest at $4\frac{1}{2}$ per cent, were offered. They were promptly subscribed. The books closed on December 19, with total subscriptions of \$728,130,000. This issue was closely followed by a further offering, dated January 2, 1920, made necessary chiefly by the large maturities of loan certificates on January 2, January 15, February 2, and February 16, 1920. The January 2 certificates, maturing December 15, 1920, bearing interest at $4\frac{3}{4}$ per cent, were also issued in anticipation of taxes. The total subscriptions for this issue were \$703,026,000. The following public statement of December 30, 1919, announced the offering and explained the Treasury's plans:

The Treasury is offering to-day an issue of $4\frac{3}{4}$ per cent tax certificates dated January 2, 1920, and maturing December 15, 1920. The success of this issue should assure the consummation of the Treasury's plan for financing the unfunded portion of the war debt in such a way as to avoid the necessity for great refunding operations by spreading maturities and meeting them so far as may be out of tax receipts.

The total amount of loan certificates, which on November 24 had been reduced to \$1,634,671,500, has been further reduced by purchase, exchange and optional redemption by \$236,703,500 net, and on December 24 was as follows:

Series A, due Jan. 2, 1920.....	\$348, 446, 000
Series B, due Jan. 15, 1920.....	451, 844, 500
Series C, due Feb. 2, 1920.....	493, 153, 500
Series D, due Feb. 16, 1920.....	104, 524, 000
Total.....	1, 397, 968, 000

Of the \$1,397,968,000 loan certificates thus remaining about one-half have already been provided for and the success of the issue of tax certificates now offered should provide for the retirement of the balance of the loan certificates and render the issue of any further certificates in January unnecessary, while leaving an important part of the tax payment due March 15, 1920, available for current purposes.

The total amount of tax certificates outstanding December 24, 1919, was approximately as follows:

Series T-S, T-9, and T M-3, due Mar. 15, 1920.....	\$550, 366, 000
Series T-J, due June 15, 1920.....	728, 130, 000
Series T-10, due Sept. 15, 1920.....	657, 469, 000
Total.....	1, 935, 965, 000

On account of the income and profits tax installment paid in this month of December, the operations of the month produced a net current surplus, excluding transactions in the principal of the public debt, of \$659,080,315.06 for the portion of the month ended December 24, 1919, on the basis of Treasury daily statements.

The success of these operations placed the Treasury in a very fortunate position and left it with practically no loan certificates out-

standing not covered by cash on hand. On January 12, 1920, the Secretary summarized the situation as follows:

It will no doubt be recalled that on September 8, in announcing an issue of tax certificates, I made certain statements concerning the Government's financial position and prospects for the balance of the calendar year and said that the turn of the tide had come. Now that the figures at the year's end are in hand it appears that my most sanguine expectations have been more than realized.

On the basis of Treasury daily statements, the Government's gross debt on Aug. 30, 1919, was-----	\$26,596,701,648.01
On Dec. 31 it amounted to-----	25,837,078,807.38
A reduction of-----	759,622,840.63
Its floating debt (unmatured Treasury certificates of indebtedness) on Aug. 30 was-----	4,201,139,050.39
On Dec. 31 it amounted to-----	3,578,485,800.37
A reduction of-----	622,653,250.02
The portion of the floating debt requiring to be refunded (so-called "loan certificates") on Aug. 30 amounted to--	2,012,387,500.00
On Dec. 31 it amounted to-----	1,326,661,000.00
A reduction of-----	685,726,500.00

The loan certificates outstanding on December 31 were of issues maturing January 2, January 15, February 2, and February 16, 1920, and have been or will be paid from cash on hand December 31 and from the proceeds of the sale of tax certificates thereafter issued, thus consummating the Treasury's plan for financing the unfunded portion of the war debt in such a way as to avoid any large funding operations.

As to the future, it may be stated positively that unless Congress should enter upon new fields of large expenditure not included in the Treasury's estimates or should make a reduction in the amount of taxes in addition to the reduction made a year ago upon the recommendation of Secretary McAdoo from about \$6,000,000,000 to about \$4,000,000,000, we may look forward confidently to the retirement of the floating debt out of the taxes provided by existing law and miscellaneous receipts coming within the general head of war salvage (although further issues of tax certificates in diminishing amounts will be necessary from time to time in the intervals between income and profits tax installment payments), and to the gradual reduction of the funded war debt through the operations of the Liberty loan bond purchase fund and sinking fund already created by law. On the other hand, should Congress embark upon new fields of large expenditure or further reduce taxes, it will, as I have already indicated, be clearly necessary to revise the Treasury's plans and call upon the country to finance the resulting deficit by the issue of a new Liberty loan.

To provide for the maturities of loan certificates on February 2 and February 16 it became necessary to offer a further issue of certificates, dated February 2, 1920, maturing March 15, 1920, bearing interest at $4\frac{1}{2}$ per cent. These certificates were to be provided for out of the installment of income and profits taxes due on March 15. Subscriptions, which closed on February 6, aggregated \$304,877,000, including \$7,477,000 as the result of exchanges of certificates of series

T-9, which had the same maturity and were accepted in exchange for the new issue pursuant to the Treasury's announcement on September 8, 1919, that if thereafter certificates maturing on or before March 15, 1920, should be issued bearing interest at a higher rate than $4\frac{1}{2}$ per cent, the certificates of series T-9 would be accepted in exchange at par with an adjustment of accrued interest.

With the maturity of loan certificates on February 16, 1920, the Treasury found itself in a position where it no longer had any such certificates outstanding. All the issues remaining matured on income and profits tax installment dates and the amounts of the various maturities in no instance exceeded the estimated amount of income and profits taxes payable on the maturity date. The Secretary, in a public statement issued under date of February 12, 1920, summed up the situation as follows:

The last issue of the Treasury's "loan" certificates of indebtedness matures on Monday. Since the Treasury announced its readiness to redeem these certificates before maturity about \$38,000,000 have been redeemed and the amount remaining outstanding last night was only about \$60,000,000. The significance of this very interesting and important fact is not perhaps fully realized. When these certificates have been paid the Treasury will have outstanding in the hands of the public no floating debt whatever in the sense of short-term certificates requiring to be refunded at maturity. The amount of tax certificates outstanding February 10 is approximately as follows:

Series T-8, interest $4\frac{1}{2}$ per cent, dated July 15, 1919, due Mar. 15, 1920 -----	\$315, 844, 500
Series T-9, interest $4\frac{1}{2}$ per cent, dated Sept. 15, 1919, due Mar. 15, 1920 -----	74, 295, 500
Series T M-3, 1920, interest $4\frac{1}{2}$ per cent, dated Dec. 1, 1919, due Mar. 15, 1920-----	152, 307, 500
Series T M-4, 1920, interest $4\frac{1}{2}$ per cent, dated Feb. 2, 1920, due Mar. 15, 1920-----	304, 877, 000
	<hr/>
	847, 324, 500
Series T J-1920, interest $4\frac{1}{2}$ per cent, dated Dec. 15, 1919, due June 15, 1920-----	728, 130, 000
Series T-10, interest $4\frac{1}{2}$ per cent, dated Sept. 15, 1919, due Sept. 15, 1920 -----	657, 469, 000
Series T D-1920, interest $4\frac{1}{2}$ per cent, dated Jan. 2, 1920, due Dec. 15, 1920-----	703, 026, 000
	<hr/>
Total tax certificates outstanding Feb. 10, 1920-----	2, 935, 949, 500

These certificates mature on income and profits tax installment dates and the amounts of the various maturities in no instance exceed the estimated amount of the taxes payable at the maturity date. The tax payments which have thus been anticipated and which are payable during the calendar year 1920 are payable in respect to the income and profits of the calendar year 1919, and consequently would not be adversely affected if any recession of business and profits should take place in 1920. The Treasury is naturally pleased with the success of the operations initiated last September and now brought to a successful conclusion which have made this splendid achievement possible. It is very grateful for the patriotic support and assistance of the Federal reserve banks and the

Treasury certificate organization and of the banking institutions of the country which have subscribed for the certificates in the first instance and distributed them very widely among investors. The rapid reduction of Government expenditure and realization of the surplus stocks accumulated for war purposes have been important factors in making possible the reduction of the floating debt and the gross debt of the Government in the past five months. The result of the elimination of loan certificates and the great reduction in the floating debt and gross debt have both been contributed to by the application to the payment of loan certificates of an important part of the balance in the general fund, which it had been necessary to retain at a high figure as long as the loan certificates were outstanding in order to provide for these frequent maturities, and which it was possible to reduce greatly in connection with their retirement.

Although the Treasury will, of course, be obliged to borrow from time to time to meet the current deficit (which in January amounted to less than \$93,000,000), in the intervals between income and profits tax installment payments, and the current requirements of the War Finance Corporation, the fact that the Treasury has no uncovered maturities is of immense importance. So long as the Treasury had certificates of indebtedness maturing in very large amounts and on dates when it could only provide the funds to meet them by fresh borrowings, its position might under certain circumstances have become embarrassing (though it never did), and it was consequently impossible for the Federal Reserve Board to exert any effective control over credit. The point is illustrated by the following quotation from the *London Economist* of January 24:

"Plenty of money and a consequent demand for bills have been the chief features of the internal history of the money market. The plenty may be attributed to the fresh creation of ways and means advances, necessitated by the maturing of more Treasury bills than were applied for. By this process, as we have frequently pointed out, dealers in and users of credit can now at any time oblige the Government to create more 'cash at the bank' by the weapon that they hold in the shape of 1,000 millions odd Treasury bills outstanding. Thus the powers that be can make money dear by paying more for it, but they can not make it really scarce until, by taxation or otherwise, they have reduced the effectiveness of this weapon."

The fact that the Treasury of the United States is no longer in the position somewhat similar to that described by the *Economist* is of immense importance for the general welfare of the country and incidentally to the holders of Liberty bonds and Victory notes, since the danger of the Treasury's being obliged to borrow large sums to meet maturing certificates upon disadvantageous terms has been eliminated. The position of the Treasury to-day and the future of the market for the outstanding issues of Liberty bonds and Victory notes is very bright. The whole color of the picture would, of course, be changed if Congress should embark upon new expenditures on a large scale. The whole problem to-day is that of giving the people time and will to save capital sufficient to enable them to absorb that part of the war issues which is still owned or loaned upon by banks and as well the flood of securities which are being pressed upon our markets from foreign sources in consequence of the extreme depression in European exchanges.

Following this announcement came the passage of the transportation act, 1920, approved February 28, 1920, which provided for the return of the railroads to private control. At the same time, the growing scarcity of capital and credit, accompanied by increased

rates of interest and discount, affected not only private borrowings but the Treasury's current borrowings as well. As early as November, 1919, the Federal reserve banks had taken action to increase discount rates, and by the end of January the rate on paper secured by Treasury certificates had already been raised to $4\frac{3}{4}$ per cent in all of the Federal reserve districts, and by the end of February to 5 per cent in most of the districts. This meant, for example, that the February 2, 1920, offering of Treasury certificates, bearing $4\frac{1}{2}$ per cent interest, had been sold, largely on account of its short maturity, not only without a preferential rate of discount but with a differential against rediscount. On March 15, 1920, in connection with the quarterly tax payment on that date and the large maturity of certificates, tax certificates were offered maturing in one year, on March 15, 1921, and bearing interest at $4\frac{3}{4}$ per cent. The subscription books remained open for almost two weeks after March 15, and the total amount subscribed was only \$201,370,500.

With this relatively light subscription and the increasingly heavy burdens resulting from payments to the railroads under the transportation act, it soon became evident that the most sanguine expectations of February 12 would not be realized, and that it was necessary, in order to meet the enlarged requirements of the Treasury and insure the absorption of the securities by investors, to diversify maturities, to introduce loan certificates in moderate amounts, and to offer certificates at rates of interest in line with the market rates for money. There followed a succession of loan-certificate offerings, the first on April 1, 1920, maturing July 1, 1920, bearing interest at $4\frac{3}{4}$ per cent, to which \$200,669,500 was subscribed. Then came two series dated April 15, 1920, one maturing July 15, 1920, and bearing interest at 5 per cent, for which \$83,903,000 was subscribed, and the other maturing October 15, 1920, and bearing $5\frac{1}{4}$ per cent interest, for which \$170,633,500 was subscribed. The April 15 offering was accompanied by the following statement from the Treasury, dated April 12, 1920:

Secretary Houston said that recent changes in the situation, which he had had the advantage of discussing with the Federal reserve bank governors meeting in Washington during the past week, had led him to the determination that it would be wise to meet the current requirements of the Government, enlarged as they are by expenditures in connection with the return of the railroads to private control, by the issue of Treasury certificates of relatively short maturities and bearing interest at higher rates. Accordingly he was announcing an issue of 5 per cent certificates of three months' maturity and $5\frac{1}{4}$ per cent certificates of six months' maturity.

Then followed an announcement of \$100,000,000, or more, of loan certificates, dated May 17, 1920, maturing November 15, 1920, bearing interest at $5\frac{1}{2}$ per cent, for which subscriptions of \$129,749,500 were received and only \$102,865,000 allotted. This was the first issue on

which partial allotments were made, only 20 per cent being allotted on oversubscriptions. By this time the discount rate on paper secured by Treasury certificates had been raised to $5\frac{1}{2}$ per cent in most of the Federal reserve banks.

The next issue was the usual quarterly operation in connection with the June 15 payment of income and profits taxes and the heavy Treasury certificate maturities from June 15 to July 15, 1920. Two series, both dated June 15, one maturing January 3, 1921, and bearing interest at $5\frac{3}{4}$ per cent, and the other a tax issue maturing in one year, on June 15, 1921, and bearing interest at 6 per cent, were announced. The general situation at this time and the terms of the offering are more fully described in the open letter of June 10, 1920, from the Secretary of the Treasury to the banking institutions of the country, which is as follows:

WASHINGTON, *June 10, 1920.*

DEAR SIR: Treasury certificates to the amount of nearly \$1,000,000,000 mature on or before July 15. The greater part of these are provided for by the income and profits tax installment payable in June. To refund the balance and provide for current requirements up to July 15, according to the best estimates now available, it seems desirable at this time to issue Treasury certificates to the amount of \$400,000,000, or thereabouts; and accordingly the Treasury is offering certificates in two series, both dated June 15, series A 1921, bearing interest at $5\frac{3}{4}$ per cent and maturing January 3, 1921, and series T J-1921, bearing interest at 6 per cent and maturing June 15, 1921, particulars concerning which will be furnished by the Federal reserve banks.

On the basis of Treasury daily statements and excluding transactions in the principal of the public debt, though the first quarter, ended September 30, 1919, of the present fiscal year ending June 30, 1920, was marked by a deficit of about \$770,000,000, in the second quarter, ended December 31, 1919, there was a surplus of over \$150,000,000; in the third quarter, ended March 31, 1920, there was a surplus of nearly \$400,000,000, and the fourth quarter, ending June 30 next, should also show a surplus. The completed fiscal year's operations should show little, if any, deficit—the Government having about balanced its budget, current receipts against current disbursements, for the first full fiscal year after fighting stopped.

The total gross debt of the United States, which, on June 30, 1919, on the basis of Treasury daily statements, amounted to nearly \$25,500,000,000, and on August 31, 1919, to nearly \$26,600,000,000, had been reduced on May 31, 1920, to less than \$25,000,000,000. The floating debt outstanding (loan and tax certificates), which on June 30, 1919, amounted to over \$3,250,000,000, and on August 31, 1919, to nearly \$4,000,000,000, had been reduced on May 31, 1920, to less than \$2,850,000,000. The reduced ordinary and public debt disbursements have made possible a very important reduction in the amount of the net balance in the general fund, which has been applied to the reduction of debt. Both gross debt and floating debt will be further greatly reduced by the operations outlined in the first paragraph of this letter.

During the coming fiscal year, beginning July 1, 1920, the Treasury expects, though it is impossible to speak positively, that there will be a further reduction of both gross debt and floating debt in the first two quarters, and, unless additional burdens should be imposed by future legislation, that there will be a very important reduction in the last two quarters.

The period of upward of 12 months since the flotation of the Victory Liberty loan has witnessed great expansion of commercial credits, but steady liquidation of United States Government war securities. The Federal reserve banks' combined loans and discounts secured by United States Government war securities have been reduced by more than \$400,000,000, though they have increased their other loans and investments by about \$1,200,000,000. All reporting member banks (about 800 member banks in leading cities which are believed to control about 40 per cent of the commercial bank deposits of the country) have reduced their holdings of and loans upon United States Government war securities by about \$2,000,000,000, but have increased their other loans and investments by about \$4,000,000,000.

The Treasury confidently asks the banking institutions of the country for their continued support and, in particular, to subscribe liberally for the certificates now offered and use their best efforts to obtain the widest possible distribution of them among investors.

Cordially yours,

D. F. HOUSTON.

To the PRESIDENT OF THE BANK OR TRUST COMPANY ADDRESSED.

These two offerings met with a quick response and were promptly absorbed by investors. The subscription books closed on June 16, the day after the date of issue. The total subscriptions aggregated \$419,121,000, of which \$176,604,000 were for the January 3 maturity and \$242,517,000 for the June 15 maturity, all which were allotted in full.

Up to October 31, 1920, four issues of certificates had been made in the fiscal year beginning July 1, 1920. The result was a further reduction in the total amount of outstanding loan and tax certificates, from \$2,485,552,500 on June 30, 1920, to \$2,337,203,500 on October 31, 1920. There has also been a decrease in the amount of loan certificates, as compared with tax certificates, from \$681,170,000 on June 30, 1920, to \$555,163,500 on October 31, 1920. On July 15, 1920, two issues were made, one maturing January 15, 1921, and the other, tax certificates, maturing March 15, 1921, both bearing interest at $5\frac{3}{4}$ per cent. The Treasury asked for \$200,000,000, or thereabouts. The books closed on July 20 with total subscriptions of \$201,061,500, of which \$126,783,500 were for the January 15 maturity and \$74,278,000 for the March 15 maturity. The general situation as it existed after this successful flotation is summarized in a statement of the Secretary dated July 26, 1920, which reads as follows:

My letter of June 10, 1920, to banks and trust companies, in connection with the offering of Treasury certificates of indebtedness dated June 15, called attention to the fact that Treasury certificates to the amount of nearly \$1,000,000,000 would mature on or before July 15, and stated, first, that the completed operations for the fiscal year ending June 30, 1920, should show little, if any, current deficit; and, second, that both gross debt and floating debt would be further greatly reduced by the operations incident to the handling of the Treasury certificate maturities from June 15 to July 15. The results show that the Treasury's expectations have been realized.

On the basis of daily Treasury statements, the total ordinary receipts for the fiscal year ended June 30, 1920, amounted to \$6,694,565,388.88 and current ordinary disbursements amounted to \$6,766,444,461.09, leaving a net current deficit (excess of current ordinary disbursements over ordinary receipts) of only \$71,879,072.21 for the fiscal year 1920, the first full fiscal year after hostilities ceased. After taking into account the special deposit of the War Finance Corporation, resulting from its redemption of United States securities (explained on page 2 of the daily Treasury statement for June 30, 1920), the net ordinary disbursements for the fiscal year 1920 were \$6,403,343,841.21, leaving an adjusted surplus (excess of ordinary receipts over net ordinary disbursements) of \$291,221,547.67 for the fiscal year.

The operations incident to the handling of the maturities of Treasury certificates from June 15 to July 15 have now been completed and have resulted in further reductions in both the gross debt and the floating debt of the United States. The gross debt on June 30, 1920, on the basis of daily Treasury statements, amounted to \$24,299,321,467.07, as against \$25,484,506,160.05 at the end of the previous fiscal year on June 30, 1919, and \$26,596,701,648.01 on August 31, 1919, when the gross debt was at its peak. In other words, the gross debt on June 30, 1920, had been reduced by \$2,297,380,180.94 from its peak on August 31, 1919, and by \$1,185,184,692.98 from the figure on June 30, 1919. On July 20, 1920, on the basis of daily Treasury statements, the gross debt amounted to \$24,264,309,321.54, showing a further reduction of about \$35,000,000 after taking into account the \$201,061,500 face amount of Treasury certificates issued under date of July 15. The floating debt (loan and tax certificates unmatured) on June 30, 1920, amounted to \$2,485,552,500 as against \$3,267,878,500 at the close of the previous fiscal year on June 30, 1919, and \$3,938,225,000 on August 31, 1919. On July 20, 1920, the loan and tax certificates outstanding amounted to \$2,453,946,500, showing a further reduction of about \$31,000,000 as the result of the redemption of loan certificates since the close of the fiscal year 1920 in the amount of some \$232,000,000 and the issue of loan and tax certificates dated July 15 in the amount of some \$201,000,000.

Further issues of Treasury certificates will be offered as necessary from time to time to provide for the current requirements of the Government and to meet maturities of Treasury certificates now outstanding. The amounts of these issues will depend in large measure upon the extent of the burdens imposed upon the Treasury by the transportation act, 1920, in connection with the return of the railroads to private control, including particularly the liability on the guaranty, which is as yet unascertainable. While, as the result of new issues of Treasury certificates in the intervals between the large income and profits tax installments, there may be temporary increases in both gross debt and floating debt, the Treasury expects, though it is impossible to speak positively, that both gross debt and floating debt will, during the first two quarters of the current fiscal year, be reduced below the figures outstanding on June 30, 1920, and that unless additional burdens should be imposed by legislation there will be an important further reduction in the last two quarters of the fiscal year.

Another offering of loan certificates in the amount of \$150,000,000, or thereabouts, was announced for August 16, 1920, maturing August 16, 1921, and bearing interest at 6 per cent per annum. This was quickly absorbed and subscriptions closed on the opening day with an excess of over \$50,000,000, the total being \$208,347,500. Allotments of only 20 per cent were made on oversubscriptions, making

the total allotted \$157,654,500. Then followed the usual quarterly operation incident to the September 15 payment of income and profits taxes and the maturity on September 15 of about \$640,000,000 of tax certificates. Two series of tax certificates dated September 15, 1920, one maturing March 15, 1921, with interest at $5\frac{3}{4}$ per cent per annum, and the other maturing on September 15, 1921, with interest at 6 per cent per annum, were offered. The general situation was described at length in the circular letter of September 7, 1920, from the Secretary of the Treasury to the banking institutions of the country, which is as follows:

WASHINGTON, September 7, 1920.

DEAR SIR: Treasury certificates of indebtedness to the amount of about \$640,000,000 mature on September 15, 1920, and about \$160,000,000 mature on October 15, 1920. The greater part of these \$800,000,000 maturing certificates will be covered by the installment of income and profits taxes payable on September 15. In order to provide for the balance of the certificates requiring to be refunded and meet the current requirements of the Government up to October 15, the Treasury has decided, on the basis of the best estimates available at this time, to offer Treasury certificates of indebtedness in the amount of \$400,000,000 or thereabouts, in two series, both dated September 15, 1920, one series designated T M 3-1921, bearing $5\frac{3}{4}$ per cent interest, maturing March 15, 1921, and the other series designated T S-1921, bearing 6 per cent interest, and maturing September 15, 1921. Applications for Treasury certificates of these series will be received through the several Federal reserve banks, from which full particulars concerning the offering may be obtained. Treasury certificates of the series maturing September 15, 1920, and October 15, 1920, will be accepted at par with an adjustment of accrued interest in payment for any certificates of the two series now offered which may be subscribed for and allotted.

On the basis of daily Treasury statements, during the first two months of the current fiscal year, beginning July 1, 1920, the ordinary receipts of the Government amounted to \$628,767,191.13, while the ordinary disbursements during the same period amounted to \$754,072,901.76, leaving a net current deficit (excess of ordinary disbursements over ordinary receipts) of \$125,305,710.63. This net current deficit for the first two months of the fiscal year is due chiefly to actual cash payments, in amount of some \$130,000,000, made necessary by the provisions of the transportation act, 1920, in connection with the return of the railroads to private control. According to the latest estimates, payments on account of the railroads will probably continue on a large scale during the balance of the present calendar year, and will be relatively heavy during the month of September. Notwithstanding the net current deficit during the first two months and these extraordinary payments on account of the railroads, it is expected that the first quarter of the fiscal year, ending September 30, 1920, will show a surplus.

The gross debt of the Government on August 31, 1920, on the basis of daily Treasury statements, amounted to \$24,324,672,123.79, as against \$24,299,321,467.07 at the close of the fiscal year ended June 30, 1920, an increase of only \$25,350,656.72. The floating debt (loan and tax certificates unmatured) on August 31, 1920, amounted to \$2,571,201,000, as against \$2,485,552,500 on June 30, 1920. As a result of the operations incident to the handling of the maturities of Treasury certificates on September 15 and October 15, and the payment of the income and profits tax installment on September 15, it is expected that the increases in both gross debt and floating debt which have occurred since

June 30 as the result chiefly of the heavy railroad payments will be more than overcome and that both gross debt and floating debt will be materially reduced by September 30 below the amounts outstanding on June 30, 1920. Further issues of Treasury certificates during the months of October and November may subsequently result in temporary increases in both gross debt and floating debt, but the Treasury confidently expects that by the completion of the second quarter of the fiscal year, on December 31, 1920, any such temporary increases will have been overcome, and that the gross debt and floating debt on December 31 will have been further reduced below the amounts outstanding on September 30.

The Treasury certificates of the two series now offered, dated September 15, are exempt from State and local taxes, except inheritance taxes, and from the normal Federal income tax and the corporation income tax, and are admissible assets for the purpose of calculating profits taxes. The certificates are acceptable in payment of Federal income and profits taxes payable at their respective maturities, and the United States reserves no option to call them for redemption before maturity. These features, together with the attractive interest rates and absolute safety of principal and interest, make the certificates extremely desirable investments. The Treasury believes, therefore, that banks generally should feel free to subscribe largely for the certificates with the confident expectation of prompt resale for investment. In this connection it is interesting to note that all reporting member banks (about \$18 member banks in leading cities, which are believed to control about 40 per cent of the commercial bank deposits of the country, and to have subscribed in the first instance for about 75 per cent of the Treasury certificates of indebtedness now outstanding) held on August 27, 1920, only about \$430,000,000 face amount of Treasury certificates, notwithstanding the fact that there were outstanding on that date some \$2,571,000,000 face amount of loan and tax certificates.

The Treasury again asks the banking institutions of the country for their continued support and, in particular, to subscribe liberally for the certificates now offered and use their best efforts to obtain the widest possible distribution of them among investors.

Cordially yours,

D. F. HOUSTON.

To the PRESIDENT OF THE BANK OR TRUST COMPANY ADDRESSED.

On the September 15 offering the Treasury asked for subscriptions of \$400,000,000, or thereabouts, and, notwithstanding the size of the issue and the heavy demands for funds for crop-moving purposes, it was promptly oversubscribed. The books closed on the opening day with a total of \$492,262,000. Three of the Federal reserve districts oversubscribed their quota and the Treasury allotted 70 per cent of their excess, leaving a total allotment of \$448,596,000, of which \$106,626,500 were of the March maturity and \$341,969,500 were of the September maturity. The success of these issues placed the Treasury in a position to meet the extraordinary demands during the month of September and early October in connection with loans and guaranty payments to the railroads under the provisions of the Transportation act, 1920. About \$250,000,000 was disbursed to the railroads during this period. It became necessary, therefore, to make a further issue on October 15, 1920. The October 15 offer-

ing took the form of five months $5\frac{3}{4}$ per cent tax certificates, dated October 15, 1920, maturing March 15, 1921, in the amount of \$100,000,000, or thereabouts. The announcement was accompanied by the following public statement, dated October 8, 1920, which summarized the Government's immediate requirements and the terms of the offering:

Treasury certificates of series G, 1920, to the amount of about \$125,000,000 mature on October 15, 1920, and on the same date semiannual interest will be payable on fourth Liberty loan bonds to the amount of about \$125,000,000. The Treasury is offering for subscription an issue of $5\frac{3}{4}$ per cent five months tax certificates dated October 15, 1920, maturing March 15, 1921, in the amount of \$100,000,000 or thereabouts. A further reduction in both gross debt and floating debt may, therefore, be expected in connection with the October 15 offering of Treasury certificates.

Subscriptions for the October 15 issue closed on that day with a surplus of \$85,076,500. Ten of the Federal reserve districts oversubscribed their quota. The total allotment was \$124,252,500.

Another offering in the amount of \$200,000,000, or thereabouts, was made in November in order to meet the current requirements of the Treasury, including particularly the maturity of nearly \$100,000,000 of loan certificates on November 15 and the interest payment on the second Liberty loan on the same date of some \$75,000,000. It took the form of six months $5\frac{3}{4}$ per cent loan certificates dated November 15, 1920, maturing May 16, 1921. Subscriptions closed promptly on November 15, and aggregated \$292,696,500, the total amount allotted being \$232,124,000. Seven of the Federal reserve districts oversubscribed their quota and 40 per cent allotments were made on oversubscriptions.

Tables showing in detail all the issues of certificates of indebtedness, from the beginning of the war to October 31, 1920, and a summary thereof are attached as Exhibits 1 and 2, pages 284 and 293. The official circulars for the various offerings of loan and tax certificates, together with offers to redeem before maturity at the option of the holders, issued since the Annual Report of the Secretary of the Treasury for 1919, are attached as Exhibits 3 to 20, pages 295 to 314.

The aggregate amount of certificates issued from the beginning of the war to October 31, 1920, was \$43,989,326,308.53. Of this total, \$19,839,279,500 represent loan certificates; \$9,148,235,000 were sold in anticipation of income and profits taxes; and \$15,001,811,808.53 comprised special issues. The amount of unmatured certificates of all classes outstanding on October 31, 1920, aggregated \$2,629,432,950, consisting, as shown by the following table, of \$1,782,040,000 tax certificates, \$555,163,500 loan certificates, \$259,375,000 Pittman Act certificates, and \$32,854,450 other special issues.

Statement of Treasury certificates outstanding October 31, 1920.

PROGRAM FOR RETIREMENT OF WAR DEBT.

The maturities of the Liberty loans and the privileges reserved to the Treasury to call the Liberty bonds and Victory notes for redemption prior to maturity give the Treasury adequate control over the war debt and make it practicable for the Government to follow an orderly program of debt retirement, provided adequate revenues from taxation are maintained and the Government exercises rigid economy in its expenditures. As has already been indicated,

there has been gratifying improvement in the public debt situation. On the basis of the daily Treasury statements, the gross debt of the United States on August 31, 1919, when it reached the peak, was, in round figures, \$26,596,000,000, of which about \$4,000,000,000 represented loan and tax certificates maturing within the year. On September 30, 1920, the gross debt was \$24,087,000,000, a reduction of over two and one-half billions of dollars, while the floating debt was \$2,347,000,000, or approximately \$1,600,000,000 less than on August 31, 1919. These reductions were effected chiefly by the application of the proceeds of taxation and salvage and were made possible to some extent by the reductions of Treasury balances resulting from the reduced scale of Government expenditures and the retirement of large amounts of outstanding loan certificates. The gross debt on October 31, 1920, amounted to about \$24,062,500,000, a further reduction of about \$25,000,000, while the floating debt was reduced to about \$2,337,000,000. While there may be increases in both gross debt and floating debt in the month of November as the result of current operations, the Treasury confidently expects that by the close of the current quarter on December 31, 1920, there will be substantial decreases in the public debt more than sufficient to overcome any such increases, and that both gross debt and floating debt on December 31, 1920, will be reduced below the amounts outstanding at the close of the quarter ending September 30, 1920.

The gross debt of \$24,087,000,000 on September 30, 1920, included \$15,293,000,000 of Liberty bonds maturing between 1928 and 1947, about 4½ billions of Victory notes maturing May 20, 1923, almost 800 millions of war-savings certificates maturing on January 1, 1923, and \$2,347,000,000 of loan and tax certificates maturing within a year. Within a period of about two and a half years, ending in May, 1923, there will thus become payable about 7½ billions of Government war obligations, of which approximately 4½ billions represent Victory notes. Earlier plans and expectations were disarranged by the unexpectedly large burdens placed upon the Treasury by the transportation act. According to the estimates, there will be paid on account of the railroads during the current fiscal year probably a billion dollars, of which over three hundred millions has already been called for and paid. Added to these expenditures are large payments to the railroads on account of the settlement of matters arising under Federal control. It is obvious that these payments limit the progress which the Government had expected to make in the retirement of the floating debt. It is expected, however, that perhaps the heaviest payments on account of the railroads will have been completed by the spring of next year, and then for the remaining months of the fiscal year the Treasury looks forward to a more rapid reduction of the floating debt. By

the end of the fiscal year, in the absence of unforeseen contingencies, the floating debt should be brought considerably below two billions, perhaps to as low as a billion and a half. The balance should be retired during the fiscal year 1922, except such an amount as it may be necessary to keep outstanding in order to avoid money strain in connection with the quarterly payments of income and profits taxes and to finance the Government's current requirements in the intervals between the heavy tax receipts. By the end of the fiscal year 1922, the Victory loan should also have been reduced by at least a half billion dollars as a result of sinking-fund operations.

The remainder of the Victory loan, perhaps $3\frac{1}{2}$ billions, will then have become substantially floating debt, as it will mature during the following fiscal year. Provision should be made, therefore, under proper Treasury regulations and, if necessary, by partial calls for redemption, for the acceptance of Victory notes during the fiscal year 1923, before maturity, in payment of income and profits taxes. In this way and through further sinking-fund operations, it should be possible to reduce the Victory loan so that at maturity it would stand at about three billions of dollars. In the meantime, on January 1, 1923, the unredeemed war-savings certificates of the series of 1918 will mature and must be provided for. The Treasury is committed to the continuance of the Government savings movement and expects to push the campaign for the sale of savings securities during the coming year, with the view particularly of assuring the continuity of the savings movement and making provision, so far as possible, for maturing savings securities out of new sales, to the extent that maturities are not covered by current receipts and other current financing.

These measures for the handling of the floating debt and the retirement of a substantial portion of the Victory loan before maturity are feasible and necessary. If carried out, they should make possible the refunding of such part of the Victory loan as may require to be refunded on terms advantageous to the Government. The program can be accomplished, however, only by strict economy in Government expenditure and by the maintenance of adequate revenues from taxation. Sound fiscal policy dictates that the receipts from taxes and salvage be kept sufficiently high not only to meet current bills, including interest and sinking-fund charges, but also to retire the present floating indebtedness and a considerable part of the Victory notes before the close of the fiscal year 1923.

The maturities and redemption dates of the war debt maturing after the Victory loan are so arranged that a substantially similar program is feasible and should be carried out with respect to the several issues of Liberty bonds. The third Liberty loan, for example,

will mature about five years after the maturity of the Victory loan, on September 15, 1928, and after the Victory loan has been provided for, sound fiscal policy would require that the sinking fund and surplus revenues then be applied to the bonds of the third Liberty loan, and thereafter to the remaining Liberty bonds in the order of their maturity. The cumulative sinking fund provided by the Victory Liberty loan act is calculated to retire the funded war debt, less the amount of foreign Government obligations held by the United States on July 1, 1920, in about 25 years. By the operation of the sinking fund and the application to the debt of surplus revenues and any repayments by foreign Governments of the principal of their obligations, it should be feasible to pay off the whole war debt within a measurable time. The war debt should be paid, not perpetuated, and the time to pay it is as soon as possible after the end of the war.

There are attached hereto as Exhibit 21, page 315, a copy of the public-debt statement of the United States as of June 30, 1920; as Exhibit 22, page 323, a preliminary statement of the public debt as of October 31, 1920, on the basis of the daily Treasury statements; and as Exhibit 23, page 324, a quarterly comparative public-debt statement on the basis of the daily Treasury statements.

TAXATION.

Fiscal and business conditions indicate the imperative need of a thorough revision of the tax law, in order that the more important changes may, without important retroactive application, be made effective with respect to income and profits for the calendar year 1921. The business interests of the country have a right to know in advance the rate of taxation they will be called upon to pay. The purchaser and consumer have an equally vital interest in the early determination of the tax burden, and unless the making of returns and the prompt payment of the tax are to be obstructed the Bureau of Internal Revenue must be given a considerable period of time before the first installment payment in which to interpret the new law, to study, prepare, and issue regulations, print the requisite forms, and create any new administrative machinery which may be necessary. For more than 18 months—since the opening of the special session of the Congress which began May 19, 1919—the President and his chief financial advisers have repeatedly urged revision of the internal-tax laws. There is pressing need for expedition in this matter by the Congress. Unless the principal amendments to the income and excess-profits tax law be adopted in the early months of 1921 they can not, without widespread confusion, be made to apply to income for the calendar year 1921.

Revision without reduction of revenues.

While it is highly desirable that the tax law should be revised at the earliest possible date, it is imperative, in my opinion, that the revenue from taxation be maintained after this fiscal year on a level of not less than four billions a year, to the end at least of the fiscal year 1923. The internal-revenue receipts may not greatly exceed \$4,000,000,000 even in the fiscal year 1921, on the basis of existing law. We now have a floating debt (tax and loan certificates maturing within 12 months) of approximately \$2,350,000,000. This short-time debt should not be funded, but should be retired, if possible, by the end of the fiscal year 1922. On January 1, 1923, war-savings certificates now amounting to about \$800,000,000 fall due, and on May 20, 1923, Victory notes now amounting to about \$4,250,000,000 mature. The retirement of the tax and loan certificates, the reduction of the volume of obligations maturing in 1923, to some extent by the operations of the sinking fund, and the successful refunding of the balance of those obligations constitute a colossal task to the accomplishment of which the whole financial policy of the Government must be shaped. With obligations of approximately \$7,500,000,000 maturing in the next two and a half years, it would be unwise, unless compelled by the severest form of industrial depression, to plan for aggregate tax receipts after this fiscal year and till at least the end of the fiscal year 1923, of less than four billions a year. But this, of course, does not mean that the public will have to pay as large a tax amount in the aggregate in that period as in the current or the preceding fiscal year.

Future relations between expenditures and receipts are beset with great uncertainty. The estimated receipts and expenditures for the fiscal years 1921 and 1922 are recited on pages 273 to 278 of this report. These estimates of expenditures were prepared by the several departments and independent establishments and not by the Treasury, except for the Treasury Department. If rigid economy is practiced and the estimates reduced wherever possible, there is some hope that by the close of the fiscal year 1922 the floating debt may be extinguished, provided, of course, that adequate revenues from taxation are maintained. There is no certain means, however, of predicting the course of business or of incomes and profits, and it is a certainty that tax receipts even under existing law will not keep up to the 1920 level. There are also frequent efforts by extraordinary measures, like the soldiers' bonus, to bring about a radical increase in expenditures. In these circumstances—as was suggested in my letter of May 18, 1920, to the chairman of the Committee on Ways and Means of the House of Representatives—the only question which should be considered is whether a due regard for the protection of the Treasury

does not impose upon the Congress a real duty to seek out additional sources of tax revenue for the next two years. The country at times is being encouraged to expect a "reduction of taxes." Revision of taxes should be effected. There can and should be a better distribution of the tax burden. Unwise taxes should be eliminated. But any scheme which would after this fiscal year yield for several years to come less than four billions of dollars would be incompatible with safety and sound finance. And the country should face the fact that present taxes even may not in the future be relied upon to yield the needed revenue. The letter of May 18, 1920, referred to, reads as follows:

WASHINGTON, May 18, 1920.

DEAR MR. FORDNEY: I received your letter of May 1, with the inclosed copies of bills H. R. 13798, introduced by Mr. Johnson, and H. R. 13799, introduced by Mr. Rainey, to provide for the payment of adjusted compensation to the veterans of the World War. Both bills impose an 80 per cent war-profits tax.

The most serious aspect of this compensation matter, as I pointed out when I had the honor of appearing before the committee, is the proposal greatly to add, especially at this time, to the present grievous burdens resting upon the people of the Nation and upon the Treasury. The method of financing the proposal raises grave problems, but is secondary. The very heavy burdens which will rest upon the Treasury by reason of laws already enacted, including particularly the recent railroad law, which it is estimated will entail an expenditure of approximately \$1,000,000,000, and also by reason of the delay in making provision to realize upon the Government's investments in railroads and ships, taken in connection with the existing credit situation, suggest the need of grave consideration of the question whether, quite aside from and in addition to any taxation which it might be necessary to impose in order to pay a bonus to the soldiers, it may not be necessary to provide for meeting the necessities of the Government in larger measure from taxation. The total indebtedness of the Government maturing within three years, represented by Treasury certificates, war-savings certificates and Victory notes, is in the neighborhood of \$8,000,000,000. It is no longer possible to finance the current needs of the Government in part by the issue of Treasury certificates except on onerous terms which reflect upon the value of the Government's long-time bonds and depreciate them in the market. Furthermore, it would appear to be bad economy and bad finance for the Government to borrow money on short-term certificates of indebtedness (maturing within three to six months) to be invested for a term of years in railroads and ships.

It is a matter of serious concern to have the Government appearing in the market every few weeks for loans. Certainly nothing ought to be done to add to existing credit expansion that can possibly be avoided. The result would be to increase prices and to make a difficult situation less satisfactory. In the circumstances obviously the Government ought to appear in the market for loans as infrequently as possible and for the lowest sums. Additional taxes are also undesirable, but they may be less undesirable than borrowing. They would at least have the effect in part of enforcing economies. The first thing to do, I am sure you will agree, is to keep Federal expenditures down to the minimum and it is obvious also that other governmental jurisdictions and private individuals should do likewise.

I beg to submit to your committee for its serious consideration the question whether, all things considered, it would not now be advisable to seek out addi-

tional sources of revenue to meet the current requirements of the Government, over and above any additional revenue which would be necessary if the soldier bonus plan is determined upon, in order to obviate the necessity of continuing in considerable measure to meet them by borrowing. Having these things in mind, I hesitate to express an opinion concerning the bills which you have submitted to me, taken by themselves. There are many grave objections, both to the proposed new war-profits tax and to the alternative measure, a sales tax, which I understand your committee is considering. If, in view of the urgent needs of the Government for money to meet its requirements, your committee concludes that it will be wise to raise a larger amount by taxation and desires any suggestions from the Treasury, I shall be glad to have the experts place themselves at its disposal. In the meantime I refrain from making any further comment on either proposal.

For the reasons indicated, and for other reasons, I think it would be highly unfortunate for any new obligations to be placed upon the Treasury through the enactment of the bonus proposal in any form, however financed.

Very truly yours,

D. F. HOUSTON.

Hon. JOSEPH W. FORDNEY,

Chairman Committee on Ways and Means,

House of Representatives.

This letter voices my deliberate conviction that "it would be highly unfortunate for any new obligations to be placed upon the Treasury through the enactment of the bonus proposal in any form, however financed." I repeat the statement with a renewed feeling of its soundness. In the form in which it passed the House of Representatives, the bill providing for the soldiers' bonus would involve new cash expenditures of not less than \$1,250,000,000, to be made during the period in which the Treasury will be most severely tried by the burden of meeting heavy maturing obligations. It would increase the present tax burden, delay the lightening of that burden, and dismay taxpayers with its promise or threat of future drafts of like character upon the public purse. It would, in short, dominate the entire program of tax legislation during the next two years or more. It seems plain that the bonus question must be definitely settled before the larger outlines of the tax program for the next year can be intelligently determined and that the bonus bill must be disposed of before the general revision of the tax law can proceed. The Treasury's views with respect to the bonus proposal are set forth more in detail elsewhere in this report on pages 102 and 103 under the heading "Soldiers' bonus."

From this letter it will be noted that, in the Treasury's opinion, there are many grave objections to a sales tax. Further consideration of the subject has convinced me that a general sales or turnover tax is altogether inexpedient. It would apply not only to the absolute necessities of life—the food and clothing of the very poor—but it would similarly raise the prices of the materials and equipment used in agriculture and manufactures. It would confer, in effect, a

substantial bounty upon large corporate combinations and place at corresponding disadvantage the smaller or disassociated industries which carry on separately the business operations that in many combinations and trusts are united under one ownership. The group of independent producers would pay several taxes, the combination only one tax. Finally, it would add a heavy administrative load to the Bureau of Internal Revenue which—burdened as it is with the responsibility of enforcing the child-labor tax law, the national prohibition act, the narcotic-drug law, the adulterated butter and mixed flour tax laws—is already near the limit of its capacity. Simplification of the tax law and restriction rather than extension of its scope are as important from the standpoint of successful administration as from that of the taxpayers' interests. Consumption taxes, if used at all, should be laid upon other than absolute necessities and restricted to a few articles of widespread use, so that the administration of the tax may be concentrated and made relatively simple.

As early as March of this year I pointed out in a letter to the chairman of the Committee on Ways and Means the necessity of a simplification of the tax system and the repeal of the excess-profits tax, a modification of the income supertaxes, and certain fundamental administrative changes such as the giving to the Treasury the power to make final settlement of tax claims and to issue regulations which should be effective from the date of their approval. The letter in question is as follows:

WASHINGTON, March 17, 1920.

HON. JOSEPH W. FORDNEY,

*Chairman Committee on Ways and Means,
House of Representatives.*

MY DEAR MR. FORDNEY: I am very glad to respond to your threefold request, communicated through Dr. Adams, for estimates of the loss in revenue which may be expected to result from the recent decision of the Supreme Court in the stock-dividend case, for recommendations concerning a new method of dealing with personal service corporations; and for definite suggestions looking to the fundamental simplification of the income and profits taxes, brief enough to receive, but thoroughgoing enough to deserve, careful consideration at a session of the Congress crowded with other questions of grave importance. To facilitate their presentation, I may discuss these subjects in the inverse order in which they have been mentioned above.

SIMPLIFICATION OF THE INCOME AND PROFITS TAXES.

In dealing with this subject I may go at once to what is, in many respects, its most vital aspect—the question of early action. Public opinion has not yet awakened to the gravity of the consequences which are likely to follow a failure to simplify the tax law at this legislative session. Unless the necessary amendments be passed now, they will be delayed in all probability, I understand, until the autumn or winter of the year 1921, with the result, unless they are to disrupt the administrative procedure and confuse the necessary calculations of the taxpayer by being made retroactive, that income and profits taxes must continue to be collected on the basis of the present law until the close of the

calendar year 1922, and, in the case of some taxpayers on the so-called fiscal year basis, until the early months of the calendar year 1923. I can not contemplate such delay without the gravest apprehension. An imperfect and uncertain tax affects the future even more adversely than the present, and for similar reasons it is costly and unwise to make a beneficent modification of the tax law retroactive or even to delay its adoption and announcement until the time at which it is to take effect.

It would be manifestly unsafe, in my opinion, to reduce now the income and profits taxes to be collected in the calendar years 1920 and 1921, but I can see nothing in the financial prospects for the calendar year 1922 and thereafter which would make impossible or unwise the very modest reduction involved in the plan of simplification hereinafter presented; and it should never be forgotten that the tax system itself is one of the most powerful causal factors affecting public expenditures. A tax system yielding, or likely to yield in the future, a surplus of revenue over expenditures is an open invitation to public extravagance, whereas an announced resolution to reduce taxes as the occasion which called them forth recedes into the past is one of the most potent means of insuring economy in public expenditures. The people, therefore, consumers as well as producers, indirect as well as direct taxpayers, may fairly ask to be told now the earliest future date at which the most obsolete features of the tax law are to be repealed.

Complexity in tax laws violates the most fundamental canon of taxation—that the liability shall be certain and definite. It is not merely a source of irritation, labor, and expense to the taxpayer; but when conjoined, as it is in the present law, with the heavy rates of taxation which war exigency has forced upon us, it becomes a major menace, threatening enterprise with heavy but indefinable future obligations, generating a cloud of old claims and potential back taxes which fill the taxpayer with dread, creating, to be sure, an attractive source of additional revenue, but clogging the administrative machinery and threatening, indeed, its possible breakdown.

FINAL DETERMINATION AND SETTLEMENT OF TAX CLAIMS AND ASSESSMENTS.

1. I recommend, therefore, as the most urgent and important of the measures of simplification which could advantageously be put into effect at once, an amendment authorizing the Commissioner of Internal Revenue, with the consent of the taxpayer and the approval of the Secretary of the Treasury (or under such other public safeguards as the Congress may prefer), to make a final determination and settlement of any tax claim or assessment, which shall not thereafter be reopened by the Government or modified or set aside by any officer, employee, or court of the United States, except upon a showing of fraud, malfeasance, or misrepresentation of fact materially affecting the determination thus made.

This recommendation is of major importance. At present the taxpayer never knows when he is through. Every time an old ruling is changed by court decision, opinion of the Attorney General, or reconsideration by the department, the department feels bound to apply the new ruling to past transactions. The necessity of constantly correcting old returns and settlements is as distressing to the department as it is obnoxious to the taxpayer. But an even more serious situation arises in connection with the assessment of back taxes. The tax return of a large corporation is likely to be crowded with debatable points which the corporation, in the first instance, usually decides in its own favor. The auditing of these returns has been necessarily delayed by the inability of the Bureau of Internal Revenue to engage and hold a sufficient force of experts

to audit promptly the more complex and difficult returns; but when the audit comes to be made it ordinarily brings to light a large amount of back taxes. A prompt determination and collection of such back taxes due would probably bring in additional revenue exceeding \$1,000,000,000. On the other hand, this situation must fill the taxpayers concerned with the gravest apprehension. If present taxes be continued and a period of industrial depression ensues during which the department finds the time and the men with which to clear up both current and back taxes within the same year the result may be highly disastrous to business.

The commissioner should be empowered and directed to dispose of these cases promptly and finally. This procedure would bring in much additional revenue, relieve business from grave uncertainty, keep out of the courts many debatable cases, and help to avert an administrative deadlock.

INTERPRETATIVE REGULATIONS OR TREASURY DECISIONS NOT TO BE RETROACTIVE.

2. As a desirable concomitant of the preceding suggestion and for reasons stated in explaining that suggestion, I recommend the adoption of an amendment providing in substance that in case a regulation or Treasury decision made by the commissioner or the Secretary, or by the commissioner with the approval of the Secretary, is reversed by the subsequent issue of a similar regulation or decision, and such reversal is not immediately caused by or based upon an opinion of the Attorney General or a decision of a court of competent jurisdiction, such new regulation or decision may be made effective from the date of approval.

FIVE-YEAR LIMITATION ON TIME FOR BRINGING SUIT FOR COLLECTION OF TAXES.

3. Section 250 of the revenue act of 1918 now provides, in subdivision (d), that no suit or proceeding for the collection of any tax shall be begun after the expiration of five years after the date when the return was due or was made, except in the case of false or fraudulent returns with intent to evade the tax. This subdivision has been held to apply only to taxes due under the revenue act of 1918. I recommend that this time limit be extended to all income and profits taxes due either under present or prior acts of Congress.

SIMPLIFICATION OF LIBERTY BOND EXEMPTION.

4. The exemptions from income surtaxes authorized by the several Liberty bond acts are highly complex and responsible for perhaps the most intricate schedule of the return which the individual taxpayer is required to fill out. My predecessor in office has recommended a consolidation of these exemptions which, while not breaking faith with the holders of Liberty bonds, would simplify their tax returns and operate to strengthen the market standing of such bonds without in any appreciable amount reducing the public revenue. I heartily indorse this recommendation, the detailed provisions of which may be found on pages 99 and 100 of the Annual Report of the Secretary of the Treasury for 1919.

COMPENSATION FOR PERSONAL SERVICE AND GAINS FROM SALES OR DEALINGS IN PROPERTY.

5. The heavy surtaxes cause real hardships when income earned over a period of years is realized or received in one year and taxed as a lump sum in that year. I recommend, therefore, that such extraordinary income, when it constitutes a material part of the gross income for that year, be deemed to have ac-

crued or been received ratably during the years in which the service was rendered or the property held, and the amount of the extraordinary income so assigned to any year be subjected to the surtax rates prescribed by law for that year.

EXCESS-PROFITS TAX.

6. Provision for the simplification and fundamental modification or repeal of the excess-profits tax at the earliest possible future date should, in my opinion, be made now. In explaining this conclusion it is unnecessary to enter into a discussion of controversial details. Two facts impress me as indisputable and conclusive: First, the application or calculation of the excess-profits tax is so complex that it has proved impossible to keep up to date the administrative work of audit and assessment. New returns are being made faster than old returns can be audited, resulting in an accumulation of claims and potential back taxes, the dangers of which have already been described. Second, the profits tax is confined to a small fraction (in number) of the business concerns of the country. Personal-service corporations, partnerships, sole proprietors, and most forms of trust organizations are exempt from the tax. If the principle be sound, it should be extended to all forms of business organization, a proposal which administrative considerations alone stamp as impracticable either in the present or any future period near enough to be worth consideration.

The general course or principle which simplification of this part of the tax law should follow is, I believe, reasonably clear. The outstanding feature of the present system of income taxation in its most important application to business income is the fact that we employ for this purpose two systems of taxation which are incommensurate and irreconcilable. Corporations pay the profits tax and normal income tax while their stockholders pay surtaxes on dividends or distributed profits, but nothing in respect of the undistributed corporate profits. On the other hand, sole proprietors and the members of partnerships pay full income tax, normal tax, and surtaxes upon the entire profits of their business whether distributed or not, but are exempt from the profits tax. The profits tax on corporations is evidently meant to be a rough equivalent for the surtaxes levied upon the reinvested or undistributed profits of other forms of business. But no true equivalence is reached. In 1918 the members of a well-known partnership paid nearly \$1,125,000 more taxes than they would have paid had their business been organized as a corporation. And the contrary is quite as frequently true.

There should be one system and not two systems of income taxation applicable to persons engaged in business. Substantial uniformity of treatment, or at least a nearer approach to uniformity of treatment, could be achieved in a variety of ways, the details of which it is not necessary to discuss here. I outline below one such plan which has many attractive features, the detailed provisions of which I shall be glad to supply upon request. The technical details, while important, are elastic and susceptible of modification. The essential thing is to simplify the excess-profits tax and grasp a uniquely opportune moment to remedy a deeply rooted defect in our system of income taxation by providing for the just taxation of the undistributed profits of corporations at a time when such taxation represents simplification and relief, not further complexity and heavier burdens. Equalization of the tax upon corporate and unincorporated business can be accomplished now with benefit to the corporations, the Government, and the general public. We should grasp an opportunity which may never return. The principal features of the plan referred to above are as follows:

(a) This plan is designed, first, to eliminate from the war-profits and excess-profits tax law (except as it is applied to profits derived from the so-called "war contracts") all reference to or use of "invested capital," and, second, to place the taxation of incorporated and unincorporated business concerns, so far as may be, on substantially the same basis.

(b) The first object is accomplished by substituting for the present graduated rates of 20 and 40 per cent, a flat tax on profits in excess of the distributed earnings. A rate of 20 per cent has been used as the basis of certain estimates quoted below, but the adoption of the proper rate is, of course, a matter which the committee will desire to settle for itself. It would be possible to adopt a declining rate, say, of 25 per cent for the fiscal year in which the suggested amendment is in operation, 20 per cent for the second year, and 15 per cent thereafter. It is only necessary that the rate should be fixed at one figure for a particular year.

(c) The second object could be accomplished (although the plan would be well worth while without this feature) by making it explicit in the law that corporations have the right to pay dividends in bonds or promises to pay bearing a fair rate of interest which are taxable to the stockholders as ordinary dividends, or by authorizing corporations to receive back from their stockholders as "paid-in surplus" cash or other dividends recently distributed. Under these or analogous procedures a corporation could retain its profits for use in the business and yet convert the profits tax into a genuine income tax. The excess-profits tax would thus become a flat tax on undistributed earnings; "invested capital" would practically disappear; and the corporation, if it desired, could place itself on substantially the same basis as the partnership, the personal-service corporation, and the sole proprietor. The principal object of this suggested amendment is to simplify the tax by removing the greatest source of inequality and complexity now found in the tax laws, i. e., the use of "invested capital."

(d) Revenue needs make it impracticable, in my opinion, to apply the preceding amendment to profits for the calendar year 1920, the taxes upon which will be payable in the calendar year 1921. But it should be put into effect as soon thereafter as the diminishing expenditures of the Government will permit. It is estimated that with a 20 per cent rate *and on the basis of present corporate net income* the suggested amendment would reduce the tax revenue by approximately \$430,000,000 a year. If, for instance, the amendment were adopted and made to apply to income received on and after January 1, 1921, the first reduction in the tax collections would occur in the last half of the fiscal year 1922, and would amount to \$215,000,000 for that fiscal year.

(e) However, present corporate conditions can hardly be maintained, and if corporate income declines and invested capital increases as rapidly as they have done in the past 12 months the proposed amendment would probably cause no reduction in the future revenue. New schemes are constantly being devised for the purpose of increasing invested capital. It is time to provide for a modification of the excess-profits tax, not only to relieve the taxpayer, but because of an approaching decline in its productivity.

REDUCTION OF SURTAXES ON INCOME SAVED AND REINVESTED.

7. In connection with the suggested tax on the undistributed profits of corporations, attention may appropriately be directed to a possible extension of its application which would go far to rectify one of the most dangerous defects of the present income tax. Because of possible doubt about the effects of such a change upon the revenue, and because the details of the proposal as they now

present themselves to my mind could not accurately be said to simplify the mere computation of the tax, I do not urge its adoption at this session of the Congress; but I have no hesitation in expressing my personal opinion that this or some similar amendment embodying the same idea could advantageously be adopted, to take effect at the earliest future date at which, in the opinion of the Congress, revenue needs and prospects permit.

While it is vitally important that saving and reinvestment effected through the medium of the corporation should not be dealt with more leniently than similar savings made by the partnership or individual, it is equally important that the methods of taxation employed should in all cases penalize saving and investment as little as possible. Our present surtaxes offend greatly in this respect. We attempt to levy surtaxes, rising to 65 per cent upon ordinary income, while there are thousands of millions of tax-free securities in the market, the income from which is practically exempt from all taxation. The result is to make investment by wealthier taxpayers in the expansion of industry or foreign trade unattractive and unprofitable. It is obvious that this situation should be remedied.

The remedy which most commends itself to my judgment at the present time is to reduce (e. g., by one-fourth) surtaxes attributable to that part of the net income which is saved and reinvested in business or property yielding taxable income and at the same time to limit the total amount of such reduced surtaxes to the same percentage (e. g., 20 per cent) of the reinvested income as the rate imposed upon the undistributed profits of corporations. The maximum tax upon such saved income would thus be approximately the same, whether reinvested by the individual, the partnership, or the corporation, and whether reinvested personally by the stockholders of a corporation or by such corporation for its stockholders. If at any later date the profits of a corporation which had paid the undistributed profits tax came to be distributed, a credit equal to the tax already paid by the corporation could, if it were thought wise, be easily granted to the stockholders.

The revenue lost by such an amendment could, if necessary, be made up by increasing the normal tax or that portion of the surtaxes attributable to income spent for purposes of consumption. But the time is fast approaching when the adoption of such an amendment would cause little real reduction of the revenue. We can not long continue to collect surtaxes rising to 65 per cent upon income from ordinary business and investment while exempt interest at a remunerative rate can easily be secured from tax-free bonds. We must take something less than 65 per cent or in the end take nothing. On the other hand, no reduction is urged in respect of income spent for unnecessary or ostentatious consumption. Income saved and reinvested in property or business yielding a taxable income should be taxed at a lower rate; income spent for consumption or invested in tax-exempt securities should pay at established rates both the normal tax and surtaxes. To the extent that it falls on savings the income tax should be reduced; to the extent that it is a tax on waste it should be maintained or even increased.

PERSONAL-SERVICE CORPORATIONS.

Under the revenue act of 1918 personal-service corporations are treated substantially as partnerships; i. e., the corporation as such is exempt from income, profits, and capital-stock taxes, but stockholders are subject to both normal income tax and surtaxes upon their full distributive shares in the net income of the corporation whether such income is actually distributed or not. The validity of this procedure is involved in the gravest doubt by the doctrine enunciated in the stock-dividend case, which apparently leads to the conclusion that

a stockholder of a corporation, particularly a minority stockholder, can not be taxed (without apportionment according to population) upon a share of the corporation's income which he has not actually received. It is possible, notwithstanding the above reasoning, that the present statutory method of dealing with personal-service corporations might be sustained on the ground that it represents in general, in its effects upon personal-service corporations and their stockholders as a class, a relief provision imposed in lieu of the excess-profits tax which is unsuited to personal-service corporations and if applied to them generally would in many cases work intolerable hardships. But this interesting question need not be discussed here. There is a grave possibility, if not probability, that the stock-dividend decision practically exempts from all income and profits taxation a group of approximately 2,500 corporations and their stockholders, who would pay under existing law—and should in fairness pay at least—from five to six million dollars. This possibility with its consequent uncertainties should plainly be removed by the passage of amendatory legislation.

Fortunately it is possible to place personal-service corporations and their stockholders in nearly the same position that they now occupy—in a manner wholly consistent with the spirit and letter of the ruling of the Supreme Court—by applying to such corporation and after January 1, 1918, the tax on undistributed profits recommended above for all corporations on and after January 1, 1921. This tax would, of course, be in lieu of the war-profits and excess-profits tax which, because of its dependence upon "invested capital," can not intelligently be applied to personal-service corporations in which, by definition, "capital (whether invested or borrowed) is not a material income-producing factor." It is plain also that the law should be so amended as to tax dividends received by the stockholders of personal-service corporations in the same manner as other dividends are taxed.

It would be desirable, moreover, in my opinion, to permit personal-service corporations at their option to distribute during the year 1920 cash or other taxable dividends to the full extent of their profits earned during 1918 and 1919, but not yet distributed; and such retroactive distributions should be made taxable by the stockholders at the surtax rates applicable to the years in which the profits were accumulated by the corporation. By so doing personal-service corporations could, if they desired, place themselves and their stockholders in nearly the same position that they now occupy, i. e., they would pay no profits tax at all, while the entire corporate income (having been distributed) would be taxable in the hands of the stockholders. Indeed, so closely would the proposed plan resemble in effect the method of taxing personal-service corporations prescribed in the revenue act of 1918 that it would be eminently proper—and probably a source of great convenience to the taxpayers concerned—to authorize personal-service corporations with the written consent of their stockholders to elect voluntarily to pay taxes for the years 1918 and 1919 on the basis prescribed in the revenue act of 1918.

ESTIMATES OF PROBABLE LOSS IN REVENUE RESULTING FROM THE DECISION IN EISNER V. MACOMBER.

The loss resulting from this decision falls into two principal classes, that chargeable to the possible exemption of public-service corporations and their stockholders, and that chargeable to the complete exemption of stock dividends.

There are about 2,500 personal-service corporations having net income of approximately \$30,000,000 involved, the taxes upon which, under existing law, do not exceed \$6,000,000 for the year 1918, and a slightly smaller amount for the year 1919. The aggregate loss for the two years, 1918 and 1919, would

probably be between \$10,000,000 and \$12,000,000. The need for legislation in this connection arises not so much from the possible loss of revenue as from the obvious undesirability of permitting 2,500 corporations and their stockholders to escape both the taxes upon corporations and those imposed upon individuals.

The loss resulting from the exemption of stock dividends is very difficult to estimate, owing to the fact that such dividends have not in the past been separately shown on the returns, while the losses from the exemption of stock dividends as such will be partially or wholly offset by the heavier taxes resulting from the decision upon any gains realized from subsequent sale of the stock, and by other offsetting factors which need not be mentioned in detail. After consideration of these factors the Actuary of the Treasury Department estimates that the net loss or refund of taxes already paid—i. e., taxes for the period ending with the year 1918 will be in the neighborhood of \$35,000,000—and that taxes for the year 1919 (payable in the calendar year of 1920) will be reduced by approximately \$70,000,000 on this account. These figures may be regarded as maxima, and most of the experts of the department are of the opinion that the entire net loss resulting from the exemption of stock dividends will amount to less than \$25,000,000.

The suggestions made above do not comprehend all the changes in the present law which, in my opinion, could be advantageously adopted at the present session of Congress. I have confined my suggestions to an irreducible minimum of measures, looking largely to the simplification of the income and profits taxes, for the consideration of which there still remains time and action upon which at this session of Congress may reasonably be asked by the taxpaying public. I shall be glad, upon request, to submit drafts of amendments embodying the suggestions here presented, and to place at your disposal for the work of tax revision all of the personnel and facilities of the Treasury Department.

Respectfully,

D. F. HOUSTON, *Secretary.*

Income surtaxes.

Since the adoption of the heavy war surtaxes in the revenue act of 1917, the Treasury has repeatedly called attention to the fact that these surtaxes are excessive; that they have passed the point of maximum productivity and are rapidly driving the wealthier taxpayers to transfer their investments into the thousands of millions of tax-free securities which compete so disastrously with the industrial and railroad securities upon the ready purchase of which the development of industry and the expansion of foreign trade intimately depend.

It seems idle to speculate in the abstract as to whether or not a progressive income-tax schedule rising to rates in excess of 70 per cent is justifiable. We are confronted with a condition, not a theory. The fact is that such rates can not be successfully collected. Tax returns and statistics are demonstrating what it should require no statistical evidence to prove. For the year 1916 net income amounting to \$992,972,985 was included in the returns of taxpayers having net income over \$300,000 a year. This aggregate fell to \$731,372,153

for the year 1917 and to \$392,247,329 for the year 1918. There is little reason to believe that the actual income of the richer taxpayers of the country had fallen in that interval. It is the taxable income which has been reduced and almost certainly through investment by the richer taxpayers in tax-exempt properties. Whatever one may believe, therefore, about the abstract propriety of projecting income-tax rates to a point above 70 per cent, when the taxpayers affected are subject also to State and local taxation, the fact remains that to retain such rates in the tax law is to cling to a shadow while relinquishing the substance. The effective way to tax the rich is to adopt rates that do not force investment in tax-exempt securities.

The simplest remedy for this situation would be a general reduction of the higher surtaxes, accompanied by increases in the lower surtax rates. It is suggested that the Congress consider such a general revision, with a reduction to a maximum rate lower than that contained in the present law, provided acceptable new taxes of equal yield can be found. But if for the immediate future it is found impracticable to reduce the higher surtaxes to a level which would induce or make it profitable for wealthier taxpayers to select taxable rather than tax-exempt investments, an effective remedy might be found in limiting the surtax rates possibly to about 20 per cent on that part of the taxpayer's income which is saved and reinvested in property or business yielding taxable income (hereinafter referred to as "saved" income), leaving higher rates—perhaps the present rates—upon income which is spent or wasted or invested in tax-free securities.

By adopting this partial abatement, the yield of the surtaxes would not be as greatly reduced as if the general level of the surtaxes were lowered, a premium would be placed upon saving and a penalty upon spending, and a legitimate check would be imposed upon investment in nontaxables. This policy could be applied in a number of different ways, which the proper committees of the Congress may desire to consider in detail. Thus, a reduction on all saved income could be given by including it in the taxable income at 80 per cent of the full amount; or the proportionate amount of surtax attributable to that part of the income which is saved could, for example, be reduced one-fifth, with a provision that such surtax should never exceed 20 per cent of the saved income. But the simplest plan would be to treat saved income as "at the top" of the taxable income, or, in other words, as subject to the highest surtax rates, and then limit the tax on saved income to 20 per cent or whatever other rate was selected as the proper limit. The last plan would work as follows in the case of a head of a family with no dependents having an income of \$300,000, of which \$100,000 is "saved" and \$200,000 spent. Under the present law he would pay \$23,680 normal tax and \$137,510 surtax,

or \$161,190 in all. With the limited tax on saved income in the third form suggested above, the surtax on \$200,000 of spent income would be \$77,510; the 20 per cent surtax on \$100,000 of saved income would be \$20,000; and the total tax would be \$121,190, a reduction of \$40,000 from the present tax. It is important to note not only that the limited rate of 20 per cent would make a "taxable" investment at $7\frac{1}{2}$ per cent approximately as attractive, so far as Federal taxation is concerned, as a tax-free investment at 6 per cent, but the taxpayer would have the tax abatement of \$40,000 to use or invest as additional capital, a consideration which would throw the balance in favor of investment in industrial or other taxable fields. The maximum loss of revenue which would result from the limitation of surtaxes on saved income to 20 per cent is estimated at \$230,000,000. This could be made up by increasing the lower surtaxes, or, if it is thought wise, the normal tax, or by adopting some of the new taxes later indicated.

In any revision of the surtaxes, attention should be given to the serious direct loss involved in our present treatment of income derived from tax-free securities. The Annual Report of the Secretary of the Treasury for the year 1919 called attention to the apparent injustice and unwisdom of the bounty or privilege now accorded to this class of income. I heartily indorse the remedial recommendations alluded to in the following excerpt from that report:

In that connection I call attention to the urgent necessity of revision of the revenue law so as to require that, for the purpose of ascertaining the amount of surtax payable by a taxpayer, his income from State and municipal bonds shall be reported and included in his total income, and the portion of his income which is subject to taxation taxed at the rates specified in the act in respect to a total income of such amount. The Treasury's recommendations in this respect have been transmitted to the appropriate committees of Congress in connection with the revenue act of 1918, and again in the present calendar year. Under the present law a person having an income of, say, \$1,000,000 from taxable securities would, upon the sale of half his property and the investment of the proceeds of that half in State or municipal bonds, not only obtain exemption for the income derived from such investment in State and municipal bonds, but greatly reduce the surtaxes payable in respect to his other income. It is intolerable that taxpayers should be allowed, by purchase of exempt securities, not only to obtain exemption with respect to the income derived therefrom, but to reduce the supertaxes upon their other income, and to have the supertaxes upon their other income determined upon the assumption, contrary to fact, that they are not in possession of income derived from State and municipal bonds.

Excess-profits tax.

The reasons for the repeal of the excess-profits tax should be convincing even to those who on grounds of theory or general political philosophy are in favor of taxes of this nature. The tax does not attain in practice the theoretical end at which it aims. It discriminates against conservatively financed corporations and in

favor of those whose capitalization is exaggerated; indeed, many overcapitalized corporations escape with unduly small contributions. It is exceedingly complex in its application and difficult of administration, despite the fact that it is limited to one class of business concerns—corporations. Moreover, it is rapidly losing its productivity. The invested capital of the average corporation, earning profits high enough to subject it to the excess-profit tax, is now estimated to be increasing at the approximate rate of 12 per cent a year, while the income of the average corporation is almost certainly declining at as great a rate. Both movements cut into the productivity of the tax. If the present changes in capital and income continue for some time in the future, as now seems probable, large reduction may be expected in the yield of the excess-profits tax. For the present fiscal year, the profits tax, with collections of back taxes, is estimated to yield about \$1,250,000,000, and for the fiscal year 1922 about \$800,000,000, as against an estimated yield for the fiscal year 1920 of slightly over \$2,000,000,000.

The excess-profits tax, however, must be replaced, not merely repealed, and I believe that it should be replaced in large part by some form of corporation profits tax. This conclusion is based not only upon the Government's need for revenue but upon grounds of equality and justice. So long as taxpayers other than corporations are subject to a progressive income tax rising now to over 70 per cent, corporation profits should not be allowed to escape with a single tax of only 10 per cent. Individuals (and partnerships in effect) pay normal taxes and surtaxes upon all net income, whether spent, saved, or retained in the business of the taxpayer. Corporations pay only normal tax on such income, although their stockholders pay in addition surtaxes on the profits of the corporation which are distributed as dividends. But no surtaxes are paid on or with respect to the profits not distributed. It seems plain, therefore, that when the excess-profits tax is repealed some equivalent or compensatory tax should be placed upon the corporation in lieu of the surtax upon reinvested income paid by other taxpayers. Unless this be done, a heavy premium would be given to the corporate form of business. If, for example, three equal partners in a business invest capital of \$2,000,000 and make net profits of \$600,000, draw out \$75,000 as salary and \$75,000 as profits, leaving \$450,000 in the business, these partners would together pay income taxes of approximately \$279,570. But if they should incorporate the business, the total income and capital-stock taxes on the corporation and its three stockholders would, in case the excess-profits tax were repealed, be only \$75,865.

One partial substitute for the excess-profits tax would be a tax on the undistributed profits of corporations as nearly as possible equal to the surtax imposed upon the saved income of the individual. If

individuals doing business in partnership pay 20 per cent on undistributed profits, individuals doing business through the medium of the corporation should pay 20 per cent. This plan could be applied in many different ways: (1) The distributed profits of the corporation could be substituted for the so-called excess-profits credit of the excess-profits tax and the remaining or taxable profits be taxed at 20 per cent; or (2) a 20 per cent tax on undistributed profits could be applied as a corporation surtax under Title II of the revenue act; or (3) corporations could in form be subjected to the same progressive surtaxes as individuals—a proposal which would prove very advantageous to all corporations with small incomes—with a proviso that the total surtax should never exceed an amount equal to 20 per cent of the undistributed profits. None of these plans presents any grave administrative difficulty or involves any particular complexity of operation.

If an undistributed profits tax be adopted, it should contain provisions expressly recognizing the various devices by which many corporations find it possible to distribute statutory "dividends," while actually retaining the profits in the business. The object should be to subject stockholders of corporations to the same tax burdens imposed upon the members of a partnership, and any procedure which facilitates the attainment of this object should be welcomed. The stockholders of any corporation should be permitted, for example, by a unanimous vote to elect to be taxed as the members of a partnership or as the stockholders of a personal-service corporation are now taxed under existing law. It would be advisable seriously to consider the propriety of requiring every corporation, 95 per cent or more of the stock of which is held by one individual, to be treated as a partnership or personal-service corporation. This would go far toward solving the problem whose solution is now vainly sought in section 220 of the revenue act of 1918.

The object of these suggestions is to establish so far as possible an exact equivalence between the taxation of corporation stockholders and other taxpayers. The undistributed-profits tax appears to be one practical means of obtaining approximate equality of treatment. This is not only to satisfy a theoretical sense of justice. It is, I believe, the course of practical wisdom. At some points the revenue law as now formulated discriminates unjustifiably against the individual in favor of the corporation. At others it discriminates unduly against corporations in favor of the individual.

These discriminations operate to force many business enterprises into forms of organization not intrinsically the best suited to their needs. Furthermore, the most troublesome problem of income taxation is the same in case of both corporations and unincorporated taxpayers, i. e., the repressive effects of heavy rates when applied

to income which is saved and reinvested. That and many other problems of personal and corporation income taxation will best be decided when linked together. We are now taxing reinvested income of individuals at rates which may exceed 70 per cent. The error of this treatment appears plainly when we attempt to apply such rates in the case of corporations. It would be unthinkable to tax the saved income of corporations at 70 per cent. On the other hand the stockholders of corporations are forced to pay through the corporation a higher normal tax than individuals. They receive no credit against this normal tax for the personal exemptions, and—under existing law—profits which have paid both the corporation income tax and the heavy excess-profits tax are again subjected, when distributed as dividends to stockholders, to surtaxes rising in some cases to 65 per cent. In the latter instances the discrimination is against the corporation and its stockholders. Like treatment should prove in the long run the surest means of obtaining just and wholesome treatment. Separate treatment will in the long run conduce to corporation baiting. If corporations insist upon different treatment, they are in the long run likely to receive worse treatment. The next revision of the tax law should place the income tax upon an enduring foundation of sound principle. Lasting solutions and not temporary makeshifts should be sought.

The tax on undistributed profits has certain obvious disadvantages, as, in fact, have all tax proposals. It is widely opposed because it would, in form, fall on reinvested profits, although the personal-income tax falls also on reinvested profits. It is believed also by many honest and able men that, notwithstanding the fact that it would reduce the tax burden upon corporations, it would tend to cause an undue dissemination of corporation profits and subject directors of corporations to a strong temptation to pay out as dividends profits actually needed in extending or maintaining the business itself.

If, in the opinion of the Congress, these or other difficulties make the undistributed-profits tax unavailable, the excess-profits tax might be replaced, in part at least, by a compensatory corporation tax, or "corporation surtax," at a flat rate. Such a tax, at any practicable rate, can not be made the equivalent of the individual or personal surtaxes on reinvested income. It would leave the corporation tax less burdensome than the personal tax on some business concerns and more burdensome than the personal tax on others. The undistributed-profits plan would tax income saved by corporations at the maximum rate paid by individuals on saved income, while leaving the corporation an option to distribute the profits—either constructively or actually—and thus subject such profits to taxation in the hands of the stockholders. But the "corporation surtax" has the great merit of

simplicity, and such a tax has recently been adopted in the United Kingdom for precisely the purposes here set forth; that is, to secure from corporations some contribution in lieu of the surtax collected from individuals on reinvested income. The discussion of this tax by the chancellor of the exchequer in his financial statement of April 19, 1920, is enlightening, and it is quoted in part below. The italics are mine:

CORPORATION-PROFITS TAX.

I propose therefore to introduce this year a new tax which, for the time being, will be levied concurrently with the excess-profits duty, but which, either in the form in which I propose it or in an amended form, may in the future prove a substitute for it. The character of the new tax, *a permanent tax*, has been the subject of most anxious consideration by the Government and myself and, as I have previously mentioned, I think, in the House last year, I sent out a mission to Canada and the United States to investigate and to study the schemes of profits taxation in force in those countries, and to see whether we could derive any lessons of use to us from their practice and experience. The results of the inquiry and of independent investigation in this country have not served to remove the difficulties which presented themselves to our first consideration of the proposal for a taxation of profits in excess of a certain return upon invested capital, and have not enabled us to see our way to adjust such a tax to existing business conditions and customs in this country. We, therefore, abandoned the idea of creating a tax on profits in excess of a fixed standard and we propose to have recourse to a different measure. I may describe our proposal as a corporation tax levied at the rate of 1 shilling in the pound on the profits and income of concerns with limited liability, engaged in trade or similar transactions. This tax will run concurrently with excess-profits duty until that duty is repealed. Where a concern is liable to both taxes, any excess-profits duty payable will be treated as a working expense in arriving at the profits for the purpose of the new tax. Both excess-profits duty and corporation tax will be deducted before the assessment of profits for income tax, and to prevent the new tax constituting too severe a burden on the ordinary shareholder of existing concerns in which there are large issues of debenture and preference shares, where a considerable proportion of the profit has to be allocated to the payment of interest and fixed dividends thereon, we propose that in no case shall the duty exceed 2 shillings to the pound on the profits which remain after the payment of such interest and dividends on existing issues of debentures and preference shares. *I would remind the committee that under the provisions of the excess-profits duty prosperous concerns with a large prewar profit standard may escape liability for the tax because their present profits, though high, are not in excess of their standard, and, at any rate, they pay a tax on what all of us think an unduly low scale. Incidentally, the new tax will do something to correct this anomaly. But I justify it on much broader grounds. Companies incorporated with a limited liability enjoy privileges and conveniences by virtue of the law for which they may well be asked to pay some acknowledgment. But, more than that, partners in a private partnership pay supertax not merely on the profits which they divide, but also on the undivided profits which they place to reserve. No such charge falls upon the undivided profits of limited liability companies. The corporation tax is justified by this distinction of the existing law in favor of such corporations, and it may be regarded as a composition in lieu of the liability to supertax.*

A flat corporation surtax of adequate rate could probably be substituted for the excess-profits tax without serious loss in revenue. Whether any loss would result by the substitution of an undistributed-profits tax is problematical. The shrinkage in the tax collected from corporations as the result of distributed profits would be partially counterbalanced by an increase in the taxation of the stockholders of the corporations involved. Furthermore, the yield of the excess-profits tax is declining and may decline rapidly in the near future. Two hundred million dollars is probably a maximum allowance for the loss of revenue that would result in 1922 if the excess-profits tax were replaced (as of January 1, 1921) by an undistributed-profits tax of 20 per cent. New taxes capable of yielding approximately this amount should be selected from the additional taxes suggested below or from other sources in case the undistributed-profits tax is adopted.

Excise and luxury taxes.

In the case of individuals who pay income tax, particularly surtax, the income tax operates as a general and perhaps the best form of luxury taxation. But there is luxurious or wasteful consumption among those persons who do not ordinarily pay income tax, and to reach this class of surplus income of taxable capacity excise or sales taxes—here briefly referred to as “consumption taxes”—must be employed.

It is not necessary, however, to tax every luxury. Consumption is elastic. If the tax is laid upon tobacco and the particular consumer prefers tobacco to candy he will reduce his consumption of candy in order to secure his accustomed supply of tobacco. It is desirable to avoid absolute necessities of life, however, because some individuals have little or no waste income to be tapped either directly or indirectly. But if the absolute necessities are avoided, the selection of other articles of taxation should be controlled by practical considerations of simplicity and convenience. In appearance consumption taxes do not conform to the theory of “ability to pay.” But when used as supplementary to a highly progressive income tax they do not necessarily—if moderate in amount and properly selected—violate this principle. The system of taxation may conform to this principle, though each tax may not. The continued use of consumption taxes in the budgets of the most advanced countries seems to prove that they have a legitimate though restricted place.

Consumption taxes must be largely justified, if at all, by the practical virtues of certainty, convenience, productivity, and efficient collection. Some of the excise or consumption taxes at present imposed by the revenue act of 1918 do not meet these tests. On this account I recommend the repeal of the taxes upon fountain drinks, ice cream, and other “similar articles of food and drink” imposed by section

630; the excess price or so-called "luxury" taxes imposed by section 904; and the taxes imposed upon medicinal articles by section 907 of the revenue act of 1918. These taxes are not highly productive (yielding in the aggregate less than \$50,000,000 in the fiscal year 1920); they are ill defined and uncertain; they are vexatious and expensive to the dealers who pay them; and I am informed by those in charge of their administration that they are widely evaded and that such evasion can not be stopped without the employment of a larger number of agents and measures more drastic than the potential importance of these taxes would justify. To this last statement there is one possible exception: The taxes imposed by section 907 apply not only to patent or proprietary medicinal preparations but to perfumes, toilet waters, cosmetics, and a long list of allied luxuries. The most striking defects of the present tax affecting these articles would be remedied by collecting the tax not on the individual sale but from the manufacturer, producer, or importer; and if the tax seems important enough to retain, it should be changed from the present basis to that suggested. It may be added that Canada has just changed the method of collecting stamp duties on patent and proprietary medicines and perfumery by having the stamps affixed by the manufacturer or importer and not by the retailer.

Additional sources of revenue.

The loss of revenue which would result from the adoption of the preceding recommendations, together with the loss to result even under existing law from the shrinkage of business, would have to be made up from new sources. For the convenience of the committees of the Congress which will be directly responsible for tax revision, I set out below a number of new or additional taxes capable of yielding in the aggregate as much as \$2,000,000,000 a year. These estimates are based upon conditions in the midsummer of 1920, and changes in the future may affect the revenue yield of the taxes mentioned.

Source.	Tax rate.	Estimated additional yield for a 12-month period.
Normal income tax.....	Increase the 4 and 8 per cent rates to 6 and 12 per cent.	¹ \$150,940,000
Readjusted surtax rates.....	(²).....	² 230,000,000
Corporation income tax.....	Additional 6 per cent.....	³ 465,000,000
Do.....	Abolish \$2,000 exemption.....	58,000,000

¹ It is estimated that an increase of the 4 and 8 per cent normal income-tax rates to 5 and 10 per cent, respectively, would yield during a 12-month period additional revenue amounting to \$75,470,000. It is also estimated that if only the 8 per cent normal income-tax rate is increased to 12 per cent, the additional revenue to be derived therefrom during a 12-month period would amount to \$103,000,000.

² The surtax rates, shown on page 45, it is estimated, would yield the same amount, \$990,000,000, as the present surtax rates. Inasmuch as the loss of revenue resulting from the abatement of surtaxes on saved or reinvested income has been estimated at \$230,000,000, only this amount has been included in the table of suggestions.

³ It is estimated that an increase in the corporation income tax from 10 to 12 per cent would yield during a 12-month period an additional revenue of \$118,800,000.

Source.	Tax rate.	Estimated additional yield for a 12-month period.
Corporation undistributed profits tax: Increase in corporation income tax, estimated at \$190,000,000.	20 per cent	\$690,000,000
Additional revenue from the application of the surtax rates to dividends distributed by corporations to avoid the 20 per cent undistributed profits tax, estimated at \$500,000,000.	Individual surtax rate	
Stamp taxes, Title XI, act of 1918	Double rates in subdivision 10 and quadruple rates in subdivisions 1-9 11, and 12.	1 134,000,000
Federal license tax on use of automobiles	50 cents per horsepower	100,000,000
Cigars	25 cents per 1,000 additional	5,000,000
Cigarettes, weighing not more than 3 pounds per 1,000.	\$2 per 1,000 additional	70,000,000
Tobacco and snuff	6 cents per pound additional	8,000,000
Gasoline	2 cents per gallon	90,000,000
Admissions to theaters	10 per cent additional	70,000,000
Increase rates on following articles specified in section 900 of the revenue act of 1918: Automobiles (other than automobile trucks and wagons) and motor cycles, including automobiles and motor-cycle tires, inner tubes, parts, and accessories (subdivisions 2 and 3).	5 per cent additional	100,000,000
Musical instruments (subdivision 4)do.....	13,000,000
Chewing gum (subdivision 6)	7 per cent additional	2,000,000
Candy (subdivision 9)	5 per cent additional	20,000,000
Toilet soap and toilet-soap powders (subdivision 21)	7 per cent additional	4,000,000
Jewelry and articles of precious metal (sec. 905, revenue act of 1918).	5 per cent additional	25,000,000
Motion-picture films (sec. 906, revenue act of 1918).do.....	4,000,000
Perfumes, cosmetics, and medicinal articles, a tax upon the sale by the manufacturer, producer, or importer in lieu of the tax imposed under section 907, revenue act of 1918, of.	10 per cent	16,000,000

¹ If the stamp taxes imposed by Title XI of the revenue act of 1918 were doubled the additional yield for a 12-month period would, it is estimated, be \$90,000,000.

The following surtax rates, limited to 20 per cent on saved or reinvested income, would yield, it is estimated, as much as the present surtax rates:

Incomes	Surtax rates.		Incomes.	Surtax rates.	
	Saved income.	Remainder of income.		Saved income.	Remainder of income.
	<i>Per cent.</i>	<i>Per cent.</i>		<i>Per cent.</i>	<i>Per cent.</i>
\$5,000-\$6,000	2	2	\$30,000-\$40,000	20	25
\$6,000-\$8,000	5	5	\$40,000-\$50,000	20	30
\$8,000-\$10,000	10	10	\$50,000-\$75,000	20	35
\$10,000-\$15,000	12	12	\$75,000-\$100,000	20	40
\$15,000-\$20,000	15	15	Over \$100,000	20	50
\$20,000-\$30,000	20	20			

These possible sources of revenue are mentioned for the information of the Congress. While I shall not attempt to discuss them in detail, attention should be called to the new or additional consumption taxes included. Reasons have been given above for the belief that no valid objection exists against the employment of a moderate number of consumption taxes properly selected; but it would, in my opinion, be neither wise nor expedient to increase radically the

volume of consumption taxation. During the last fiscal year the taxes on transportation and insurance, beverages, tobacco products, admissions, and dues, together with the excise or sales taxes imposed by Title IX of the revenue act—taxes which may be roughly grouped as consumption taxes—yielded \$1,150,386,743, or 21 per cent of the total internal taxes. If necessary this amount could be moderately increased to perhaps 25 or 30 per cent of the total. But I can see no justification for a general-sales tax designed to substitute indirect taxes falling on the consumer for the income tax which now furnishes the backbone of the Federal fiscal system, nor even for an increase in specific sales or consumption taxes which would yield perhaps two billions in place of the one billion, approximately, now collected from the consumer.

The particular articles included in the suggested list of additional consumption taxes have not been selected because their use is particularly harmful or in any sense less legitimate than the use of articles not so included. Consumption taxes must be judged by practical standards. What should be sought are a few consumption taxes which will tap the surplus income which is being wasted, not a conglomerate multiplication of petty taxes upon every article of luxurious or unnecessary consumption, which can neither be clearly defined, cheaply collected, nor administered without widespread evasion.

Administrative amendments.

A number of important technical and administrative amendments were recommended in my letter of March 17, 1920, to the chairman of the Committee on Ways and Means, previously quoted. These recommendations have been substantially embodied in H. R. 14197 and H. R. 14198, both of which have already passed the House of Representatives. I earnestly hope that these bills may be promptly enacted into law.

Tax exemptions of Liberty bonds and Victory notes.

The attention of the Congress is again invited to the recommendation made in the Annual Report of the Secretary of the Treasury for 1919, on pages 96–100, that legislation be enacted to simplify and consolidate the limited exemptions of 4 and 4½ per cent Liberty bonds from surtaxes and profits taxes. The existing situation with respect to these exemptions, which were conferred upon Liberty bond holders by legislation enacted from time to time during the war, is fully set forth in the annual report for 1919. A provision embodying the Treasury's suggestions as to the simplification of these exemptions was incorporated in H. R. 13355, introduced in the House of Repre-

sentatives on March 30, 1920, and referred to the Committee on Ways and Means, and again in section 6 of H. R. 14198, which passed the House of Representatives on May 27, 1920, and has been referred to the Committee on Finance of the Senate. I believe that these simplified exemptions should be enacted into law and that any slight loss of revenue which may result will be more than counterbalanced by the gain to the Treasury which will result from the increased attractiveness of the taxable issues of Liberty bonds and the consequent benefit to the Government's credit, as well as from the simplification of administration in the Bureau of Internal Revenue.

ECONOMY.

The necessity of rigid economy in Government expenditure, as a condition of any sound financial program, has already been emphasized. Government expenditures must be reduced to the minimum consistent with efficient service and an effective national budget system must be established. Any consideration of the problem of public economy must take into account, however, the various elements in the existing situation and the facts as to the nature and distribution of the expenditures.

Perhaps the most fundamental fact is that, apart from maturities of the floating debt, the Government of the United States has balanced its budget and that the current operations of the Treasury are now showing a surplus. On the basis of daily Treasury statements, the total ordinary receipts for the fiscal year ended June 30, 1920, amounted to \$6,694,565,388.88 and current ordinary disbursements amounted to \$6,766,444,461.09, leaving a net current deficit (excess of current ordinary disbursements over ordinary receipts) of only \$71,879,072.21 for the fiscal year 1920, the first full fiscal year after hostilities ceased. After taking into account the special deposit of the War Finance Corporation, resulting from the redemption of its holdings of United States securities, the net ordinary disbursements for the fiscal year ended June 30, 1920, were \$6,403,343,841.21, leaving an adjusted surplus (excess of ordinary receipts over net ordinary disbursements) of \$291,221,547.67 for the fiscal year. For the first quarter of the current fiscal year, through September 30, 1920, the total ordinary receipts of the Government, on the basis of daily Treasury statements, amounted to \$1,540,000,000 as against ordinary disbursements during the same period of \$1,251,000,000, resulting in an excess of ordinary receipts over ordinary disbursements of \$289,000,000 for the quarter. The remaining three quarters of the fiscal year, when completed, should also show a substantial excess of ordinary receipts over ordinary disbursements, which must be applied to the retirement of the floating debt and the operations of the sinking fund. With-

out substantial reductions in the estimated expenditures for the fiscal years 1921 and 1922, however, the surplus applicable to the public debt will not be sufficient unless additional revenues from taxation are provided.

An analysis of Government expenditures for the fiscal year 1920, on the basis of daily Treasury statements, develops the striking fact that of the net ordinary disbursements of \$6,403,000,000, about 90 per cent consisted of expenditures under the following main heads:

Purchase of obligations of foreign Governments.....	\$421, 000, 000
War Department.....	1, 611, 000, 000
Navy Department.....	736, 000, 000
Shipping Board.....	531, 000, 000
Federal control of transportation systems and payments to the railroads under the transportation act, 1920.....	1, 037, 000, 000
Interest on the public debt.....	1, 020, 000, 000
Pensions.....	213, 000, 000
War-risk insurance.....	117, 000, 000
Purchase of Federal farm loan bonds.....	30, 000, 000
Total.....	5, 716, 000, 000

Substantially all the expenditures entering into this total, and a large share of the expenditures on various minor accounts, represent burdens directly traceable to the war, to past wars, or to preparedness for future wars. These figures serve to indicate the direction which sincere efforts to reduce the cost of the Government must take.

In considering governmental economy, one practice of recent origin must not be overlooked, namely, that of making revolving-fund appropriations and authorizing receipts to be credited as repayments to appropriations. It has been frequently objected to by the Treasury as a peace-time measure. Its evils were pointed out at length in the Annual Report of the Secretary of the Treasury for 1919, on pages 126 to 129. A still more questionable tendency has recently shown itself, notably in the merchant marine act, 1920, in the form of statutory provisions relieving various interests of profits taxes, thus diverting money from the Treasury just as truly as if carried as an appropriation. Practices of this character are destructive of any program of economy and would greatly impair the working of a budget system. It is clearly desirable that henceforth no moneys be taken out of the Treasury except by direct and definite appropriation.

The following table, analyzing appropriations made and expenditures authorized by the Sixty-sixth Congress, second session, strikingly illustrates the extent of the burdens imposed upon the Treasury this year by indefinite and indirect appropriations, in addition to the total appropriations customarily shown as carried by law:

*Appropriations made and expenditures authorized by the Sixty-sixth Congress,
second session.*

DIRECT APPROPRIATIONS.

Total appropriations under annual appropriation acts.....	\$2, 212, 084, 098. 78
Permanent and indefinite appropriations.....	1, 425, 407, 752. 29
Miscellaneous appropriation acts.....	156, 501, 585. 78
Deficiencies.....	986, 836, 073. 50
Total	<u>4, 780, 829, 510. 35</u>

ADDITIONAL AUTHORIZATIONS.

Additional expenditures authorized from various balances of prior appropriations and from receipts.....	\$210, 937, 608. 07
Authorizations for United States Shipping Board:	
Estimated expenditures authorized from the "Emergency shipping fund" during fiscal year 1921, from the several classes of receipts as provided in the sundry civil act, June 5, 1920.....	\$250, 000, 000. 00
Unexpended balance on hand July 1, 1920, under appropriation "Em- ergency shipping fund," made available for expenditure during fiscal year 1921 by same act.....	62, 671, 670. 34
	312, 671, 670. 34
Estimated expenditures authorized under indefinite app- ropriations provided by the transportation act, Feb. 28, 1920, on account of return of railroads to private control..	570, 000, 000. 00
Total additional appropriations and authorizations..	<u>1, 093, 609, 278. 41</u>
Grand total, appropriations and authorizations.....	5, 874, 438, 788. 76

A BUDGET SYSTEM.

The creation of a Federal budget system is an urgent necessity. It was needed when the expenditures of the Government were relatively small; now that they are vastly greater, it is imperative. The national finances must be handled on a business basis. They can not be under the present arrangements. The Secretary of the Treasury is now merely the medium through which estimates of appropriations are transmitted to the Congress. The estimates are not jointly considered by executive agencies. They are made up separately by the several departments. The country does not get a complete view of them. Congress considers them piecemeal and without specific reference to income. It spends much time on details, instead of considering larger matters which really make for effective control

of the finances. The system was the subject of criticism and discontent even before the war. It is now condemned in unmeasured terms and there has arisen a popular demand for scientific improvement that would seem to impel action.

Private enterprise relates its expenditures and its activities to its income under the controlling influence of profits. This has resulted in scientific business management in most of the great industries. The Government has grown from a relatively small affair to a great institution. Its management is a business operation which should be conducted in accordance with enlightened principles. It has not the stimulus of profits, as understood in private business, to increase its efficiency. Its profits are not expressed in dollars and cents, but in the benefits to the people of the country and the results achieved. Its ultimate possible cost is limited only by the ability of the people to pay under the power of taxation. Financial burdens upon the people will be needlessly maintained or increased unless the system is reformed. This can be accomplished only by the establishment of an effective budget system which would point the way to coordination of the activities of Government and control of the expenditures with due regard to income.

In the first place, a budget system should provide for the formulation and submission to the Congress of unified estimates. These should consist of a well-balanced scheme in which the cost of each activity would be properly related to the cost of the whole and to the Nation's income. The responsibility for the preparation of the budget should be placed upon the President, and, in my judgment, he should meet it through the Secretary of the Treasury, the chief fiscal officer of the Government. I believe that the budget bureau should be established in the office of the Secretary of the Treasury. He is the officer charged by law to provide funds for expenditures. It would appear that the preparation of the budget should be the principal function of the chief Government finance officer. It is indefensible that he should be charged with the duty of keeping an adequate balance in the general fund to meet any and all demands and denied any word with respect to the determination of the expenditures of the Government outside his own department. To place the budget bureau in the office of the President, as is sometimes urged, would mean the creation of an establishment likely to overshadow, or to be overshadowed by, the great departments of the Government and, what is more important, would mean a division of responsibility with respect to receipts and expenditures which should be centralized under one control. The Secretary of the Treasury, acting for the President, should have power to reduce and revise the estimates. Under his direction the bureau of the budget should

make a continuous study of the various Government agencies, with a view to the elimination of duplicated work and wasted effort. If this responsibility is placed upon the Treasury, the Bureau of War Risk Insurance, the Public Health Service, the Office of the Supervising Architect, the General Supply Committee, and the prohibition unit of the Bureau of Internal Revenue simultaneously should be transferred to the jurisdiction of some other department, as recommended later in this report.

In the second place, the budget should receive initial consideration by the Congress through a single great budget committee for each House. These committees should consider both the appropriations and the ways of raising the revenue to meet them. There should be a rule that after the committees have made their reports no addition can be made to any item in the budget except by an unusual vote, such, for instance, as two-thirds. It would be an important achievement if the Congress would go further and, as far as the budget presented by the President is concerned, impose a limitation on the right to increase any item either in committee or on the floor, unless recommended by the Secretary of the Treasury or approved by two-thirds of the membership of the Congress. The Congress should, of course, retain the right to reduce items in the budget, but if the President is to be held responsible for a financial program it should exercise restraint in increasing the budget as submitted by him. In order that there may be no interference with the constitutional right of the Congress to appropriate money apart from the budget, it appears to me that such appropriations should be made in separate bills. These should also provide for the necessary revenue to meet the proposed expenditures in case the estimated revenues of the Government are not sufficient. A plan of this character would definitely place the responsibility for expenditures before the people of the country.

The third step in the formulation of an adequate budget scheme is the establishment of an effective audit. At the present time the auditing force consists of the Comptroller of the Treasury and six auditors. Their audit of the Government's accounts is to insure that expenditures are made in accordance with law. These offices should be consolidated into one organization and the scope of their work enlarged so as to include not only the examination of accounts as to accuracy and legality, but also the desirability of the expenditures and the adequacy of the results. The head of this accounting organization and the assistant head, who for convenience may be called the Comptroller General of the United States and the Assistant Comptroller General of the United States, should be appointed by the President, by and with the advice and consent of the Senate. They

should not be regarded as political appointees and should be free from partisan considerations. Their terms of office should not be limited to any specified period of years. They should be permitted to continue during good behavior and efficient service and be subject to removal by the President. It is not to be supposed that any President, in view of the very nature of the offices, would remove these officials except in the public interest. The reports of the Comptroller General should be made to the President and to the Congress.

The Treasury, except as a matter of organization, is not particularly concerned with the question whether the general accounting office should be attached to this department, as is the case under the present accounting system, or established as an independent unit. There is much to be said, theoretically, for a separate and independent auditing establishment. It is sound budget practice. Its advantages, however, are probably more apparent than real. Without question, the comptroller general must be free and untrammelled in his decisions and his criticisms. There must be no interference with him in giving any information he may desire to the President, the Congress, or the people. As a part of the Treasury, he would have behind him the support and prestige of this great department, which would have every reason to uphold his independence, as is the case under the existing order. It would appear that his association with the Treasury would be an asset rather than a liability to him in the free exercise of his functions. He probably would be stronger than if standing alone. Furthermore, the fiscal operations of the Treasury and the accounting system are intertwined. For instance, every warrant signed in the name of the Secretary of the Treasury for the deposit of funds in the Treasury or the withdrawal of funds from the Treasury is countersigned in the name of the Comptroller of the Treasury. This countersignature would probably be continued under a budget system. The operations of the two establishments would be so closely connected that it would seem that they would function more effectively and easily if they were under the same head. These observations are presented for consideration. The Treasury, however, offers no objection to the separation of the accounting system from this department, if, in the wisdom of the Congress, such action seems desirable in the creation of an effective budget. If the activities of the Treasury which I propose be transferred to some other department are not transferred, it would appear that the auditing system should be erected as an independent establishment.

A budget system will not only be a great step forward in improving the business methods of the executive agencies, but it will also be one of the best means of giving the people of the country complete information with respect to the operations of their Govern-

ment, the efficiency of its management, and the results achieved in relation to the cost of the undertaking. The postponement of this reform is inconsistent with our conceptions of democracy. The Congress already has devoted attention to this important question, having passed a measure which the President returned because of a constitutional objection. The House passed the bill modified to meet that objection. In its revised form, it is believed that the bill, together with supplementary action already taken by the Congress in modifying its rules and further steps which may follow, will provide the foundations of an adequate budget system, although, of course, experience may point the need of amendment. It is earnestly recommended that the Congress give this matter consideration at the present session.

LOANS TO FOREIGN GOVERNMENTS.

Under the acts of Congress of April 24, 1917, September 24, 1917, April 4, 1918, and July 9, 1918, the Secretary of the Treasury was authorized to establish credits in favor of foreign Governments engaged in war with enemies of the United States, and to the extent of these credits to make advances to such Governments through the purchase at par of their respective obligations. The amounts appropriated for such loans by the respective acts were as follows:

Act Apr. 24, 1917-----	\$3, 000, 000, 000
Act Sept. 24, 1917-----	4, 000, 000, 000
Act Apr. 4, 1918-----	1, 500, 000, 000
Act July 9, 1918-----	1, 500, 000, 000
Total-----	10, 000, 000, 000

Under this authority loans were made during the war and after the armistice for the purpose in general of enabling the respective Governments to meet commitments made in the United States in connection with the prosecution of the war. During the past fiscal year the Secretary of the Treasury has continued to allow credits and to make advances only to the extent to which he had previously made commitments. From November 15, 1919, to November 15, 1920, credits were established as follows:

Belgium-----	\$6, 983, 793. 77
Czecho-Slovak Republic-----	12, 000, 000. 00
Italy-----	45, 337, 306. 73

And advances were made as follows:

Belgium-----	\$10, 469, 467. 89
Czecho-Slovak Republic-----	8, 566. 206. 74
France-----	110, 000, 000. 00
Greece-----	15, 000, 000. 00
Italy-----	20, 416, 114. 00

No credits were established under the Victory Liberty loan act.

In certain instances in which the purpose was accomplished without requiring the total amount of the credit or the advance, the balance of credit was withdrawn or the unused portion of the advance was repaid. Certain repayments were made in connection with the routine of the accounts. A repayment was made by Cuba as the first step toward discharging the indebtedness of the Cuban Government to this Government.

Withdrawals of credits from November 15, 1919, to November 15, 1920, were as follows:

Belgium.....	\$1, 214, 325. 88
Czecho-Slovak Republic.....	958. 90

Repayments were made during the same period as follows:

Cuba.....	\$500, 000. 00
France.....	19, 302, 357. 55
Great Britain.....	23, 017, 633. 57
Roumania.....	1, 794, 180. 48
Serbia.....	605, 326. 34

There have also been received the following sums, application of which will be made in due course:

Belgium.....	\$1, 512, 901. 66
France.....	17, 246, 490. 00

From April 24, 1917, up to November 15, 1920, the credits established (after deducting credits which had been withdrawn) and the cash advances were as follows:

Countries.	Credits established net.	Cash advanced.	Other charges against credits.	Balances under established credits.
Belgium.....	\$349, 214, 467. 89	\$349, 214, 467. 89		
Cuba.....	10, 000, 000. 00	10, 000, 000. 00		
Czechoslovakia.....	67, 329, 041. 10	61, 256, 206. 74		\$6, 072, 834. 36
France.....	3, 047, 974, 777. 24	2, 997, 477, 800. 00		50, 496, 977. 24
Great Britain.....	4, 277, 000, 000. 00	4, 277, 000, 000. 00		
Greece.....	48, 236, 629. 05	15, 000, 000. 00	\$33, 236, 629. 05	
Italy.....	1, 666, 260, 179. 72	1, 631, 338, 986. 99		34, 921, 192. 73
Liberia.....	5, 000, 000. 00	26, 000. 00		4, 974, 000. 00
Roumania.....	25, 000, 000. 00	25, 000, 000. 00		
Russia.....	187, 729, 750. 00	187, 729, 750. 00		
Serbia.....	26, 780, 465. 56	26, 780, 465. 56		
	9, 710, 525, 310. 56	9, 580, 823, 677. 18	33, 236, 629. 05	96, 465, 004. 33

Of the foregoing advances there have been repaid up to November 15, 1920, by—

British Government.....	\$80, 181, 641. 56
French Government.....	31, 449, 357. 55
Roumanian Government.....	1, 794, 180. 48
Serbian Government.....	605, 326. 34
Cuban Government.....	500, 000. 00
Belgian Government.....	10, 000. 00

Detailed statements showing the dates and amounts of credits and advances to foreign Governments are attached hereto as Exhibits 24 and 25, pages 325 to 337.

No further credits will be extended under existing legislation by the Secretary of the Treasury in favor of any foreign Govern-

ment, and consequently no further advances will be made to Governments in favor of which there are no existing balances. Present balances are as follows:

Czecho-Slovak Republic	\$6, 072, 834. 36
France.....	50, 496, 977. 24
Greece.....	33, 236, 629. 05
Italy.....	34, 921, 192. 73
Liberia.....	4, 974, 000. 00

The credit of which a balance remains in favor of the Czecho-Slovak Republic was granted for the purpose of assisting that Government to repatriate its troops from Siberia. The movement of the troops has been substantially completed and a large part of the expenses paid. It is not expected that the remaining liabilities on this account will require the advance of more than a part of the balance.

It is estimated that advances of not more than \$21,070,000 will be required to accomplish the purposes for which the balance in favor of France was arranged.

The credits in favor of Greece were established pursuant to a special agreement made early in 1918, under which the United States, Great Britain, and France undertook to lend to the Greek Government for specified purposes, in equal shares in their respective currencies, up to the equivalent of 250,000,000 francs each. Although a special charge has been created against the credits established by the United States, the advances to be made, and consequently the amount of the special charge, are limited by the purposes set forth in the agreement. Further advances by the Treasury will probably not exceed the sum of \$28,900,000.

The balance of credit in favor of Italy was extended for the purpose of enabling the Italian Government to make certain reimbursements in dollars to the British Government. The amount of these reimbursements has been determined to be \$16,695,063.91. Further advances to Italy are therefore not expected to exceed this amount. The British Government has agreed that upon receipt of this amount from the Italian Government it will pay it to the Secretary of the Treasury to be applied by him upon obligations held by the United States Government.

Advances to Liberia will be made only for specific purposes for which commitments have heretofore been incurred. It is not expected that they will exhaust the entire balance of credits in favor of Liberia.

All balances of credits in excess of the amount necessary to carry out the commitments will be withdrawn in due course.

For these advances, the Treasury holds obligations in the form of certificates of indebtedness to the United States, payable as to principal and interest, without deduction for taxes of the debtor.

Government, in gold coin of the United States of the present standard of weight and fineness at the Subtreasury of the United States in New York or at the Treasury of the United States in Washington. Certain of them, at the option of the holder, are payable in the money of the debtor country; some at a fixed rate and others at the buying rate for cable transfers of the currency of the debtor country in the New York market at noon on the day of demand as determined by the Federal Reserve Bank of New York. The certificates of indebtedness are signed in the name of the respective debtor Governments by representatives of such Governments designated to the Treasury by the Department of State as being authorized to sign them in the name and on behalf of the respective Governments.

The earlier certificates were payable at fixed dates of maturity, all which are now past, so that they are now held as demand obligations. They bore interest at various rates of interest from 3 per cent per annum upward. Those subsequently taken are payable on demand and bear interest at the rate of 5 per cent. By arrangement with the respective Governments substantially all the obligations have since May 15, 1918, borne interest at the rate of 5 per cent. The certificates of indebtedness are receivable in payment for bonds of the debtor Government or else are convertible into bonds in conformity with the provisions of the various Liberty bond acts in effect at the respective dates of the certificates of indebtedness. All the obligations are of the same general character. The following is a skeleton copy of an obligation received under the fourth Liberty bond act:

CERTIFICATE OF INDEBTEDNESS.

\$ (amount in figures).

The Government of (name of foreign Government), for value received, promises to pay to the United States of America, or assigns, the sum of (number of dollars in words) on demand, with interest from date hereof at the rate of (rate per cent) per cent per annum. Such principal sum and the interest thereon will be paid without deduction for any (name of foreign Government) taxes, present or future, in gold coin of the United States of America of the present standard of weight and fineness at the Subtreasury of the United States in New York, or, at the option of the holder, at the Treasury of the United States in Washington.

This certificate will be converted by the Government of (name of foreign Government) if requested by the Secretary of the Treasury of the United States of America, at par with an adjustment of accrued interest into an equal par amount of (rate per cent) per cent convertible gold bonds of the Government of (name of foreign Government), conforming to the provisions of acts of Congress of the United States known, respectively, as second Liberty bond act, third Liberty bond act, and fourth Liberty bond act. If bonds of the United States issued under authority of said acts shall be converted into other bonds of the United States bearing a higher rate of interest than $4\frac{1}{2}$ per cent per annum, a proportionate part of the obligations of the Government of (name of foreign Government) of this series acquired by the United States under au-

thority of said acts shall, at the request of said Secretary of the Treasury, be converted into obligations of said Government of (name of foreign Government), bearing interest at a rate exceeding that previously borne by this obligation by the same amount as the interest rate of the bonds of the United States issued upon such conversion exceeds the interest rate of (rate of this obligation) per cent, but not less than the highest rate of interest borne by such bonds of the United States.

(Signature of representative of foreign Government.)

For the Government of (name of foreign Government).

Dated the _____ day of _____.

To and including November, 1918, the dates for the collection of interest from foreign Governments were May 15 and November 15. In the spring of 1919 the respective Governments were informed that it would be convenient for the Treasury to receive semiannual payments of interest on April 15 and on October 15 on approximately two-thirds of their respective obligations, and on May 15 and November 15 on the remainder. The full amount of interest due up to April 15, 1919, or May 15, 1919, was, except in the case of Russia, paid in cash on all these loans. To the extent that such interest was not paid from other resources of the foreign Governments concerned, it was paid from the proceeds of loans made by the United States Government. All interest on the debts of Cuba and Greece was paid as it became due.

The following is an itemized statement showing the amount of interest heretofore paid by each of the foreign Governments on advances made to it by the United States Treasury:

Belgium.....	\$10, 907, 281. 55
Cuba.....	1, 136, 865. 47
Czecho-Slovak Republic.....	304, 178. 09
France.....	128, 140, 816. 48
Great Britain.....	233, 357, 185. 50
Greece.....	409, 153. 34
Italy.....	57, 598, 852. 62
Liberia.....	161. 10
Roumania.....	263, 313. 74
Russia.....	4, 595, 564. 15
Serbia.....	636, 059. 14
Total	437, 349, 431. 18

The amount paid on Russian obligations represents the interest up to November 15, 1917, in full, together with a partial payment of \$1,865,925.08 on account of the interest which became due May 15, 1918, and partial payments of \$1,399,877.43 on account of the interest which became due November 15, 1918. That paid by the Governments of Greece and Cuba includes interest paid up to October 15, 1920, and November 15, 1920, respectively. The amount paid by the French Government includes interest amounting to \$1,810,441.50 to

July 31, 1919, on an obligation dated January 28, 1919, and also interest accrued after April 15, 1919, on \$19,302,357.55 principal subsequently repaid by the French Government in connection with the adjustment of accounts. The sum paid by the British Government includes \$2,244,778.59 interest accrued after May 15, 1919, on \$80,181,641.56, principal subsequently repaid by the British Government in connection with the adjustment of accounts and that paid by Roumania includes a partial payment of \$154,409.63 on account of interest accrued to October 15, 1919.

The Secretary of the Treasury holds a special fund of \$1,808,506, which is equal to the unpaid balance of the interest which became due on Russian obligations on May 15, 1918. It is believed that ultimately this can be applied in discharge of this balance. A similar fund of \$335,095.07 is held which it is believed will be applicable upon the unpaid balance of the interest which became due November 15, 1918, on the Russian account. The interest accrued and remaining unpaid on Russian obligations, after deducting these special funds, for the half year ending November 15, 1918, is \$2,994,025.10, and for the half years ending April 15, 1919, and May 15, 1919, is \$4,101,107.50.

The interest accrued and remaining unpaid on obligations of foreign Governments purchased by the Treasury under the Liberty bond acts for the half years ending respectively October 15, 1919 and November 15, 1919, April 15, 1920 and May 15, 1920, and October 15, 1920 and November 15, 1920, is as follows:

Countries.	Oct. 15 and Nov. 15, 1919.	Apr. 15 and May 15, 1920.	Oct. 15 and Nov. 15, 1920.	Total.
Belgium.....	\$8,330,832.65	\$8,468,375.00	\$8,539,887.75	\$25,339,095.40
Czechoslovakia.....	1,164,422.14	1,354,134.64	1,478,333.35	3,996,890.13
France.....	65,669,500.12	72,218,078.80	73,637,124.10	211,524,703.02
Great Britain.....	104,741,907.05	104,920,458.96	104,920,458.96	314,582,824.97
Italy.....	39,050,152.83	40,442,845.74	40,765,715.11	120,258,713.68
Liberia.....	328.69	640.16	650.00	1,618.85
Roumania.....	382,818.00	625,000.00	597,302.95	1,605,121.04
Russia.....	4,713,366.30	4,685,999.25	4,693,243.75	14,092,609.30
Serbia.....	669,258.13	669,511.64	659,230.96	1,998,000.73
	224,722,586.00	233,385,044.19	235,291,946.93	693,399,577.12
Add balance (in excess of special funds above mentioned) of interest accrued and remaining unpaid on Russian obli- gations for half year ending Nov. 15, 1918, and half years ending Apr. 15, 1919, and May 15, 1919.....				7,095,132.61
Total.....				700,494,709.72

The Liberty bond acts which authorized the Secretary of the Treasury to acquire foreign obligations also authorized him to exchange them into long-time obligations bearing a rate of interest not less than that borne by the demand instruments. The acts provide that the former shall be in such form and terms as the Secretary of the Treasury may prescribe. In the early autumn of 1919, the Treas-

ury informed the treasuries of the European Governments to which it had made advances that it was prepared, in case they so desired, to discuss with them the exchange of the demand notes for long-time obligations, and in that connection the deferring of interest collection during the reconstruction period of two or three years from the spring of 1919. Public announcement of the position of the Treasury was made on September 26, 1919. The considerations which moved the Treasury with regard to deferring the collection of interest were set forth in the following letter from the Secretary of the Treasury to the chairman of the Committee on Ways and Means of the House of Representatives:

WASHINGTON, *December 18, 1919.*

MY DEAR CONGRESSMAN: On October the 9th last I sent you a copy of a public statement made by me on the 26th of September relative to the obligations of foreign Governments held by the United States Government, and also a copy of a letter written by me on October 9th to Senator Penrose in reply to a letter from him requesting information concerning the extension of the interest on such loans. In that statement and in my letter to Senator Penrose I explained the policy which the Treasury proposed to adopt in respect to the funding of the demand obligations of foreign Governments now held by the United States into long-time obligations, and the funding during the reconstruction period of two or three years of the interest on such obligations. Notwithstanding my public announcement of September 26 and the controlling reasons which prompted the Treasury to adopt this policy, it appears from statements which have been made lately in Congress and elsewhere that there still exists a misunderstanding in respect to this question. Some of the statements to the effect that it is the duty of our Government, notwithstanding the present grave derangement of foreign exchanges, to insist upon immediate payment of interest amounting to about \$475,000,000 a year, indicate a tendency to overlook certain aspects of the question and a failure to grasp the meaning of the present position of the finances of the world. While the Treasury favors such an arrangement, it does not favor the cancellation and, indeed, has no power to cancel any portion of the interest or principal. The collection in dollars of this interest under present circumstances would be no less disastrous to American interests than to the interest of our debtors.

The loans to foreign Governments were made, as provided by Congress in April, 1917, for the purpose of assisting them in the prosecution of the war. Our entry into the war made it necessary for this Government to call upon the American people for vast sums of money for its own war purposes. In order to obtain such funds it was necessary substantially to close our financial markets to all other borrowings, but, at the same time, it became most important that our associates in the war should be able to obtain in greater amounts than theretofore the supplies which they required and which we alone could furnish.

Except for the purpose of meeting commitments for war purposes previously made with the knowledge of the Treasury, the Treasury has, since last April, substantially discontinued the establishment of credits in favor of foreign Governments. The program authorized by Congress for foreign loans was therefore substantially ended eight months ago.

At almost the same time the foreign Governments of their own accord, but with the hearty approval of the Treasury, ceased the "pegging" of their exchanges.

These necessary steps by the United States Treasury and the treasuries of our associates, in the endeavor to reduce governmental financial activity and to return trade and finance to normal channels, have been reflected in the great drop which has taken place in the foreign exchanges.

With the ending of the war and of the program of our loans to foreign Governments, it was considered appropriate, in accordance with the authority conferred by the Liberty bond acts, to take up with those Governments the funding of the demand obligations now held by the United States into long-time obligations; and in view of the fact that, as indicated by the state of the foreign exchanges, the reconstruction of Europe has not proceeded to a point where Europe can even yet pay by exports for its necessary food, it was considered by the Treasury most expedient that as a part of a general funding arrangement provision should be made for deferring and spreading over a later period the payment of interest which would accrue during the next two or three years.

At the time of writing exchanges of the principal Allies are quoted as follows:

Sterling, 3.86, or at a discount of 20.7 per cent.

Francs, 10.23, or at a discount of 49.4 per cent.

Lire, 12.75, or at a discount of 59.4 per cent.

Belgian francs, 9.97, or at a discount of 48 per cent.

Under these circumstances an impenetrable barrier exists which makes it impracticable for those Governments to pay in dollars the amount of interest due from them to the United States. This involves no question as to the solvency or financial responsibility of those Governments, nor a failure to raise funds by loans and taxes from their people and a corresponding burdening of our people, but results from the condition of the foreign exchange market. If the Governments of the Allies were to raise immediately by taxes and loans the whole of their debt to us, those taxes and loans would produce only sterling, francs, and lire, and those foreign currencies would not furnish one additional dollar of dollar exchange because conditions are not such as to permit those currencies now to be converted into dollars. The United States Treasury has no use at the present time for any considerable amounts of these currencies and could not afford to accumulate large idle foreign balances.

If the Treasury does not defer the collection of interest and thus adds to the present difficulties in the financial and economic rehabilitation of the world by demanding an immediate cash payment of interest before the industry and trade of Europe has an opportunity to revive, we should not only make it impossible for Europe to continue needed purchases here and decrease their ultimate capacity to pay their debt to us, but should hinder rather than help the reconstruction which the world should hasten. A nation can liquidate its foreign debts only by the accumulation of foreign credits, which may be accomplished through an excess trade balance, invisible exchange items, the creation of credits by loans, or by the export of gold. Until our associates in the war, whose manufacture and trade suffered so much more than ours, have had an opportunity to resume normal industrial and commercial activities, they have not the exports with which to pay the interest due on our obligations and could make such payment only by the shipment of gold or by obtaining dollar loans in the United States. The loans which the Allied Governments have so far been able to place in our markets have not been sufficient to correct the situation. I can not believe that anyone would consider it equitable or wise, in the present circumstances, for us to require payment in gold, of which we already have enough, when the payment of one year's interest alone would exhaust about 50 per cent of the gold reserves of our debtors. While I fully realize the desirability of collecting this interest and of decreas-

ing at once by a corresponding amount the taxes which we must collect, I should be most reluctant, without specific instructions from Congress to the contrary, to demand the immediate payment of interest which would not only seriously retard the economic restoration of those countries without which they will be unable to pay the interest and principal of their debt to us, but which would also destroy their power to make needed purchases in our market.

My advisers are firmly of the opinion that in connection with and as a part of a general funding of the demand obligations into time obligations I am duly authorized under the Liberty loan acts to spread over subsequent years the interest which would accrue during the reconstruction period of, say, two or three years, and to include such amounts in the time obligations. If, however, the Ways and Means Committee of the House, which shared with the Secretary of the Treasury the initial responsibility for the Liberty loan acts, should question my power so to act, I shall be pleased to have you so inform me at once, in order that I may lay before your committee a proposal for further enabling legislation.

Cordially yours,

CARTER GLASS.

HON. JOSEPH W. FORDNEY,

House of Representatives.

The Committee on Ways and Means replied that there was in its opinion no legislative bar to the procedure proposed. Negotiations looking to the exchange and, in that connection, the deferring of interest collection were undertaken in Washington. They were continued in Europe in the fall of 1919 and the spring of 1920 by Albert Rathbone, then Assistant Secretary of the Treasury, and will be concluded in Washington. I trust that they will be completed in the near future. Such an arrangement will involve no present burden to the debtor nations and would do much in fact to clear the atmosphere and to improve European credits. The foreign exchanges are now at a greater discount than they were at the time of the Treasury's original statement. It would add to the difficulties of the situation and would not be to the advantage of the United States at this time to require cash payment of interest from the debtor European Governments.

Section 8 of the Victory Liberty loan act provides that obligations of foreign Governments acquired by virtue of the provisions of the first Liberty bond act or through the conversion of short-time notes acquired under that act shall mature not later than June 15, 1947, and that all others shall mature not later than October 15, 1938. I am of the opinion that, if they so desire, the respective foreign Governments should be given the benefit of the full periods thus permitted. The long-time obligations should, I believe, contain a provision for a moderate sinking fund, the first payments on which should be made at a reasonably early date. The dates on which the Treasury receives large tax payments, and is itself bound to pay interest on obligations of the United States, require that interest and

sinking fund payments on the foreign obligations be made in substantially the following proportions and on the dates mentioned:

Ten per cent January 15 and July 15.

Ten per cent February 15 and August 15.

Fifty per cent April 15 and October 15.

Thirty per cent May 15 and November 15.

The following tables show substantially the annual installments of deferred interest and sinking fund payments which I believe the long-time obligations should provide for, subject to the necessary modifications to suit such obligations as in the adjustment may bear different dates:

Interest and sinking fund payments.

It may be necessary for certain small payments of principal to be made at the time the agreements for the exchange are entered into, in order to bring the principal to round sums. The agreement with each Government should give the United States the right to use the obligations of that Government held by the United States, whether before or after the exchange, in settlement of war claims hereafter made by such Government against the United States. The bonds should provide for accelerating the payment of all deferred interest whenever the currency of the Government in question over the foreign exchanges reaches a price approximating the gold import point and while the exchange remains not lower than that figure, and that, if this should happen before the deferred interest period has expired, no further interest should be deferred. Both principal and interest should be payable in gold coin of the United States

or, at the option of the holder, in the currency of the debtor Government at a fixed rate of exchange (about gold parity), and without deduction for, and exempt from all, taxation by the debtor Government. The obligations should contain suitable provision for their conversion into bonds of small denominations or for their payment, at the option of the obligor, in lieu of such conversion. To prevent or curtail gold exports from the United States, they should contain an agreement by the debtor Government to offer demand drafts payable in its currency at a figure to be fixed (substantially the gold export point), and to apply the proceeds to deferred interest and then to principal, current interest to be adjusted accordingly. Sinking-fund payments should be provided to be made in gold coin of the United States or in the currency of the debtor Government at the par of exchange, if the holder shall so request.

Of the obligations of the British Government held by the United States, \$122,017,633.57 are regarded as having been given for purchases of silver under the Pittman Act. An agreement has been made with the British Government for the funding and payment of this amount as follows: The sum of \$17,633.57 has been paid with interest. As to the remainder, \$122,000,000, the British Government, on April 15 and May 15, 1921, respectively, is to pay the interest accrued on 60 per cent from April 15, 1919, and on 40 per cent from May 15, 1919, at the rate of 5 per cent per annum. On each 15th of October, November, April, and May thereafter it is to pay a semi-annual installment of interest at the rate of 5 per cent per annum, which has accrued up to the respective date upon the corresponding proportion of the part of the principal from time to time remaining unpaid. The principal is to be paid in equal annual installments in the years 1921, 1922, 1923, and 1924 in the proportions of 60 per cent on April 15 and 40 per cent on May 15 of each year. Until the payment in full of the principal with interest, in order to afford American nationals an opportunity to acquire rupee credits at the same cost as such credits are offered to British nationals, the British Government will permit the United States Treasury, through the Federal Reserve Bank of New York, on substantially the same terms as are open to British nationals, to make tenders to purchase rupee credits offered by the Indian Government in London or elsewhere in Great Britain. Payment is to be made in dollars to the agents in New York of the British Government for the sterling cost of the rupees at the cable rate for sterling fixed by the Federal Reserve Bank of New York at noon of the day of such sterling payment in London. The British treasury having made the necessary arrangements with the Government of India, upon the request of the Secretary of the Treasury, will, in addition, place at the disposal of the

Federal Reserve Bank of New York rupee credits at the rate of exchange of 48 $\frac{2}{3}$ cents per rupee in amounts not exceeding 1 crore in any one month and not exceeding 7 crores in any one year. Forthwith upon the sale of such credits by the Federal Reserve Bank of New York, payments therefor at the given rate will be made to agents of the British treasury in New York. Rupee credits thus acquired may be availed of by cable transfers by the Federal Reserve Bank of New York and may be disposed of by that bank, but not at a lesser price than their actual cost to the bank. The dollar amounts paid for rupee credits shall be used by the British treasury to repay the principal of the obligations mentioned in this paragraph, not previously paid, accrued interest upon the principal sums repaid to date of payment simultaneously to be paid by the British treasury. All principal amounts so paid in any year shall reduce correspondingly the fixed annual installments payable in that year, and payments of interest thus made shall reduce correspondingly the interest payments otherwise due.

The indebtedness incurred by the United States to make the foreign loans is not cared for by the sinking fund. Congress contemplated that foreign repayments would provide for that part of our debt. Of late there has been no little discussion as to how this foreign debt should be treated. Some advance the proposal that it should be canceled. This is a favorite plan of some Europeans and some Americans. The suggestion is based first on one ground and then on another. At one time it is based on sentiment or on considerations of generosity. By some it is based on the contention that it will promote peace. It apparently is assumed that antagonisms will be set up if the nations of Europe are asked to repay the loans which they sought and so gladly received. At another time it is based on consideration for present producing interests. Voices are heard representing that it will ruin the trade of America if Europe is to send us her commodities for what she owes us. Apparently these advocates contend that international trade will be profitable provided only we give to the world what we produce, declining to receive any commodities in return. I imagine neither of these suggestions will be received with favor by the American taxpayers. They will realize that if the debts are canceled they must pay taxes to meet the interest and to redeem the principal of ten billions of dollars. Another suggestion is that the demand notes now held by the Government shall be funded into bonds bearing a higher rate of interest which the debtor nations will consent to exchange for the outstanding bonds and that a direct relation be set up between those who consent to receive such bonds in this country and the foreign debtors, although it is proposed that this Government guarantee the

bonds. No evidence is furnished that debtor nations would be willing to assent to the creation of a bonded debt with a higher rate of interest with obligation for the immediate payment of interest; and there is nothing in existing law which warrants such a transaction. They should not be charged interest at a rate exceeding the cost to our Government of the money borrowed from our people to lend to them. The advances made by the United States to the Allies began only at the time of our entry into the war. For substantially a year we had no considerable military forces in Europe and we were lending the money needed to supply the part purchased from our people of the materials necessary for the armies of the Allies, who were holding the Germans in the meantime. If, in April, 1917, we had had a vast army in Europe there would have been no considerable loans to the Allies for purchases of war material in this country, since our own armies would have needed all the munitions this country could have produced. In the circumstances we must deal with the debts of the allied Governments in a spirit of fairness. The suggestion that we should throw them upon the market appears to me to be as fatuous and impracticable as either of the other suggestions.

The reasonable and proper course is to proceed under the terms of existing law, which authorizes the Secretary of the Treasury to fund the demand notes into obligations with a distant maturity at a rate of interest at least equivalent to that borne by our own bonds, coupled with authority for the time being to defer interest payments.

Foreign obligations received on account of sales of surplus war supplies and European relief.

Foreign obligations have been received from the Secretary of War up to November 15, 1920, on account of sale of surplus war supplies, as follows:

Country.	Principal amount payable.	Date.	Maturity.	Interest runs from—	Interest payable.

The Treasury holds these obligations as custodian and was not concerned in their acquisition. Interest has been paid promptly on the Belgian and Latvian obligations. The sum of \$1,176,454.11 interest has been received from Poland and has been credited on account of payment of interest accrued from December 30, 1919, to June 20, 1920, on obligations dated June 3, 1919, and July 19, 1919, for \$10,000,000 each and on account of interest accrued from December 30, 1919, to June 30, 1920, on obligations dated June 3, 1919, and July 22, 1919, for \$10,000,000 each, and on those dated July 31, 1919, for \$8,151,060.52. The sum of \$10,179.87 has been received on account of interest accrued on the Russian obligation for the period from June 30, 1919, to December 30, 1919. Since the first interest date of the French obligations is February 1, 1921, and that of the notes dated April 29, 1920, for \$4,646,465.20 of the Kingdom of the Serbs, Croats, and Slovenes is December 30, 1920, no interest on these notes is payable until the dates indicated. Interest on the other notes has not been paid.

Foreign obligations have been received from the American Relief Administration on account of relief rendered pursuant to act ap-

proved February 25, 1919, and are held by the Treasury as custodian, as follows:

Country.	Principal amount payable.	Date.	Maturity.	Interest runs from—	Interest payable.
Armenia.....	\$8,028,412.15	June 30, 1919	June 30, 1921	June 30, 1919	June 30.

Total.....	84,014,527.92				

No interest has been received on these obligations.

There has been received from the Secretary of the Navy an obligation of the Republic of Poland for \$2,266,709.66, dated April 22, 1920, maturing March 27, 1926, bearing interest at the rate of 5 per cent from March 27, 1920, payable annually on the 30th day of December.

Foreign currencies.

Currencies needed by the United States in France, Great Britain, and Italy for our war expenditures in those countries were provided by the respective foreign Governments under an arrangement whereby the dollar equivalent of the amounts so provided was made available to the respective foreign Governments for use to meet their war expenditures in the United States, and thus the needs of these Governments for advances from the United States were reduced by a corresponding amount. During the fiscal year ended June 30, 1919, this plan was also extended to Belgium. A small amount of Belgian currency was provided under the arrangement during the fiscal year ended June 30, 1920. In view, however, of the condition of the exchanges and the comparatively small requirements for Belgian and Italian currencies during the past fiscal year, these, with the exception of the small amount of Belgian currency, were obtained by United States disbursing officers by the use of checks in the usual course. The following tabulation shows the amount of foreign currencies placed at the disposal of the United States and the dollar equivalents paid therefor in the United States for the period from

the beginning of the operation of the arrangement during the month of January, 1918, up to November 15, 1920:

Country.	Francs.	Pounds sterling.	Lire.	Dollar equivalent.
Belgium.....	12,500,000.00	1,197,555.56
France.....	5,711,941,418.08	1,025,438,235.88
Great Britain.....	100,572,387 13 1	449,496,227.55
Italy.....	97,583,742.51	14,425,092.25
Total.....	1,490,557,111.24

As shown by the final report of the United States Liquidation Commission of the War Department, dated May 31, 1920, a contract of general settlement was made between the United States War Department and the French Government, by the terms of which the latter acknowledged an indebtedness of \$177,149,866.86 and the War Department an obligation to France of 1,938,604,417.25 francs. Negotiations between the Treasury and French representatives regarding the manner and form of mutual payments and the rate of exchange to be applied to the extent that amounts due from the respective Governments shall be agreed to be set off are not completed. Negotiations are also pending between the various departments of this Government and various foreign Governments concerning mutual claims. Pending final settlement of these matters and for use in connection therewith and for current necessities, the balances with the Tresor Public, Paris, as a depository of public moneys of the United States, to the credit of United States disbursing officers and of the Treasurer of the United States amounted, according to latest reports received, to an aggregate of 658,699,767.87 francs, equivalent at the rate of exchange used for accounting purposes to \$42,927,767.41. On the basis of the Treasury daily statements, the total balances of foreign currencies as of November 15, 1920, standing to the credit of disbursing officers of the United States and the Treasurer of the United States, including the balances with the Tresor Public, were equivalent at the accounting rates of exchange to \$50,189,337.39.

During the fiscal year the Treasury paid off certificates of indebtedness, amounting to 155,000,000 pesetas, issued by it under the 250,000,000 pesetas credit, which had been arranged in August, 1918, by a representative of the Treasury with a syndicate of Spanish banks. This was the only foreign indebtedness incurred by the United States during the war. At that time Spanish exchange was at a premium of about 40 per cent. By reason of the drop in the rate of Spanish exchange resulting, in part, from the arrangement of this credit, the Treasury was able to obtain in the exchange market at

par or less the pesetas necessary to be bought in order to pay the certificates. The transaction gave a substantial profit to the Government.

Expenditures reported by foreign Governments.

Under the Liberty loan acts the Treasury was authorized for the purpose of more effectually providing for the national security and defense and prosecuting the war, to establish credits for foreign Governments and to purchase their obligations at par. The foreign Governments were therefore required by the Treasury to state the purposes to be served in order to enable the Treasury to determine whether they were germane to the purposes indicated by the Liberty loan acts and whether and in what amount credits should be given. The Treasury did not, of course, make expenditures for the foreign Governments. It paid to them the purchase price of the securities; and they made the expenditures. After this was done they made further statements to the Treasury showing the actual application of the proceeds of the loans.

As the program authorized by Congress for foreign loans was substantially closed in April, 1919, and the making of advances for commitments incurred prior to that time is now practically at an end, statements are attached as Exhibits 26 to 32, pages 338 to 347, showing the amounts advanced to foreign Governments and the expenditures reported by them to November 1, 1920. These have been tabulated by the following periods, viz:

1. April 6 to December 31, 1917.
2. January 1, to June 30, 1918.
3. July 1 to November 30, 1918.
4. December 1, 1918, to June 30, 1919.
5. June 30, 1919, to November 1, 1920.

They have also been summarized to show the total advances and the expenditures reported for the entire period classified by (a) the five periods above referred to, (b) the individual Governments. They give total expenditures from April 6, 1917, as reported by the British Government to June 30, 1919, by the French Government to January 31, 1920, by the Italian Government to August 31, 1919, by the Belgian Government to February 28, 1920, and by the Russian Government to December 31, 1917, and in addition certain specific expenditures as reported up to November 1, 1920.

Under arrangements which were entered into about September 1, 1917, purchases were made by the missions of the various foreign Governments under the general supervision of a purchasing commission, originally composed of Bernard M. Baruch, Robert S. Brookings, and Robert S. Lovett, established by agreement between the Secretary of the Treasury and the respective foreign Governments

for the purpose of coordinating governmental buying in the United States. Proposed purchases of each Government were considered in relation to the requirements of the United States and of the allied Governments before being approved. Purchases of food were made with the approval of the Food Administration and those of fuel (coal and oil) with that of the Fuel Administration. On March 4, 1918, by order of the President, the work of the commission was integrated with that of the War Industries Board. Under date of December 14, 1918, the arrangements between the commission and the foreign Governments were terminated and the functions of the former which then remained were taken over by the Treasury Department. These had come substantially to an end by June 30, 1919. From the inception of the commission the coordination which it was able to bring about became increasingly effective each month, and on May 15, 1918, an arrangement was made with the War Trade Board, whereby the issue of export licenses to the foreign Governments was withheld except for purchases which had been approved by the commission. This arrangement continued until the export restrictions were withdrawn by the War Trade Board, in December, 1918.

In Europe the Interallied Council on War Purchases and Finance, created in the autumn of 1917 with the view of considering and coordinating the demands of the Allies upon the American Treasury, continued in operation until after the armistice. In initiating, soon after America entered the war, the Purchasing Commission in the United States and the Interallied Council on War Purchases and Finance in Europe, the Treasury broke new ground and took important first steps toward coordination of the demands of the Allies upon the American Treasury and the American market with each other and with the requirements of the United States. Finding their sanction only in the Treasury's circumscribed activities, they were, however, necessarily limited in power and scope, and their functions to a large extent were properly superseded by other and more comprehensive instrumentalities so soon as the latter were created.

After the signing of the armistice, it was the belief of the Treasury that its further loans to foreign Governments should be reduced so far as possible, and that they should finance themselves in our financial markets. Steps were taken as rapidly as possible to relax governmental supervision and to induce the respective Governments to act independently. The consequence was that the Belgian, British, French, and Italian Governments all found means during the period to obtain funds here from private lenders, on treasury bills and on long-time obligations; their transactions with the United States Treasury formed a smaller proportion of their entire transactions; and important maturities, including that of the Anglo-French loan of \$500,000,000 on October 15, 1920, have been met without the assist-

ance of the United States Treasury. Payments in dollars by various of our departments to the British Government have amounted since July 1, 1919, to something like \$70,000,000, and are probably not yet complete; and payments to the British Government for sterling furnished by it for the use of the United States Government in meeting commitments for war expenditures in England amounted during the year ended November 15, 1920, to about \$48,000,000.

In considering the statements it must be borne in mind that the amounts shown under the various headings do not for the most part include expenditures of dollars obtained by foreign Governments otherwise than from the American Government's loans and expenditures in Europe, and therefore do not represent total disbursements. Furthermore, purchases of commodities here are included in the item of exchange, particularly for the earlier part of the war. In the ordinary course of trade, all transactions in these would have been reflected in a net balance of trade which would have been settled through the importation of gold or the sale of exchange except in so far as it might have been capitalized through the purchase of American securities held abroad, or of securities of the foreign Governments offered in the United States or adjusted by transfer of bank balances or otherwise. In the early stages of the war, all commodity purchases by Great Britain were thus merged in exchange except purchases of munitions and sugar. Therefore, the exchange item in the British statement of expenditures reflected purchases of wheat, food, cotton, leather, and oil under Government control, as well as all transactions of individual buyers in the United States, and the amounts shown under specific headings included only commodities bought under Government control after centralized purchases and finance were established. The amount expended by France for exchange was of a less complex character than the disbursements shown under the same heading for Great Britain. After March, 1917, imports into France were in general prohibited until after the armistice. In some cases, however, imports from the United States were authorized and in such cases the Bank of France undertook to provide funds sufficient to pay for them. Prior to November 30, 1918, the dollar funds provided by the Bank of France constituted the major part of the French exchange payments. There are also included under this heading certain sums expended in New York in purchasing drafts on Paris or in making payments for cotton. Some purchases on French account were paid for by drafts on London; this being particularly true in the earlier part of the period. The purchases of these drafts are included in the British item of expenditure and the amount of transactions as estimated from time to time for the French and British Governments forms part of the reimbursement by the French to the

British. It will readily be apparent that completely to analyze the total purchases of exchange is impossible. It was consistently the aim of the Treasury Department to have whole classes of transactions, such as the buying of wheat and food, taken out of the general exchange market, so far as possible, to be provided for by direct payments, and to determine, as completely as possible, the character of the remaining exchange transactions. The system of governmental supervision and control which, under the Executive order of January 26, 1918, became effective over exchange transactions on February 16, 1918, and other steps pursued made it possible to exercise a close scrutiny on items of exchange purchases until the end of June, 1919, when control of exchange by this Government was terminated. It will be recalled that the "unpegging" of their exchanges by the British, French, and Italian Governments took place in March, 1919.

The items of reimbursements included in the statements of expenditures consist principally of payments by France and Italy to Great Britain for cereals, sugar, meats, and munitions and for neutral freights, and other disbursements made to neutrals, and of payments by Belgium to Great Britain for horses, petrol, oats, flour, and certain relief supplies furnished by Great Britain out of supplies obtained actually or constructively from the United States. The expenditures for silver represent principally sales to the British under the provisions of the Pittman Act for the purpose of strengthening the metallic reserve of the currency of India. Such sales were not, however, paid for entirely out of United States Treasury advances. The British authorities received \$71,353,249.99 for rupees made available to the Federal Reserve Bank of New York, and the sum of \$9,999,658.07 in gold was shipped to this country from India. The interest item includes, with the exception of Cuban and Greek interest and of the partial payments of \$3,265,802.51 mentioned on page 57 on account of Russian interest, the amount received by the United States on its advances to foreign Governments. The contributions for relief in the statements of British, French, and Italian expenditures include an item of \$16,000,000, which each contributed toward the relief of the people of Austria. The French expenditures also include part of the amount provided by the French Government toward the relief of the people of France and Belgium. Almost the whole of the advances to Roumania and Serbia, and considerably more than half of those to Belgium and the Czecho-Slovak Republic were for relief. The Treasury's program of advances for relief during the period between November 30, 1918, and June 30, 1919, was largely based upon reports from the American Relief Administration, which represented that they were necessary as a military measure to prevent the spread of anarchy; and a considerable part were made upon the condition that

they should be expended through the American Relief Administration.

The British Government made to its allies from August 1, 1914, to March 31, 1920, loans of £1,850,500,000, of which £876,500,000 were lent after April 1, 1917, and the French Government, from August 1, 1914, to December 31, 1919, made loans to its allies of 7,575,000,000 francs.

In January, 1919, Norman H. Davis was appointed by the President finance commissioner, representing the Secretary of the Treasury in Europe and acting as financial adviser to the American peace mission until July, 1919. Early in that year Albert Strauss and Thomas W. Lamont were designated as special representatives of the Secretary and were associated with Mr. Davis as financial advisers to the peace mission. In the following fall Albert Rathbone, then Assistant Secretary, acted on behalf of the Secretary of the Treasury as financial adviser associated with the Peace Mission, and after the return of the mission as the United States representative on the committee on organization of the Reparations Commission. Upon the organization of the commission he participated in its deliberations as the unofficial representative of the United States, being succeeded by Roland W. Boyden early in April, 1920.

THE INTERNATIONAL FINANCIAL SITUATION.

The international financial situation during the year has had the close attention of the Treasury. At the date of this report the foreign exchanges are substantially lower than they were a year ago. As compared with our currency, those of almost all countries are at a discount. This is indicated by the table following showing the discount or premium reached by certain foreign currencies on the first of each month, beginning with November 1, 1919, and ending with November 1, 1920.

	Nov. 1, 1919, discount (per cent).	Dec. 1, 1919, discount (per cent).	Jan. 2, 1920, discount (per cent).	Feb. 2, 1920, discount (per cent).	Mar. 1, 1920, discount (per cent).	Apr. 1, 1920, discount (per cent).	May 1, 1920, discount (per cent).	June 1, 1920, discount (per cent).	July 1, 1920, discount (per cent).	Aug. 2, 1920, discount (per cent).	Sept. 1, 1920, discount (per cent).	Oct. 1, 1920, discount (per cent).	Nov. 1, 1920, discount (per cent).

Foreign trade.

The foreign trade of the United States in recent years, measured in terms of dollars on the basis of prevailing prices over the years indicated, has shown a vast growth. In the decade preceding the war it had shown a steady upward movement, and in 1913, the last calendar year before the European war, the exports of merchandise had risen to \$2,484,018,292 and the imports were \$1,792,596,480, an excess of exports of \$691,421,812. In the last year of the war the exports of merchandise were valued at \$6,149,087,545 and the imports at \$3,031,212,710, resulting in an excess of exports of \$3,117,874,835. In 1919, the first calendar year after hostilities ceased, the exports were valued at \$7,920,425,990 and the imports at \$3,904,364,932, showing an excess of exports of \$4,016,061,058. To the end of September of this calendar year the exports were valued at \$6,080,990,920, or at the rate of nearly eight and one-quarter billions for the year, and the imports were \$4,358,405,643, indicating an excess of exports for the nine months of \$1,722,585,277. The apparent excess exports for the calendar years 1918 and 1919 and the current year to the end of September show a value of \$8,856,521,170.

It is notable that approximately 50 per cent of the exports of merchandise for the last calendar year before the war and for the period indicated since the beginning of 1918 consisted of agricultural commodities, while a smaller per cent of the imports were of such commodities. For the fiscal year ended June 30, 1914, of the total exports of merchandise valued at \$2,364,579,148, \$1,113,973,635 covered agricultural commodities; while, of the total imports of \$1,893,025,657, \$924,246,616 represented agricultural commodities; and of the latter amount over \$231,000,000 were of such noncompetitive products as coffee, tea, tropical fruits and nuts, oils, and cocoa, and over \$101,000,000 were of sugar, of which commodity we produce only approximately 25 per cent of our needs. In that year, therefore, our exports of competitive agricultural products exceeded our imports of such commodities, without including sugar, by over a half billion of dollars. In the calendar year 1919, of the total exports of merchandise of \$7,920,425,990, more than half, or slightly over \$3,972,000,000, represented agricultural commodities, including approximately \$1,000,000,000 of breadstuffs, over \$1,100,000,000 of unmanufactured cotton, approximately \$1,160,000,000 of meat and dairy products, and nearly \$260,000,000 of tobacco; while these imports were valued at only slightly over \$1,600,000,000 of which more than \$435,000,000 were of noncompetitive products such as coffee, tea, cocoa, and fruits and nuts, \$132,916,292 of oils, and over \$394,000,000 of sugar. The excess of agricultural exports for that year was more

than \$2,300,000,000 and the excess of exports of competitive products much larger.

It need scarcely be added that the increase in the physical volume of trade for 1919 or the current year was very much lower than the corresponding increase in the value of the trade. The figures during and since the war reflect the great upward movement of prices. It is difficult to indicate the physical volume of trade and its increases. A survey made in 1919 of domestic exports of certain commodities constituting a large fraction of our total exports for the 5-year-period 1914-1919 on values adjusted to a prewar basis reveals an increase of about 23 per cent when compared with such exports for 1910-1914, as against an increase of 97 per cent with no adjustment of values. This comparison would not apply to the whole mass of exports, for the reason that the percentages of the aggregate values of the selected articles to the total values of domestic exports for the fiscal years 1916, 1917, and 1918 are considerably below the average percentage shown for the articles selected for the 5-year period preceding the war to the total values of exports for that period. A more recent and exhaustive survey indicates in an even more striking manner the wide difference between prewar and postwar values of commodities exported from this country. The latter survey, using as a basis 100 commodities and the fiscal years 1911-1914, inclusive, shows an increase of 31 per cent for the five-year period 1914-1919 on values adjusted to a prewar basis, as contrasted with an increase of 217 per cent with no such adjustment. It would not be safe to assume that the stated percentage of increase in physical volume is indicative of the growth in the total physical volume; but it affords evidence that the extraordinary growth in export values of the postwar period over the prewar period is largely the result of the rise in valuation. The difference between the physical volume of trade and the value of the trade is frequently overlooked in discussions of foreign commerce, but it is evidently of prime importance and has a significance in many directions.

Financing foreign trade.

From January 1, 1919, to September 30, 1920, our exports to Europe amounted to \$8,484,433,858 and our imports from Europe to \$1,741,114,553, the excess of goods exported being \$6,743,319,305. This surplus appears to have been paid for in part by the great loans made by the Treasury to foreign Governments pursuant to the Liberty bond acts; by credits granted by the United States Grain Corporation, the War Department, and the United States Shipping Board; by the appropriation by Congress of \$100,000,000 for European relief; by loans by the War Finance Corporation to banks and

exporters in this country to assist in financing exports; and by immigrants' remittances, new loans to Europe, the shipment of gold, the sale in this market of foreign securities and the repurchase in our market of American securities formerly held in Europe. Regarding such repurchase of securities, the Secretary made the following statement on February 12, 1920:

* * * it is interesting to observe that the extreme depression in high-grade investment securities in this country at the present time is, to a very important extent, the result of heavy selling of such securities in our markets from foreign sources. This, as Secretary Glass said in his annual report, is one of the processes which is stimulated by the very position of the exchanges which it tends to correct. By absorbing these high-grade investment securities the American people are furnishing capital to Europe at a time of Europe's need and are giving this help in just the way that Europe helped America in the period of America's growth and of her own monetary troubles. In the days of the infancy of the Republic, in the days of our Civil War, and of the period of reconstruction after the Civil War, of the monetary panics which we suffered at frequent intervals until the establishment of our Federal Reserve System, America suffered greatly for lack of capital and credit and because of her depreciated currency and later her inelastic currency. In those days Europe came to America's aid, not by Government loans, not with any comprehensive plan, but by the investment of private capital upon attractive terms in American enterprises and in the purchase of American securities at bargain prices. Europe profited enormously by these investments, and America profited, too, because she obtained the capital she needed at the price that the capital was worth to her. Honest and energetic business men in both countries went to work in their own way and solved the problem on business terms. Yet in those days Europe was far better able to meet the relatively small demands of America than is America now, burdened as she is by Government expenditures since the beginning of the war to the aggregate amount of about \$36,700,000,000, to meet the stupendous demands of Europe to-day. I am confident that the solution of Europe's problems will be found by the wisdom and courage of European statesmen in facing the monetary difficulties imposed upon them by the Great War and by the enlightened, sympathetic, and friendly cooperation of the business men and workmen of America and Europe when peace is restored and the hope and fear of Government interferences are removed.

Notwithstanding these payments there remained on September 15, 1920, according to the best available estimates, an unfunded balance of probably \$3,000,000,000 to \$3,500,000,000 due from Europe, and this balance has probably increased since September 15, 1920. Inasmuch as other items probably roughly offset each other, this balance may fairly be said to represent the goods sent to Europe and the services furnished by our people in addition to the aid rendered by the Government itself.

The liquidation of Europe's large indebtedness to this country, commercial and governmental, will present serious problems, and the liquidation of part of it will extend over many years. It will be effected doubtless by the further return of securities, by expenditures of travelers abroad, by payments for services, by in-

creased foreign investments, and in very large measure, of necessity, by the importation of commodities. Unless our exporters and bankers can arrange with our investors for the necessary cooperation there should be considered with the utmost care the question how far it is wise to continue piling up an export balance which is neither paid for nor funded. As encouragement to the funding of the export balance, the Treasury favored the passage of the act approved December 24, 1919, under which regulations governing the organization of corporations to promote foreign trade have been promulgated by the Federal Reserve Board.

In the changed conditions of the world to-day, it is important that no step be taken which will interfere with the payment by foreign nations of their indebtedness to us by sending us commodities. If America is to sell her surplus products to the nations of the world, she must be prepared to accept payment through the shipment of goods. Anything which obstructs this operation will, in the circumstances, affect the prosperity of this Nation and work injury to humanity in many parts of the world. In this connection I can do no better than to quote the following excerpt from the message of the President to the Congress dated December 2, 1919:

A fundamental change has taken place with reference to the position of America in the world's affairs. The prejudice and passions engendered by decades of controversy between two schools of political and economic thought—the one believers in protection of American industries, the other believers in tariff for revenue only—must be subordinated to the single consideration of the public interest in the light of utterly changed conditions. Before the war America was heavily the debtor of the rest of the world, and the interest payments she had to make to foreign countries on American securities held abroad, the expenditures of American travelers abroad and the ocean freight charges she had to pay to others about balanced the value of her prewar favorable balance of trade. During the war America's exports have been greatly stimulated, and increased prices have increased their value. On the other hand, she has purchased a large proportion of the American securities previously held abroad, has loaned some \$9,000,000,000 to foreign Governments, and has built her own ships. Our favorable balance of trade has thus been greatly increased and Europe has been deprived of the means of meeting it heretofore existing. Europe can have only three ways of meeting the favorable balance of trade in peace times: By imports into this country of gold or of goods, or by establishing new credits. Europe is in no position at the present time to ship gold to us, nor could we contemplate large further imports of gold into this country without concern. The time has nearly passed for international governmental loans, and it will take time to develop in this country a market for foreign securities. Anything, therefore, which would tend to prevent foreign countries from settling for our exports by shipments of goods into this country could only have the effect of preventing them from paying for our exports and therefore of preventing the exports from being made. The productivity of the country greatly stimulated by the war must find an outlet by exports to foreign countries, and any measures taken to prevent imports will inevitably curtail exports, force curtailment of production, load the banking machinery of the country with

credits to carry unsold products, and produce industrial stagnation and unemployment. If we want to sell, we must be prepared to buy. Whatever, therefore, may have been our views during the period of growth of American business concerning tariff legislation we must now adjust our own economic life to a changed condition growing out of the fact that American business is full grown, and that America is the greatest capitalist in the world.

No policy of isolation will satisfy the growing needs and opportunities of America. The provincial standards and policies of the past, which have held American business as if in a strait-jacket, must yield and give way to the needs and exigencies of the new day in which we live, a day full of hope and promise for American business, if we will but take advantage of the opportunities that are ours for the asking. The recent war has ended our isolation and thrown upon us a great duty and responsibility. The United States must share the expanding world market. The United States desires for itself only equal opportunity with the other nations of the world, and that through the process of friendly cooperation and fair competition the legitimate interests of the nations concerned may be successfully and equitably adjusted.

The position of the Treasury on another important means of financing exports, namely, the sale of foreign securities in this country, was expressed in the following public statement which was issued by the Secretary on January 24, 1920, in response to an inquiry as to whether this department exercised any supervision over such issues:

During the war the Capital Issues Committee undertook to determine whether it was compatible with the national interest that certain issues should be made. The work of that committee came to an end shortly after the armistice.

During the war, including that portion of the post-armistice period during which the United States Government was financing the requirements of the Allies, the Treasury was unwilling that their Governments should compete with it by the issue of securities in our markets. Latterly, the attitude of the Treasury has been favorable to the issue under proper safeguards in our markets of sound investment securities of foreign Governments, and of States, municipalities, and private borrowers, when emanating from those countries with which the international exchange is favorable to the United States, and it may be assumed without inquiry that the Treasury does not object to such issues. But the effort must be to sell the securities, and procure the investment in them of new savings, and not to dislodge United States Government securities by inducing the holders to sell and exchange them.

The principal need of most of the countries of Europe is for capital here, rather than for bank credit. By maintaining doubtless necessary embargoes on the export of gold, the principal countries of Europe prevent their people from making payment in cash of their international debit balance, thus necessitating the settlement of that balance by investment of American capital in Europe. In the position of most of the European exchanges, resulting from these gold embargoes, even transactions which under normal conditions would be regarded as self-liquidating, and therefore appropriately to be financed by means of bank credit, will not readily be liquidated in dollars. The requirement of Europe for credit, therefore, should be met by the sale of capital issues to investors rather than by the manufacture of bank credit which could only result in unhealthy inflation of our own domestic credit structure.

Neither the Capital Issues Committee nor the Treasury has ever undertaken to authorize, approve, or pass upon the merits of any issue of securities what-

ever, whether of private companies, municipalities, State, or Governments, and the fact that any such issue was not objected to must not in any case be construed as carrying authorization, approval, or recommendation. The use of the name of the United States Government or of any department of the Government in connection with the issue of any such securities is unauthorized.

An estimate of financial obligations of foreign Governments offered in the United States from August 1, 1914 (as disclosed from unofficial information in possession of the Treasury Department), was sent by the Secretary of the Treasury to the President of the Senate under date of January 27, 1920, in response to Senate resolution No. 214, of October 17, 1919. A copy of this estimate is attached as Exhibit 33, page 349.

Suggested international financial conference.

In the latter part of January, 1920, the Secretary received a letter from the Chamber of Commerce of the United States of America requesting an expression of the Treasury's opinion on a memorial signed by 44 prominent American citizens, recommending the holding of an international conference to consider the international financial situation. The Secretary's reply was as follows:

WASHINGTON, January 28, 1920.

SIR: I have the honor to acknowledge receipt of the letter of January 22, 1920, signed by yourself and Messrs. A. C. Bedford, John H. Fahey, and Harry A. Wheeler, to whom, as a committee designated by the Chamber of Commerce of the United States, was referred a communication transmitting a memorandum signed by 44 prominent American citizens, addressed to the United States Government, the reparations commission, and the Chamber of Commerce of the United States, recommending that the Chamber of Commerce of the United States designate representatives of commerce and finance to meet with those of other countries for the purpose of examining the situation as set out in the communication and recommending such action as may be advisable.

In compliance with your request for an expression of opinion from the Treasury in respect to the observations and recommendations contained in the memorial, I may first state that the views and policy of the Treasury in respect to the international financial situation are set forth in the inclosed extracts from my annual report (pp. 11 to 14, inclusive).

With much that is contained in the memorial the Treasury is in hearty accord. Concerning the need of increased production and decreased consumption, the need of balancing governmental budgets and taking effective measures to deflate currency and credit, concerning the need of prompt and proper determinations by the reparations commission which will make possible the resumption of industrial life in Germany and the restoration of trade with Germany, there can be no doubt.

The people of the United States are being called upon by taxes and otherwise not only to meet the Government's expenditures, but to reduce the war debt. So far as the countries of Europe are concerned, the adoption of similar policies is a matter for the Governments of those countries and for the reparations commission.

In an effort to alleviate the situation the United States Government has done all that was considered advisable and practicable. Since the armistice we have extended to foreign Governments the following financial assistance :

Direct advances-----	\$2, 380, 891, 179. 65
Funds made available to those Governments through the purchase of their currencies to cover our expenditures in Europe -----	736, 481, 586. 76
Army and other governmental supplies sold on credit (approximately)-----	685, 000, 000. 00
Relief (approximately) -----	100, 000, 000. 00
Unpaid accrued interest up to Jan. 1, 1920, on Allied Government obligations-----	324, 211, 922. 00
Total -----	4, 226, 584, 688. 41

The Treasury is opposed to further governmental aid beyond that outlined in my annual report, and in my recent communication to the Ways and Means Committee of Congress with respect to the extension of interest on the Allied Government obligations held by the Government of the United States and to the supplying of relief to certain portions of Europe. The Governments of the world must now get out of banking and trade. Loans from Government to Government not only involve additional taxes or borrowings by the lending Government with the inflation attendant thereon, but also a continuance by the borrowing Government of control over private activities which only postpones sound solutions of the problems.

The Treasury is opposed to governmental control over foreign trade and finance and even more opposed to private control. It is convinced that the credits required for the economic restoration and revival of trade must be supplied through private channels; that as a necessary contribution to that end the Governments of the world must assist in the restoration of confidence, stability, and freedom of commerce by the adoption of sound fiscal policies; and that the reparations commission must adopt promptly a just and constructive policy.

The memorial which was simultaneously circulated in Europe differs in its scope and character from the one presented in the United States. The European memorial contains some passages omitted in the American memorial which apparently advocate further governmental financial assistance, and also requests the respective Governments to designate representatives to attend the proposed conference, which would give it an official character.

The Treasury has not looked with favor upon certain features of the memorial nor upon the proposed conference, being apprehensive lest the memorial and such a conference should serve to cause confusion and revive hopes (which, I am certain, are doomed to disappointment) that the American people through their Government will be called upon to assume the burdens of Europe by United States Government loans. Such matters as the suggestion of further governmental loans by the United States, the cancellation of some or all of the obligations of European Governments held by the United States Government (as contemplated by a passage contained in the European memorial but omitted from the American memorial), and the deferring of obligations of foreign Governments held by the United States to liens created in favor of loans hereafter made for reconstruction purposes, are clearly not appropriate for consideration in such a conference as is contemplated by the memorial.

The existing world-wide inflation of currency, credit, and prices is a consequence of the fact that for a period of four or five years the peoples of this earth have been consuming and destroying more than they have produced and saved, and against the wealth so destroyed the warring nations have been issuing currency and evidence of indebtedness. The consequence of the world's greatest war is profound and inescapable. It has affected all the nations of the civilized world, as well those who participated actively in the war as those who did not. The inflation exists in the neutral countries of Europe and in the Orient. It exists where there was no war debt, where the war debt was badly handled, and to some degree where the war debt was well handled.

The problems to the cure of which the distinguished gentlemen are directing their attention have been the subject in one form or another of daily study of the Treasury Department since the outbreak of the war, and especially since the signing of the armistice. These problems have at all times been complex and difficult, and simple solutions have never been possible, because they involve some factors which are not susceptible of solution by any comprehensive plan. The process of healing the wounds inflicted by the war must necessarily be slow and painful, involving as it does not only the physical restoration of industry and agriculture but as well the restoration to habits of industry of masses of men accustomed by the war to unsettlement. We must necessarily, and to a great extent, depend upon and encourage the independent activity and resourcefulness of each person affected to repair his own fortunes, with the assistance of his business connections in other countries, and also upon each individual to return to a normal life of industry and economy.

From the moment of the cessation of hostilities the Treasury of the United States has pursued a policy of looking toward the restoration as promptly as possible of normal economic conditions, the removal of governmental controls and interferences, and the restoration of individual initiative and free competition in business. It has insisted upon strict economy in governmental expenditure and upon the maintenance of taxes at a level which, with the salvage of war materials and supplies, etc., will insure the prompt retirement of the floating debt of the United States and the establishment of a fund adequate for the retirement of the funded debt in the course of a generation. The Treasury long since, with the cooperation of the Federal Reserve Board, removed the embargo on the export of gold, thus enabling American citizens and, indeed, the nations of the world, to the extent that they find credit here, to finance their purchases throughout the world in cash.

Rightly or wrongly, a different policy has been pursued in Europe. European Governments have maintained, since the cessation of hostilities, embargoes upon the export of gold. The rectification of the exchanges now adverse to Europe lies primarily in the hands of European Governments. The normal method of meeting an adverse international balance is to ship gold. The refusal to ship gold prevents the rectification of an adverse exchange. The need of gold embargoes lies in the expanded currency and credit structure of Europe. Relief would be found in disarmament, resumption of industrial life and activity, and the imposition of adequate taxes and the issue of adequate domestic loans.

The American people should not, in my opinion, be called upon to finance, and would not, in my opinion, respond to a demand that they finance, the requirements of Europe in so far as they result from the failure to take these necessary steps for the rehabilitation of credit.

Such things as international bond issues, international guaranties, and international measures for the stabilization of exchange are utterly impracticable so long as there exist inequalities of taxation and domestic financial policies in

the various countries involved; and when these inequalities no longer exist such devices will be unnecessary.

It is unthinkable that the people of a country which has been called upon to submit to so drastic a program of taxation as that adopted by the United States, which called for financing from current taxes a full one-third of the war expenditures, including loans to the Allies, should undertake to remedy the inequalities of exchange resulting from a less drastic policy of domestic taxation adopted by the other Governments of the world. The remedy for the situation is to be found not in the manufacture of bank credit in the United States for the movement of exports, a process which has already proceeded too far, but in the movement of goods, of investment securities, and, in default of goods or securities, then of gold into this country from Europe; and in order that such securities may be absorbed by investors our people must consume less and save.

The United States could not, if it would, assume the burdens of all the earth. It can not undertake to finance the requirements of Europe, because it can not shape the fiscal policies of the governments of Europe. The Government of the United States can not tax the American people to meet the deficiencies arising from the failure of the governments of Europe to balance their budgets, nor can the Government of the United States tax the American people to subsidize the business of our exporters. It can not do so by direct measures of taxation, nor can it look with composure upon the manufacture of bank credit to finance our exports when the requirements of Europe are for working capital rather than for bank credit. Lamentable as would be the effects upon our industrial life and upon Europe itself of the continued maintenance of an exchange barrier against the importation into Europe of commodities from the United States, this country can not continue to extend credits on a sufficient scale to cover our present swollen trade balance against Europe, while paying cash (gold and silver) to the countries of Central and South America and the Far East with which it has an adverse balance on its own and international account. The consequence of the maintenance by Europe of this barrier will be to force the United States to do business with those countries with which it is able to do business on a cash basis. The only other policy which the United States could adopt would be the policy of reestablishing embargoes on gold and silver and of inflating its own currency to the same extent that the currencies of Europe are inflated, with a view to lowering its exchange to a parity with theirs. This would involve taxing the whole people for the benefit of our exporters and the benefit of Europe and submitting to have imposed on the United States domestic financial policies adopted by Europe but quite contrary to those heretofore adopted by the United States. It would mean a world-wide inflation, the abandonment of the gold standard, and, ultimately, chaos.

If the peoples and governments of Europe live within their incomes, increase their production as much as possible, and limit their imports to actual necessities, foreign credits to cover adverse balances would most probably be supplied by private investors, and the demand to resort to such impracticable methods as government loans and bank credits would cease.

There is no more logical or practical step toward solving their own reconstruction problems than for the Allies to give value to their indemnity claims against Germany by reducing those claims to a determinate amount which Germany may be reasonably expected to pay, and then for Germany to issue obligations for such amount and be set free to work it out. This would increase Germany's capacity to pay, restore confidence, and improve the trade and com-

merce of the world. The maintenance of claims which can not be paid causes apprehension and serves no useful purpose.

Private investors can only make loans to the extent of their savings in excess of domestic capital requirements, and then will only make them to the extent that they have confidence in the securities or obligations offered. The adoption of the measures indicated should add to the confidence of the private investor.

If the Chamber of Commerce of the United States considers it advisable and desirable to designate representatives to attend an unofficial conference, the Treasury does not desire to offer any objection, provided the scope and character and limitations of such a conference, as well as the impossibility of United States Government action, are clearly understood.

Cordially yours,

CARTER GLASS.

HOMER L. FERGUSON, Esq.,

*President Chamber of Commerce of the United States of America,
Washington, D. C.*

The Brussels Conference.

Subsequently the suggestion that an international financial conference be convened was addressed to the Council of the League of Nations. An invitation to such a conference was extended to the United States by Sir Eric Drummond, secretary general of the league, under date of April 15, 1920, as follows:

[Société des Nations. League of Nations.]

SUNDERLAND HOUSE, CURZON STREET,
London, W. I., April 15, 1920.

YOUR EXCELLENCY: The council of the League of Nations at its meeting held in London on February 11-13 passed the following resolution:

"ARTICLE I. The League of Nations shall convene an international conference with a view to studying the financial crisis and to look for the means of remedying it and of mitigating the dangerous consequences arising from it.

"ART. II. A commission composed of members of the council nominated by the president is instructed to summon the States chiefly concerned to this conference and to convene it at the earliest possible date."

In accordance with instructions received from the Council of the League of Nations I have the honor to forward to you herewith, for transmission to the United States Government, a note and inclosure containing an invitation to be represented at the conference or to be associated with it in its work.

In view of the urgency of the matter, I am directed to ask you to be good enough to telegraph the substance of this note and inclosure to your Government with a request that the League of Nations may be informed of the reply at as early a date as may be possible.

I have the honor to be,

Your obedient servant,

ERIC DRUMMOND,
Secretary General.

His Excellency the Hon. JOHN W. DAVIS, etc.,

American Embassy, Grosvenor Gardens, London, S. W.

INVITATION.

The Council of the League of Nations begs to inform the Government of the following resolution adopted during the meetings of the council held in London February 11-13, 1920:

"ARTICLE I. The League of Nations shall convene an international conference, with a view to studying the financial crisis and to look for the means of remedying it and of mitigating the dangerous consequences arising from it.

"ARTICLE II. A commission composed of members of the council nominated by the president is instructed to summon the States chiefly concerned to this conference and to convene it at the earliest possible date."

This conference will be held at Brussels about the end of May, 1920. The council invites the following countries to send delegates to this conference:

Argentine Republic.

Australia.

Belgium.

Brazil.

Canada.

Chile.

Czechoslovakia.

Denmark.

France.

Greece.

Holland.

India.

Italy.

Japan.

New Zealand.

Norway.

Poland.

Portugal.

Roumania.

Serb-Croat-Slovene State.

South Africa.

Spain.

Sweden.

Switzerland.

United Kingdom.

Other States members of the league will be invited to send to the council as soon as possible any proposals which they would like to have considered by the conference. The council of the league is informing the United States Government of the proposed conference and is inviting them to send representatives to the conference or to be associated with the work of the conference.

The council may invite States not included in the above list to communicate to the conference full information regarding their financial and economic situation, and if necessary it will decide under what conditions these States may be heard.

The council therefore has the honor to invite the Government to send to the conference not more than three delegates conversant with public finance and banking as well as with general economic questions. The council requests that the names of these delegates may be notified to the secretary general of the League of Nations. The council will nominate the president of the conference and will supply the necessary personnel for the secretariat. The exact date of the meeting will be announced by the secretary general.

The council suggests that in order to facilitate the preparations for the conference the Government should forward to the secretary general as soon as possible any suggestions for dealing with the present financial difficulties which it may desire to submit to the conference, together with a statement indicating any steps it may have taken for dealing with the situation.

It is suggested that the general expenses in connection with the organization of the financial conference should be met by the League of Nations and the expenses and salaries of the delegations by their respective Governments.

ACCOMPANYING MEMORANDUM.

THE LEAGUE OF NATIONS,
SUNDERLAND HOUSE, CURZON STREET,
London, W. A., April 15, 1920.

The secretary general of the League of Nations is instructed by the council of the League of Nations to communicate to the United States Government the text of an invitation to an international financial conference which the council is addressing to the States members of the League of Nations. The world is at this moment in a condition of economic and financial disorder with results which are at present so serious and may in the future become so dangerous that the League of Nations can not ignore them without failing in its most essential duties. In taking the initiative of convening a financial conference to meet at Brussels within the next few weeks, the council of the league fully realizes the difficulty of the problem under consideration, and it does not ask the conference for a complete solution. It desires that the present situation should be discussed from an international point of view, and the delegates meeting at Brussels will be invited to conduct the debate on a higher plane than the mere consideration of the special problems and interests of each State. The purpose of the conference is not to recast the economic system of the world, but to obtain suggestions for its improvement by the impartial examination of the present situation and the formulation of practical conclusions by the best qualified experts in each country.

Recognizing the economic and financial importance of the United States, the council of the League of Nations expresses the earnest hope that the United States Government will wish to avail itself of the opportunity of the United States being represented at the conference or of being associated with its work.

The following reply was made :

The Government of the United States acknowledges receipt of the text of an invitation, addressed by the Council of the League of Nations to the States members of the league, to an international financial conference to be held at Brussels, and transmitted to this Government under date of April 20, 1920, by the secretary general of the League of Nations through the American ambassador to England, expressing the hope that the United States Government will wish to avail itself of the opportunity of being represented at the conference or being associated with its work.

The United States is intensely interested in the restoration of stable conditions throughout the world and hopes that an exchange of views and information by experts may assist in the betterment of existing conditions.

It is not clear to this Government whether the suggestion as to the United States taking part in the conference refers to the appointment of an official delegation representing the Government, or the appointment of unofficial delegates. This Government would not see its way to appoint an official delegation, but the Secretary of the Treasury will be glad to designate one or more unofficial representatives to attend the conference. While these delegates will not be authorized to bind or commit this Government in any way, they will be authorized to take part in the discussions of the conference, for the purpose of giving information as to the financial and economic conditions in this country and for the purpose of obtaining similar information in respect to the other countries.

The conference was postponed from time to time, but was finally set for September 24, 1920. Roland W. Boyden, the unofficial repre-

representative of the United States on the Reparation Commission, was designated as the unofficial representative of the Treasury at the conference. The following is an extract from the cable instructions sent Mr. Boyden in connection with the conference:

* * * * *

I have, with consent of Department of State, designated you an unofficial representative to attend the conference and to report concerning the same. You are authorized to take such part as you may deem advisable in the discussions of the conference for the purpose of giving information as to the financial and economic conditions in this country and for the purpose of obtaining similar information in respect to other countries, but you are not authorized to bind or commit this Government in any way.

Replies to a questionnaire and supplementary memorandum issued by the League of Nations have been sent to the secretariat of the League of Nations through Department of State and embassy in London. Suggest you communicate with embassy for purpose of obtaining this material.

Understand committee in charge of conference desires head of each delegation to make brief statement of financial and economic conditions in his country. You are authorized to make such statement on behalf of the United States in case you consider it advisable to do so.

Understand advisory committee on matters relating to the conference has proposed that questions of reparations and cancellation of war debts be not dealt with at the conference except in form of statement from chairman, and that such statement would not be open to discussion. We understand Germans and Austrians are now expected to attend conference, and assume, in view of their presence, above-mentioned questions will not be brought up. It is view of United States Treasury that such matters as further governmental loans by United States, cancellation of some or all of obligations of European Governments held by United States Government, and deferring of obligations of foreign Governments held by the United States to liens created in favor of loans subsequently made for reconstruction purposes, are clearly not appropriate for consideration of conference. You are, therefore, not authorized to enter into discussions regarding the obligations of foreign Governments held by the United States or further advances by this Government to other Governments. These matters, together with the exchange of the demand obligations held by the United States Government for long-time obligations, and the deferring of the collection by the United States of interest during the reconstruction period, are, in my opinion, matters resting exclusively between the Treasury of the United States and the treasuries of the respective Governments whose obligations we hold.

Referring to proposed agenda, you will note that information contained in replies to questionnaire covers many of the matters referred to. This Government has no external debt. Information concerning currency and external loans is set forth in replies to questionnaire. Federal taxes imposed by existing legislation are calculated to yield an annual revenue of about \$4,000,000,000. It is the policy of the Treasury that taxes in this amount should continue to be raised, but that incidence of taxation should be somewhat changed with view to acceleration of production and accumulation of capital. With exception of tariff of duties upon imports and restrictions upon importation of certain dyestuffs, and with exception also of certain restrictions upon exchange transactions with territory under control of so-called bolshevik government of Russia, foreign trade and the exchanges are unrestricted, and it is present policy of this Government that they should continue unrestricted. It is policy of Treasury and of existing legislation that Federal Government begin forthwith paying off

its war debts; measures are being taken to halt increase of inflation of credit and to encourage production and saving. In opinion of Treasury, these ends can best be attained in this country by avoiding so far as possible governmental restriction and control and by leaving private enterprise free to produce surplus necessary for reducing our national debt and for supplying Europe with materials requisite for its reconstruction. Attention should be called to fact that in addition to taxes imposed by Federal Government, State and local taxation is estimated to amount to not less than \$2,000,000,000 annually. It should be remembered also that although European Governments are indebted to this Government in amount approaching \$10,000,000,000 there remains in hands of European holders investment in property in United States amounting to several billion dollars.

Final reports of the proceedings of the conference have not been received at the time this report goes to press. Excerpts from certain of the resolutions adopted unanimously are as follows:

FROM RESOLUTIONS PROPOSED BY COMMITTEE ON PUBLIC FINANCE.

Thirty-nine nations have in turn placed before the International Financial Conference a statement of their financial position. The examination of these statements brings out the extreme gravity of the general situation of public finance throughout the world, and particularly in Europe. Their import may be summed up in the statement that 3 out of every 4 of the countries represented at this conference and 11 out of 12 of the European countries anticipate a budget deficit in the present year. Public opinion is largely responsible for this situation. The close connection between these budget deficits and the cost of living, which is causing such suffering and unrest throughout the world, is far from being grasped. Nearly every Government is being pressed to incur fresh expenditure, largely on palliatives which aggravate the very evils against which they are directed. The first step is to bring public opinion in every country to realize the essential facts of the situation and particularly the need of reestablishing public finances on a sound basis as a preliminary to the execution of those social reforms which the world demands.

Public attention should be especially drawn to the fact that the reduction of prices and the restoration of prosperity is dependent on the increase of production, and that the continual excess of Government expenditure over revenue represented by budget deficits is one of the most serious obstacles to such increase of production, as it must sooner or later involve the following consequences:

- (a) A further inflation of credit and currency.
- (b) A further depreciation in the purchasing power of the domestic currency, and a still greater instability of the foreign exchanges.
- (c) A further rise in prices and in the cost of living.

The country which accepts the policy of budget deficits is treading the slippery path which leads to general ruin; to escape from that path, no sacrifice is too great.

It is, therefore, imperative that every Government should, as the first social and financial reform, on which all others depend:

- (a) Restrict its ordinary recurrent expenditure, including the service of the debt, to such an amount as can be covered by its ordinary revenue.
- (b) Rigidly reducing all expenditure on armaments in so far as such reduction is compatible with the preservation of national security.
- (c) Abandon all unproductive extraordinary expenditure.

(d) Restrict even productive extraordinary expenditure to the lowest possible amount.

The supreme council of the allied powers in its pronouncement on the 8th of March declared that "Armies should everywhere be reduced to a peace footing; that armaments should be limited to the lowest possible figure compatible with national security and that the League of Nations should be invited to consider, as soon as possible, proposals to this end." The statements presented to the conference show that, on an average, some 20 per cent of the national expenditure is still being devoted to the maintenance of armaments and the preparations for war. The conference desires to affirm with the utmost emphasis that the world can not afford this expenditure. Only by a frank policy of mutual cooperation can the nations hope to regain their old prosperity; and in order to secure that result the whole resources of each country must be devoted to strictly productive purposes. The conference accordingly recommends most earnestly to the council of the League of Nations the desirability of conferring at once with the several Governments concerned, with a view to securing a general and agreed reduction of the crushing burden which, on their existing scale, armaments still impose on the impoverished peoples of the world, sapping their resources and imperilling their recovery from the ravages of war. The conference hopes that the assembly of the league which is about to meet will take energetic action to this end.

While recognizing the practical difficulties in the way of immediate action, in all cases, the conference considers that every Government should abandon at the earliest practicable date all uneconomical and artificial measures which conceal from the people the true economic situation. Such measures include:

(a) The artificial cheapening of bread and other foodstuffs, and of coal and other materials, by selling them below cost price to the public, and the provision of unemployment doles of such a character as to demoralize instead of encouraging industry.

(b) The maintenance of railway fares, postal rates, and charges for other Government services on a basis which is insufficient to cover the cost of the services given, including annual charges on capital account.

In so far as, after every effort has been made, it is impossible to cut down expenditure within the limits of existing revenues, fresh taxation must be imposed to meet the deficit and this process must be ruthlessly continued until the revenue is at least sufficient to meet the full amount of the recurrent ordinary expenditure. The conference considers that the relative advantages of the various possible means of increasing the national revenue, whether by direct or indirect taxation or by a capital levy (to be devoted to the repayment of debt), depend upon the special economic conditions obtaining in each country, and that in consequence each country must decide for itself on the methods which are best suited to its own internal economy.

If the above principles are accepted and applied, loans will not be required for recurrent ordinary expenditure; borrowing for that purpose must cease. In a number of countries, however, although the ordinary charges can be met from revenue, heavy extraordinary expenditure must at the present time be undertaken on capital account. This applies more especially in the case of those countries devastated during the war, whose reconstruction charges can not possibly be met from ordinary receipts. The restoration of the devastated areas is of capital importance for the reestablishment of normal economic conditions; and loans for this purpose are not only unavoidable but justifiable. But in view of the shortage of capital it will be difficult to secure the sums required even for this purpose and only the most urgent schemes should be pressed forward immediately.

The means by which loans are raised are no less important than the purposes to which they are destined. In future the loans which are required for urgent capital purposes must be met out of the real savings of the people. But those savings have, as it were, been pledged for many years ahead by the credits created during the war, and the first step to raising fresh money must be to fund the undigested floating obligations with which the markets are burdened. Those principles apply both to internal and to external borrowing, and in regard to the latter, we suggest that it would be in the general interest for the creditor countries to give such facilities as may be possible to the debtor countries to fund their floating obligations at the earliest possible date.

* * * * *

FROM RESOLUTIONS PROPOSED BY COMMITTEE ON INTERNATIONAL TRADE.

The International Financial Conference affirms that the first condition for the resumption of international trade is the restoration of real peace, the conclusion of the wars which are still being waged, and the assured maintenance of peace for the future. The continuance of the atmosphere of war and of preparations for war is fatal to the development of that mutual trust which is essential to the resumption of normal trading relations. The security of internal conditions is scarcely less important, as foreign trade can not prosper in a country whose internal conditions do not inspire confidence. The conference trusts that the League of Nations will lose no opportunity to secure the full restoration and continued maintenance of peace.

The International Financial Conference affirms that the improvement of the financial position largely depends on the general restoration as soon as possible of good will between the various nations, and in particular it indorses the declaration of the supreme council of the 8th March last "that the States which have been created or enlarged as the result of the war should at once reestablish full and friendly cooperation and arrange for the 'unrestricted interchange of commodities in order that the essential unity of European economic life may not be impaired by the erection of artificial economic barriers.'"

The conference recommends that within such limits and at such time as may appear possible each country should aim at the progressive restoration of that freedom of commerce which prevailed before the war, including the withdrawal of artificial restrictions on and discriminations of price against external trade.

The International Financial Conference expresses its conviction that the instability of exchanges constitutes a great hindrance to the resumption of normal international trade.

The International Financial Conference would welcome any action which can be taken by the League of Nations to enable the countries, which under present conditions can not purchase the necessary supplies for their reconstruction, temporarily to obtain commercial credits on an approved basis for this purpose.

The International Financial Conference expresses the conviction that the repair, improvement, and economical use of the transport systems of the world, and particularly of countries affected by the war, are of vital importance to the restoration of international trade.

FROM RESOLUTIONS PROPOSED BY COMMITTEE ON CURRENCY AND EXCHANGE.

* * * * *

1. It is of the utmost importance that the growth of inflation should be stopped. * * *

2. Governments must limit their expenditure to their revenue (we are not considering here the finance of reconstructing devastated areas).

3. Banks, and especially banks of issue, should be freed from political pressure and should be conducted solely on the lines of prudent finance. * * *
4. The creation of additional credit should cease, and Governments and municipalities should not only not increase their floating debts but should begin to repay or fund them by degrees. * * *
5. Until credit can be controlled merely by the normal influence of the rate of interest it should only be granted for real economic needs. * * *
6. Commerce should as soon as possible be freed from control and impediments to international trade removed. * * *
7. All superfluous expenditure should be avoided. * * *
8. It is highly desirable that the countries which have lapsed from an effective gold standard should return thereto. * * *
9. It is useless to attempt to fix the ratio of existing fiduciary currencies to their nominal gold value. * * *
10. Deflation, if and when undertaken, must be carried out gradually and with great caution. * * *
11. We can not recommend any attempt to stabilize the value of gold, and we gravely doubt whether such attempt could succeed. * * *
12. We believe that neither an international currency nor an international unit of account would serve any useful purpose. * * *
13. We can find no justification for supporting the idea that foreign holders of bank notes or bank balances should be treated differently to native holders.
14. In countries where there is no central bank of issue one should be established. * * *
15. Attempts to limit fluctuations in exchange by imposing artificial control on exchange operations are futile and mischievous. * * *
16. A committee should be set up both for continuing the collection of the valuable financial statistics that have been furnished for this conference and also for the further investigation of currency policy.

FROM RESOLUTIONS PROPOSED BY COMMITTEE ON INTERNATIONAL CREDITS.

* * * * *

The committee is of opinion that in principle the resources out of which this assistance is to be provided should be found from the savings of the lending countries and must not result in undue increase of the fiduciary circulation—that is to say, in the creation or extension of a disproportion between means of payment and the genuine requirements of business.

The committee believes, on the other hand, that this assistance can only be effectively accorded to countries which are prepared to assist one another in the restoration of economic life and to make every effort to bring about within their own frontiers the sincere collaboration of all groups of citizens and to secure conditions which give to work and thrift liberty to produce their full results.

The committee does not believe that, apart from particular decisions dictated by national interests or by considerations of humanity, credits should be accorded directly by Governments.

It appears to the committee that one of the chief obstacles to the granting of credits is the absence in borrowing countries of sufficient security for ultimate repayment. The committee therefore studied with attention, in the light of the general considerations enumerated above, all the proposals presented with a view to creating guarantees which would provide satisfactory security for exporters.

The committee has been forced to recognize that no single system could by itself suffice to provide for the many different needs of the various countries.

and that it is necessary to indicate a series of measures sufficiently elastic to be adapted afterwards to every variety of circumstances.

* * * * *

EUROPEAN RELIEF.

Although the Treasury strongly held the opinion that this Government should, at the earliest possible moment, discontinue lending money to other Governments and that the reconstruction of Europe could not be accomplished by loans from Government to Government, the department nevertheless was forced to the conclusion that certain limited measures by this Government were necessary for the purpose of keeping the destitute populations of Europe alive through last winter. The Secretary of the Treasury accordingly wrote the chairman of the Committee on Ways and Means of the House of Representatives as follows, under date of December 18, 1919:

WASHINGTON, *December 18, 1919.*

MY DEAR CONGRESSMAN: Reports and urgent advices received from reliable sources as to the shortage and utter lack of food in certain portions of Europe are so serious that I feel it my duty to lay some of the facts before Congress. Although the shortage of food in Europe as a whole is less this winter than last, there is in parts of Europe (especially Austria, Poland, and Armenia) a most dangerous shortage of food, clothing, and fuel. In these places there has not been sufficient recovery of economic life to enable the people to produce enough to meet their requirements or to enable them to buy or to borrow sufficient food and clothing to keep them alive. In certain sections whole populations are now dangerously weak and hopeless from hunger. The death rate caused by starvation is already increasing to an alarming extent, and unless something is done great numbers will die from starvation or cold. It is unnecessary to elaborate the grave effects which this may have on the social order and the economic fabric, not only in the places where these conditions exist, but in the whole of Europe and even the world. The British Government has informed this Government that it is prepared to share with us to the extent of its ability in the relief of Austria, which, according to our information, is in the most desperate condition.

As you are aware, the Treasury has strongly held the opinion that this Government should, at the earliest possible moment, discontinue lending money to other Governments. I have urged that private initiative should be restored and that credits for purchases in the United States should be obtained through private channels. In discussing in my annual report the international financial situation I said that "we are prone to overlook the vast recuperative power inherent in any country which, though devastated, has not been depopulated, *and the people of which are not starved afterwards.*" I am reluctantly convinced now that in order to meet the urgent necessity of keeping the destitute populations of Europe alive through this winter there must be taken at once measures for their relief. The resources and efficiency of the private charities of this country are not adequate to the necessities which can not in the nature of the case be financed through ordinary private channels. I therefore have the honor to request that your committee afford me the opportunity of laying before it any information which it may desire and which I am able to furnish, in order that appropriate legislation may be considered at once.

The emergency is of such magnitude; the dictates of humanity are so pressing; the possible effects of the present situation upon the social, economic, and financial rehabilitation of Europe, and consequently upon the trade and prosperity of the world, in which the United States has so great a stake, may be of such consequence that I do not hesitate from the standpoint of humanity and public policy to assume the responsibility of appealing to the humane and practical sentiments of the Congress to take immediate steps to furnish from our surplus the food necessary to save the situation. We can not and must not now fail to supply some food on credit to save human lives and safeguard civilization, for which we have already expended so many lives and billions of dollars.

Cordially yours,

CARTER GLASS.

HON. JOSEPH W. FORDNEY,

Chairman of Ways and Means Committee,

House of Representatives,

Washington, D. C.

January 7, 1920, the Secretary again wrote to the chairman of the Committee on Ways and Means, as follows:

WASHINGTON, January 7, 1920.

MY DEAR CONGRESSMAN: With reference to my letter of December 18 to you, calling your attention to the desperate situation in certain portions of Europe where urgent relief is required, and requesting an opportunity to lay before your committee further information and proposals for legislation which will enable this Government to assist in alleviating that situation, I have the honor to submit herewith a summary of the many reports and dispatches from various reliable sources as to the situation in those parts of Europe where relief is so urgently necessary; namely, Poland, Austria, and Armenia. I also have the honor to submit a proposed legislative authorization which, in my opinion, would enable this country to give the assistance which is imperatively required.

Poland.—According to the best information obtainable, the minimum grain requirement necessary to carry Poland until the next harvest, and which can not be filled anywhere but in the United States, is 300,000 tons. This deficiency is due to a partial failure of the wheat crop and to a lack of fuel for thrashing. Poland is at present living under a hand-to-mouth régime, which can be remedied only by a steady flow of imports from the only available surplus stocks of food; namely, those in the United States. The potato crop, which is the staple food of the poorer classes, has been destroyed by frosts to the extent of 50 per cent in many districts, as it is impossible properly to care for potatoes in transit due to delays in transportation. Poland has been unable to procure clothing since the beginning of the war, and the result is that during the past five years practically all clothing has been worn out and has not yet been replaced.

The food situation in Poland is so serious that the European Children's Relief Fund has felt obliged to loan Poland small quantities of flour from the stocks intended for child feeding. The assistance to the children of Poland rendered through this fund, which feeds 1,300,000 children daily, is claimed by its administrators there to have been a powerful means of averting revolutions up to this time, and the failure of the Polish Government properly to ration its adult population has already caused demonstrations by the Reds in Warsaw. The cost of supplying the 300,000-ton grain minimum would be approximately \$50,000,000. It is possible that a portion of this requirement may be met through private charity and that the British Government may be able

to supply some tonnage for the transportation of this grain from the United States. In so far as this outside aid is received, the assistance to be furnished by the United States would be diminished.

Austria.—In Austria the acute misery and suffering are probably greater than in Poland. Two-tenths only of the present Austrian State are self-supporting in food, and the remaining eight-tenths, even before the war, produced food to supply themselves for six months of the year at most and were dependent for the remaining six months upon importations. Consequently, the situation to-day, especially in Vienna, has become exceedingly grave, due to a shortage of coal and food. There is every indication that unless some relief is afforded immediately the population can not withstand the strain of conditions that are already well-nigh intolerable. Coal and food rations for domestic consumption have been reduced below a safety minimum, and it is only a question of days before existing stocks will be exhausted, when even the present reduced rations will become impossible unless new supplies are obtained. Already the forests in the neighborhood of Vienna are being cut down for fuel, as are also many of the wooden dwellings. Famine riots have broken out in some Austrian towns during the past months, and although the population of Vienna has shown admirable patience this city and large parts of Austria are faced with the danger of a complete breakdown, which, according to the chancellor, Dr. Renner, must unavoidably occur by the end of January unless outside assistance is obtained.

What the effect of a general social breakdown in Austria would be can, of course, only be conjectured. That it would be confined to Austria, however, seems highly improbable, and if it spread to Germany, Poland, and possibly all of Europe the result would be no less than a general disintegration of political cohesion in western Europe. Such an event would be fraught with the most serious consequences for the United States, and would certainly leave in its wake severe suffering and thousands of deaths among the poorer classes of the people.

The British Government has definitely proposed to join, to the extent of its ability, with the United States Government in furnishing relief to Austria. The British Government has explained, however, that with the present depreciation in its exchange, it could not supply dollars for the purchase of food in the United States, but it can no doubt supply the requisite tonnage and some relief supplies obtainable in the United Kingdom. The total estimated requirements for Austrian relief are \$100,000,000, but the British participation should reduce the amount of relief to be supplied from the United States to Austria to about \$70,000,000.

Armenia.—Although the population of Armenia is small, the situation there is desperate, and the winter season will see many deaths unless adequate food, medical supplies, and clothing are received from outside sources. It has been estimated that a bare minimum program of 7,500 tons of flour, together with other necessities, amounting in all to \$500,000 monthly, will be required to meet the situation, and if deliveries are not maintained after the severe winter weather sets in orphanages will close and great numbers of deaths will result. At present there are 700,000 destitute people being kept alive by this program, and partial aid is being furnished to many others.

As there are private charitable funds available for Armenia, it is probable that the amount of relief which the United States Government would be called upon to furnish to Armenia would not exceed \$1,000,000.

In addition to the three above-mentioned countries or territories where the requirements are most urgent, it may be necessary to furnish some supplies to

other sections of Europe (outside the boundaries of Germany) where the situation is not now so desperate but where food supplies will be required to carry them through until the next harvest. It is estimated that \$25,000,000 would suffice for this purpose.

In this summary of conditions no attempt has been made to cover all the ground or even touch on all the aspects of the situation in the countries mentioned. Data in the form of consular dispatches and telegrams from various official and unofficial American representatives abroad exist in abundance to substantiate the foregoing summary of the dire need of the people of these countries for immediate relief.

In conclusion I may say that while it is impossible now to estimate definitely just what will be required, I am of the opinion, from the information so far obtainable, that a minimum of \$125,000,000 and a maximum of \$200,000,000 would suffice to supply the portion of relief to be assumed by this Government, provided Congress should grant the necessary authorization to participate in alleviating this serious and desperate situation.

As any relief undertaking, so far as concerns the United States, would be primarily a question of supplying food, and as it is advisable that the purchases of food for Europe should be handled and coordinated in such a manner as not to increase the prices of food in the United States, I am recommending in the proposed legislation that the United States Grain Corporation be empowered to purchase, sell, and deliver food and relief supplies for Europe up to the amount of \$150,000,000, and that for the supplies so furnished credit may be extended by the Grain Corporation. If this amount proves insufficient to meet the minimum requirements, the Treasury will again submit the matter to Congress for such action as it may deem expedient.

If you desire further information than that contained herein, Assistant Secretary Davis and Mr. Hoover, who are most conversant with this situation, will be glad to appear before your committee on the 10th instant at 10.30 a. m.

Cordially yours,

CARTER GLASS.

HON. JOSEPH W. FORDNEY,

Chairman of Ways and Means Committee,

House of Representatives.

SUGGESTED DRAFT OF A BILL PROVIDING FOR THE RELIEF OF POPULATIONS IN EUROPE
AND IN COUNTRIES CONTIGUOUS THERETO.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That for the participation of the Government of the United States in the furnishing of foodstuffs and other relief supplies and for the transportation thereof to populations in Europe and countries contiguous thereto, the United States Grain Corporation is authorized, with the approval of the Secretary of the Treasury and to an amount not exceeding \$150,000,000, to buy or contract for the purchase of wheat of the crops of 1918-1919 and flour produced therefrom and other food and food products and relief supplies necessary for the purposes of this act, and to sell, consign, or contract for the sale, and to deliver or contract for the delivery of the same, for cash or on credit, at such prices and on such terms or conditions as may be necessary to carry out the purposes of this act and to relieve populations in the countries of Europe or countries contiguous thereto: *Provided,* That an audited itemized report of the receipts and expenditures of the United States Grain Corporation for the purposes authorized by this act shall be submitted to Congress not later than December 31, 1920.

The following statute entitled "An act providing for the relief of populations in Europe and in countries contiguous thereto suffering for want of food," was subsequently enacted by the Congress and approved by the President March 30, 1920:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, for the participation of the Government of the United States in the furnishing of foodstuffs to populations in Europe and countries contiguous thereto suffering for the want of food, the United States Grain Corporation is hereby authorized, with the approval of the Secretary of the Treasury, to sell or dispose of flour now in its possession, not to exceed five million barrels, for cash or on credit, at such prices and on such terms or conditions as may be necessary to carry out the purposes of this act and to relieve populations in the countries of Europe or countries contiguous thereto suffering for the want of food: Provided, That an audited, itemized report of the receipts and expenditures of the United States Grain Corporation for the purposes authorized by this act shall be submitted to Congress not later than the first Monday in December, 1920.

Under this authority the Grain Corporation, with the approval of the Secretary of the Treasury, sold flour on credit to the Governments of Armenia, Austria, the Czecho-Slovak Republic, Hungary, and Poland. At the date of this report the obligations received by the Grain Corporation from these Governments have not been turned over to the Treasury. They are understood, however, to aggregate approximately \$57,000,000 in face amount.

THE DOMESTIC CREDIT SITUATION.

The efforts of the Federal Reserve Board and the Federal reserve banks to control credit and avoid undue expansion of loans are clearly indicated in the statements issued from time to time by the board. The fundamental fact is that, notwithstanding the increased rates of discount and the endeavor to discourage the use of credit for speculative and nonessential purposes, the year has been marked by an unprecedented increase in loans at the Federal reserve banks, at member banks, and banking institutions generally. Instead of a curtailment of credit, there has been a tremendous expansion. The situation was outlined by the Federal Reserve Board in its public statement of October 17, 1920, which is as follows:

In view of the representations which have recently been made to the board as to the unavailability of credit in agricultural sections the board requested information concerning credit conditions throughout the country from the chairmen and governors of Federal reserve banks at their usual autumn conference here this week. The board is advised that credit has been steadily available for the successive seasonal requirements of agriculture, as well as for the needs of commerce and industry, and that there is no ground for expecting that its availability for these purposes will not continue. The present improved credit situation is due in part to the timely steps taken last spring, following

conferences between the board and governors and directors of Federal reserve banks to provide credit for crop moving requirements, and in part to the subsequent improvement in transportation reported from all districts except in a few localities.

Between January 2 and October 1 of the present year about 800 leading member banks from all sections of the country which report their condition to the board weekly and which represent approximately 70 per cent of member bank resources, have increased their loans for agricultural, industrial, and commercial purposes by an amount exceeding \$1,800,000,000. This great increase in the credit extended to their customers has in the main been made possible by the accommodation extended member banks by the Federal reserve banks.

During the same period, the 12 Federal reserve banks have increased their holdings of agricultural and commercial paper by more than \$500,000,000, and from January 23 to October 1, 1920, increased their issues of Federal reserve notes by over \$460,000,000. At the same time, Federal reserve banks having surplus funds have extended accommodation to Federal reserve banks in agricultural and live-stock districts by means of discounts, aggregating on October 1, over \$225,000,000.

The disturbances in price and demand which have recently manifested themselves in markets for various agricultural and other commodities, not only in the United States but in other countries as well, are inevitable and unavoidable consequences of the economic derangements occasioned by the World War. The United States continue to have a heavy volume of exports although foreign demand for certain agricultural staples has somewhat decreased. But the chief market for our raw and manufactured products is at home, and our present huge crops of immense value may be expected gradually and in regular course to move from producers to consumers. The recent census, reckoning our population at 105,000,000, emphasizes anew our own capacity as consumers irrespective of the demands of other countries.

In response to the Senate resolution adopted May 17, 1920, the Federal Reserve Board under date of May 25, 1920, made the following statement of its attitude toward the expansion of credit and the use of credit for crop-moving purposes:

WASHINGTON, May 25, 1920.

SIR: On May 17, 1920, the Senate adopted the following resolution:

"Resolved, That the Federal Reserve Board be directed to advise the Senate what steps it purposes to take or to recommend to the member banks of the Federal Reserve System to meet the existing inflation of currency and credits and consequent high prices, and what further steps it purposes to take or recommend to mobilize credits in order to move the 1920 crop."

In response the board desires to say that it has recognized for many months past that the expansion of bank credits in this country was proceeding at a rate not warranted by the production and consumption of goods. It has repeatedly admonished the Federal reserve banks that influence should be exerted upon the member banks to induce them to avoid undue expansion of loans and to keep their volume of outstanding credits within moderate bounds.

Beginning six months ago, the rates of discount on various classes of paper at the Federal reserve banks were advanced. During the latter part of January the present rates were put into effect. These advances, while undoubtedly checking credit transactions which otherwise would have been made, have not been entirely effective in bringing about the reduction in loans desired and which might normally have been expected during the early months of the year.

Liquidation during these months is entirely natural and healthy, and is necessary in order that the banks may be prepared to meet the demands made upon them during the crop making and harvesting seasons, but there has been no such liquidation, and, on the contrary, commercial loans have steadily increased. Thus it appears that the public has anticipated demands for banking credit which are usually made later on in the year. The average reserves of the Federal reserve banks are now a little over 42½ per cent, as against 45 per cent at the beginning of the year and about 51 per cent 12 months ago.

The Federal advisory council, which is composed of one member from each Federal reserve district, elected annually by the board of directors of the Federal reserve bank, is required by section 12 of the Federal reserve act to meet in Washington at least four times each year. The council is authorized "to confer directly with the Federal Reserve Board on general business conditions; to make oral or written representations concerning matters within the jurisdiction of said board; to call for information and to make recommendations in regard to discount rates, rediscount business, note issues, reserve conditions in the various districts, the purchase and sale of gold or securities by reserve banks, open-market operations by said banks, and the general affairs of the reserve banking system."

Upon receipt of a notice that the council would hold its regular meeting on May 17, the board extended an invitation to the three class A directors of each Federal reserve bank, who are the representatives of the stockholding banks, to come to Washington at the same time for conference with the Federal Reserve Board and the Federal advisory council. This conference was held on the 18th instant, and it was developed at the meeting that the present credit expansion is due in great part to the abnormally high prices of goods and commodities now prevailing throughout the country and to the congestion of foodstuffs and essential raw materials at or near points of production because of lack of transportation facilities.

The board is convinced that if the unsold portions of last year's crops can be brought to market before the new crop matures, the liquidation of credits which are now tied up in carrying the old crops will be sufficient to offset to a considerable degree the credit demands which will be made upon the banks in moving the crop of 1920.

At the conference above referred to the board's views were outlined by its governor substantially as follows: The member banks should lean less heavily upon the Federal reserve banks and rely more upon their own resources, unnecessary and habitual borrowings should be discouraged, and the liquidation of long-standing, nonessential loans should proceed. Banks were cautioned, however, that drastic steps should be avoided and that the methods adopted should be orderly, for gradual liquidation will result in permanent improvement, while too rapid deflation would be injurious and should be avoided. The board pointed out the necessity for extending such credits as may be necessary to promote essential production, especially of foodstuffs, and that if for any reason it should prove impracticable to increase essential production, there should be greater economy in consumption and more moderation in the use of credit. The problem of the banking system of the country is to check further expansion and to bring about a normal and healthy liquidation without curtailing essential production and without shock to industry, and, as far as possible, without disturbance of legitimate commerce and business. In order to effect this it seems necessary to distinguish between essential and nonessential loans; but the Federal Reserve Board feels it would be a most difficult task, which it should not undertake, to attempt by general rule of country-wide appli-

cation to make this distinction. During the war there was a broad underlying principle that essentials must be "necessary or contributory to the conduct of the war," but notwithstanding the sharp outline of this principle much difficulty was experienced by the various war boards in defining essentials and non-essentials. All the more difficult would it be for the Federal Reserve Board to make such a general definition in the present circumstances.

Section 13 of the Federal reserve act defines the eligibility of paper for discount by the Federal reserve banks and lays down a general rule that any paper maturing within the time prescribed and "issued or drawn for agricultural, industrial, or commercial purposes, or the proceeds of which have been used, or are to be used, for such purposes" is eligible. No expressed condition is made regarding the essential or nonessential character of the transactions giving rise to notes which may be offered for discount and the Federal Reserve Board is not required, and properly could not be expected, generally to adopt such a criterion of eligibility. It is too much a matter of local conditions and local knowledge to justify at this time any general country-wide ruling by the board even if such a ruling were deemed helpful.

On the other hand, there is nothing in the Federal reserve act which requires a Federal reserve bank to make any investment or to rediscount any particular paper or class of paper. The language of both sections 13 and 14 is permissive only. Section 4 of the Federal reserve act, however, requires the directors of a Federal reserve bank to administer its affairs "fairly and impartially and without discrimination in favor of or against any member bank," and subject to the provisions of law and the orders of the Federal Reserve Board to extend "to each member bank such discounts, advancements, and accommodations as may be safely and reasonably made with due regard for the claims and demands of other member banks." Thus the directors of a Federal reserve bank have the power to limit the volume and character of loans which in their judgment may be safely and reasonably made to any member bank.

The recent amendment to paragraph (d) of section 14 distinctly authorizes each Federal reserve bank on its own account, without reference to action taken by any other Federal reserve bank, to establish a normal discount or credit line for each member bank, and permits the imposition of graduated rates on discount lines in excess of the normal line. This amendment, however, does not repeal or modify sections 4 and 13, and a Federal reserve bank is still free to decline to discount any paper which in its judgment does not constitute a desirable investment for it or which in its opinion would not constitute a safe and reasonable investment within the meaning of section 4.

It is the view of the board, however, that while Federal reserve banks may properly undertake in their transactions with member banks to discriminate between essential and nonessential loans, nevertheless that discrimination might much better be made at the source by the member banks themselves. The individual banker comes in direct contact with his customers; he is better qualified than anyone else to advise the customer, because of his familiarity, not only with the customer's business, but with the general business conditions and needs in his immediate locality. In making loans he is bound by no general rule of law as to the character of the purpose for which a loan is being asked. He is entirely free to exercise discretion, and can make one loan and decline another, as his judgment may dictate. He can estimate with a fair degree of accuracy the legitimate demands for credit which are liable to be made upon him, as well as the fluctuations in the volume of his deposits. He knows what industries sustain his community, and is thus qualified to pass upon the essential or nonessential character of loans offered him. He knows, or should know,

what rediscount line he may reasonably expect of his Federal reserve bank, and he ought not to regard this line as a permanent addition to his capital. With knowledge of the limitations or penalties put upon his borrowings from the Federal reserve banks the banker may be depended upon to use a more discriminating judgment in granting credit accommodations to his customers, and that judgment he must exercise if the present situation is to be remedied fundamentally.

It is true that under existing conditions the volume of credit required in any transaction is much greater than was the case in prewar times; but it is also true that the resources of the member and nonmember banks would be ample to take care of the essential business of the country, and to a large extent of nonessentials as well, if there were a freer flow of goods and credit. If "frozen loans" were liquefied, and if commodities which are held back either for speculative purposes or because of lack of transportation facilities should go to the markets, and if large stocks of merchandise should be reduced, the resultant release of credits would have a most beneficial effect upon the general situation. In the meantime everything must be done to expedite the release of these credits and to restrict nonessential credits in future.

While the problem of credit regulation and control is national and even international in its scope, yet in the last analysis it is merely an aggregation of individual problems, and the proper working out of the situation must depend upon the public and upon the banks which deal with the public. The public must be made to realize the necessity of economy in expenditures and in consequent demands for banking credit. The banks themselves are best able to impress the importance of this policy upon the public.

For the further information of the Senate the board quotes from the report of the Federal advisory council made to it on May 18, signed by James B. Forgan, president.

"The council has given consideration to the matters included in your communication of April 17 and begs to reply thereto in the following manner, following the order set out by you:

"(a) Causes of continued expansion of credits and of Federal note issues."

There are many contributing causes, of which the following may be regarded as paramount:

1. We recognize, of course, that the first cause is the great war.
2. Great extravagance, national, municipal, and individual.
3. Inefficiency and indifference of labor, resulting in lessening production.
4. A shortage of transportation facilities, thus preventing the normal movement of commodities.
5. The vicious circle of increasing wages and prices.

(b) "How can the reserve position of the Federal reserve banks be materially strengthened before the seasonal demand sets in next fall without undue disturbance of the processes of production and distribution?"

By urging upon member banks through the Federal reserve banks the wisdom of showing borrowers the necessity of the curtailment of general credits, and especially for nonessential uses, as well as continuing to discourage loans for capital and speculative purposes; by checking excessive borrowings through the application of higher rates.

(c) "If steps can not be taken at this time leading to a more normal proportion between the volume of credits and the volume of goods, when can they be taken?"

In our opinion steps should be taken now, as outlined in answer to the last question.

(d) "What is the effect upon the general situation of the increased Treasury borrowings and what should be the policy of the Federal reserve banks in establishing rates of discount on paper secured by certificates of indebtedness?"

It is obvious that the borrowings of the Treasury have the same effect upon the general credit situation as those of other borrowers. The council would suggest the wisdom of congressional relief from the burden of Government financing by a policy of rigid economy; the revision of the tax laws for the sake of a more equitable distribution of the burden without reducing the revenue; the enactment of the budget system, the budget to include provision for the gradual payment of the short-time obligations of the Treasury. These would of necessity preclude unwise appropriations, such as the proposed soldiers' bonus.

In view of the large volume of Treasury certificates of indebtedness carried by member banks at the instance of the Treasury Department, we believe that rates established by the Federal reserve banks on paper secured by them should not be materially greater than the rates borne by the certificates.

The board feels assured that the banks of the country now realize the necessity of more conservatism in extending credits and of a reasonable reduction in the volume of credits now outstanding. The board will not hesitate, so far as it may be necessary, to bring to bear all its statutory powers in regulating the volume of credit, but wishes to point out that the more vital problems relating to the movement of the 1920 crop are physical rather than financial.

This was the unanimous view of those present at the conference on the 18th instant, at which the following resolution was adopted:

"The whole country is suffering from inflation of prices with the consequent inflation of credit. From reports made by the members of this conference, representing every section of the country, it is obvious that great sums are tied up in products which if marketed would relieve necessity, tend to reduce the price level and relieve the strain on our credit system.

"This congestion of freight is found in practically all of the large railroad centers and shipping ports. It arises chiefly from inadequate transportation facilities available at this time, and is seriously crippling business. We are informed that the per ton-mile of freight increased in three years—1916, 1917, and 1918—47 per cent, while the freight cars in service during the same period increased 1.9 per cent.

"A striking necessity exists which can only be relieved through the upbuilding of the credit of the railroads. This must come through adequate and prompt increase in freight rates. Any delay means the paying of greater cost directly and indirectly, and places a burden on the credit system which in the approaching time for seasonal expansion may cause abnormal strain. Even under the load of war inflation, high-price level, and extravagances the bank reserves would probably be sufficient if quick transportation could be assured during the time of the greatest strain.

"*Therefore be it resolved*, That this conference urge as the most important remedies that the Interstate Commerce Commission and the United States Shipping Board give increased rates and adequate facilities such immediate effect as may be warranted under their authority and that a committee of five, representing the various sections of the country, be appointed by the chairman to present this resolution to the Interstate Commerce Commission and the United States Shipping Board, with such verbal presentation as may seem appropriate to the committee."

Much will depend upon the restoration of the normal efficiency of railroad and steamship lines. If adequate transportation facilities can be provided, the

board sees no occasion for apprehension in connection with the movement of crops now being grown.

Respectfully,

W. P. G. HARDING, *Governor*.

THE PRESIDENT OF THE SENATE.

SOLDIERS' BONUS.

The Treasury's attitude on the proposed soldiers' bonus has already been indicated. It is stated in greater detail in the testimony of the Secretary and the Fiscal Assistant Secretary before the Committee on Ways and Means of the House of Representatives on March 11, 1920. The Secretary's opinion was asked as to the wisdom of an issue of bonds in an amount of from \$1,000,000,000 to \$2,000,000,000 in order to pay a bonus, the probable effect it would have upon prices, upon credit, and upon the issues of bonds and notes now outstanding. He expressed his views as follows:

The proposal to expend a sum ranging from \$1,000,000,000 to \$2,000,000,000 is a very serious one for the people of the Nation at this time, and the proposal to meet such an expenditure by the sale of bonds presents or suggests very grave possibilities.

I am not alarmed as to the conditions of the Nation's finances at present. I do not think that the situation is critical. I believe that with economy on the part of individuals throughout the Nation, with the avoidance of waste and extravagant living, with economy on the part of Congress in making appropriations, and prudence in handling our financial problems, this Nation, in spite of disturbed European conditions and their effects here, can proceed in an orderly fashion. I think, however, that to float bonds in the amount of \$2,000,000,000, or to meet such an additional expenditure out of taxes, will present very grave problems and might bring disaster.

I do not know how we could float bonds for \$2,000,000,000 at rates of interest borne by the existing bonds, and I do not know just what would happen if we undertook to float bonds for \$2,000,000,000 at a higher rate of interest. I assume that there would be very great difficulty in floating bonds at existing rates of interest. I do not know that we could sell \$2,000,000,000 worth of bonds even at a higher rate of interest. I am confident that if such volume of bonds were floated it would depress the value of the obligations of the Government now held by 20,000,000 or 30,000,000 of our citizens; to what point, of course, I can not say. I think that it would lead to a further credit expansion, which has been one of the factors in the upward movement of prices. It would, therefore, add to the cost of living of the 110,000,000 people of the Nation; and one of the many results of this would be that laborers would say, "The cost of living is rising and we must have more wages." The vicious price and wage circles would persist and extend.

We are prudently doing what we can to bring about something like a gradual return toward a stable condition of industry and finance. I am not prepared to say that we shall ever reach the prewar normal; but I imagine everybody wishes the country to return to a stable condition. We are having difficulty enough at present in effecting this result.

A proposal to float bonds as suggested would, in my judgment, not only counteract any effort in that direction, but would produce a very grave situation which I am not sure we could handle.

If the Congress deems it wise to extend aid to the soldiers the less harmful way of meeting the expenditures would be by increasing taxes. Taxes in themselves tend toward economy if they are properly laid, because they take so much out of the control of individuals for the time being, and they would not cause further credit expansion.

But existing taxes are burdensome and in some cases very disturbing to industry. Instead of increasing them we should survey the present tax system with a view to its modification or simplification, with a view to raising the necessary revenue with as little inconvenience as possible to taxpayers. If we have to find new sources of revenue or if we increase present taxes, we shall further burden industry, probably curtail production, and in any event increase the cost of living.

The proposal would mean an addition to the cost of living, whatever method of financing it you employ. I can not escape the conclusion that it would add to the burden of every man, woman, and child in this Nation if you undertake to meet the expenditure by taxes; and it will add even more if you undertake to do so by increasing the credit structure of the Nation.

That, in brief, is the way the matter presents itself to my mind. * * *

In the jam confronting us we ought to be careful, very careful, about adding to the burden of the people, about increasing prices, adding to the cost of living of 110,000,000 of people and depressing the bonds, bought by 20,000,000 people, arousing apprehension on the part of the holders.

A complete record of the testimony of the Secretary and the Fiscal Assistant Secretary is annexed hereto as Exhibit 35, page 362. In his letter of May 18, 1920, to the chairman of the Committee on Ways and Means, the Secretary again emphasized the Treasury's opposition to a soldiers' bonus, however financed. That letter is quoted on page 27 of this report under the heading of "Taxation."

The military and naval forces of the United States performed their duty during the war nobly and well. In defense of the liberty of their own land and of free institutions everywhere, they proved themselves worthy followers of the patriots who founded this Nation. They can never be compensated in money or in any other material thing. Their reward lies in their knowledge of patriotic duty rendered, in the glory of achievement, and in the gratitude of all the people of the Nation. The sick, the wounded, the crippled and their dependents, and the dependents of the dead, of course, must be given every necessary attention and generous treatment. That is the Government's imperative duty; the cost is not to be reckoned. But the granting of a general indiscriminate bonus would place such a burden upon the people of this country, including the soldiers and sailors themselves and their families, that, I am sure, if the full bearing of the proposal upon the welfare of America were realized by the members of our heroic Army and Navy, they would be among the first to discountenance and reject it.

RECEIPTS AND EXPENDITURES DURING THE WAR PERIOD.

On the basis of the daily Treasury statements, the total expenditures of the Government, exclusive of the principal of the public debt and postal disbursements from postal revenues, for the period from April 6, 1917, to June 30, 1920, were \$38,830,812,895.93. The receipts during this period from taxes and sources other than borrowed money were \$16,078,844,097.10, or slightly in excess of 41 per cent of the expenditures, although they do not include the September 15 and December 15, 1920, installments of taxes levied on 1919 incomes and profits. The expenditures include capital outlays as well as items which have been permanently absorbed. The receipts also include certain sums which by law are covered into the Treasury as miscellaneous receipts, but which, for statistical purposes, more properly should be offset against expenditures. No deduction has been made for loans to foreign Governments or for investments, such as ships, stock of the Emergency Fleet Corporation, stock of the Housing Corporation, and loans to railroads. Foreign loans made up to June 30, 1920, aggregated \$9,523,000,000. Excluding this sum, the total disbursements of the Government from the beginning of the war to June 30, 1920, were \$29,307,000,000, about 55 per cent of which, on the basis of these unadjusted figures, was met out of tax receipts and revenues other than borrowed money.

Cost of the war.

Since the armistice, particularly in the fiscal year 1920 and in the current year, large sums were, in accordance with law, deposited in the Treasury as miscellaneous receipts which, for statistical purposes, should be offset against war expenditures instead of being added to receipts. To get an accurate view of the relation between tax receipts and expenditures and the net cost of the war, it is necessary to make certain adjustments in the figures. For example, the proceeds of sales of surplus war supplies are included in the miscellaneous receipts. They are not receipts for this purpose. They represent the return of money already included in expenditures. They should be deducted from expenditures and thus the net cost to the Government of the articles covered would be ascertained. Some of the war salvage receipts were used to augment appropriations under sanction of law, before the passage of legislation requiring items of this character to be deposited in the Treasury as miscellaneous receipts. In these cases the proceeds from such sales were deposited in the Treasury and corresponding deductions made from expenditures. During the fiscal year 1920 the United States Grain Corporation returned to the Treasury \$350,000,000 on account of its capital stock. In the official figures this item appears as having gone out of the Treasury as an expenditure in the purchase of the stock and as having come back

as a miscellaneous receipt upon its payment. The payment should simply be deducted from expenditures. Certain repayments were made by foreign Governments on the principal of their obligations held by the United States, by way of adjustment of accounts. They should be treated for the purposes of this calculation as a reduction of the total loans to foreign Governments.

The total miscellaneous receipts, including Panama Canal tolls, deposited in the Treasury from April 6, 1917, to June 30, 1920, were \$1,950,000,000. If it is assumed that \$325,000,000 would have represented the amount of these receipts on a peace basis for this period of three years and three months, the balance of the miscellaneous receipts would be \$1,625,000,000. This should be deducted from total expenditures and eliminated from miscellaneous receipts. If it is further assumed that the expenditures on a peace basis during the fiscal years 1917, 1918, and 1919 would have been at the rate of \$1,000,000,000 a year, and during the fiscal year 1920 at the rate of \$1,500,000,000 a year, the total, on a peace basis from April 6, 1917, to June 30, 1920, would have been \$3,750,000,000. Deducting this sum and the miscellaneous receipts of \$1,625,000,000 from the total expenditures, exclusive of the principal of the public debt, we get \$33,455,000,000, which would be the approximate net cost of the war, including loans to foreign Governments less repayments. Excluding such loans, the estimated net cost on this adjusted basis would be \$24,010,000,000.

The receipts require similar adjustment for the purpose of this analysis. To ascertain the amount received from war taxes, there must be deducted from the total receipts the proceeds of loans, the miscellaneous receipts of \$1,625,000,000, and the estimated revenues on a peace-time basis. The remainder, \$10,703,000,000, would be the approximate amount of war taxes during the period under review. This amount is 32 per cent of the estimated net expenditures on account of the war, including the net amount of loans to foreign Governments, and 44.57 per cent exclusive of such loans.

Based on this analysis, the following statement of the net war expenditures and war-tax receipts from the period of April 6, 1917, to June 30, 1920, is given:

Estimated net war expenditures, Apr. 6, 1917, to June 30, 1920 (on basis of daily Treasury statements).

Total expenditures exclusive of the principal of the public debt_		\$38, 830, 000, 000
Estimated "miscellaneous receipts" which		
should be offset against expenditures and		
eliminated from receipts-----		\$1, 625, 000, 000
Estimated expenditures on a peace basis-----		3, 750, 000, 000
		<hr/> 5, 375, 000, 000
Estimated net war expenditures-----		<hr/> 33, 455, 000, 000 <hr/>

Estimated net war-tax receipts, Apr. 6, 1917, to June 30, 1920 (on basis of daily Treasury statements).

Total receipts exclusive of principal of the public debt.....	\$16, 078, 000, 000
Estimated "miscellaneous receipts" eliminated from receipts and offset against expenditures	\$1, 625, 000, 000
Estimated tax receipts on a peace basis.....	3, 750, 000, 000
	<hr/> 5, 375, 000, 000
Estimated net war-tax receipts.....	10, 703, 000, 000

There is attached to this report as Exhibit 36, page 410, a statement showing the receipts and expenditures for the fiscal year 1920 on the basis of the daily Treasury statements, and also as Exhibit 37, page 412, giving the cash expenditures for the fiscal years 1917, 1918, 1919, and 1920, classified according to departments and establishments. Exhibit 38, page 413, shows classified disbursements and receipts, exclusive of the principal of the public debt, from April 6, 1917, to October 31, 1920.

SECURITIES OWNED BY THE UNITED STATES GOVERNMENT.

A detailed statement of securities owned by this Government as of June 30, 1920, with a face value of \$11,101,589,306.30, was published for the first time at the close of the fiscal year and is attached to this report as Exhibit 21, page 319. It was compiled on the basis of the face value of the securities. Some of them are not held in the custody of the Treasury, and the tabulation, therefore, was made up in part from reports received from other departments and establishments. These securities are closely related to the public debt, since they result for the most part from the expenditure of funds obtained through loans, the ordinary expenditures of the Government during the period of their acquisition having been in excess of the receipts from all sources other than the principal of the public debt. They may be classified as follows: (1) Obligations of foreign Governments, (2) capital stock of war emergency corporations, (3) railroad securities, (4) Federal land bank securities, and (5) miscellaneous.

The first are of three kinds, viz, (a) those acquired by the Treasury, under authority of the Liberty bond acts, in the amount of \$9,445,006,855.18, on the basis of advances, less repayments; (b) those received from the Secretary of War on account of sales of surplus war supplies, amounting to \$563,032,739.63; and (c) those received from the American Relief Administration on account of relief, in the amount of \$84,014,527.92. The total is \$10,092,054,122.73, or approximately 91 per cent of the aggregate securities owned.

The holdings of capital stock of war emergency corporations, which at one time amounted to \$1,125,000,000, showed a material decrease by June 30, 1920, as the result of steps looking to liquida-

tion taken by the Housing Corporation, the Grain Corporation, and the War Finance Corporation. The total reduction was \$734,417,-623.43, leaving net investments on this account of \$390,582,376.57. There has been further liquidation since the close of the fiscal year by the Grain Corporation, in the amount of \$100,000,000.

The railroad securities, aggregating \$444,847,105, may be classified as (*a*) those purchased from the revolving fund appropriation under authority of section 7 of the Federal control act, approved March 21, 1918, as amended, in amount of \$110,578,755 (not including securities purchased by the Director General of Railroads from the operating revenues of railroads under the provisions of section 12 of the Federal control act); (*b*) those acquired by the Director General by way of reimbursement for motive power, cars, and other equipment ordered for carriers under Federal control, amounting to \$329,203,750; and (*c*) obligations acquired as the result of new loans to railroads from the \$300,000,000 revolving fund appropriation under section 210 of the transportation act, 1920, in the sum of \$5,064,600.

The other securities consist of capital stock and bonds of the Federal land banks, aggregating \$174,040,510, and of \$65,192 of bankers acceptances of short maturities received by the Secretary of War on account of sales of surplus war supplies. For the most part, the securities shown in the statement are held in custody for the Secretary of the Treasury by the Treasurer of the United States, the Assistant Treasurers, or the Federal reserve banks. Appropriate custody accounts and records are kept in the section of investments under the supervision of the Commissioner of Accounts and Deposits. The facilities of the Treasury have been extended to other departments and establishments, which have been invited to deposit their holdings with it, in order to obtain greater safety and to permit the publication of complete reports. Certain trust funds, such as those of the Government life insurance fund, and of the Alien Property Custodian, with the investment of which the Treasury is charged, are not shown in the statement of securities, inasmuch as they are not beneficially owned by the United States.

RETIREMENTS OF LIBERTY BONDS AND VICTORY NOTES.

Five per cent bond purchase fund.

Purchases of Liberty bonds and Victory notes for the bond-purchase fund were continued during the fiscal year 1920, but ceased on June 30, 1920. Section 15 of the second Liberty bond act, as amended by section 6 of the third Liberty bond act and the Victory Liberty loan act, authorized the Secretary of the Treasury, until the expiration of one year after the termination of the war, to buy an-

nually bonds and notes issued under authority of the second Liberty bond act, as amended, including bonds issued upon conversion of bonds issued under the first Liberty bond act or the second Liberty bond act, as amended, at such prices and upon such terms and conditions as he might prescribe, up to 5 per cent of the par amount of bonds or notes of any series outstanding at the beginning of the bond-purchase fund year. The Treasury's purchases under this authorization have been made from time to time, at average cost, through the Federal reserve bank of New York, and from the War Finance Corporation. These agencies in turn made purchases in the open market, when it was deemed necessary, to stabilize market prices and to protect the Government's credit. These operations undoubtedly sustained and strengthened the market for Liberty bonds and Victory notes and so redounded to the benefit of all holders of these issues. The securities bought have been canceled and retired. On April 18, 1920, the following statement was issued by the Secretary with reference to purchases for the bond-purchase fund to June 30, 1920, and thereafter for the cumulative sinking fund:

The authorization conferred upon the Secretary of the Treasury by Congress to make purchases of Liberty bonds and Victory notes for the 5 per cent bond-purchase fund expires one year after the termination of the war. The continuance of a technical state of war beyond the period contemplated at the time the authority was conferred has presented to the Secretary of the Treasury the practical problem of determining what his future course should be with respect to the bond-purchase fund. Secretary Glass, in his annual report, said, "Purchases of bonds under authority of section 6 of the act of April 4, 1918 (bond-purchase fund), are not included as an item of estimated expenditure (for the fiscal year beginning July 1, 1920); this authority expires one year after the termination of the war, and the Secretary reserves decision with respect to such purchases after July 1, 1920." Congress created in the Victory Liberty loan act a 2½ per cent sinking fund to commence July 1, 1920. In view of the fact that on July 1 more than a year will have elapsed since the flotation of the last Liberty loan and of the further fact that unless Government expenditures should be greatly decreased or taxes increased, continued purchases for the bond-purchase fund could only be financed by the issue of additional certificates of indebtedness, thus increasing the floating debt while decreasing the funded debt, my present intention is not to treat the two funds as cumulative, but to discontinue purchases for the bond-purchase fund on and after July 1, 1920, and to make purchases thereafter only for the sinking fund created under the Victory Liberty loan act. The approximate amount of the bond-purchase fund quota for the period ending June 30, 1920, will be taken over from the War Finance Corporation or, to a limited extent, purchased in the market, and in either case canceled and retired.

Hereafter such purchases as the Treasury may have to make for the bond-purchase fund or the sinking fund under the general program above announced will be occasional and not habitual.

I am confirmed in the determinations above set forth by the fact that the natural market in Liberty bonds and Victory notes has now reached such dimensions that the purchases for the bond-purchase fund have ceased to be a

dominating factor. The recent liquidation which has brought the bonds and notes to new low levels seems to find its chief source in selling by industrial and other corporations which were large purchasers during the Liberty loan campaigns and which are now under pressure to find funds for their current business, in a period when necessary measures of credit control make further expansion of bank loans both difficult and expensive. This offers a unique opportunity to investors, large and small, the quotations for the bonds and notes being extremely attractive to investing institutions and private investors. I believe that the time has come when the disappearance of the Government from the market, except as an occasional purchaser within the limitations above outlined, will have a beneficial effect upon the market for the bonds and notes, both by reducing the Treasury's current borrowings on Treasury certificates and stimulating the interest of investment bankers and the public in the market for Liberty and Victory securities.

Pursuant to this announcement, no purchases for the 5 per cent bond-purchase fund have been made since June 30, 1920, and those made prior to that date, after April 18, 1920, represented chiefly accumulations taken over from the War Finance Corporation.

The aggregate par value of Liberty bonds and Victory notes retired by the bond-purchase fund between April 15, 1918, and June 30, 1920, when purchase ceased, was \$1,764,896,150, and the aggregate paid therefor was \$1,677,566,210.26, or, on an average, slightly more than 95 per cent of the par value. The following is a summary of the purchases:

Summary statement of bond purchases to June 30, 1920.

Loan.	Par amount purchased.	Amount paid.	Accrued interest paid.
First Liberty loan converted 4 per cent and 4½ per cent bonds, 1932-1947.....	\$36,912,000	\$34,722,342.29	\$532,112.62
Second Liberty loan 4 per cent and 4½ per cent bonds, 1927-1942.....	478,688,000	452,358,913.01	6,896,021.63
Third Liberty loan 4½ per cent bonds, 1928.....	433,308,100	414,067,698.57	3,679,624.35
Fourth Liberty loan 4½ per cent bonds, 1933-1938.....	566,987,050	530,548,515.45	6,523,811.37
Victory loan, 4½ per cent and 3½ per cent notes, 1922-1923.....	249,001,000	245,868,740.94	3,500,393.93
Total.....	1,764,896,150	1,677,566,210.26	21,131,963.90

In accordance with the requirements of section 6 of the third Liberty bond act, a detailed statement of the complete operations will be submitted to the Congress in a separate report. Now that operations have been completed, attention may be called to the reasons which actuated the Treasury in making its purchases. The bond-purchase fund was discussed at length by the Secretary of the Treasury in connection with the third Liberty loan and subsequent Liberty loans and was an important factor in the success of those loans. Of late, however, there seems to have been some misapprehension on the subject. The considerations which moved the Treasury in recommending that the bond-purchase fund authority be granted, and

which guided it in the exercise of the authority, are set forth in the testimony of the Secretary of the Treasury before the Committee on Ways and Means of the House of Representatives in connection with the third Liberty bond bill, on March 27, 1918, as follows:

Very careful and earnest attention to the situation which has developed since the last Liberty loan has convinced me that the United States must do what each of the warring countries in one form or another does, and prepare itself to support the market for its bonds. No measure of this sort, however, can be of any value unless the fund provided for the purpose is a large one. Every effort must be made to reach the people who have money to invest or those who will have and who can be induced to save and pay for the bonds for which they subscribe. In connection with every issue, however, it will be found that the patriotism of some has outrun their ability to pay for the bonds, so that either those who buy them and get tired of holding them do not want to hold them, or those who from necessity or for other reasons are obliged to sell them, will offer their bonds in the market; and it puts the Government at a very great disadvantage if there is no means of sustaining the market to a reasonable extent so as to steady it * * *. Inevitably during the period of the war, after each Liberty loan has been closed, we have been forced to face the facts that there will be more sellers than buyers of the bonds. The present bill would authorize the Treasury to retire the excess. That is, it would authorize through the sinking fund a repurchase of such an amount of the bonds as the sinking fund would permit and would take up the surplus offerings, and the amount provided, I think, would be sufficient for the purpose. With such a sinking fund and the secondary distribution which the War Finance Corporation can bring about, there will not be such a desire to sell the bonds, because the very fact that they can sell them will make people feel more confident about holding them. There is a curious feeling in the breast of the average man that if he buys a Government bond, even though he contracts to lend his money to the Government, nevertheless if he gets tired of his investment and wants to get his money back, that he ought to be able to sell the bond at par regardless of the fact that the Government is not under any obligation to redeem that bond before maturity. It is extraordinary the extent to which that feeling exists. People would not have that feeling about a corporation which sold its bonds, or about any individual who gave his note. They would not expect them to be redeemed at par before maturity. It is a perfectly unreasonable feeling, but one of the things we have got to reckon with. I believe that the provision for this sinking fund will relieve the situation somewhat. This sinking fund, by the way, ought not to be a mandatory sinking fund but discretionary; that is, the Secretary ought to be permitted within the limits of 5 per cent of the bonds issued to buy back bonds.

It is a most difficult thing, but a thing which we must face, to try to keep Government bonds measurably around par. We have got to continue Government borrowings at a reasonable rate of interest. I think that some such thing as this sinking fund will be much cheaper for the Government than to increase the interest rate; at least we ought to try it. The reason I say it is cheaper is this: Suppose we need three billions, and the sinking fund on the entire outstanding bonds for the year—assuming we had ten billions outstanding—at 5 per cent would be \$500,000,000. It only means that we should have to sell a few more bonds and then buy them back and keep the rate of interest up, and it does not hurt us any. We are just taking back some of the bonds. * * * This 5 per cent each year is intended to apply during the war only. * * *

It is also interesting to note, in view of the widespread contention that purchases should have been made at par rather than at the market, that this very proposal was rejected by the Committee on Ways and Means, when the matter of granting the authority was under consideration. The Secretary of the Treasury in his testimony before the committee said in this connection:

I do not think it would be a wise thing for us to attempt that—that is to say, to purchase the bonds at par—because I think if we were to state that we had \$100,000,000 that the Government would invest in these bonds at par, for instance, that would be simply an invitation to the people to sell their bonds to the Government at par and you would exhaust the fund in short order.

Bonds purchased from repayments of foreign loans.

In accordance with the provisions of section 3 of the first Liberty bond act, and section 3 of the second Liberty bond act, repayments by foreign Governments on account of the principal of their obligations bought under authority of these acts have been applied to the purchase and retirement of Liberty bonds. The face value of those secured to November 15, 1920, was \$119,109,050. They were bought for \$114,538,818.16, or slightly less than 95 per cent of the par value. These operations are fully set forth in the separate detailed statement of all expenditures under the Liberty bond acts. The purchases may be summarized as follows:

Bonds purchased as the result of payment of foreign loans to Nov. 15, 1920.

Loan.	Principal amount purchased.	Amount paid.	Amount of accrued interest paid.
Third Liberty loan $4\frac{1}{2}$ per cent coupon bonds.....	\$80,758,750	\$76,472,985.84	\$927,529.20
Third Liberty loan $4\frac{1}{2}$ per cent registered bonds.....	8,407,550	8,407,550.00	6,909.52
Fourth Liberty loan $4\frac{1}{2}$ per cent coupon bonds.....	29,942,750	29,658,282.32	553,567.76
Total.....	119,109,050	114,538,818.16	1,488,006.48

Bonds purchased with franchise tax paid by Federal reserve banks.

Section 7 of the Federal reserve act provides that the net earnings derived by the United States from the Federal reserve banks, as franchise tax, shall in the discretion of the Secretary be used to supplement the gold reserve held against outstanding United States notes, or applied to the reduction of the outstanding bonded indebtedness. These earnings for the calendar year 1919 have been applied to the purchase, at the market, of \$2,922,450 par amount of second Liberty loan $4\frac{1}{2}$ per cent bonds, at a cost of \$2,703,850.74, with accrued interest of \$20,814.43, the latter amount being chargeable as interest on the public debt. These bonds have been canceled and retired.

Bonds retired on account of gifts.

From time to time various persons, for patriotic or other reasons, present Liberty bonds and Victory notes to the Government. These are redeemed at par and retired, and the proceeds are covered into the Treasury as miscellaneous receipts. The aggregate amount presented and retired to November 15, 1920, is \$12,850, as follows:

Bonds retired account of gifts, November 15, 1920.

Loan.	Par amount.	Accrued interest matured.	Accrued interest unmatured.
First Liberty loan $4\frac{1}{2}$ per cent coupon bonds.....	\$350.00		\$6.22
Second Liberty loan 4 per cent coupon bonds.....	700.00	\$51.00	2.35
Second Liberty loan 4 per cent registered bond.....	7,000.00		44.59
Second Liberty loan $4\frac{1}{2}$ per cent coupon bonds.....	2,150.00	42.49	2.93
Third Liberty loan $4\frac{1}{2}$ per cent coupon bonds.....	800.00	40.10	5.71
Third Liberty loan $4\frac{1}{2}$ per cent registered bonds.....	500.00		9.81
Fourth Liberty loan $4\frac{1}{2}$ per cent coupon bonds.....	1,350.00	35.24	7.02
Total coupons.....	5,350.00	168.83	24.23
Total registered.....	7,500.00		54.40
Grand total.....	12,850.00	168.83	78.63

Bonds retired on account of forfeitures to the United States.

Whenever Liberty bonds or Victory notes are forfeited to the United States for any reason and deposited in the Treasury, they are canceled and retired. Up to November 15, 1920, there have been retired on this account \$3,550 of bonds and notes, as follows:

Bonds retired account of forfeitures to the United States to Nov. 15, 1920.

Loan.	Par amount.
First Liberty loan $3\frac{1}{2}$ per cent coupon bond.....	\$50
First Liberty loan $4\frac{1}{2}$ per cent converted coupon bond.....	50
Third Liberty loan $4\frac{1}{2}$ per cent coupon bonds.....	700
Fourth Liberty loan $4\frac{1}{2}$ per cent coupon bonds.....	2,650
Victory Liberty loan $4\frac{1}{2}$ per cent coupon notes.....	100
Total.....	3,550

Bonds retired on account of estate and inheritance taxes.

Under section 14 of the second Liberty bond act, as amended by the third Liberty bond act and the Victory Liberty loan act, $4\frac{1}{2}$ per cent Liberty bonds and $4\frac{3}{4}$ per cent Victory notes are receivable by the United States at par and accrued interest in payment of any estate or inheritance taxes. Such securities are canceled and retired, and the face amount, with any accrued interest, is covered into the Treasury as receipts on account of Federal estate (or inheritance) taxes. The value of those received to November 15, 1920, is \$9,781,750, as follows:

Acceptance of Liberty bonds and Victory notes in payment of estate or inheritance taxes to Nov. 15, 1920.

Loan.	Paramount of bonds.	Interest paid.
First Liberty loan converted $4\frac{1}{2}$ per cent coupon bonds.....	\$159,400.00	\$1,839.57
First Liberty loan converted $4\frac{1}{2}$ per cent registered bonds.....	3,800.00	31.85

CUMULATIVE SINKING FUND.

The cumulative sinking fund established by section 6 of the Victory Liberty loan act approved March 3, 1919, became effective July 1, 1920. The law permanently appropriates, for the current fiscal year and for each fiscal year thereafter until the debt is discharged, an amount equal to the sum of "(1) $2\frac{1}{2}$ per centum of the aggregate amount of such bonds and notes outstanding on July 1, 1920, less an amount equal to the par amount of any obligations of foreign Governments held by the United States on July 1, 1920, and (2) the interest which would have been payable during the fiscal year for which the appropriation is made on the bonds and notes purchased, redeemed, or paid out of the sinking fund during such year or in previous years."

On this basis the constant appropriation annually for sinking-fund purposes is \$253,404,864.87, derived as follows:

Aggregate amount Liberty bonds and Victory notes outstanding July 1, 1920.....	\$19,581,201,450.00
Less par amount obligations of foreign Governments purchased under the several Liberty loan acts and held by the United States on July 1, 1920.....	9,445,006,855.18
Difference.....	10,136,194,594.82
$2\frac{1}{2}$ per cent thereof.....	253,404,864.87

To this sum there will be added each year the interest which would have been payable on any bonds or notes paid, redeemed, or purchased for sinking-fund account during the year or in previous fiscal years.

The cumulative sinking fund, it is calculated, will retire the funded war debt of the United States, less the amount representing the foreign obligations held by the United States on July 1, 1920, in about 25 years. Under other provisions of the Liberty loan acts any repayments of the principal of the foreign obligations must be applied to the retirement of Liberty bonds. The floating debt is not covered by the sinking fund, but is to be retired out of current revenues. The prewar debt also is not covered, but the only important items there are of indeterminate maturities after specified dates, which may be retired after such dates from time to time as the condition of the Treasury may warrant.

The cumulative sinking fund was created for the retirement of the funded war debt in the order of its maturity, a course which should in the long run benefit most the holders of all the Liberty bonds, because of its tendency to provide for the earliest maturing obligations without undue refunding operations and the fact that the earlier maturing obligations are most likely to sell on the highest interest basis. During the current fiscal year the operation of the sinking-fund provisions has been seriously limited by the extraordinary payments required to be made on account of the railroads, which, as set forth elsewhere in this report, have likewise limited the Treasury's progress in the retirement of the floating debt. Substantial sinking-fund purchases during the first part of the fiscal year would therefore have increased the floating debt or prevented its reduction, and would thus have tended to substitute floating debt for funded debt. The market for Liberty bonds and Victory notes, moreover, has been in a state of approximate equilibrium since the sinking-fund provisions became operative, and it has not been necessary to give support by Government purchases.

Up to November 15, 1920, sinking-fund purchases have accordingly been moderate in amount, as appears from the following table:

July -----	\$5, 261, 250
August -----	-----
September -----	-----
October -----	3, 425, 000
November 1-15 -----	6, 354, 000
Total -----	15, 040, 250

It is hoped, however, that with some relief from the heaviest railroad expenditures and from other extraordinary payments, the Treasury will, during the balance of the fiscal year, and at least after the beginning of the calendar year 1921, be able to proceed to apply the

remainder of the cumulative sinking fund for the current fiscal year to the retirement of the debt. Purchases for the sinking fund are made in the open market at the prevailing market prices, chiefly through the Federal reserve bank of New York, as fiscal agent, and are therefore reflected in the controlling market prices and redound to the benefit of all holders of Liberty bonds and Victory notes.

PROPOSALS FOR REFUNDING THE LIBERTY LOANS.

There has been no little discussion during the year of the necessity of taking governmental action to improve the market prices of the outstanding issues of Liberty bonds and Victory notes. Many of the proposals have been utterly untenable as, for example, that all outstanding issues be given the circulation privilege, or be converted into interest-bearing currency. It is unnecessary to do more than suggest the disastrous possibilities of adding \$20,000,000,000 of potential currency to the country's circulation. More insistent suggestions have been either that the Liberty bonds be converted into tax-exempt obligations or that they be exchanged for securities bearing a higher rate of interest. The Treasury has consistently and vigorously declared its opposition to any such schemes. It opposed on public grounds the cash bonus proposals for soldiers. It even more strongly opposes bonus proposals of this sort for capital. The obligation of the United States is to pay the principal of the Liberty loans at maturity and the interest in the meantime. That obligation will be met. As financial conditions become stabilized, moreover, the market prices of Liberty bonds and Victory notes should inevitably appreciate without imposing upon the country the additional burden of higher interest rates on the \$20,000,000,000, or thereabouts, of funded Government obligations. Most competent judges have little doubt that the outstanding Liberty bonds and Victory notes will gradually return toward par in the near future, and that they will perhaps go to a premium before their maturity. There has, in fact, been a considerable recovery in the market prices of both Liberty bonds and Victory notes during the past few months notwithstanding the general credit stringency and the prevailing scarcity of capital.

The most fundamental objections to the suggestions that the Liberty loans should be refunded at this time in order to improve their market prices are that the funding is unnecessary, that it would tend to perpetuate the war debt, and that it would upset the Treasury's well-considered program of debt reduction. The Liberty bonds and Victory notes are now funded obligations and do not require to be refunded at this time. There are many instances of the refunding of loans at or near maturity, at a lower rate of interest, but there are few instances of their refunding before maturity at a higher rate

of interest. Such an operation would not be a refunding in any proper sense. The maturities of the Liberty bonds and Victory notes, with the options to the Treasury of redemption prior to maturity, were carefully arranged with a view to give the Treasury adequate control over the debt, and to make it practicable for the country to follow an orderly program of retirement. To refund the Liberty loans now into a long-term consolidated loan could only tend to perpetuate the war debt and relieve the healthy pressure for its retirement.

The Treasury has from time to time been called upon to express its views with respect to specific refunding proposals, particularly in connection with the bill introduced by Senator Frelinghuysen to provide for the exchange of the several issues of Liberty bonds for fully tax-exempt long-term consolidated bonds bearing interest at $3\frac{1}{2}$ per cent. On April 10, 1920, the Secretary addressed the following letter to Senator Frelinghuysen in response to his request for a statement of the Treasury's attitude on the bill:

WASHINGTON, *April 10, 1920.*

MY DEAR SENATOR: I received your letter of April 6, 1920, in which you request a statement of the Treasury's views as to S. 4119, introduced by you "to authorize an issue of bonds in exchange for bonds of the first, second, third, and fourth Liberty loan issues." I have carefully examined the bill and note that what you propose is, in substance, the refunding of the Liberty loans into one consolidated loan, maturing in 50 years, bearing interest at $3\frac{1}{2}$ per cent, and carrying substantially complete exemption from taxation.

It is my considered judgment that the bill which you propose offers no satisfactory solution of the problem of the present depreciation in the market prices of Liberty bonds, and that it should not be enacted into law.

I should like to call your attention, in the first place, to the fact that while the bill would authorize an issue of bonds to the amount of \$30,000,000,000, the total face amount of the bonds of the first, second, third, and fourth Liberty loans outstanding on March 31, 1920 (on the basis of daily Treasury statements), was only \$15,616,872,038. Inasmuch as the bill provides that the bonds which it authorizes shall be issued solely for the purpose of retiring bonds of the first, second, third, and fourth Liberty loans, it is obvious that the authority which it proposes to confer is almost twice as large as would be appropriate for the purpose.

As to the merits of the bill, I feel that from the point of view of the Treasury it is neither necessary nor desirable to attempt to consolidate the outstanding bonds of the Liberty loans into one loan. In this connection I am inclosing for your information a copy of Form L. and C. 400, recently issued by the department, which summarizes in convenient form the terms of the several issues of Liberty bonds, including their exemption from taxation. As you will see upon examining this summary, the maturities, redemption dates, and interest payment dates for the several issues were determined by the Treasury with great care, in order to spread maturities over a considerable period of years and provide sufficient redemption privileges in the intervals between maturities to permit the convenient handling of the retirement or refunding of the several issues. The interest payment dates, moreover, were carefully fixed with a view

to spreading the heavy interest payments over the several months of the year. In my opinion, therefore, no consolidation of the Liberty issues is necessary from the point of view of fiscal convenience; in fact, I believe it would be a serious mistake to attempt to consolidate the maturities of either principal or interest into one loan.

The Treasury is also definitely opposed to the issue of further obligations of the United States bearing full exemptions from taxation for what it regards as fundamental reasons of social and economic policy. Its position in this respect was fully set forth in Secretary McAdoo's testimony before the Committee on Ways and Means of the House of Representatives on August 28-29, 1917, in connection with the second Liberty bond act. I am inclosing, for your information, a copy of an extract from this testimony. The chief objection to the total exemption from taxation is that its value depends largely upon the wealth of the individual investor and is greatest in the case of the wealthiest investor. Such an exemption from taxation, moreover, would materially cut down the revenues of the Government of the United States at a time when it can not afford to dispense with any of the receipts which would otherwise accrue on account of taxes.

I think that as a practical matter, moreover, the enactment of the bill proposed by you would be without important effect upon the market prices of $4\frac{1}{2}$ per cent Liberty bonds. Fully exempt $3\frac{1}{2}$ per cent bonds of the first Liberty loan are selling in the neighborhood of 97. Fully exempt $3\frac{3}{4}$ per cent Victory notes are selling in the neighborhood of the same price, and every $4\frac{1}{2}$ per cent Victory note carries with it the continuing right to convert it into a fully exempt $3\frac{3}{4}$ per cent Victory note; yet on December 31, 1919, of a total issue of about \$4,500,000,000 only \$940,000,000 consisted of $3\frac{3}{4}$ per cent Victory notes. I should not expect to see any very large proportion of the $4\frac{1}{2}$ per cent bonds converted into $3\frac{1}{2}$ per cent exempt bonds. I should expect that the passage of your bill and the carrying out of the plan would reduce the market value of the present $3\frac{1}{2}$ per cent bonds to about the level now established for the $4\frac{1}{2}$ per cent bonds rather than bring up the market price of the $4\frac{1}{2}$ per cent bonds to the level of that of the $3\frac{1}{2}$ per cent bonds. There are only about a billion and a half dollars of tax exempt first $3\frac{1}{2}$ s and there are some fourteen billion dollars of taxable $4\frac{1}{2}$ s. If all the holders of $4\frac{1}{2}$ per cent bonds had an option to convert them into $3\frac{1}{2}$ per cent bonds fully exempt, that option would probably have the effect of depreciating the price of $3\frac{1}{2}$ s rather than appreciating the price of $4\frac{1}{2}$ s. The number of persons with wealth sufficient to make the value of the total exemption from surtaxes compensate them for the surrender of an amount equal to three-fourths of 1 per cent per annum is limited. The present market price of the $3\frac{1}{2}$ per cent bonds is in no small measure due to their relative scarcity. This scarcity value would, of course, disappear the moment an option to convert was given to the holders of ten times their amount of $4\frac{1}{2}$ per cent bonds.

The proviso in section 1 of the bill, which would subject the proposed bonds to the normal income tax in the event that the normal tax should be reduced to the rate in force on January 1, 1914, would effect a complete reversal of the Government's established policy. All the Liberty bonds and Victory notes are now exempt from the normal Federal income tax, and the Treasury believes that this exemption from normal tax should not be withdrawn, since it is fair to all holders, with no undue advantages to large holders, and is an important factor in maintaining the market prices of all the issues.

I do not believe, therefore, that your bill offers any real solution of the problem of the market prices of Liberty bonds. As the Treasury views it, the present depreciation of Liberty bonds on the market is due chiefly to the fact that of the

20,000,000 Americans who patriotically subscribed during the period of the war, large numbers have not been willing or able to exercise such control over their personal expenditure as would enable them to retain their bonds after the cessation of hostilities. Liberty bonds, like other bonds, are subject to market influences, including the law of supply and demand, and their market quotations have declined in consequence of the failure of the great investing public to save in proportion to the enormous expenditure of capital during and since the war. Many patriotic people bought Liberty bonds under the impulse of patriotism who have been unwilling since the war was over to continue to lend their money to the Government and have forced their holdings on the market more rapidly than others could save funds to invest, with consequent depreciation in market prices. The remedy for this condition is for the people to work and save, to keep their holdings of Liberty bonds as investments, and to purchase additional Government securities with their savings.

The present market prices of Liberty bonds are causing no loss to real investors who are holding their bonds as permanent investments; they are not suffering because others see fit to sell their bonds now for less than they are worth, and neither these investors nor those who wish to sell their bonds have any ground for expecting a donation from the United States in the form of additional tax exemptions or other privileges. The United States is under no obligation to guarantee the holders of Liberty bonds against variations in money-market conditions or to guarantee a market at par for the bonds. To make valuable gifts to the people who subscribed for their bonds on definite terms for a definite period of time would, in my opinion, be subversive of all decent principles of Government. The Treasury is as much opposed to a bonus to bondholders as to a bonus to other special classes in the community.

As you doubtless know, the Government is already doing everything in its power to protect the market for Liberty bonds and the interests of Liberty bond holders by means of purchases for the 5 per cent bond-purchase fund provided by existing law. These purchases, which have greatly tended to sustain and strengthen the market for the bonds, have been made under the authority of section 15 of the second Liberty bond act, as amended by section 6 of the third Liberty bond act, which authorized the Secretary of the Treasury to purchase annually until the expiration of one year after the termination of the war up to 5 per cent of the bonds of each series outstanding at not exceeding par and accrued interest. To November 30 last, as shown by Secretary Glass's report to Congress, a copy of which is inclosed, \$1,043,080,500 principal amount of Liberty bonds had been purchased, the principal amount paid therefor being \$993,363,526.15. The authority thus conferred by Congress has been exercised by the Treasury for the sole purpose of stabilizing the market, and in my judgment very important results have been achieved, redounding to the benefit of all holders of Liberty bonds. The Treasury has not profited by the action of those Liberty bondholders who have forced their bonds on the market nor by its purchases of those bonds. It has been obliged to borrow at higher rates of interest the money to make the purchases which have been forced on it for the protection of the holders of Liberty bonds and of the Government's credit.

In this connection, and with particular reference to the provisions of section 2 of S. 4119, I feel that I should call your attention to the provisions of section 6 of the Victory Liberty loan act, approved March 3, 1919, creating a 2½ per cent cumulative sinking fund which goes into operation on July 1, 1920, and is calculated to retire the Liberty bonds and Victory notes outstanding on that date within approximately 25 years (except for an amount equivalent to the obligations of foreign governments held by the United States on said date). This cumulative sinking fund was established pursuant to the recommendation

of Secretary Glass in his letter of February 10, 1919, to the Committee on Ways and Means, and received the careful consideration of the Congress in connection with the Victory Liberty loan act. In view of the provision for the sinking fund which has already been made, therefore, no necessity exists for the sinking fund proposed in S. 4119 except, of course, in so far as it might be designed to retire the new bonds proposed to be issued under the bill. As to the Liberty bonds and Victory notes outstanding, the ground has already been covered.

Very truly yours,

D. F. HOUSTON, *Secretary.*

HON. JOSEPH S. FRELINGHUYSEN,
United States Senate, Washington, D. C.

Many other specific proposals have contemplated the refunding of the outstanding bonds and notes into obligations bearing a higher rate of interest. Several bills designed to effect this have been introduced in the Congress. The following letter, which is typical of the Treasury's replies to other similar proposals, was sent by the Secretary of the Treasury under date of April 22, 1920, to a correspondent who suggested this course:

WASHINGTON, April 22, 1920.

DEAR SIR: I received your letter of April 17, 1920, as to the market prices of Liberty bonds. The Treasury is not contemplating the issue at this time of any new United States bonds, and you were misinformed if you heard that the United States was about to issue new bonds bearing interest at a higher rate than the Liberty bonds. There is at the present time no outstanding privilege of converting first Liberty loan $3\frac{1}{2}$ per cent bonds into bonds bearing a higher rate of interest, although first 4's and second 4's are still convertible into $4\frac{1}{2}$ per cent bonds pursuant to the extended conversion privilege described in Treasury Department Circular No. 137, dated March 7, 1919, as amended and supplemented June 10 and November 1, 1919, copies of which are inclosed.

Your suggestion that Liberty bonds be made legal tender is, in the opinion of the Treasury, entirely untenable. The currency needs of the country are being amply provided for by the operation of the Federal Reserve System, and to give Liberty bonds the legal-tender quality would make them so much spending money, produce unprecedented inflation of the currency, and fundamentally upset prices.

The Treasury is also definitely opposed to the proposal that the Liberty bonds be exchanged for bonds bearing a higher rate of interest and believes that it offers no solution of the problem of the depreciation in the market prices of Liberty bonds.

As the Treasury views it, the Liberty bond problem is chiefly one of quantity. Unfortunately, many holders of Liberty bonds who patriotically subscribed for them and held them during the war have since regarded them as so much spending money and thrown them on the market more rapidly than others could save funds to invest, with consequent depreciation in market prices. People generally have been spending money freely and saving relatively little, so that there has not been sufficient capital saved to overcome the pressure upon the market from those who bought bonds as patriots but not as investors. In these circumstances, to add a fraction to the rate of interest borne by the bonds would have no important or lasting effect upon their market prices, while it would have an injurious effect upon the Government's credit and burden the Government and the taxpayers with higher interest charges over a long period of years. The Government could not, of course, manufac-

ture savings or create buyers for its securities simply by increasing the interest rate on the outstanding bonds. The only effect of such a course would be to depreciate all other securities automatically and establish a high-interest level for many years which would be burdensome to the development of the country.

The present market prices of Liberty bonds are causing no loss to real investors who are holding their bonds as permanent investments; they are not suffering because others see fit to sell their bonds now for less than they are worth, and neither these investors nor those who wish to sell their bonds have any ground for expecting a donation from the United States in the form of additional interest on the bonds. The United States is under no obligation to guarantee the holders of Liberty bonds against variations in money-market conditions or to guarantee a market at par for the bonds. To make a gift of a higher rate of interest to the people who subscribed for their bonds on definite terms for a definite period of time would, in my opinion, be subversive of all decent principles of Government. To limit such a gift to original subscribers would be impracticable; to extend it to market purchasers would be utterly indefensible. The Treasury would vigorously oppose any donation of this character.

Very truly yours,

D. F. HOUSTON, *Secretary.*

MARKET PRICES OF LIBERTY BONDS AND VICTORY NOTES.

The year under review has been marked by considerable fluctuations in the market prices of Liberty bonds and Victory notes, as will appear from the following table:

Highest and lowest market prices for Liberty bonds and Victory notes from Oct. 1, 1919, to Nov. 1, 1920.

	First 3½'s.	First 4's.	First 4½'s.	First-second 4½'s.	Second 4's.

These fluctuations have been the subject of considerable public discussion. They clearly result from the operation of the economic law of supply and demand. Many persons have disregarded this fact, and, simply because it was the Government's securities involved, urged artificial support and devices which would disrupt any sound financial program. The matter has constantly received the careful thought of the Treasury. It was a problem even during the war. The following statement, for example, was made by the Secretary of the Treasury before the Committee on Ways and Means of the House of Representatives on February 18, 1918, at the hearing on the bill to create the War Finance Corporation:

The only sound and sure way to protect the market price of Government bonds is to teach the people to save, so that they may become true investors in bonds and not merely subscribers for bonds. Yet there will be on every issue subscribers who find themselves unable to pay for their bonds or through necessity, misfortune, or otherwise are obliged to sell them. And there will always be those, few in number I am glad to believe, whose patriotism is of the surface sort and who take the credit of appearing as subscribers but are unwilling to make the necessary sacrifices to enable them to become permanent investors in the bonds. Last and not least, there are those sympathizers with the enemy who deliberately sell their bonds with a view to the injury that they may do to the credit of the United States. I have studied with interest various measures which have been introduced in Congress and plans which have been presented to me for preventing Liberty bonds from going below par. Most of these, I am

sorry to say, have been, though very well meant, ill considered and calculated to destroy the success of the Government's financial plans. Any prohibition upon the sale of Liberty bonds would restrict subscriptions to such an extent as to jeopardize the success of future loans, and would be an act of bad faith toward those who have subscribed to the past loans and may be unable to hold their bonds. Any attempt to peg the price of Liberty bonds at par would be unwise and subject to legitimate criticism as turning the Government's long-term 20 or 25 or 30 year bonds into demand obligations. The only way in which that could be done would be for the Government to stand ready to redeem them at par at any time. The purpose of borrowing on time by the Government is exactly the same purpose which animates the manufacturer or merchant to borrow for a definite period in reference to his needs, with a view to paying back the obligation at maturity, and the man who lends the money has no right to expect a borrower to pay it back in advance upon his demand at any time. There is always a different reasoning, however, about the Government. Many people seem to think that if they lend their money to the Government for 10 years and the Government agrees to take it for 10 years and pay the principal in full upon maturity and interest in the meantime, if they get tired and want to sell their bonds the Government ought to stand ready to take them back immediately; in other words, to stand ready to convert a 10-year obligation into a demand obligation. They would never think of expecting that of a manufacturer or an individual or a banker who borrowed the money for a definite length of time. And yet many people have the idea that the Government, because it borrows their money for 10 or 20 years, or whatever period it may be, and agrees to pay it back at maturity at par with interest meanwhile at the stipulated rate, must stand ready to respond to their demand and redeem the bonds before maturity at par merely because they want it. The great mass of the purchasers of Liberty bonds not only are buying them with a view to holding them primarily because they are a good investment, but also because they patriotically want to help the Government; and I must say I have been immensely gratified with the splendid spirit shown by the people throughout the United States in buying Government bonds. I think I may say that out of the last two Liberty loans, when we sold over five billion eight hundred million dollars of bonds, there probably has not been resold up to date in the market more than one hundred million of these bonds.

If the Government attempted to make only demand loans, it would not be possible to pay them, and we should put ourselves in position to face some extraordinary calamity.

If the Government attempted to pay those loans on demand it might be bankrupted. Then, again, I think that if you undertook to peg the market at par you would encourage people to turn their bonds back to the Government when they get a little tired of holding them. Those people are not sufficiently informed about the importance of holding on as long as they can, and if they find that they can turn them back at par they would do so quicker, whereas if they may be penalized for selling before maturity they may not be so anxious to sell. Practically to attempt to maintain Government bonds at par involves the idea of issuing interest-bearing currency. It is impossible to peg the price of \$6,000,000,000 or \$10,000,000,000 of any security. The price of Government bonds will fluctuate as the price of other securities fluctuates. The man who holds on to his bonds and now watches calmly a downward variation in the price of his bonds will see the time come when the variation will be the other way and his bonds will sell at a premium. It is highly

desirable that violent and unnecessary fluctuations in price should be avoided and that all possible measures should be taken to stabilize the price of Liberty bonds.

The Treasury's views as to the depreciation in market prices have been frequently set forth. In the spring of 1920 the discussion of the question became particularly acute by reason of wide fluctuations in the prices. People who had no thought of selling their bonds were disturbed by constant agitation that the bonds be brought back to par regardless of inexorable economic laws which no artificial means could control without working greater injury. To clarify the situation, the position of the Treasury was stated in the following announcement, dated May 20, 1920:

Liberty bonds and Victory notes are selling below par partly because many of the people who bought them in a spirit of patriotism found themselves after the war was over unable or unwilling to continue to save and treated them as spending money. They are selling below par partly because the war and post-armistice conditions have resulted in a world-wide shortage of capital and credit which has greatly increased the price of money. The expansion of credits and increase in prices and the correlative decrease in the buying power of money necessarily carry with them a decrease in the market value of the promise to pay a fixed sum of money at a future date with interest at a fixed rate. This has nothing at all to do with the question whether the money will be paid at that future date or not. No one doubts that it will be. The obligation of the Government of the United States carries with it no risk whatever. It is certain of payment. The market price of that obligation is practically an indication of the pure interest rate at any given time, that is to say, of the present value of the promise to pay a given sum at a future date with interest in the meanwhile. It is simply an economic law that the decrease in the buying power of money or, to put it the other way around, the increase in the prices of commodities carries with it necessarily a depreciation in the present value of the promise to repay money at a future date.

During the past year or more Liberty bonds and Victory notes have been gradually shifting from the hands of those who borrowed to buy them and were unable or unwilling to save and pay for them into the hands of permanent investors whose holdings are taken out of the banks and put away in safe deposit vaults. One evidence of this is the tremendous decrease in banks' holdings of and loans upon Government war securities during the past year. Another indication of the steady absorption which is proceeding is the fact that the principal of amount of Liberty bonds and Victory notes which are held in registered form instead of coupon form has increased 55 per cent or 60 per cent since original issue and is steadily increasing.

From all parts of the country I hear reports from banks that their customers' purchases of Liberty bonds and Victory notes have, during the past few months, for the first time exceeded their sales. This indicates that real investors all over the country are absorbing the securities which are being sold, in consequence of stringent credit conditions, by corporations and others who purchased out of patriotism or as a secondary reserve against future requirements.

The necessity of those business companies and business men who are being forced to sell their securities at bargain prices in the present credit stringency is the opportunity of investors.

Just as expansion is accompanied by a decrease in the buying power of money and consequently of the value of an obligation to repay money at a future date, so deflation will be accompanied by an increase in the buying power of money and consequently of the promise to pay money at a future date. Dear money results in part from the effort to prevent further expansion. Naturally enough, its first effect is to force the best securities in the world on the market because they are the easiest to realize upon. As the inevitable deflation takes place and the price of money approaches normal again the market price of Liberty and Victory securities will, of course, appreciate in accordance with inexorable economic laws.

In the long run, therefore, the raising of discount rates in the effort to prevent further inflation will help Liberty bond and Victory note values, although the first effect of those steps has been to some extent to force them on the market out of weak hands. Deflation means increased buying power of money and of the present value of the promise to pay money at a future date.

There can be no doubt that Liberty bonds and Victory notes are, as they always were, the safest investment in the world, and that the present abnormal credit position affords a unique opportunity to those who have or can save money for investment in these securities.

The Savings Division also has made every effort to assist the people to understand the intrinsic value of the securities and the benefits, both to the Government and to themselves, of holding them. The following statement issued by it in May, 1920, was given wide circulation:

YOUR LIBERTY BOND.

The United States Government borrowed money from you to finance the war. You hold the Government's promise to pay you back. This promise is called a Liberty bond or Victory note. On this bond is stated the conditions under which the Government borrowed the money from you.

For instance: If you hold a bond of the third Liberty loan it states that on April 15 and October 15 of each year until maturity you will receive interest on the amount you paid for the bond. Other issues bear other rates of interest and other maturity dates, all of which are clearly stated on the bond.

Now, if you keep your bond until the date when the Government pays you in full for it, you do not need to worry if, in the meantime, the price is low one day or high the next. You and Uncle Sam are living up to your agreement with each other and neither will lose by it.

On the other hand, if you sell your Liberty bond now you will find that the man you sell it to will not give you a dollar for every dollar you paid for it. The price has been brought down because so many people are offering to sell their bonds. If the market is flooded with tomatoes you can buy them cheap, but if everybody is clamoring for tomatoes and there are few to be had, the price goes up. The same is true of Liberty bonds. Short-sighted people are dumping them on the market and wise ones are buying them.

The best advice that can be given to the owner of a Liberty bond is this: Hold the bond you bought during the war; it is as safe and sound as the United States Government itself.

Buy as many more at the present low rate as you can afford. If you hold them to maturity, you are bound to make the difference between what they sell at now and their face value. You will also receive good interest on your investment.

Hold on to your Liberty bonds and buy more.

Other suggestions for stabilizing market prices of Liberty and Victory notes have been that they be refunded into consolidated long-term bonds with full exemption from taxation, or for bonds bearing a higher rate of interest (discussed elsewhere in this report), and that they be accepted in payment of income and profits taxes, or that they be drawn by lot for redemption at par.

The Treasury's objections to the use of Liberty bonds in payment of income and profits taxes are set out in the letter of the Secretary to the chairman of the Committee on Ways and Means of the House of Representatives, dated May 15, 1920, which is, in part, as follows:

It would, in my judgment, be a mistake to accept Liberty bonds in payment of any part of the present Federal taxes for 1921 (except estate taxes, as authorized under existing law). The Government's necessities are so urgent that the whole amount of its revenues must be applied to meet its current disbursements, including, so far as possible, the reduction of its floating debt. To accept payment of even 25 per cent of the taxes in Liberty bonds would add to the Government's financial burdens, and the difference would have to be made up by an addition to the floating debt, an operation which could not in the end benefit the outstanding bonds. After all, the thing which will most benefit the market for Liberty bonds is the retirement of the floating debt. The bill in question, however, would reverse this process and in effect convert funded debt into floating debt.

It is also important to bear in mind that Liberty bonds are widely distributed among persons of small means, who are not themselves heavy taxpayers and are not so largely held by corporations and persons of great wealth. A provision at this time permitting them to be accepted in payment of income and profits taxes would, in these circumstances, result in making it possible for corporations and wealthy persons to reduce the amount of their taxes by buying Liberty bonds in the market at a discount and turning them in to the Government at a profit. The acceptance of Liberty bonds in payment of income and profits taxes would not correspondingly benefit the great majority of holders.

The effort in the Liberty loan campaigns and since has been, moreover, to reach the savings of the people and place the Government's war debt in the hands of millions of people who would become to that extent capitalists and permanent investors. If we are to reach promptly a sound economic position, the people's taxes and their current outgo should be met out of their current income. To accept the Government's funded war debt in payment of current taxes would be a step toward further undoing the work of the Liberty loan organization in seeking out funds for permanent investment from savings. This objection does not lie against the acceptance of Liberty bonds in payment of estate taxes, which, economically speaking, are capital taxes; but to accept Liberty bonds, which are or should be capital investments, in payment of an income tax would be a mistake. The depreciation of Liberty bonds in the market is due largely to the reaction which the country underwent after armistice day and the tendency to treat them as spending money for current purposes. This is a tendency which the Government should discourage, not encourage.

It is a matter of the utmost importance for our future welfare that the Government should exercise the most rigid economy and retire the war debt with the utmost rapidity. The proper course to be pursued in that respect is to

retire first the debt of shortest maturity. This in the long run will be most advantageous to the holders of the Liberty bonds of longer maturity, because they will be relieved to that extent of apprehension of further financing to meet the floating debt and earlier maturing funded debt. The retirement of the floating debt and, later on, of a substantial portion of the Victory notes, which mature in May, 1923, will do more to bring Liberty bonds to par or better than almost anything else. In the long run Liberty bondholders would only be injured by the reverse process of diverting to the retirement of the funded debt the proceeds of income and profits taxes, which should be available for current expenditures and the retirement of the floating debt.

The objection to the plan of drawing by lot is set forth in the Secretary's letter, dated July 14, 1920, to a correspondent, extracts from which are quoted:

With respect to the suggestion that the Government make drawings of Liberty bonds by lot for redemption at par, in order to stabilize the market for such bonds, in my judgment such a plan would be neither wise nor administratively feasible. The plan, in effect, introduces the lottery scheme into Government financing. Aside from this objection, it would introduce a speculative element into the Liberty bond market, since unquestionably many brokers and others would engage extensively in buying in Liberty bonds between redemption dates on the chance of being able to sell them to the Government at a profit. Furthermore, the plan would be likely to have the effect of dislodging bonds in the hands of investors willing and able to hold them to maturity. It would introduce the psychology of selling into the Liberty bond market, instead of the psychology of saving and holding for permanent investment. The securities of the Government of the United States are premier securities in the world to-day and should depend for their appeal upon their sound investment value, and not upon a lottery scheme intended to enlist the temporary interest of the speculative element in the community. * * *

The dissipation of the funds made available from taxes for the retirement of the public debt by the purchase of the Government's securities from certain fortunate holders at more than the market prices would result in the exhaustion of the sinking fund and leave the market unprotected and at the mercy of speculators in the intervals between drawings. It would exhaust the fund for the benefit of those who were most fortunate in the drawings and would in general redound to the benefit of speculators in the bonds and notes rather than support the market for holders in general.

As the Treasury views it, the Liberty-bond problem is chiefly one of quantity. Unfortunately, many holders of Liberty bonds, who patriotically subscribed for and held them during the war, have since regarded them as so much spending money and thrown them on the market. People generally have been spending money freely and saving too little, so that there has not been sufficient capital accumulated to overcome the pressure upon the market from those who bought bonds as patriots but not as investors. The holders of Liberty bonds who save and hold their bonds as investments will not, in the opinion of the Treasury, have occasion to regret it, nor will they suffer by reason of the present depreciation in market prices.

Liberty bonds, like other bonds, are subject to market influences, including the law of supply and demand, and their market quotations have declined in consequence of the failure of the great investing public to save in proportion to the enormous expenditure of capital during and since the war. Many patriotic people bought Liberty bonds and Victory notes under the impulse of patriotism who have been unwilling, since the war was over, to continue to lend their money to the Government and have forced their holdings on the market more rapidly than others could save funds to invest, with consequent depreciation in market prices. The remedy for this condition is for people to work and save, to keep their holdings of Liberty bonds as investments, and to purchase additional Government securities with their savings.

LOANS ON LIBERTY BONDS.

There has been an insistent demand from different sources during the year that the Treasury take some action to secure loans on easy terms for holders of Liberty bonds and Victory notes. The Treasury has consistently taken the position that the problem was a banking one, to be worked out through the banks and the Federal Reserve System. The question was definitely presented from one angle in a bill (S. 3680) to provide for loans to holders of Liberty bonds through the postal savings banks. At the request of the Committee on Finance of the Senate, the Treasury indicated its views on this bill in the following letter to the chairman of the committee:

WASHINGTON, *January 17, 1920.*

MY DEAR SENATOR: I have the honor to acknowledge receipt of your committee's letter of January 10, 1920, inclosing a copy of S. 3680, a bill to provide for the purchase and redemption of Liberty bonds in the denomination of \$50 and \$100, through the postal savings banks, and requesting a statement of the Treasury's suggestions touching the merits of the bill and the propriety of its passage. The Treasury definitely feels that the plan proposed by the bill would be too difficult of administration to be successful, and that even if it were possible to administer the plan it is open to fundamental objections of policy.

The bill provides for making loans to holders of Liberty bonds through the postal savings banks at the coupon rate. It makes no discrimination, and it would not be administratively practicable to discriminate between those holders who desire loans for legitimate purposes and those whose need for loans arises from wasteful or speculative expenditure. For the Government to go into the banking business and make loans at less than the current rate on Liberty bonds would be contrary to every sound principle of economics and finance. The Government ought not to go into the banking business. If it did, it ought not to make loans at less than the market rate. The Government, moreover, has no surplus funds to lend, and the funds for making any such loans, over and above available resources of the postal savings system, would have to be provided by new Government borrowings in the market.

The Government is already doing everything in its power to protect the market for Liberty bonds and the interests of Liberty bondholders by means of purchases for the 5 per cent bond-purchase fund provided by existing law. The Treasury's purchases of Liberty bonds have been made, as you know, under the authority of section 15 of the second Liberty bond act as amended by section 6 of the third Liberty bond act, which authorized the Secretary of the Treasury to purchase annually up to 5 per cent of the bonds of each series outstanding at not exceeding par and accrued interest. To November 30 last \$1,043,080,500 principal amount of Liberty bonds had been purchased, the principal amount paid therefor being \$993,363,526.15. A copy of my special report of these operations to November 30, 1919, is inclosed herewith. The authority thus conferred by Congress has been exercised for the purpose of stabilizing the market, and in my judgment very important results have been achieved redounding to the benefit of all holders of Liberty bonds. The effect of such large purchases obviously would be to sustain and strengthen the market for the bonds. On the other hand, for the Treasury to pay more than the market price for its purchases for the 5 per cent bond-purchase fund, or to use the fund for the purposes of a plan like that proposed in the bill, would tend to exhaust the fund for the benefit of those who were most expeditious in realizing on their holdings, leaving the market otherwise unprotected.

The Treasury's purchases of Liberty bonds have been made to protect the market for the bonds and the Government's credit. It is unfortunate that so many of the patriotic subscribers to the Liberty loans, who purchased bonds of maturities extending from 10 to 30 years, found themselves unable or unwilling to continue to extend credit to the Government during the life of the bonds and forced their holdings upon the market after the cessation of hostilities, which had, of course, increased their intrinsic value. The Treasury has not profited by their action or by its purchases of these bonds. It has been obliged to borrow at higher rates of interest the money to make the purchases which have been forced upon it for the protection of the holders of the bonds and of the Government's credit.

The whole plan for the stabilization of the market value of Government bonds through the 5 per cent bond purchase fund was, as you no doubt recall, fully discussed by Secretary McAdoo before the Committee on Ways and Means at the hearings on the third Liberty bond bill and the fact of the creation of the fund was advertised in the circulars describing the bonds of the third, fourth, and Victory loans and was an important factor in the success of those loans.

I think it is also important to note, in connection with the plan proposed by the bill, that extremely heavy demands have recently forced the Federal reserve banks to increase their rediscount rates in order to protect the country from the serious consequences of an overexpanded credit structure. The demand for capital and credit unfortunately appears to exceed the supply, which can only be replenished out of the savings of the people. A situation of this sort, under inexorable economic law, forced higher rates for money and it is impracticable to discriminate in the matter of rates between those holders of Liberty bonds who are trying to save and pay off the loans which they made to buy them, and those who seek to use their bonds as a means of obtaining cheap money for speculative or other wasteful purposes. It is true that subscribers for Liberty bonds were urged to borrow and buy them; but it is also true that they were urged to save and pay for them. Those who only obeyed the first injunction—to borrow and buy, and have neglected the second—to save and pay, have done only a portion of their duty and have no claim at this late date to have the Government carry their bonds at a low rate of interest at the expense of the general welfare.

The plan proposed in Senate bill 3680 would have a tendency to convert Liberty bonds held by small bondholders into ready cash at Government expense, and thereby discourage thrift, encourage spending, and further increase prices and the cost of living. The great effort of the Liberty loan campaigns has been to reach the investor and get him not only to buy Liberty bonds but to save and keep them as investments. By enabling small bondholders to secure from the Government cash up to 90 per cent of the face value of their bonds, the bill would tend to undo the work of the Liberty loan campaigns. In this connection it is important to note that, as shown in my annual report for the year 1919, on pages 72-77, the outstanding bonds of the \$50 denomination on June 30, 1919, amounted to nearly \$2,000,000,000 and the outstanding bonds of the \$100 denomination on the same date to about \$2,500,000,000. Liberty bonds of all other denominations, moreover, are exchangeable by the holders without charge for bonds of the \$50 and \$100 denominations. To the extent that the plan succeeded, therefore, it would be likely to require the use of a large volume of Government funds in order to make the loans on the bonds. It is, of course, impossible to forecast what proportions the loans would assume, but they would doubtless exceed the available funds in the postal savings banks, whose resources are already largely invested in Liberty bonds, under the supervision of the Board of Postal Savings Trustees. The proposed plan apparently makes no provision for advancing Government funds, but once initiated the available resources of the postal savings banks would, no doubt, soon be exhausted, and it would be difficult for the Government to withhold accommodations from some holders of its bonds which had already been extended to others.

The use of Government funds for the purpose of making small loans on Liberty bonds would also be essentially class legislation, and by necessitating governmental expenditure, or further Government loans, would impose additional burdens on the whole community for the benefit of a portion of the community.

The provision that bonds pledged with postal savings banks and not redeemed within six months be sold at par and accrued interest or retained by the postal savings banks in lieu of deposits would, for all practical purposes, be inoperative under present conditions. So long as Liberty bonds are selling at a discount, it would be impossible to dispose of them at par, with the result that they would be held by the postal savings banks indefinitely, with consequent depletion of their cash reserves. Apart from this the plan apparently makes no provision whatever for closing out the borrower's equity in case of default.

From the point of view of administration the plan offers many difficulties, some of which chiefly concern the Post Office Department. While the Treasury, of course, is not in a position to speak for the Post Office Department, one serious objection immediately suggests itself in that post offices generally do not have sufficient safekeeping facilities to make it feasible for them to hold and maintain deposits of Liberty bonds received under the plan. The plan directly affects the Postal Savings System and would require careful consideration from that point of view. Many difficulties also arise in connection with the plan for adjusting interest on the loans by retaining the maturing coupons on the bonds deposited; this method works only in cases where the loan is both originally made on an interest date and repaid on an interest payment date. If the loan is paid on any other date, and is not exactly of six months' duration, the Government would lose the accrued interest represented by the next maturing coupon, which it is proposed to return to the borrower; and from the borrower's point of view, if the loan is originally made between interest dates, the Government by retaining and collecting the next maturing coupon may secure

interest which accrued during a period when the bond was held by the borrower, with consequent injustice to the borrower.

The Treasury feels that the existing banking and credit machinery of the country is adequate to provide for loans upon Liberty bonds in small amounts at reasonable rates without imposing these additional burdens upon the Treasury and the Postal Savings System.

Very truly yours,

CARTER GLASS.

Hon. BOIES PENROSE,

Chairman Committee on Finance,

United States Senate,

Washington, D. C.

The agitation for governmental action to secure loans on Liberty bonds and Victory notes through the Federal Reserve System at low rates of interest and on easy terms was presented to the Treasury in definite form by the Massachusetts Real Estate Exchange. The Treasury replied in two letters of July 1, 1920, and August 28, 1920, as follows:

WASHINGTON, July 1, 1920.

DEAR SIR: I received your letter of June 28, 1920, regarding market prices of Liberty bonds and the action of Federal reserve banks in raising discount rates.

The Federal reserve bank discount rates are fixed, not by the Treasury but by the Federal reserve banks, subject to review and determination by the Federal Reserve Board, and have recently been increased and brought more into line with prevailing commercial rates, in order to reduce speculation and correct our expanded credit situation. The demand for capital and credit unfortunately appears to exceed the supply, which can only be replenished out of the savings of the people. A situation of this sort, under inexorable economic law, forces higher rates for money. The United States is under no obligation to guarantee the holders of Liberty bonds against fluctuations in the market rate for money or variations in the money market conditions, or to guarantee a market at par for the bonds. The interest rate and life of the bonds were fixed in the bonds, but no commitment was made as to the discount rate at the Federal reserve banks. It would be intolerable if the Federal Reserve System should, a year after the Victory Liberty loan was floated, be prevented from exercising the normal and necessary control over our expanded credit situation by an increase in discount rates, in order to enable those subscribers for the Liberty loans who have not paid for their bonds, or can not continue to hold them without borrowing, to carry them indefinitely at the people's expense through the Federal Reserve System. Such subscribers have no claim at this late date to have their bonds carried at a low rate of interest at the expense of the general welfare.

So far as the Treasury is informed, however, there has been no effort by the Federal Reserve Board or the Federal reserve banks to force liquidation of loans secured by Liberty bonds or Victory notes, as distinguished from other loans, and from the Treasury point of view, of course, it is desirable that bondholders should keep their bonds as investments rather than be forced to sell them on the market. The Federal reserve banks, moreover, are still maintaining a preferential rate in favor of loans secured by Liberty bonds and Victory notes. In this connection, I inclose for your information a copy of Gov. Harding's letter of May 24 to Senator Owen and a copy of the Federal Reserve

Board's letter of May 25 to the President of the Senate, which set forth the general policy of the Federal Reserve Board with reference to the reduction of loans.

The depreciation in the market prices of Liberty bonds is the result chiefly of market conditions and does not reflect any change in the intrinsic value of the bonds to investors. Liberty bonds, like other bonds, are subject to market influences, including the law of supply and demand, and their market quotations have declined in consequence of the great scarcity of capital and credit and the failure of the investing public to save in proportion to the enormous expenditure of capital during and since the war. Many patriotic people bought Liberty bonds and Victory notes under the impulse of patriotism who proved to be unwilling, once the war was over, to continue to lend their money to the Government and forced their holdings on the market more rapidly than others could save funds to invest, with consequent depreciation in market prices. The remedy for this condition is for people to work and save, to keep their holdings of Liberty bonds as investments, and to purchase additional Government securities with their savings to the utmost of their ability. At current market prices the outstanding Liberty bonds offer a great opportunity to investors, and there are many indications that their absorption by real investors is progressing.

Very truly yours,

D. F. HOUSTON, *Secretary.*

WILLIAM S. FELTON, Esq.,

President, Massachusetts Real Estate Exchange,

20 Pemberton Square, Boston, Mass.

WASHINGTON, August 28, 1920.

SIR: I have received your letter of July 31 with further reference to the market prices of Liberty bonds and the action of the Federal reserve banks in raising discount rates.

I note that you agree that the present excess of the demand for capital and credit over the supply, which can only be replenished out of the savings of the people, forces higher rates for money and makes necessary a curtailment of non-essential loans; but that you urge that the Federal reserve banks should rediscount loans secured by Liberty bonds at a slightly higher rate than is borne by the bonds themselves, when such bonds are in the hands of the original subscribers and the loans are not new loans, but are renewals of loans made when the bonds were purchased, provided that such loans be reduced at each maturity in reasonable amounts, under penalty of a much higher rate of interest.

As stated in the Treasury's letter of July 1, 1920, Federal reserve bank discount rates are fixed not by the Treasury but by the Federal reserve banks, subject to review and determination by the Federal Reserve Board. In my judgment, however, it would be neither wise nor administratively feasible for Federal reserve banks to attempt to make any such discrimination in favor of loans secured by Liberty bonds in the hands of original subscribers.

It is true that to meet the Government's urgent war necessities subscribers for Liberty loans were urged to borrow and buy Liberty bonds. It is also true that they were urged to save and pay for them. The interest rate and life of the bonds were fixed in the bonds, but no commitment was made as to the rate of interest at which holders of the bonds might borrow on the security of the bonds, nor as to the discount rates on such loans at Federal reserve banks. Those subscribers who obeyed the first injunction—to borrow and buy Liberty bonds—but have neglected the second—to save and pay for them—have done only a part of their duty to the Government. It is now over a year since the

Victory Liberty loan was floated, and subscribers to the various Liberty loans have had ample time to save and pay for their bonds and notes. Aside from the inevitable practical difficulties involved in the administration of the plan which you suggest, therefore, such subscribers have no claim at this late date to have their bonds carried at a lower rate of interest than other holders of Liberty bonds and Victory notes.

The raising of discount rates and the efforts to curtail nonessential loans should in the long run help Liberty bond and Victory note values by preventing further inflation. Deflation means an increase in the buying power of money and of the present value of the promise to pay money at a future date. As the inevitable deflation takes place, and the price of money becomes normal again, market prices of Liberty bonds and Victory notes should appreciate in accordance with inexorable economic law.

Very truly yours,

D. F. HOUSTON, *Secretary.*

WILLIAM S. FELTON, Esq.,

President, Massachusetts Real Estate Exchange,

209 Washington Street, Boston, Mass.

LIBERTY LOAN TRANSACTIONS.

From the beginning of the war to June 30, 1920, there had been issued on account of subscription, conversion, exchange, transfer, or otherwise, Liberty bonds and Victory notes in the gross amount of \$37,037,928,550. During the same period \$17,456,727,100 of Liberty bonds and Victory notes were retired. This left outstanding on June 30, 1920, bonds and notes of the par value of \$19,581,201,450, including delivered and deliverable items. These figures indicate the magnitude of the Treasury's operations in connection with the five great popular war loans. The vast transactions are summarized in Exhibits 39 to 51, pages 417 to 440. These show the payments of the principal of the loans received by the Treasurer, the principal retired, and the securities outstanding; a summary of all issues and retirements of bonds and notes; recapitulations of the first, second, third, fourth, and Victory Liberty loan transactions; a statement and analysis of the war securities account; bonds and notes outstanding by denominations; denominational exchanges; conversion transactions; final allotments of subscriptions; and subscriptions allotted by States.

Against total subscriptions of \$24,072,257,550, bonds and notes amounting to \$21,435,370,600 were allotted. The cash payments received by the Treasurer on account of allotted subscriptions aggregated \$21,432,944,521, including \$26,071 representing part payments. The Treasury had delivered up to June 30, 1920, bonds and notes to the par amount of \$21,432,902,900, leaving an undelivered item against allotted subscriptions of \$15,550 in Victory notes.

Bonds and notes aggregating \$4,492,956,200 had been issued on conversion up to the close of the fiscal year. These included the conversion of \$333,421,950 of $4\frac{1}{4}$ per cent Victory notes into $3\frac{3}{4}$ per cent

Victory notes and the conversion of \$98,399,400 of $3\frac{3}{4}$ per cent Victory notes into $4\frac{3}{4}$ per cent Victory notes. The extension of the conversion privilege accorded 4 per cent bonds of the first Liberty loan converted and of the second Liberty loan under authority of the Victory Liberty loan act continues in effect. There were outstanding on June 30, 1920, \$65,803,050 of the first 4's out of the total of \$568,318,450 originally issued, and there remain of the second 4's \$240,003,250 of an original issue of \$3,807,865,000.

Registered bonds and notes aggregating \$1,538,534,900 have been issued against a corresponding face amount of coupon bonds and notes surrendered for exchange. Coupon bonds and notes of the aggregate face amount of \$345,065,750 have been issued upon exchange for an equivalent amount of registered bonds and notes. There were delivered against original subscriptions \$2,188,965,350 registered bonds and notes. On June 30, 1920, there were outstanding \$3,515,713,500 of these securities, a net increase of \$1,326,748,150. This gain in the registered issues is gratifying. It indicates that the holders of Liberty bonds and Victory notes are realizing the advantages, from the standpoint of safe-keeping, of the registered over the coupon securities. This is particularly important in view of the great number of them outstanding in the hands of persons unaccustomed to investments and without available facilities for safe-keeping.

Coupon bonds and notes amounting to \$4,192,053,750 have been presented for denominational exchange. Permanent bonds to the amount of \$2,627,781,850 had been issued in exchange for temporary bonds up to June 30, 1920. Transfers of registered bonds and notes from one registered holder to another aggregated \$187,317,600.

The number of bonds and notes handled by the Treasury indicate the great volume of these transactions. The Division of Loans and Currency received into stock a total of 174,553,049 pieces, with an aggregate value of \$54,615,012,100. There have been withdrawn from stock 147,310,203 worth at par \$42,941,154,050. There have been retired 72,816,761 with a face value of \$20,567,903,600. There remain on hand 35,597,662 pieces worth at par \$14,696,092,600, of which 27,242,846 pieces, amounting to \$11,673,858,050, were in the Treasury vaults, and 8,354,816 pieces, amounting to \$3,022,234,550, on hand in Federal reserve banks. There were outstanding on June 30, 1920, 66,138,626 pieces in the face amount of \$19,351,015,900. Deducting from this amount an unadjusted item of \$850 and adding \$230,186,400 of permanent bonds issued in exchange for temporary bonds, but not yet delivered, brings the total amount of Liberty bonds and Victory notes outstanding on June 30, 1920, to \$19,581,201,450.

The great number of bonds and notes outstanding is an index to the distribution of the loans. The Treasury's record of denomina-

tional exchanges indicates an important movement from the lower to the higher denominations. This doubtless is due primarily to sales of the lower denominations and their subsequent surrender to the Treasury for higher denominations. Notwithstanding the great amount of the smaller denominations which have been sold, the aggregate number of \$50 and \$100 bonds and notes outstanding continues large. On June 30, 1920, 30,456,794 of the \$50 denomination were outstanding, in the aggregate face amount of \$1,522,839,700. On the same date there were 23,436,472 of the \$100 denomination outstanding in the total amount of \$2,343,647,200. The number of the \$500 Liberty bonds and Victory notes outstanding at the close of the fiscal year was 3,611,476 in the amount of \$1,805,738,000; the number of the \$1,000 denomination was 8,028,471 of the face value of \$8,028,471,000. Since the original deliveries in coupon Liberty bonds and Victory notes there has been a net decrease of \$871,167,000 in the \$50 denomination and a net decrease of \$730,386,000 in the \$100 denomination through denominational exchanges. On the other hand, there has been a net increase of \$1,681,218,000 in the \$1,000 denomination.

The final allotments of subscriptions of Liberty loans by Federal reserve districts corrected to October 31, 1920, are given in Exhibit 50, page 439. These figures are final with respect to the first, second, third, and fourth loans. All adjustments for those loans have been made and incomplete subscriptions and part payments thereon declared in default. The final statistics differ in no important particular from prior allotment statements except for that of the fourth Liberty loan, which shows a reduction of some \$28,000,000 from previous figures. This is caused chiefly by the reduction in the amount of subscriptions reported by the War Department as made by members of the military forces. The War Department has only recently corrected its reports to the Treasury, and shown that a number of Army subscriptions previously reported by the War Department did not, as a matter of fact, result in official subscriptions. The annual report of the Secretary of the Treasury for 1919 showed the allotted subscriptions of Victory notes as of September 30, 1919. The exhibit referred to gives the allotments for the Victory loan as of October 31, 1920, when they amounted to \$4,497,818,750. The figures are still subject to minor adjustments.

Because of the public interest in the subscriptions allotted by States in the several Liberty loans, there is attached a table, which appears as Exhibit 51, page 440. For the first and second loans, the Federal reserve bank of Richmond did not maintain records by States. Allotments for the States in that district consequently are not given for these two loans. The statement is incomplete for the sixth Federal reserve district for the third loan.

Pursuant to the provisions of Treasury Department Circular No. 111, dated April 6, 1918, offering the third Liberty loan for subscription, the Secretary of the Treasury has declared forfeited all delinquent third Liberty loan subscriptions filed with an official agency, together with all payments made thereon and all right and interest in the bonds allotted. This forfeiture was declared by Treasury Department Circular No. 183, dated February 20, 1920, attached as Exhibit 52, page 441. Accordingly, all forfeited installment payments are covered into the Treasury to the credit of miscellaneous receipts.

Under the provisions of Treasury Department Circular No. 121, dated September 28, 1918, offering the fourth Liberty loan for subscription, similar action has been taken as to all delinquent subscriptions to the fourth Liberty loan by Treasury Department Circular No. 200, dated July 30, 1920, given as Exhibit 53, page 443. Delinquent subscriptions to the first and second Liberty loans were previously declared in default as reported in 1919.

Additional regulations were issued during the year in Department Circulars Nos. 142 and 182, dated November 15, 1919, and February 14, 1920, respectively, with respect to assignments of United States registered bonds and notes and are appended as Exhibits 54 and 55, pages 445 and 446. The regulations relative to transportation charges and risks on bonds and notes presented for exchange or transfer were amplified by Supplement to Department Circular No. 141, dated April 30, 1920, and those with respect to assignments in case of death by Second Supplement to Department Circular No. 141, dated October 12, 1920, attached as Exhibits 56 and 57, pages 447 and 449.

For convenience of the public, the department has summarized the terms and conditions and salient features of the several Liberty loans. This information is contained in Form L. and C. 400, as revised June 30, 1920, is printed as Exhibit 58, page 451.

PERMANENT COUPON LIBERTY BONDS.

With one exception, the issues of coupon Liberty bonds were originally delivered during the war in temporary form with coupons attached covering only four interest payments. The exception was the issue of $3\frac{1}{2}$ per cent bonds of the first Liberty loan, which were delivered in permanent form with all coupons to maturity. Notes of the Victory Liberty loan and registered bonds of all of the Liberty loans also were delivered in permanent form. The expedient of issuing temporary bonds resulted from the department's experience in the first Liberty loan. That operation clearly showed that, with the growing issues of war securities, the policy of delivering in the first

instance long-term bonds with all coupons attached presented insuperable mechanical difficulties and at the same time involved much waste owing to subsequent conversions and exchanges.

With the approach of maturities of the last coupons of the temporary bonds it became necessary for the Treasury to take the second and final step and to provide for the exchange of these for permanent bonds with coupons to maturity. The undertaking was a great one because of the number of pieces outstanding. Plans were evolved for the exchange over a period sufficient to permit the issuing of bonds without inconvenience to the Treasury or to the holders. Regulations governing the matter are contained in Department Circular No. 164, dated December 15, 1919, and two supplements, dated March 13 and August 27, 1920 (Exhibits 59, 60, and 61, pp. 454 to 461). The form of application is given in Form L and C. 305 (Exhibit 62, p. 462). The following public statement was published under date of March 23, 1920:

As already announced by the Treasury and the several Federal reserve banks, exchanges of the temporary 4½ per cent coupon bonds of the third Liberty loan for permanent bonds with all subsequent coupons attached began on Monday, March 15, 1920, and are now being carried on, chiefly through the several Federal reserve banks, as fiscal agents of the United States, with the cooperation of the banking institutions of the country. Detailed information concerning the exchanges is given in Treasury Department Circular No. 164, dated December 15, 1919. The temporary coupon bonds of the third Liberty loan had no interest coupons attached for interest accruing after March 15, 1920, and therefore became exchangeable by their terms on and after that date for new bonds with all subsequent coupons to maturity. Full supplies of the permanent third 4½'s are available, and it is hoped that the exchanges will proceed as promptly as possible, in such a way as to meet the convenience of holders of temporary bonds and banking institutions as well as the Treasury Department. The next interest payment on the third Liberty loan does not occur, however, until September 15, 1920, and it is understood that in the meantime, up to about September 6, 1920, the temporary third 4½'s will still be recognized as good deliveries in the market, so that there is no necessity for any immediate rush by bondholders to exchange their temporary bonds for permanent bonds.

The Treasury has made ample provision in connection with these exchanges of temporary for permanent bonds whereby recognized banking institutions in the United States who make no charge for their services may effect exchanges for themselves and their customers without expense or risk on account of the transportation of the temporary bonds surrendered or of the permanent bonds issued upon exchange. Adequate provision has also been made whereby incorporated banks and trust companies may make over-the-counter exchanges. Full information as to these arrangements is available at the respective Federal reserve banks. In view of the liberal arrangements which have thus been made for effecting the exchanges, and in view of the fact that no charge for the exchange is imposed by the United States, the Treasury confidently appeals to the banking institutions of the country to handle exchanges of temporary for permanent bonds without expense to the holders, and thus complete their

patriotic service in connection with the war loans by carrying out this last, and mechanically the largest, operation related to our war financing without imposing charges for their own services. Holders of temporary bonds will, it is hoped, consult their own banks and avail themselves of their assistance in effecting the exchanges for permanent bonds.

Deliveries of permanent bonds in exchange for temporary bonds will be made within the United States by the Federal reserve banks and the Treasury Department at the risk and expense of the United States, whether or not submitted through banking institutions, but the arrangements for the transportation of temporary bonds surrendered for exchange at the expense and risk of the United States are available only when presented through recognized banking institutions to the Federal reserve banks. In other words, holders of temporary bonds who surrender their bonds direct to a Federal reserve bank or the Treasury Department for exchange will be obliged to make their own arrangements for the transportation and insurance of the temporary bonds surrendered.

First Liberty loan converted 4 per cent bonds, second Liberty loan 4 per cent bonds, first Liberty loan converted $4\frac{1}{4}$ per cent bonds, and second Liberty loan converted $4\frac{1}{4}$ per cent bonds are all expected to be available in permanent form for delivery in exchange for temporary bonds within the next month or six weeks, and exchanges of these bonds will be handled in substantially the same manner as exchanges of the third Liberty loan bonds. Inasmuch as the temporary first $4\frac{1}{4}$'s and second $4\frac{1}{4}$'s have coupons attached covering interest to June 15 and May 15, 1920, respectively, they need not be exchanged for permanent bonds until those dates; in fact, before June 15 and May 15, 1920, respectively, the permanent first $4\frac{1}{4}$'s and second $4\frac{1}{4}$'s are required chiefly for delivery upon conversion and exchange of temporary first 4's and second 4's, which have no coupons attached for interest accruing after December 15 and November 15, 1919, respectively, but whose exchange has been postponed awaiting the preparation of the permanent $4\frac{1}{4}$'s, in order that both conversion and exchange might be effected simultaneously. As repeatedly announced, the first 4's and second 4's are still convertible into $4\frac{1}{4}$ per cent bonds, pursuant to the terms of the extended conversion privilege, and holders of temporary 4 per cent bonds are therefore urged to submit their bonds for both exchange and conversion. As already announced, in the absence of written instructions to the contrary, temporary 4 per cent bonds presented for exchange for permanent bonds will be deemed to be presented also for conversion into $4\frac{1}{4}$ per cent bonds.

The temporary $4\frac{1}{4}$ per cent bonds of the fourth Liberty loan still have one unmatured coupon attached, due October 15, 1920. Exchanges of temporary fourth Liberty loan bonds will therefore not begin until approximately October 15, 1920, when it is expected that adequate stocks of permanent bonds will be available, so as to permit exchanges to be carried on in substantially the same manner as exchanges of third Liberty loan bonds. Temporary first second $4\frac{1}{4}$'s do not become exchangeable until December 15, 1920. The first $3\frac{1}{2}$'s and both series of Victory notes were issued originally in permanent form.

All 4 per cent and $4\frac{1}{4}$ per cent registered Liberty bonds are already in permanent form and need not be exchanged for other bonds. Holders of temporary 4 per cent and $4\frac{1}{4}$ per cent coupon Liberty bonds are therefore strongly urged to present their temporary bonds for exchange for registered bonds instead of for coupon bonds in permanent form, and in that event will promptly receive registered bonds upon exchange. The exchanges of temporary for registered bonds may be made at any time, and need not await the completion of the permanent coupon bonds. Substantially the same facilities are available

for exchanges of temporary bonds for registered bonds as for exchanges for permanent coupon bonds, and holders of the temporary bonds should have no difficulty in arranging with their own banks for exchanges into registered bonds without expense.

It was the Treasury's intention to have the permanent bonds ready for distribution on the date of the maturity of the last coupon of the temporary bonds, or as early as possible during the six months following. This made it possible for holders to make the exchange in advance of the first interest payment date after the maturity of the last coupon on temporary bonds. The last coupon of the third Liberty loan $4\frac{1}{2}$ per cent bonds matured on March 15, 1920. Exchanges began on that date at the Treasury and at the Federal reserve banks and have proceeded without interruption. Deliveries of the first Liberty loan converted $4\frac{1}{2}$ per cent and second Liberty loan converted $4\frac{1}{2}$ per cent bonds in permanent form were commenced in the spring of 1920. They were available before the interest payment dates on May 15 for the second loan and June 15 for the first loan. The 4 per cent bonds of the second Liberty loan and the first Liberty loan converted presented an unusual problem because usually conversion into $4\frac{1}{2}$ per cent bonds was also involved. As the last coupons of the second Liberty loan 4 per cent bonds matured on November 15, 1919, and those of the first Liberty loan converted 4 per cent bonds on December 15, 1919, provision was made to cover the current six months' period by the delivery of special 4 per cent coupons. The final coupon attached to the temporary bonds of the fourth Liberty loan matured October 15, 1920, and it is expected that deliveries of the permanent bonds will commence toward the close of the present calendar year. Those of the first Liberty loan second converted will be ready for delivery on December 15, 1920, the date of maturity of the final coupon attached to the temporary bonds of that loan.

In these exchanges the Treasury has assumed all expenses and risks of transportation of temporary bonds surrendered when transactions are conducted through Federal reserve banks and recognized banking concerns. The return of all permanent bonds issued upon exchange for temporary bonds is at Government risk and expense, within the limits of the United States. To facilitate exchanges, the Treasury has authorized advance deliveries to incorporated banks and trust companies. All such consignment stocks have been secured by the pledge of collateral security with the Federal reserve banks in accordance with Form L. and C. 304 (Exhibit 63, p. 464).

The following table shows the approximate number and amount of temporary coupon bonds and the number and amount of permanent bonds delivered to October 31, 1920:

	Temporary coupon bonds.		Permanent bonds delivered to Oct. 31, 1920.	
	Number of pieces. ¹	Amount. ¹	Number of pieces.	Amount.
First 4's } First 4½'s }	2,258,301	\$420,264,500	1,126,478	\$268,707,850
First second 4½'s.....	9,857	2,442,800		
Second 4's } Second 4½'s }	8,622,833	2,730,338,350	4,610,049	2,025,111,500
Third 4½'s.....	13,246,111	2,933,426,850	10,125,967	2,651,118,150
Fourth 4½'s.....	20,901,538	5,308,266,900		
Total.....	45,038,640	11,394,739,400	15,862,494	4,944,937,500

¹ Approximate.

Eliminating the bonds of the fourth loan and of the first second converted, deliveries of which have not yet commenced, the table indicates that while something over 81 per cent par amount of the temporary bonds have been exchanged for permanent bonds, only about 66 per cent of the number of pieces have been so exchanged. The Treasury has made every effort to reach holders of temporary bonds. In addition to public announcements from the department and the Federal reserve banks, placards were prepared advising holders of these securities as to the necessity of exchanging them. These were transmitted to post offices, other public buildings, and banks and trust companies for public display. A copy of the placard and the Treasury's letter to the banks and trust companies dated August 18, 1917, are attached as Exhibit 64, page 466.

Original deliveries of coupon bonds of the several Liberty loans in temporary form aggregated 81,530,097 pieces, with a value of \$17,-119,906,500, deliveries against subscriptions and against conversions being included. Because of conversions, denominational exchanges, and exchanges of coupon for registered bonds, the number of pieces in temporary form was reduced to about 45,000,000 pieces. Consequently, it will not be necessary to incur the expense of preparing and delivering approximately 36,500,000 pieces in permanent form.

GOVERNMENT SAVINGS SECURITIES.

The Savings Division has general supervision of a small savings organization in each of the 12 Federal reserve districts. Its work and its field service have, during the past year, been along the lines outlined in the Annual Report of the Secretary of the Treasury for 1919, on pages 62 and 63. In general, the efforts of the Savings Division have been directed to the following ends: (1) To develop and protect the secondary market for all war issues of Government securities. (2) To sell Government savings securities. (3) To make permanent the habits of regular saving and investment in United States Government securities. In the accomplishment of these pur-

poses, the division has developed its activities along the following lines:

(1) *Schools*.—The division is cooperating with leading educators of the country to the end that instruction in sound economic principles shall become an inherent part of the American school system. It has received fine support from the schools in promoting thrift, saving, and investment in small Government securities. The principles of saving are being taught and thrift stamps and war-savings stamps are being sold in a large majority of the schools of the country. Several of the State departments of education have included chapters on saving and investment in their State courses of study. Many new editions of school textbooks now contain material on Government securities and the practice of sound investment. At their annual meeting in Salt Lake City in July, 1920, the National Education Association appointed a committee of seven State superintendents to confer with the division with the view of shifting the responsibility of the educational phases of this movement to the school authorities, and thus relieving the Savings Division of much of the detail work it has heretofore had to assume. It is hoped that by the end of the current fiscal year the active direction of the school savings work will have been transferred in large measure to the school authorities.

(2) *Industries*.—Government savings associations have been organized in various industries throughout the country. In many plants the per capita investment of the employees in savings stamps has shown a steady increase. The partial payment plan, which enables employees to buy Liberty bonds and Victory notes at the current market prices, is also being widely used. Numerous labor organizations have passed resolutions presenting to their membership the advantages of Government securities. The resolutions adopted by the American Federation of Labor, for example, were as follows:

RESOLUTIONS ADOPTED BY THE AMERICAN FEDERATION OF LABOR.

Whereas wage earners have become familiar with the merits of securities issued by the United States Government, in denominations small enough for saving, which are known as savings stamps and Treasury savings certificates; and

Whereas wage earners should adopt some form of easy saving for their individual benefit as well as the good of the entire country, through a practical method that is guaranteed to take care of the future and establish regular and systematic investment of small amounts; and

Whereas wage earners have the opportunity to affiliate themselves with the Government savings associations that are now being formed under the auspices of the Treasury Department: Therefore, be it

Resolved, That the American Federation of Labor in convention assembled, at Montreal, Canada, June, 1920, reiterate its former indorsement and approval of the plan of the Savings Division of the United States Treasury Department now being operated in each of the Federal reserve districts; and be it further

Resolved, That all the international unions and Federal unions be urged to advocate thrift stamps, Government savings stamps, and Treasury savings certificates as the best and safest method for saving and investment that their membership can adopt, as against the schemes of private corporations which are now attempting to take advantage of the Government's savings program and the saving habit formed during the war by introducing thrift systems in industry through which they will make profit from the savings of the workers; and be it further

Resolved, That this convention in view of the current low market prices of Liberty bonds and Victory notes advises all international and Federal unions as well as State federations of labor and central bodies to urge their respective memberships to purchase Government securities at current market prices either for cash or on the installment plan and to hold their bonds until maturity; and be it further

Resolved, That the members of the various unions be requested to urge their employers and local banks to provide partial-payment facilities for the purchase of Government securities at market prices; and be it further

Resolved, That copies of this resolution be sent to President Woodrow Wilson; Secretary of the Treasury, Hon. David F. Houston; the other members of the Cabinet; United States Senators and Congressmen; governors of the different States and Territories; and the directors of the Federal reserve districts, with the request that steps be taken to extend and advertise the opportunities which the Government has provided for the practice of thrift and saving on a small, easy payment plan for all the people, and especially the wage earners.

(3) *Women's organizations*.—Women's organizations have cooperated to the same end and have urged the application of the budget idea to personal and household management. Outlines provided by the division have been made the basis of economic study by women's clubs and are being incorporated in regular club programs.

(4) *Publicity*.—Information has been furnished to newspapers and periodicals. Articles have been continuously supplied and printed in labor papers, trade and technical journals, house organs, fraternal publications, the religious press, farm journals, educational papers, and in those reaching Government employees, bankers, and railroad men. Special appeals have been made to foreign-born residents. They were issued in more than a dozen languages and reprinted in foreign-language newspapers. Advertising copy, with accompanying cuts, has been suggested to commercial, banking, and brokerage firms to bring before the investing public the opportunities offered by Government securities. Through publicity a strenuous campaign has been carried on against promoters of wildcat stocks and other securities of doubtful or speculative character. In addition to other publicity, the division has issued monthly a posterette carrying the calendar of the current month, with appropriate slogans relative to the wisdom of saving and safe investment. This is furnished to factories and industrial plants for posting in conspicuous places and occasionally to 35,000 schoolrooms. The normal circula-

tion of these posters is 125,000 copies, and they are frequently reproduced in newspapers, house organs, and various trade journals. A clip sheet carrying a cartoon and news items dealing with savings, the dangers of investment in wildcat securities, and the advantages of investment in Liberty bonds at present market prices is also issued monthly to a selected list of about 3,000 publications. Electrotypes of cartoons showing the dangers of extravagance and the advisability of investment in Government securities are sent to advertisers and publishers on request.

Savings securities for 1920.

The same types of war-savings securities were issued for 1920 as were issued in 1919, as follows:

Thrift stamps, 25 cents, noninterest bearing.

War-savings stamps, \$5 maturity value.

War-savings certificates, with spaces for 20 war-savings stamps.

Treasury savings certificates, with maturity value of \$100 and \$1,000.

A full announcement concerning the 1920 war-savings securities was made in the Secretary's public statement of December 22, 1919, which is as follows:

The Treasury is distributing to-day circulars announcing the issue of the 1920 war-savings securities, which will be on sale by the first of the year at post offices and other agencies, consisting principally of incorporated banks and trust companies. In view, especially, of the gratifying increase in recent months in the sale of the 1919 securities following the postwar reaction, it is anticipated that during the coming year the 1920 securities will be purchased in large volume and that the Government's movement for thrift, saving, and investment in Government securities will continue to show good results. From the beginning of the movement in December, 1917, up to December 15, 1919, the Treasury has received from the sale of the war-savings securities a cash total of \$1,128,480,731.

The 1920 securities consist of the 25-cent thrift stamp, which bears no interest and is used to evidence payments on account of war-savings stamps and certificates, the \$5 war-savings stamp, and the registered Treasury savings certificates in denominations of \$100 and a \$1,000 maturity value. The issue price of the war-savings stamp is \$4.12 in January and increases 1 cent a month to \$4.23 in December. The issue price of the \$100 certificate is \$82.40 in January and increases at the rate of 20 cents a month to \$84.60 in December. The \$1,000 certificate will be sold for \$824 in January, and the price increases at the rate of \$2 a month to \$846 in December.

The 1920 securities will be substantially the same in terms and conditions as those of the 1919 issue, but some alterations have been made in the forms. The 1920 war-savings stamp, for example, will be carmine in color, will bear the head of George Washington, and the size will approximate the larger stamp used in 1918. A change has also been made in the terms of the 1920 Treasury savings certificates as compared with the 1919 issue, in that the 1920 certificates are redeemable at the Treasury, beginning with the second calendar month

after the month of purchase, without the 10 days' demand required by the terms of the 1919 Treasury savings certificates. Post offices are not required, however, to make payment of war-savings certificates until 10 days after receiving written demand for payment.

As in 1919, war-savings certificates of the 1920 series bearing their full complement of 20 war-savings stamps, may be exchanged for registered Treasury savings certificates, series of 1920, of the \$100 denomination, and owners of war-savings certificates who desire the protection of registration are urged to exchange their war-savings certificates for a Treasury savings certificate rather than to seek registration of the war-savings certificates at a post office. In addition to its other advantages, the Treasury savings certificate gives the benefit of central registration at the Treasury and the provision for payment by the Treasury itself. The latter provision will be of advantage and facilitate payment in case of change of residence, since a registered war-savings certificate can be redeemed only at the post office at which it was registered.

Two other circulars are being distributed which offer, beginning January 2, 1920, a 1918 issue of Treasury savings certificates in the \$100 denomination, and continue after December 31, 1919, the issue of 1919 Treasury savings certificates in the denominations of \$100 and \$1,000, in both cases not for cash sale but only in exchange for 1918 and 1919 war-savings certificates, respectively. It is anticipated that many holders of the 1918 and 1919 war-savings certificates will find it advantageous to change their holdings into these Treasury savings certificates, whose terms and conditions are substantially the same as those of the 1920 issue, except for their earlier maturity dates.

In addition to the advantages mentioned above in the case of exchange of 1920 war-savings certificates for Treasury savings certificates, these circulars offer other inducements in the opportunity for consolidating holdings and also for changing ownership in the manner provided in the circulars.

Holders of one or more war-savings certificates of the 1918 or 1919 issue which bear war-savings stamps having a total maturity value of \$100 or some multiple of \$100—i. e., \$200, \$300, \$400, etc.—may exchange the certificates for the same maturity value of Treasury savings certificates of the corresponding issue. When two or more war-savings certificates are offered for exchange, each one need not bear its full complement of 20 war-savings stamps, provided the total value of the stamps aggregates \$100 or some multiple of it. In the matter of ownership the regulations provide in effect that the Treasury savings certificates taken in exchange may be made out in favor of new and different owners, if the owners of the war-savings certificates so request. The exchanges may be made at first and second class post offices or other post offices specially designated by the Postmaster General, at Federal reserve banks, and at the Division of Loans and Currency of the Treasury, but not at banks and trust companies generally.

No change was made in 1920 in the thrift stamps used in 1919. They are undated and noninterest-bearing securities. The 1920 war savings stamps and certificates are identical in terms with those of the 1919 issue, except for the fact that they mature on January 1, 1925, instead of January 1, 1924. The form, however, was changed. The 1920 stamps are larger in size than the 1919 issue, red in color, and bear the portrait head of Washington. In view of difficulties in the Bureau of Engraving and Printing it became necessary to issue the \$100 denomination of Treasury savings certifi-

cates, series of 1920, printed in orange instead of carmine, as stated in the annual report for the year 1919. The terms of the 1920 issue appear in Department Circular No. 170, dated December 10, 1919, attached hereto as Exhibit 65, page 468. Further regulations governing the issue and sale of war-savings certificates and Treasury savings certificates during 1920 are contained in Department Circulars Nos. 169, 171, and 172, all dated December 10, 1919; No. 178, dated January 15, 1920, as to holdings in excess of the lawful limit; No. 181, dated February 10, 1920, as to sales stations; and supplement to circular No. 172 of December 10, 1919, dated April 10, 1920, which are attached as Exhibits 66 to 71, pages 476 to 507. Those governing the surrender of 1919 war-savings securities were prescribed in Treasury Department Circular No. 173, dated December 10, 1919 (Exhibit 72, p. 507); those relating to redemptions of war-savings certificates contributed to religious, philanthropic, or charitable organizations in Department Circular No. 166, dated November 15, 1920 (Exhibit 73, p. 511); and those further defining rights of holders of war-savings certificates and Treasury savings certificates in supplement to Department Circular No. 108 and in supplement to Department Circular No. 149, respectively, both dated August 20, 1920 (Exhibits 74 and 75, pp. 513 and 514).

Cash receipts from the sale of stamps and Treasury savings certificates, using the figures in the daily Treasury statement for the last day of each month from the first month of their issue to October 31, 1920, have been as follows:

1917, December	\$10, 236, 451. 32
1918, January	24, 559, 722. 15
February	41, 148, 244. 22
March	53, 967, 864. 49
April	60, 972, 984. 12
May	57, 956, 640. 12
June	58, 250, 485. 00
July	211, 417, 942. 61

REDEMPTIONS.

Total from beginning of campaign to September 30, 1920-----	\$372,287,319.61
Series as follows:	
1918-----	340,333,563.88
1919-----	27,602,456.94
1920-----	4,351,298.79

A copy of the circular letter of March 13, 1920, sent by the Secretary of the Treasury to the banking institutions of the country to ask their cooperation in the work of the savings movement and the sale of savings securities, is as follows:

WASHINGTON, *March 13, 1920.*

DEAR SIR: The prosperity, progress, and welfare of the American people are so vitally dependent on thrift, economy, and saving that I deem it highly important and appropriate to address an emphatic appeal to you indorsing and supporting a recent statement by my predecessor urging the cooperation of the banks and trust companies of the country in the Treasury's program for saving and investment in Government securities. An effective and patriotic service can be rendered by the banking institutions, with many compensating advantages to themselves, by becoming agents and wholeheartedly promoting the distribution of thrift and savings stamps and Treasury savings certificates.

The Treasury savings movement is on a firm and permanent basis. The sale of savings securities during the last half of the year 1919 showed encouraging progress, and redemptions were on a lower level. In view of the exigencies of the present economic situation it is obvious that the movement is fundamental, and in order that the fullest measure of success may be obtained the movement must be assisted directly and actively by the banks and trust companies through the agency service.

The war has left us with many financial and economic problems, and the Treasury savings program can help materially in their solution. Aside from the fact that the proceeds from the sales of the securities will assist in serving the cash requirements of the Treasury, the movement is of the very essence of fundamental economics, affording a tangible means of combating high prices and extravagance and the ills that follow in their train. Economy must be the watchword of the Government and the people in public and private finance, and we can not expect the return of a normal healthy condition unless the people produce more, save more, and spend less. That is the doctrine of the savings

movement. It can be vitalized and reduced to reality only if all agencies of the country which are capable of reaching the millions of investors, or those who should be investors, however small, will lend their cooperation.

The unique position which the banking institutions occupy between the Treasury on the one hand and the people on the other gives them a strategic advantage of great importance. Even considerations of self-interest should impel the banking institutions to assume their acknowledged and rightful leadership with sufficient vigor and force to arouse the American people and to turn them from the perils of heedless extravagance to the habits of saving and thrift made imperative by this reconstruction period.

With this statement of the situation, it is confidently expected that every banking institution in the country will qualify at once to handle Government savings securities. In responding nobly and loyally now as they did during the war they will serve their country, their community, and themselves. Agency provisions and application blanks may be obtained from the Government savings organization of the Federal reserve bank in each district.

Cordially yours,

D. F. HOUSTON,
Secretary of the Treasury.

TO THE PRESIDENT OF THE BANK OR TRUST COMPANY ADDRESSED.

Although sales of savings securities have decreased since the war because of the lack of the war appeal and the discontinuance of the spectacular campaigns, the reaction from the habit of saving, and the natural tendency to turn funds from war-savings securities to Liberty bonds and Victory notes at the present attractive prices, the demand for war-savings securities still continues strong in many parts of the country. While sales have declined, redemptions have also materially decreased, and the evidence is constantly accumulating that the people appreciate the value of these securities as investments. As the security markets become more settled, there is every reason to expect that the savings securities, bearing interest at 4 per cent compounded quarterly, exempt from State and local taxes and from the normal Federal income tax, and redeemable substantially on demand, will prove increasingly attractive. The Treasury is committed to the continuance of its savings program, and feels that with the approach of the first large maturity of war-savings certificates—that of the series of 1918—on January 1, 1923, it is of real importance that the movement become established on an enduring peace-time basis and that its continuity be assured. There is no good reason why, as time goes on, this undertaking should not play an increasingly important part in the current financing of the Government.

Savings securities for 1921.

The same types of savings securities will be issued for 1921 as were issued in 1920, with the following additions:

Treasury savings stamp, \$1, noninterest bearing.

Treasury savings card for affixing Treasury savings stamps.

Treasury savings certificates with a maturity value of \$25.

The new Treasury savings stamp will be bright red in color, imprinted on green tint, and will bear the portrait head of Hamilton. The certificate of the maturity value of \$25 will be similar in design to those having a maturity value of \$100 and \$1,000; each denomination will be of a different color, imprinted on green tint. Both the stamps and certificates will be identical in terms with those of the 1920 issue, except for the fact that they will mature on January 1, 1926, instead of January 1, 1925. The 1921 war-savings stamp will be larger in size than the 1920 issue, orange in color, imprinted on green tint, and will bear the portrait head of Lincoln. No change will be made in 1921 in the thrift stamps. The terms of the issues for 1921 will appear in detail in formal Treasury Department circulars, to be issued at a later date.

THE WAR FINANCE CORPORATION.

The activities of the War Finance Corporation, created to meet conditions of the war or growing out of the war, are drawing to a close. By reason of the developments of the past year, the corporation is approaching the period of actual liquidation. It is already in process of liquidation. It long ago ceased making loans under its original authority for purposes "necessary or contributory to the prosecution of the war." Such loans stopped after the signing of the armistice except to make advances to carry out previous commitments and to assist the railroads by reason of the failure of the appropriation for the Railroad Administration upon the adjournment of the Congress in March, 1919. The cessation of these activities marked the close of the corporation's direct war functions, leaving only the collection of the principal and interest on these loans.

To meet conditions growing out of the war in relation to foreign trade, and in order to promote commerce with foreign nations, the corporation was authorized by the Congress, in the Victory loan act, approved March 3, 1919, to make loans to finance exports. This provision of law empowered the corporation to make advances, fully and adequately secured, to American exporters of domestic products or to banks financing such exports. The maximum maturity of such loans was five years and the aggregate advances made by the corporation for these purposes could not exceed the sum of \$1,000,000,000 outstanding at any one time.

The corporation was not called upon to exercise this power until December, 1919. Previous to that date inquiries and applications, though many in number, came from concerns which could not offer adequate security, or proposed terms not contemplated by the law. In the late autumn of 1919, applications reached the corporation in

increasing numbers in a form which could be considered as coming within the meaning of the statute. From December 26, 1919, when the first loan to promote exports was made, to November 15, 1920, the corporation had made total loans in this connection of \$46,347,654.27, of which \$2,855,146.63 had been repaid, leaving outstanding on that date \$43,492,507.64.

The following is a summary of the amounts advanced up to November 15, 1920, to assist in the exportation of domestic products, classified by commodities and countries of destination:

Commodities.	Countries.	Amount.
Agricultural implements.....	Great Britain, France, and Belgium.....	\$4,000,000.00
Condensed milk.....	England and France.....	5,000,000.00
Cotton.....	Czecho-Slovakia.....	9,322,117.27
Electrical equipment and supplies.....	Great Britain, South Africa, Australia, France, Belgium, and Italy.....	10,796,537.00
Grain, flour, and foodstuffs.....	Belgium.....	12,229,000.00
Locomotives.....	Poland.....	5,000,000.00
Total.....		46,347,654.27

Suspension of active operations.

The War Finance Corporation was a war agency. Its general powers expire six months after the termination of the war. The special powers conferred upon it under the Victory loan act, authorizing assistance in financing of exports, expire one year after the termination of the war. These special powers were granted after the armistice, when business had suffered a recession in consequence of the cancellation of war orders and when there was a fear that exports might decline and unemployment exist. The corporation continued to exercise its special powers in a relatively small way until there was a certainty that there would be no sudden upsetting of the business situation of the country by diminishing exports.

On May 10, 1920, at my request, the corporation suspended the making of further advances in aid of exports except in pursuance of commitments theretofore made. There has been no change in the general situation since that date that would justify the resumption of activities on the part of the corporation. This power was granted to serve a certain purpose and to be exercised during the period of readjustment immediately following the armistice. The purpose has been fulfilled. While a technical state of war exists, a year and eight months have elapsed since this special and temporary authority was granted by the Congress. It was assumed at that time that peace would have been established long ago and the power terminated. There is no more warrant to resume operations of the War Finance Corporation than there would have been to continue its activities at the time they were suspended. The requests for resumption are discussed in the beginning of this report.

The following is a copy of the Secretary's public statement, dated May 10, 1920, announcing the suspension of the corporation's activities:

At my request the War Finance Corporation has suspended the making of further advances in aid of exports, except pursuant to commitments heretofore made. The general powers of the corporation expire six months after the termination of the war, and the special powers conferred upon it under the Victory loan act expire one year after the termination of the war. The continuance of a technical state of war long after the time contemplated when this legislation was enacted and when the conditions which gave rise to it have ceased to exist has presented a problem of no small concern. The act creating the corporation was passed during the war. In general terms, it was intended that the corporation should assist business and agencies in activities for the successful prosecution of the war. After the armistice, when business had suffered a recession in consequence of the cancellation of war orders, and when there was a fear that exports might decline and unemployment exist, an amendment to the act was passed authorizing the corporation to assist in the financing of exports. Now, more than a year later, and after direct Government loans to European Governments have for all practical purposes been discontinued, business is prosperous and involuntary unemployment is negligible. The export business not only has not declined but has actually increased. In the calendar year 1918 total exports amounted to \$6,149,000,000. They rose in the calendar year 1919 to \$7,922,000,000, and for the first quarter of this year they greatly exceeded those of the first quarter of last year. Obviously, private interests are not failing to finance exports. In the circumstances it does not seem necessary now that the Government should continue to intervene to stimulate exports, particularly as it is compelled to resort from time to time to temporary borrowing in part to meet its present obligations.

In existing circumstances, it seems clear that the Government should enter the borrowing field as seldom as possible and then for the lowest possible sums. It would be a question whether the Government should continue to aid and stimulate exports, considering their present volume privately financed, even if the Treasury had surplus funds. It seems clear to me that it should not continue to do so when the Treasury has to resort to borrowing from time to time. The entire capital stock of the War Finance Corporation, \$500,000,000, has been issued and is held by the Treasury. This and its reserve fund of about \$25,000,000 are invested to the extent of about \$422,000,000 in United States bonds, notes, and certificates of indebtedness, and to the extent of about \$103,000,000 in other loans and investments. Consequently, if the corporation continues to make loans in aid of exports, it can do so only by calling upon the Treasury of the United States to redeem securities of the United States in which the capital furnished by the United States is invested, or by selling bonds of the War Finance Corporation to the public. These bonds, although not guaranteed by the United States Government, would nevertheless be marketable only on account of the ownership of the entire capital by the Government.

In compliance with this request, the directors of the corporation at a meeting held on May 10, 1920, adopted the following resolution:

Resolved, That at the request of the Secretary of the Treasury, and pending further action by this board, the making by the corporation of further advances for export purposes, except pursuant to existing commitments, be suspended.

The power of the corporation to suspend further loans and other operations, except as incident to liquidation, was sustained in the following opinion from the Attorney General, dated May 10, 1920:

WASHINGTON, *May 10, 1920.*

MY DEAR MR. SECRETARY: I beg to acknowledge receipt of your letter of May 6, 1920, in which you request the expression of my opinion upon the following questions of law:

1. Is the board of directors of the War Finance Corporation vested under existing law with discretion to suspend further loans and other operations except as incidental to liquidation?

2. May the funds of the War Finance Corporation not needed for the payment of its debts, for commitments already made, or for its operating expenses, be used under existing law to retire a substantial portion of its outstanding capital stock?

3. May the Secretary of the Treasury assent to such retirement?

The War Finance Corporation was created by the act of April 5, 1918 (40 Stat., 506). By that act the management of the corporation is vested in a board of directors consisting of the Secretary of the Treasury and four other persons (sec. 3), who are "created a body corporate and politic in deed and in law," which shall have succession for a period of 10 years (sec. 1). The corporation is vested with the powers usually incidental to corporate existence, and the board of directors is given the customary powers of appointing and fixing the compensation of officers and employees necessary for the transaction of its business, defining their duties, requiring bonds of them, dismissing them at pleasure, and prescribing by-laws regulating the manner in which the business of the corporation shall be conducted (sec. 6).

By sections 7 to 9 the corporation is authorized and empowered, subject to certain restrictions, (1) to make advances to any bank, banker, or trust company which shall have made after April 6, 1917, and shall have outstanding any loan to any person conducting a going business in the United States whose operations shall be necessary or contributory to the prosecution of the war or which shall have rendered financial assistance to any such persons by the purchase after April 6, 1917, of his bonds or other obligations; (2) in exceptional cases to make advances directly to such person, but only for the purpose of conducting such business in the United States and only when, in the opinion of its board of directors, such person is unable to obtain funds upon reasonable terms through banking channels or through the general public; (3) to make advances to any savings bank, banking institution, or trust company which receives savings deposits or to any building or loan association whenever the corporation shall deem such advances to be necessary or contributory to the prosecution of the war or important in the public interest. Loans of this character can not be made after the expiration of six months after the termination of the war.

By section 21, added by the amendment of March 3, 1919 (40 Stat., 1309, 1313), the corporation is authorized and empowered, subject to certain restrictions, to make advances, in order to promote commerce with foreign nations through the extension of credits (1) to any person engaged in the United States in the business of exporting therefrom domestic products to foreign countries if such person is, in the opinion of the directors, unable to obtain funds upon reasonable terms through banking channels; (2) to any bank, banker, or trust company in the United States which, after the taking effect of this section, makes an advance to any such person for the purpose of assisting in the exportation of such products. Loans of this character can not be made after the expiration of one year after the termination of the war.

It is obvious that, within the time limitations imposed by these provisions, the determination of the question whether the conditions justifying the exercise of these powers still exist, and, furthermore, whether, assuming their existence, these powers should continue to be exercised is a matter which is left to the decision of the board of directors. I have no doubt, therefore, that they have the power to determine at any time to suspend further loans and operations. Your first question must therefore be answered in the affirmative.

But I am also of the opinion that the War Finance Corporation has no power to use funds on hand, even though they are not needed for the payment of debts of the corporation, for commitments already made or for its operating expenses, to retire a part of its outstanding capital stock. It is true that corporations have, in the absence of constitutional or statutory prohibition, inherent power to buy, to sell, or to retire their own stock (*Johnson County v. Thayer*, 94 U. S., 631, 643; *Allen v. Francisco Sugar Co.*, 193 Fed., 825; *Sanford v. First National Bank of Marysville, Kans.*, 238 Fed., 298; *First Trust Co. v. Ill. Central R. R. Co.*, 256 Fed., 830, and many other cases).

But I believe that the act creating the War Finance Corporation contains certain provisions which are inconsistent with the existence of any such power in it. Section 15 provides that "all the net earnings of the corporation not required for its operations *shall* be accumulated as a reserve fund until such time as the corporation liquidates * * *. Such reserve fund *shall*, upon the direction of the board of directors, with the approval of the Secretary of the Treasury, be invested in bonds and obligations of the United States issued or converted after September 24, 1917, or, upon like direction and approval, may be deposited in member banks of the Federal Reserve System or in any of the Federal reserve banks, or be used from time to time, as well as any other funds of the corporation, in the purchase or redemption of any bonds issued by the corporation."

It seems to me clear that under this section the War Finance Corporation can use its net earnings for the purposes enumerated and no other, and it does not seem to me reasonable to suppose that Congress intended that the corporation should have power to use its capital for a purpose for which it could not use its reserve fund or surplus.

But there is a further and even stronger objection to the retirement of the stock in the way suggested. It is self-evident that a corporation can not buy its own stock for the purpose of retiring it without the consent of the stockholders from whom it is bought. In this case the United States is the owner of all the stock of the corporation, and it has not consented to sell its stock nor authorized the Secretary of the Treasury to do so in its behalf. It is true that by the act of April 5, 1918, he is given certain broad powers of supervision over the conduct of the business of the corporation. Thus the board of directors can not make calls on the United States to pay its stock subscriptions (sec. 2), nor pass by-laws (sec. 6), nor buy, sell, or deal in bonds or other obligations of the United States (sec. 11), nor fix the rate of interest which its own bonds shall bear or the terms on which they shall be sold (sec. 12), nor the manner in which the reserve fund shall be invested without the approval of the Secretary of the Treasury (sec. 15). But no inference can be drawn from the bestowal of these powers on him that he is authorized to consent to the sale to the corporation of the stock owned by the United States. Your second and third questions must, therefore, be answered in the negative.

Respectfully,

A. MITCHELL PALMER.

Attorney General.

THE SECRETARY OF THE TREASURY.

Washington, D. C.

The corporation immediately advised all applicants having no definite commitments that there had been a change in policy and that their applications could not be given further consideration. Some applicants voluntarily waived part of advances to which the corporation had been committed, while proposed loans to others to whom commitments had been made contingent upon the fulfillment of certain conditions as to time, etc., were canceled because the applicants did not meet the conditions. This resulted in a reduction of the total amount of commitments from \$69,201,920 to \$48,149,574.27. Of the latter sum \$46,347,654.27 had been advanced up to November 15, 1920. The remainder is awaiting the perfection of documents and must be advanced, if at all, not later than March 1, 1921. Of the total advances there has been repaid to November 15, 1920, the sum of \$2,855,146.63; \$13,644,045.64 will be due prior to July 1, 1921; \$10,051,925 will be due between July 1, 1921, and September 15, 1922; \$9,000,000 will be due in the calendar year 1923; and \$10,796,537 will be due during the calendar year 1925; total, \$46,347,654.27.

Up to April 16, 1920, when, as stated elsewhere in this report, the Secretary announced that the purchases on account of the bond-purchase fund would cease after June 30, 1920, the War Finance Corporation was the chief agency from which the Treasury purchased Liberty bonds and Victory notes for the bond-purchase fund. The corporation terminated its relation with the Treasury in this connection at the close of the fiscal year, when \$65,849,650 par value of Liberty bonds and Victory notes were sold by the corporation to the Treasury at average cost for the purposes of the bond-purchase fund.

With the cessation of the corporation's active operations in aid of financing exports, it had no further use for the greater part of its funds. It needed funds only for the payment of its debts, commitments, and operating expenses. The Treasury felt that it would be desirable, in these circumstances, for the corporation to consider the retirement of a substantial part of its capital stock, all of which is owned by the United States, if that were permissible under the law. The opinion of the Attorney General of May 10, 1920, quoted above, however, held that under existing law the stock could not be retired in this manner. Most of the funds of the corporation, however, were invested in Government securities. It seemed unnecessary for the Treasury to continue to pay interest on such securities to a Government corporation which was now largely inactive as far as the employment of its funds was concerned. As it was not possible to retire the stock, the Treasury requested the corporation to present its Government securities for payment and cancellation and to accept in return a cash credit on the books of the Treasurer. To this the corporation assented, and on June 30, 1920, sold to the Secretary of the

Treasury at par and accrued interest \$301,204,000 of certificates of indebtedness and the Liberty bonds and Victory notes above described at average cost with interest. For these securities the corporation received a credit on the books of the Treasurer of \$363,100,619.88 on account of principal and \$2,333,944.06 on account of accrued interest. or a total of \$365,434,563.94.

In accordance with the mandatory provisions of the urgent deficiency act approved May 8, 1920, the corporation purchased from the United States Railroad Administration at par and accrued interest \$43,270,100 principal amount of Liberty bonds and Victory notes. of which \$35,835,350 has since been purchased by the Treasury from receipts on account of repayments of loans by foreign Governments. Of the proceeds of such sale, amounting to \$36,344,136.81, including principal and accrued interest, the corporation invested on account of its reserve fund \$32,854,450 in a special Treasury certificate of indebtedness. For the remainder, the Treasury gave the corporation a credit on the books of the Treasurer.

On November 15, 1920, the corporation owned the following Government securities:

Second 4½ per cent Liberty loan bonds, par value-----	\$95, 100. 00
Third 4½ per cent Liberty loan bonds, par value-----	1, 964, 350. 00
Victory 3½ per cent Liberty loan notes, par value-----	1, 100. 00
Victory 4½ per cent Liberty loan notes, par value-----	5, 374, 200. 00
United States certificates of indebtedness, 6 per cent due Sept. 22, 1921-----	32, 854, 450. 00
Total-----	40, 289, 200. 00

The \$200,000,000 of one-year 5 per cent bonds of the corporation dated April 1, 1919, matured April 1, 1920. All of these bonds have been paid except \$126,000, which were outstanding on November 15, 1920, awaiting presentation for redemption.

Every effort is being made to liquidate the outstanding loans of the corporation as rapidly as possible. The subjoined statement shows the condition of the corporation as of November 15, 1920:

*Statement of condition of the War Finance Corporation at the close of business
Nov. 15, 1920.*

ASSETS.

Current assets:

Due from the Treasurer of the United States----- \$372, 718, 417. 76

Loans:

Current liabilities:

1-year 5 per cent gold bonds, series A (matured)-----	126, 000. 00	
Coupons on 1-year 5 per cent gold bonds outstanding-----	6, 450. 00	
Accrued rent and sundry expenses unpaid (estimated)-----	7, 958. 33	
		140, 408. 33
Total-----	536, 731, 324. 28	

NOTES.—The item of "Current assets" amounting to \$372,718,417.76, representing current cash due from Treasurer United States, includes the proceeds of the sale of Government obligations to the Secretary of the Treasury.

All of the earnings of the corporation constitute a reserve fund (in accordance with section 15 of the War Finance Corporation act), therefore no reserves are set up against contingencies.

¹ Purchased at par from the United States Railroad Administration by direction of act of Congress.

During the year numerous changes occurred in the organization of the corporation. The chairman was changed by the resignation of Secretary Glass and the appointment of the present incumbent. Eugene Meyer, jr., resigned as managing director on May 31, 1920, and was succeeded in the position of managing director by Director Angus W. McLean. On February 2, 1920, George R. Cooksey was appointed a director to fill out the unexpired term of Director Leonard, resigned. Upon the expiration of his term, on May 17, 1920, Mr. Cooksey was reappointed. W. P. G. Harding resigned as a director on March 8, 1920, and was succeeded on that date by Franklin W. M. Cutcheon. Mr. Cutcheon retired as a director on May 17, 1920, when his term expired. In view of the fact that the making of further loans was suspended, it has not been necessary to fill the two vacancies on the board of directors, the present three directors constituting a quorum. There has been considerable reduction of the staff of the corporation, which has never exceeded 45 persons. Exclusive of the directors, the present personnel is 18, which number will be reduced to 14 on or before December 31. Since April 1, 1920, the staff's monthly salary roll has been reduced from \$8,575.61 to \$4,538.61, which amount by the end of the calendar year will be further reduced to approximately \$3,700.

There is attached as Exhibit 76, page 515, a statement showing in detail all of the outstanding loans of the War Finance Corporation.

RAILROADS.

Under the transportation act, 1920, approved February 28, 1920, as amended, the Secretary of the Treasury is required to make payments to carriers as defined in the act upon receiving proper certificates from the Interstate Commerce Commission (a) under section 204, for the reimbursement of deficits during Federal control; (b) under section 209, to make good the guaranty therein provided; and (c) under section 210, for loans from the revolving fund of \$300,000,000 therein provided. Copies of said sections of the act, as amended, are attached as Exhibit 34, page 355.

Section 204.

In response to a request of the Treasury for an estimate, the Interstate Commerce Commission has stated that in its opinion the total amount of payments to be made under section 204 will not exceed \$10,000,000. The following certificates have been received from the commission in connection with section 204 of the act, and the amounts, less those certified to be due from the respective carriers

to the President (as operator of the transportation systems under Federal control) have been paid up to November 15, 1920:

Date of certificate.	Carrier.	Gross amount certified.	Amount paid.
1920.			
Apr. 6	Midland Ry.....	\$40,000.00	\$40,000.00
30	Randolph & Cumberland R. R. Co.....	5,000.00	5,000.00
May 20	Liberty White R. R. Co.....	2,500.00	2,500.00
June 3	Nevada, California & Oregon Ry. Co.....	29,189.21	20,000.00
10	Jefferson & Northwestern Ry. Co.....	60,000.00	52,949.05
12	New Mexico Central Ry. Co.....	60,699.52	50,000.00
17	Electric Short Line Ry. Co.....	36,708.25	36,000.00
17	Georgia, Florida & Alabama Ry. Co.....	25,000.00	25,000.00
25	Shearwood Ry. Co.....	9,540.33	8,282.31
28	Gainesville & Northwestern R. R. Co.....	7,100.34	6,500.00
28	Wisconsin & Michigan R. R. Co.....	33,364.56	27,670.13
July 1	Randolph & Cumberland R. R. Co.....	18,214.06	7,500.00
2	Montana Western Ry. Co.....	23,501.20	23,501.20
7	Bartlett Western Ry.....	17,546.73	14,428.84
9	Midland Ry.....	58,769.67	22,917.21
16	Ocala Southern R. R. Co.....	26,279.10	8,822.82
23	Lorain & Southern R. R. Co.....	5,187.38	5,187.38
26	Franklin & Pittsylvania R. R. Co.....	21,751.06	4,488.87
Sept. 18	Little Cottonwood Transportation Co.....	39,073.32	32,150.62
	Total.....	519,424.73	392,898.43

There were received from the Interstate Commerce Commission, in connection with section 204, further certificates similar in tenor (except that relating to Little Cottonwood Transportation Co.), but by reason of the qualification contained in such certificates the Comptroller of the Treasury, whose decisions relating to expenditures under appropriations are binding on the Secretary of the Treasury, decided that the Secretary was not authorized to draw warrants in payment thereof. The comptroller's decision is as follows:

WASHINGTON, *October 22, 1920.*

The Honorable The SECRETARY OF THE TREASURY.

SIR: I have your letter of October 11 requesting decision whether you are authorized under the provisions of paragraph (g) of section 204 of the transportation act of February 28, 1920 (41 Stat., 461), to make payment on a certificate transmitted to you by the Secretary of the Interstate Commerce Commission in the following form:

INTERSTATE COMMERCE COMMISSION,
Washington.

(Certificate No. B-27.)

CERTIFICATE OF REIMBURSEMENT OF DEFICIT UNDER FEDERAL CONTROL, SECTION
204 (g), TRANSPORTATION ACT, 1920.

To the SECRETARY OF THE TREASURY OF THE UNITED STATES:

Pursuant to section 204 of the Transportation Act, 1920, the Interstate Commerce Commission has ascertained from annual and special reports made to it by the Knoxville, Sevierville & Eastern Railway Co., a carrier as defined in section 204, that the Knoxville, Sevierville & Eastern Railway Co., during the period of Federal control, taken as a whole, sustained a railway operating

deficit, and hereby certifies that under the provisions of paragraphs (f) and (g) of said section 204 there is payable to the said Knoxville, Sevierville & Eastern Railway Co. the sum of twenty-nine thousand seven hundred and fifty-nine dollars and eighty-four cents (\$29,759.84).

The commission also hereby certifies that the amount due from the said Knoxville, Sevierville & Eastern Railway Co. to the President (as operator of the transportation systems under Federal control) on account of traffic balances and other indebtedness is nine thousand five hundred and forty dollars and eighty-seven cents (\$9,540.87).

This certification is made subject to the proviso that the commission may certify to the Secretary of the Treasury of the United States such other additional amounts as it may determine to be payable to the said Knoxville, Sevierville & Eastern Railway Co. in accordance with the provisions of section 204 of said act.

Dated this 8th day of October, 1920.

By the commission, Division 4.

GEORGE B. MCGINTY, *Secretary*.

Paragraph (c) of section 204 of the Transportation Act, 1920, provides:

"(c) As soon as practicable after March 1, 1920, the commission shall ascertain for every carrier, for every month of the period of Federal control during which its railroad or system of transportation was not under Federal operation, its deficit in railway operating income, if any, and its railway operating income, if any (hereinafter called 'Federal control return'), and the average of its deficit in railway operating income, if any, and of its railway operating income, if any, for the three corresponding months of the test period taken together (hereinafter called 'test-period return') * * *."

Paragraphs (d) and (e) of said section direct the commission to state an account of the monthly credits due to the carrier or the United States, as the case may be, based upon a comparison of the Federal control return with the test-period return as ascertained under the provisions of paragraph (c). Paragraph (f) provides that if the sum of the amounts credited to the carrier exceeds the sum of the amounts credited to the United States the difference shall be payable to the carrier.

From the provisions of these paragraphs it will be seen that while credit is to be given to the carrier or the United States on the basis of the return for each month of the Federal control period, taken separately, the amount payable to the carrier, if any, embraces the whole period and is based on the difference between the sum of the monthly credits to the carrier and the sum of the monthly credits to the United States. It would seem clear, therefore, that no amount is payable to the carrier under the provisions of this section until the difference between the sum of the credits to the carrier and the sum of the credits to the United States has been ascertained by the commission.

With reference to the case of the carrier who operated its railroad or system of transportation for less than a year during, or for none of, the test period, paragraph (f) provides that there shall be payable to such carrier its deficit in railway operating income for that portion (as a whole) of the period of Federal control during which it operated its own railroad or system of transportation. Manifestly nothing is payable under this provision until the amount of the deficit for the whole period has been determined by the commission.

Paragraph (g) of said section 204 provides:

"(g) The commission shall promptly certify to the Secretary of the Treasury the several amounts payable to carriers under paragraph (f). The Secretary of the Treasury is hereby authorized and directed thereupon to draw warrants in

favor of each such carrier upon the Treasury of the United States for the amount shown in such certificate as payable thereto. An amount sufficient to pay such warrants is hereby appropriated out of any money in the Treasury not otherwise appropriated."

The act of May 8, 1920, 41 Stat., 590, provides:

"The Interstate Commerce Commission in certifying to the Secretary of the Treasury the amount payable to any carrier under paragraphs (f) and (g) of section 204 of the transportation act, 1920, also shall certify to the Secretary of the Treasury such sums, if any, as may be due from such carrier to the President (as operator of transportation systems under Federal control) on account of traffic balances or other indebtedness. The amount so certified to be due the President, upon his request, shall be deducted by the Secretary of the Treasury from the amount so certified to be due such carrier and thereupon shall be transferred from the appropriation made in paragraph (g) of the said section 204 and credited by him to the appropriation made in section 202 of the transportation act, 1920. Such deductions shall be considered as a payment pro tanto of such indebtedness to the Government."

Paragraph 1 of the certificate now under consideration is not in the language of the law and probably was written with the intention that it should not be taken as an ascertainment by the commission of the amount due. It might be construed as a sufficient authority for payment by you if it stood alone and was not qualified by the provisions of paragraph 3. But you are not authorized, however, under the law to accept a qualified certificate. When the commission certifies to you under authority of paragraph (g) of section 204 that an amount set forth in the certificate is payable to a carrier under paragraph (f) you are justified in assuming that the amount so certified has been ascertained in accordance with the provisions of paragraphs (c), (d), (e), and (f), but such certificate must be unqualified and without reference to any future certification of additional amounts, for paragraph (g) does not authorize such procedure.

The specific question submitted by you is answered in the negative, and in no case are you authorized to make payment under the provisions of paragraph (g) of section 204 of the act in the absence of an unqualified certificate from the commission that the amount of the proposed payment is payable under paragraph (f).

The certificate and accompanying papers are returned herewith.

Respectfully,

W. W. WARWICK, *Comptroller*.

Section 209.

In response to a request of the Treasury for an estimate, the Interstate Commerce Commission has stated that in its opinion, based upon the sworn monthly reports of Class I carriers, the total amount necessary to make good the guaranty provided by section 209 will aggregate approximately \$600,000,000. Under the provisions of paragraphs (h) and (i) of this section, by which the commission is authorized to certify advances to be made to the carriers on account of the sum estimated to be necessary to make good the guaranty if the carriers should apply for such advances during the guaranty period of six months from March 1, 1920, the Treasury has received

from the commission up to November 15, 1920, certificates for advances as follows:

Date of certificate.	Carrier.	Amount.
Mar. 26, 1920	Buffalo, Rochester & Pittsburgh Ry. Co.	\$766,000
Do.	Atlanta & St. Andrews Bay Ry. Co.	30,000

Payments under these certificates have been made by the Treasury up to November 20, 1920, in the aggregate amount of \$250,485,374. Up to that date the Treasury had not received from the Interstate Commerce Commission any certificate certifying the total amount necessary to make good to a carrier the guaranty provided by section 209. The commission did, however, certify a partial payment to a carrier which had not during the guaranty period applied for an advance under paragraph (h). The Comptroller of the Treasury decided that the Secretary of the Treasury is not authorized, except in accordance with the provisions of paragraph (h), to issue a warrant for a partial payment on account of the amount necessary to make good the guaranty to a carrier. The decision is as follows:

WASHINGTON, October 7, 1920.

The Honorable The SECRETARY OF THE TREASURY.

SIR: I have your letter of September 27 transmitting two certificates which have been submitted to you by Mr. B. H. Meyer, as chairman, Division 4, of the Interstate Commerce Commission.

My decision is requested whether you are authorized under the provisions of paragraph (g) of section 209 of the act of February 28, 1920 (41 Stat., 466), to make payment on the certificates as submitted.

The act in question provides, among other things, for the termination of Federal control of railroads and systems of transportation on March 1, 1920.

Section 209 of the act provides for certain guaranties to the carriers for a period of six months after termination of Federal control. With reference to said guaranties paragraphs (g) and (h) of the section provide:

"(g) The commission shall, as soon as practicable after the expiration of the guaranty period, ascertain and certify to the Secretary of the Treasury the several amounts necessary to make good the foregoing guaranty to each carrier. The Secretary of the Treasury is hereby authorized and directed thereupon to draw warrants in favor of each such carrier upon the Treasury of the United States for the amount shown in such certificate as necessary to make good such guaranty. An amount sufficient to pay such warrants is hereby appropriated out of any money in the Treasury not otherwise appropriated.

"(h) Upon application of any carrier to the commission, asking that during the guaranty period there may be advanced to it from time to time such sums, not in excess of the estimated amount necessary to make good the guaranty, as are necessary to enable it to meet its fixed charges and operating expenses, the commission may certify to the Secretary of the Treasury the amount of and times at which such advances, if any, shall be made. The Secretary of the Treasury, on receipt of such certificate, is authorized and directed to make the advances in the amounts and at the times specified in the certificate upon the execution by the carrier of a contract, secured in such manner as the Secretary may determine, that upon final determination of the amount of the guaranty provided for by this section such carrier will repay to the United States any amounts which it has received from such advances in excess of the guaranty, with interest at the rate of 6 per centum per annum from the time such excess was paid. There is hereby appropriated out of any money in the Treasury not otherwise appropriated a sum sufficient to enable the Secretary of the Treasury to make the advances referred to in this subdivision."

One of the certificates submitted, No. A-246, is as follows:

"Interstate Commerce Commission, Washington. Certificate No. A-246. Certificate of Interstate Commerce Commission under section 209 (g). transportation act, 1920.

"To the Secretary of the Treasury of the United States:

"1. The Interstate Commerce Commission, hereinafter called the commission, hereby certifies that the Grand Trunk Western Railway Company, a corporation of the States of Michigan and Indiana, hereinafter called the carrier, is a carrier as defined in paragraph (a) of section 209 of the transportation act, 1920; that the carrier filed with the commission on or before March 15, 1920, a written statement that it accepted all of the provisions of the said section 209.

"2. The commission has ascertained and hereby certifies to the Secretary of the Treasury that the amount of five hundred thousand dollars (\$500,000) is necessary to make good to said carrier the guaranty provided by section 209 of the transportation act, 1920.

"3. This certification is made subject to the proviso that the commission may hereafter certify to the Secretary of the Treasury such additional amounts as may be necessary to make good to the carrier the guaranty of said section 209 of the transportation act, 1920.

"Dated this 25th day of September, 1920.

"By the commission, Division 4.

"(Signed)

GEORGE B. MCGINTY, *Secretary.*"

The other certificate, No. A-247, is identical with this except that it relates to the Detroit, Grand Haven & Milwaukee Railroad Co. and is for \$250,000.

Your doubt as to the sufficiency of this certificate arises from the fact that paragraph 2 thereof does not state that \$500,000 is the amount necessary to make good the guaranty. It is merely to the effect that said amount is necessary to make good the guaranty and it is qualified by paragraph 3, which reserves to the commission the right thereafter to certify "such additional amounts as may be necessary to make good to the carrier the guaranty."

Considering the form in which this certificate is made and the amount stated therein it is apparent that said amount is not the amount ascertained by the commission to be necessary to make good the guaranty to this carrier, but is, in fact, only an amount estimated to be within the amount necessary to make good said guaranty. In other words, it is to be regarded as an advance or partial payment or payment on account on the carrier's claim under the guaranty. This raises the question whether the provisions of paragraph (g) authorize such advances or partial payments or payments on account.

The direction in the statute is that the commission shall, as soon as practicable after the expiration of the guaranty period, ascertain and certify the several amounts necessary to make good the guaranty to each carrier, and that the Secretary of the Treasury shall draw warrants "for the amount shown in such certificate as necessary to make good such guaranty." From this language it would appear to be clear that paragraph (g) contemplates and authorizes only one payment in each case, said payment to be made after the commission shall have ascertained and certified the amount necessary to make good the guaranty. That such was the intent and purpose of this paragraph is further indicated by the fact that in the succeeding paragraph provision was made for advances during the guaranty period of such sums, not in excess of the estimated amount necessary to make good the guaranty, as are necessary to enable the carrier to meet its fixed charges and operating expenses. Having thus provided for the fixed charges and operating expenses during the period of six months after termination of Federal control and having by release from Federal control and by authorizing increased rates enabled the carrier to make its own provision for caring for its financial obligations after the six months' guaranty period, I think it is but reasonable to assume that Congress intended that the payments authorized under paragraph (g) should be made only after a carrier had submitted its entire claim under the guaranty and the commission had ascertained the amount due thereon. The law providing for the guaranty was enacted before the beginning of the guaranty period, and it must be assumed that all carriers affected thereby were aware of its provisions at the time it was passed. Therefore if any carrier neglected during the guaranty period to avail itself of the provisions of paragraph (h) or to have its records and evidence in proper shape for the presentation of its entire claim under paragraph (g) within a reasonable time after the termination of the guaranty period, the responsibility for delay in receiving final payment under the guaranty must rest with the carrier and not the Government.

It is noted that, notwithstanding the fact that the advances authorized under paragraph (h) are in no case to be in excess of the estimated amount necessary to make good the guaranty, provision is made in said paragraph for securing the United States against the contingency of such advances being in excess of the amount of the guaranty as finally determined by the commission. Since it was deemed necessary to provide against overpayments resulting from erroneous estimates during the guaranty period, it must be assumed that similar provision would have been made in paragraph (g) if said paragraph had been

intended to authorize payments based on estimates. No such provision having been made, the only logical inference is that payments on estimates are not authorized under said paragraph. —

Reading paragraph (g) in the light of the other provisions of section 209 and considering the number of debit and credit items which may be involved in the determination of the amount payable upon final settlement under the guaranty, I am of opinion that the making of advances or partial payments under said paragraph (g) is not within either the letter or the spirit of the law.

I can find nothing in the law to justify a conclusion to the effect that said paragraph (g) authorizes any payment to a carrier before the amount due under the guaranty has been ascertained by the commission. I think it is quite clear that the law does not give to the carrier the right to file its claim piecemeal and to have certificates for payment made by the commission without limit as to number or time.

If payment is authorized upon certificates made in the form hereinbefore set forth, then there is no legal requirement that any settlement made under the provisions of paragraph (g) be regarded as final, and there would be no end to the work of the commission in examining and reexamining the accounts of the carriers, as new items of claim might be presented for years to come. I can not believe that such was the intent or purpose of the law. I think the law contemplated the adjudication and final settlement of these claims as soon after the expiration of the guaranty period as practicable.

The needs of certain carriers for funds is recognized, but this office may not construe the law to authorize the payment of public money except in such amounts and at such times as Congress has authorized by law, no matter how urgent the needs of claimants.

Answering your question specifically, I have to advise that you are not authorized to issue a warrant upon a certificate in the form submitted in this case or upon any other certificate which does not show that the amount stated therein has been ascertained and certified by the commission as the amount necessary to make good the guaranty.

You ask also whether you are now authorized to make advances under paragraph (h) in cases in which application therefor was filed with the commission on August 31.

In reply to this question you are advised that you are authorized to make advances under paragraph (h) on all applications filed with the commission prior to September 1, 1920, subject, of course, to all the conditions and requirements of said paragraph, one of which is that the advance must be necessary to enable the carrier to meet its fixed charges and operating expenses during the guaranty period.

The carrier having applied in time is not responsible for such delay as may be necessary in action by the Interstate Commerce Commission or the Treasury Department.

The certificates and accompanying papers are returned herewith.

Respectfully,

W. W. WARWICK, *Comptroller.*

Section 210.

As originally enacted, section 210 placed upon the Secretary of the Treasury the duty of prescribing the time, not exceeding five years from the making thereof, within which loans certified by the Interstate Commerce Commission should be repaid by the carriers, the security

to be taken therefor, the terms and conditions of the loan and the form of the obligation to be entered into. By section 5 of the sundry civil appropriation act, approved June 5, 1920, section 210 was amended so as to provide that the time, not exceeding fifteen years from the making thereof, within which a loan is to be repaid, the security which is to be taken therefor and the terms and conditions of the loan shall be in accordance with the findings and certificate of the commission, which shall certify, among other things, that the applicant, in the opinion of the commission, is unable to provide itself from other sources with the funds necessary for the purposes mentioned. Up to November 15, 1920, the Treasury had received from the commission, in connection with section 210, certificates for loans as follows:

Date of certificate.	Carrier.	Amount of loan.
1920.		
May 21	Boston & Maine R. R.	\$5,000,000

Up to November 15, 1920, loans aggregating \$81,621,085 have been made by the Treasury pursuant to these certificates.

Under paragraph (d) of section 210, the Secretary of the Treasury is authorized to call upon the Federal Reserve Board for advice and assistance with respect to any application or loan. The Secretary has availed himself of this privilege and has had great assistance

from the board. The latter created a committee known as the Railway Loan Advisory Committee to the Federal Reserve Board. This committee has made recommendations to the board with respect to the form of obligation to be taken for each loan. At the request of the Secretary of the Treasury, it has also examined the various applications for advances under paragraph (h) of section 209, and has given the Secretary the benefit of its recommendations with respect to the security to be taken in connection with each advance. The committee and its secretary have also rendered invaluable assistance to the Secretary of the Treasury generally in the performance of the duties imposed upon him by the transportation act, 1920.

DISCONTINUANCE OF THE SUBTREASURIES.

As a result of recent legislation, a Treasury organization of much historic interest will soon disappear. An act approved May 29, 1920, authorized the Secretary of the Treasury to discontinue the subtreasuries and to transfer any or all of their duties to the Treasurer of the United States, or to the mints or assay offices, or to the Federal reserve banks.

The Independent Treasury was established by the act of August 6, 1846, after the short-lived subtreasury system of 1840-1841, as the outgrowth of the unsatisfactory fiscal and financial conditions then existing. The Second United States Bank had finally closed its doors in 1841, and the methods of the State banks which were being used as Government depositaries were considered unsound. The intent of the law was to effect a complete divorce between the Government's finances and the banks. It provided for the establishment of subtreasuries at Philadelphia, New York, New Orleans, Boston, Charleston, and St. Louis. Later the Charleston subtreasury was discontinued and additional subtreasuries were established at Baltimore, Chicago, Cincinnati, and San Francisco. These nine subtreasuries have continued in operation until the present time. The necessity for their existence, however, has steadily diminished as the relations between the Government and the banks of the country have become closer, and has finally disappeared with the establishment and development of the Federal Reserve System.

Until the Civil War, the subtreasury system maintained a strict independence. Government securities were marketed independently of the banks and no banks were used as depositaries. The Government was practically its own banker and was expected to keep its own money and have no connection with banking institutions. With the establishment of the national banking system in 1863, however, and the unprecedented fiscal operations incident to the Civil War, this independence gradually began to disappear and national banks

became depositaries of public moneys and financial agents of the Government. This change in the relations of the Government and the banks and in the position of the Independent Treasury developed in the intervening years and culminated with the passage of the Federal reserve act in 1913, under which the Federal reserve banks were established and authorized to act as depositaries and fiscal agents of the United States. Since that time, the Federal Reserve System has become so thoroughly established that not only are the subtreasuries no longer needed by the Treasury in connection with the fiscal operations of the Government or the collection and disbursement of the public moneys, but the Federal reserve banks are already performing many of the functions and duties previously performed only by the subtreasuries.

The functions and duties performed by the subtreasuries have been, in general, as follows:

The acceptance of gold coin and standard silver dollars for exchange.

The acceptance of United States notes, Treasury notes, gold and silver certificates and subsidiary and minor silver coins for redemption.

The issue of gold order certificates on gold deposits.

The exchange of various kinds of money for other kinds of money.

The cancellation and shipment to Washington of unfit currency and the laundering of unfit currency which permits of this process.

The receipt from United States depositary banks of their surplus deposits of internal revenue, customs, money order, postal, and other Government funds.

The receipt of deposits of postal savings funds, post-office funds, money-order funds, deposits on account of the 5 per cent fund for the redemption of national-bank notes, deposits of interest on public deposits, and deposits of funds by Government disbursing officers.

The payment of United States coupons.

The encashment of checks and warrants drawn against the Treasurer of the United States.

The receipts of funds for transfer to some other point through another subtreasury there located.

The keeping in custody of reserve and trust funds consisting of gold coin and bullion and standard silver dollars securing gold and silver certificates and United States notes.

Believing that the work of the subtreasuries could be performed more efficiently and economically by the Treasurer of the United States, the mints and assay offices, and the Federal reserve banks, the Secretary of the Treasury on April 18, 1919, designated a committee composed of representatives of the Treasury and the Federal

Reserve Board, including C. S. Hamlin, of the Federal Reserve Board, as chairman, the Comptroller of the Treasury, the Assistant Treasurer of the United States, the Chief of the Division of Loans and Currency, and the Chief of the Division of Public Moneys, to consider and report to the Secretary upon the question of the advisability of discontinuing any or all of the subtreasuries and the transfer of any or all of their duties and functions to the Treasurer of the United States, the Federal reserve banks, or other agencies. After an exhaustive study of the duties performed by the several subtreasuries and their relations to the Treasury Department, the banks, and the public, and careful consideration of the extent to which the Federal reserve banks could assume the subtreasury functions, the committee submitted a report to the Secretary of the Treasury in the form of a tentative draft of a bill to provide for the discontinuance of the subtreasuries and the transfer of their duties and functions. After further investigation and deliberation, the Secretary recommended to the Congress that the nine existing subtreasuries be abolished and that provision be made to transfer their duties and functions to the Treasurer of the United States, the United States mints and assay offices, and the Federal reserve banks. In accordance with that recommendation the following authority was incorporated in the legislative, executive, and judicial appropriation act, approved May 29, 1920:

INDEPENDENT TREASURY.

Section 3595 of the Revised Statutes of the United States, as amended, providing for the appointment of an Assistant Treasurer of the United States at Boston, New York, Philadelphia, Baltimore, New Orleans, St. Louis, San Francisco, Cincinnati, and Chicago, and all laws or parts of laws so far as they authorize the establishment or maintenance of offices of such Assistant Treasurers or of Subtreasuries of the United States are hereby repealed from and after July 1, 1921; and the Secretary of the Treasury is authorized and directed to discontinue from and after such date or at such earlier date or dates as he may deem advisable, such subtreasuries and the exercise of all duties and functions by such Assistant Treasurers or their offices. The office of each Assistant Treasurer specified above and the services of any officers or other employees assigned to duty at his office shall terminate upon the discontinuance of the functions of that office by the Secretary of the Treasury.

The Secretary of the Treasury is hereby authorized, in his discretion, to transfer any or all of the duties and functions performed or authorized to be performed by the Assistant Treasurers above enumerated, or their offices, to the Treasurer of the United States or the mints or assay offices of the United States, under such rules and regulations as he may prescribe, or to utilize any of the Federal reserve banks acting as depositaries or fiscal agents of the United States, for the purpose of performing any or all of such duties and functions, notwithstanding the limitations of section 15 of the Federal reserve act, as amended, or any other provisions of law: *Provided*, That if any moneys or bullion, constituting part of the trust funds or other special funds heretofore

required by law to be kept in Treasury offices, shall be deposited with any Federal reserve bank, then such moneys or bullion shall by such bank be kept separate and distinct from the assets, funds, and securities of the Federal reserve bank and be held in the joint custody of the Federal reserve agent and the Federal reserve bank: *Provided further*, That nothing in this section shall be construed to deny the right of the Secretary of the Treasury to use member banks as depositaries as heretofore authorized by law.

The Secretary of the Treasury is hereby authorized to assign any or all the rooms, vaults, equipment, and safes or space in the buildings used by the subtreasuries to any Federal reserve bank acting as fiscal agent of the United States.

All employees in the subtreasuries in the classified civil service of the United States, who may so desire, shall be eligible for transfer to classified civil-service positions under the control of the Treasury Department, or if their services are not required in such department they may be transferred to fill vacancies in any other executive department with the consent of such department. To the extent that such employees possess required qualifications, they shall be given preference over new appointments in the classified civil service under the control of the Treasury Department in the cities in which they are now employed.

Acting under the authority conferred by this act, the Secretary on August 2, 1920, appointed a Treasury committee to consider the discontinuance of the subtreasuries and the transfer of their duties and functions, with particular reference to the individual problems presented by each of these institutions. On August 30, 1920, the Secretary promulgated regulations with respect to the exchange, replacement, and redemption of United States paper currency through the Federal reserve banks, which had been prepared by a Treasury committee on currency appointed in June. Regulations were issued on October 19, 1920, with respect to the exchange and redemption of United States coin and the performance by Federal reserve banks of other duties and functions heretofore performed by the subtreasuries. Circular letters under date of October 20 and October 21, 1920, have also provided, respectively, for the making of deposits for the 5 per cent redemption fund and for the transfers of excess balances by national-bank depositaries. In accordance with the act, the Secretary has also taken steps to provide, so far as possible, for the employees of the subtreasuries. Every effort is being made to find employment in other Treasury offices in Washington or in the field for subtreasury employees not taken over by the Federal reserve banks. So far as possible, the custody of gold and silver coin and bullion in the trust funds and of reserve stocks of currency and coin formerly held by the subtreasuries is being transferred to the Treasurer of the United States and the mints and assay offices.

Since it is necessary that the assets of each subtreasury be checked, examined, and transferred separately, the nine subtreasuries are being discontinued in order. By Treasury Department Circular No. 209,

dated October 23, 1920 (Exhibit 77, p. 521), the subtreasury at Boston was discontinued at the close of business on October 25, 1920. By Treasury Department Circular No. 210, dated October 27, 1920 (Exhibit 78, p. 522), the subtreasury at Chicago was discontinued at the close of business November 3, 1920. The subtreasury at New York is the next to be discontinued, probably about December 1, 1920. The remaining subtreasuries will be closed as rapidly as possible. It is expected that all will have been discontinued by shortly after January 1, 1921.

The closing of the subtreasuries, with the transfer of their duties and functions, is being effected without interruption to business and without interference with the financial operations of the Government. It is believed that the change will result in substantial benefit to the banks and the general public and that a considerable saving will be effected to the Government, chiefly as the result of the greater economy in the use of Government balances and the reduction in operating expenses effected by abolishing the subtreasury establishments. In this connection it is of particular interest to note the following description of the system of Government depositaries as it stands with the subtreasuries eliminated.

DEPOSITS OF GOVERNMENT FUNDS.

The fiscal year 1920 witnessed important changes in the Treasury's policies regarding the establishment and maintenance of depositaries of public moneys. Starting in 1864 with 204 national-bank depositaries, with total deposits at the end of that fiscal year of \$39,980,756.34, the number and classes of Government depositaries have gradually increased. On June 30, 1920, there were 587 general national-bank depositaries, 116 limited national-bank depositaries, 9,475 special depositaries, 12 Federal reserve banks with 21 branches, 12 Federal land banks, 17 foreign depositaries, and 6 insular depositaries, with combined total deposits on that date of \$358,391,340.97. With this marked growth in the number and classes of depositary banks, which were of great service to the Treasury during the war period, it became of prime importance as a measure of administrative economy strictly to regulate and closely to supervise the deposits. With the Government borrowing money to meet its current disbursements by the sale of Treasury certificates of indebtedness at rates of interest running as high as 6 per cent, the ordinary principles of business administration required the elimination of all idle or excessive balances which the Treasury might have with any of its various depositaries.

A careful survey of the situation showed that no excessive or idle balances were being kept with Federal reserve banks and their

branches, or with foreign or insular depositaries. Deposits with special depositaries under the Liberty loan acts were, by their nature, self-limiting, and those with Federal land banks were temporary only. The situation as to balances with national bank depositaries, however, was different. Some of these balances had been established at a time when the Government's receipts exceeded its disbursements and deposits had been made to avoid a money stringency. Others had been established to enable the particular banks to transact Government business which they were no longer transacting. During the war period, additional general depositaries had been created for the purpose of supplying cash to disbursing officers of the Army and Navy and other disbursing officers connected with war activities. The fixed balances maintained with other general depositaries were considerably increased to care for Government business of a like nature. As we drew away from the period of the war, many of these activities were discontinued. The necessity for some depositaries ceased to exist. Large balances with others on account of war activities were no longer necessary. Furthermore, with the establishment and growth of the Federal reserve system and the utilization of the Federal reserve banks and their branches as depositaries and fiscal agents of the Government, it has gradually developed that the greater part of the Government's disbursements are now made through the Federal reserve banks and their branches. The practice of permitting the larger part of the revenues of the Government to be deposited with national banks delayed to a considerable extent the receipt of those revenues at the Federal reserve banks and branches for disbursement. In addition, that practice necessitated the tying up of considerable amounts of Government funds in the form of stationary balances with national bank depositaries as a basis for their handling the Government's receipts. The Treasury undertook, therefore, during the fiscal year a concerted effort to reduce its balances carried with national bank depositaries, both for the purpose of cashing checks and as a basis for handling receipts, to the minimum amounts absolutely necessary for the transaction of essential Government business.

To that end the Secretary formulated and announced in Treasury Department Circular No. 176, dated December 31, 1919 (Exhibit 79, p. 523), definite regulations governing deposits of public moneys. The terms of that circular require that beginning March 1, 1920, all checks, including bank drafts, received by collectors of internal revenue, collectors of customs, depository postmasters, and other depositors of public moneys, shall be forwarded for deposit each day to the Federal reserve bank of the district in which the depositor's

head office is located (or in case the head office is located in the same city with a branch Federal reserve bank to such branch Federal reserve bank). Cash receipts only may be deposited with national-bank depositaries. The operation of this regulation made possible substantial reductions in balances carried with depositaries which had theretofore received revenues, and, in fact, the total elimination of some of them. It was announced in this circular also that the Treasury would designate and maintain balances with national banks only at points where necessary to meet the requirements of Government officers for cash for pay-roll or other official purposes, and then only if there is no Federal reserve bank or branch located at or near the point.

Immediately upon the adoption of these definite policies the Government's account with each national bank depositary was subjected to a careful and thorough examination. The Government balance with each was adjusted in the light of these policies. As a result the Treasury was able during the fiscal year to discontinue 628 national-bank depositaries, including 566 which transacted no Government business whatever and carried a fixed balance of \$1,000 each, and to reduce the total amount held by national-bank depositaries to the credit of the Treasurer of the United States from \$45,492,512.64, as shown on the daily Treasury statement of June 30, 1919, to \$12,644,214.62, as shown on the daily Treasury statement of June 30, 1920. This reduction and withdrawal, amounting to over \$30,000,000, made no disturbance whatever in the money market. Whenever requested to do so, the Treasury permitted depositaries affected by this action to repay the funds withdrawn to the Treasury in installments. At a time when the Treasury was borrowing money to meet its current disbursements at rates of interest running as high as 6 per cent, as before stated, the return of these balances to the Treasury was an important measure of administrative economy.

In conjunction with the adoption of these new policies the Secretary established a class of limited national-bank depositaries, for the sole purpose of receiving deposits made by United States courts and their officers, by postmasters, or by other duly authorized Government officers for credit to their official disbursing accounts. These are not authorized to accept any other deposit, and they hold no funds to the credit of the Treasurer of the United States. One hundred and sixteen limited depositaries were established during the fiscal year. On June 30, 1920, the amount held by them and general depositaries to the credit of Government officers other than the Treasurer of the United States was \$11,567,054.19.

Interest on Government deposits.

Since June 1, 1913, Government depositaries have been required to pay interest at the rate of 2 per cent per annum on daily balances. The amounts received from this source, exclusive of special depositaries under the Liberty loan acts, for the past eight fiscal years are as follows:

1913 -----	\$122, 218. 89
1914 -----	1, 409, 426. 07
1915 -----	1, 222, 706. 93
1916 -----	791, 671. 45
1917 -----	703, 771. 76
1918 -----	1, 134, 569. 09
1919 -----	5, 507, 742. 43
1920 -----	2, 658, 768. 71

Special depositaries.

The Treasury's valuable special depositary system was maintained throughout the fiscal year, in order to permit banking institutions purchasing Government securities, as offered from time to time, to make payment for them by credit, thereby retaining the proceeds of such sales in the form of deposits until withdrawn from time to time as needed to meet current disbursements of the Government. Any incorporated bank or trust company is eligible for designation as such special depositary, in accordance with the provisions of Department Circular No. 92, as amended and supplemented, dated April 17, 1919. At the close of the fiscal year 1920 there were 9,475 special depositaries, of which 4,527 were national banks and 4,948 were State banks and trust companies, holding Government deposits amounting to \$273,355,000.

Interest on special deposits.

In accordance with the department's regulations, the special depositaries also paid interest on Government deposits at the rate of 2 per cent per annum. The interest received from these during the fiscal year was \$11,431,460.31. The total amount received from April 24, 1917, to June 30, 1920, was \$43,352,542.13, as indicated, by semiannual periods and Federal reserve districts, in the following statement:

Interest collected to June 30, 1920, by Federal reserve districts, on deposits in special depositaries on account of sales of Liberty bonds, Victory notes, and certificates of indebtedness, and income and profits tax payments, under acts of Apr. 24, 1917, Sept. 24, 1917, Apr. 4, 1918, Sept. 24, 1918, July 9, 1918, and Mar. 3, 1919.

United States depositaries in foreign countries.

The Treasury continued to maintain depositaries in France, Great Britain, Italy, Spain, Belgium, and Canada for the use of disbursing officers of the Government, especially of the Army and Navy, to facilitate payments in foreign countries. These were designated under the authority vested in the Secretary of the Treasury by section 8 of the act of September 24, 1917, as amended and supplemented. The authority granted by this section, however, is restricted. The depositaries which may be designated thereunder are such as are necessary to provide for current disbursements only. The act of September 24, 1918, authorizes the designation of depositaries in foreign countries with which may be deposited all or any part of the avails of any foreign credits or foreign currencies. The authority given by the first-named act expires six months after the termination of the war between the United States and Germany. The authority of the last-named act is limited to the period of the war and two years after its termination. The

experience of the Treasury has been that it is not only convenient but practically necessary that there be Government depositaries in foreign countries and in the dependencies and insular possessions of the United States to furnish United States disbursing officers with adequate financial facilities, both as to disbursements and deposits. If the existing restricted authority is permitted to expire by limitation, without additional authority having been granted, much inconvenience and perhaps loss may be incurred. These contingencies may be provided for by the enactment of a statutory provision reading substantially as follows:

The Secretary of the Treasury may designate such depositaries of public moneys in foreign countries and in the Territories and insular possessions of the United States as may be necessary for the transaction of the Government's business, under such terms and conditions as to security and otherwise as he may from time to time prescribe.

I trust that the Congress will give this matter its immediate consideration.

Collateral security for Government deposits.

New regulations with respect to collateral security for deposits with national-bank depositaries were incorporated in Department Circular No. 176 (Exhibit 79, p. 523). It was provided that on and after December 31, 1919, and until further notice, the following securities and no others will be accepted as security for deposits of public moneys with national-bank depositaries:

(a) Bonds, notes, and Treasury certificates of indebtedness of the United States, of any issue, including outstanding interim certificates or receipts for payments therefor; all at par.

(b) Bonds of the Federal land banks, bonds of the War Finance Corporation, bonds of Porto Rico and the District of Columbia, and bonds and certificates of indebtedness of the Philippine Islands; all at par.

(c) The $3\frac{1}{2}$ per cent bonds of the Territory of Hawaii at 90 per cent of market value; and other bonds of said Territory at market value, not to exceed par.

These institutions were required on or before June 30, 1920, to substitute securities of these classes for all others placed with the Treasurer as security for public deposits. This ruling affected \$1,774,000 State, county, city, and other securities held by the Treasurer on December 31, 1919.

Creation of Division of Deposits.

To administer these definite policies as to Government depositaries, and to secure a closer, more economical, and more effective supervision, a division known as the Division of Deposits was established in

the Secretary's office on May 19, 1920. The order creating it was as follows:

There is hereby created and established in the office of the Secretary a division to be known as the Division of Deposits.

The Division of Deposits is assigned to the general supervision of the Assistant Secretary in charge of fiscal offices, and will be charged with the administration of all matters pertaining to the designation of Government depositaries and the deposit of Government funds in Federal reserve banks, national banks, special depositaries under the Liberty loan acts, foreign depositaries, Federal land banks, and the Philippine treasury. This division will also be charged with the duty of the supervision of all depositaries and of obtaining proper security for all Government deposits. It will also issue directions to all public officers as to the deposit of all public moneys collected by them, and will be charged generally with the administration of all matters pertaining to the foregoing.

All previous orders inconsistent herewith are hereby revoked.

FRAUDULENT DEALINGS IN SECURITIES.

The attention of the Congress has several times been called to the necessity of enacting legislation to protect the people of the United States from grave injury growing out of the issue of securities of doubtful worth and in many cases of fraudulent character. The Treasury has during the year received numerous complaints that unscrupulous promoters are inducing patriotic subscribers to the war obligations of the Government, particularly those unaccustomed to investments, to exchange Liberty bonds and Victory notes for worthless or speculative securities, with consequent financial loss to many holders and prejudice to the national finances by the dislodging of Government securities from the hands of investors.

The Treasury Department has done its utmost under existing law to combat this evil and has waged through its Savings Division and many voluntary local and national organizations a campaign to educate the Liberty bond holders to the value of their bonds and the danger of dealing with irresponsible and wildcat concerns. On November 28, 1919, for example, the Secretary of the Treasury issued the following statement warning owners of Liberty bonds against unscrupulous stock promoters:

The Treasury again warns owners of Liberty bonds against stock promoters who are trying to persuade them to exchange their Government securities for stock in fraudulent ventures. Information which comes to the Treasury indicates that, particularly in sections of the country where new enterprises are being floated, a surprisingly large number of people are allowing themselves to be made the dupes of swindlers. It is a principle of investment that safety goes normally with a relatively low rate of return, and the suggested high returns upon stocks which are being offered is enough to create suspicion. Where Liberty bond holders are urged to give up their securities for stocks of speculative character, good sense suggests the presumption that the offer is

made because Liberty bonds are worth decidedly more than the stock. Experience in a great number of cases shows that the stock is worthless, and the bond owner who makes the exchange is simply another victim to the army of sharpers who find easy booty in these days of reckless speculation.

Self-interest and good business judgment should decide in favor of the holding of Liberty bonds, which are declared by those most experienced in investment to be the world's best security. The bond owner who continues his partnership with the Government has the added satisfaction of knowing that by helping to maintain the urgently needed capital resources of the country he is making his contribution to the solution of the reconstruction problem in which the Nation's welfare is as vitally concerned as by the war. It is the duty of citizens in every community to sound the warning against fraudulent operators in Government securities at this time, when we can ill afford to dissipate our resources for the profit of the unscrupulous few.

Some progress has also been made by criminal prosecutions against persons dealing illegally in war-savings certificates, though as to Liberty bonds and Victory notes there has been no Federal legislation to give any basis for effective action. The consideration by the Congress of this matter is respectfully urged by the Treasury. Action should be taken, it is believed, along the lines indicated in the letter of February 11, 1919, from the Secretary of the Treasury to the chairman of the Committee on Ways and Means of the House of Representatives, and the exhibit attached, which appears in the report of the Secretary of the Treasury for 1919 as Exhibit 69, page 426. There is much to be said also for the enactment of legislation to make it a Federal crime to induce or solicit holders of Government securities to part with them by means of fraudulent representations. The views of the department are further expressed in the following letter, dated January 10, 1920, to the chairman of the Committee on the Judiciary of the House of Representatives:

WASHINGTON, *January 10, 1920.*

MY DEAR MR. VOLSTEAD:

I am very much impressed by the importance of some sort of legislation on the lines proposed by the Capital Issues Committee to prevent or control fraudulent issues and prospectuses. The dissipation and freezing of capital in worthless or highly speculative enterprises has proceeded to such an extent that money can not be had for sound investment bonds at reasonable rates nor for foreign financing, and the Government's Liberty bonds are depreciated to an entirely unjustified extent.

On February 11, 1919, I addressed a letter to Hon. Claude Kitchin, chairman of the Ways and Means Committee, with which I inclosed a draft of a proposed law to be known as the Federal stock publicity act. This letter will be found in my annual report for the fiscal year 1919 at page 426. Also in my annual report, at page 95, I referred to the bill.

The President, in his address to Congress on "The cost of living," delivered August 8, 1919, said with reference to this legislation:

"May I not add that there is a bill now pending before the Congress which, if passed, would do much to stop speculation and to prevent the fraudulent methods of promotion by which our people are annually fleeced of many millions of hard-earned money? I refer to the measure proposed by the Capital

Issues Committee for the control of security issues. It is a measure formulated by men who know the actual conditions of business, and its adoption would serve a great and beneficent purpose."

In a letter addressed to the Hon. William M. Calder, United States Senate, dated March 31, 1919, contained in my annual report for 1919, at page 46, I use the following language:

"The oversold condition of the market for Liberty bonds thus created was accentuated * * * by the wicked devices of bond sharps and swindlers who took advantage of the inexperience of many small investors in Liberty bonds whom the Treasury was, failing the necessary legislation, powerless to protect."

The report on business conditions made by the Federal reserve agent at New York, in the second Federal reserve district, dated December 20, 1919, contains the following significant language:

"The operations of dealers in poor or worthless stocks are particularly serious at a time of great expansion such as the present, not only because of the waste of capital involved, but because fraudulent issues are lost sight of in the general outpouring. Reports from the banks in certain parts of the district indicate that a large amount of Liberty bonds have been secured in exchange by promoters, who promise quick and rich returns in place of the interest carried by the bonds. Many sales for cash are reported also, particularly to wage earners. An estimate of the amount of dubious issues on sale, secured from a source specializing in such matters, puts the total at 'hundreds of millions.'

"As usual, the victims of such transactions are those who are in the worst position from knowledge or experience to measure the worth of securities. Methods of sale include not only newspaper advertisements and offers through the mails, but solicitation by a highly organized corps of canvassers. In a number of cases the name of the Federal reserve bank is reported to have been used for the purpose of convincing prospective purchasers of the value of the stock offered. Usually the argument has been that the bank whose stock the canvasser is selling will become a member of the Federal reserve system, or that the paper to be handled by the newly organized 'finance corporation' will be discounted by the Federal reserve bank. Such statements should be sifted with the greatest care, but usually the man approached by the canvasser is in no position to know the limitations set by law, both on Federal reserve membership and discounts.

"Certain cases of apparently fraudulent intent have already been brought to the attention of the Federal or local prosecutors, but in the past most prosecutions have succeeded only when the fraud has been completed and the investor has lost his money. It is, therefore, essential that individuals buy only after seeking advice from trusted bankers or others who are equipped with sound information and good sense on financial matters. In a number of progressive communities the newspapers not only refuse to take dubious financial advertising, but have undertaken to warn their readers against unscrupulous vendors of stocks. Officers of banks can carry this public service further by giving advice to all inquirers, whether they are customers or not. Many bankers are already doing work of that sort."

The proposed draft of the Federal stock publicity act, above referred to, was introduced as H. R. 188, and is now, I understand, before your committee.

I beg to impress upon you the desirability of enacting legislation along the lines indicated in this bill. The situation is a grave one and needs remedial legislation.

In the bill, as originally transmitted by me, the Treasury Department was given general jurisdiction over the subject matter, and the Secretary was au-

thorized to create a new bureau for the enforcement of the act. Upon reflection, however, I have reached the conclusion that it will probably be wiser to give jurisdiction over the matter to the Federal Trade Commission, especially in view of the fact that this commission has already taken jurisdiction, under its existing powers, over some important phases of this subject matter.

As stated in my letter to Mr. Kitchin, above referred to, I approve the general plan of the proposed bill. Doubtless some amendments are necessary, but your committee will quickly be able to decide just what amendments or changes should be made.

I gladly tender the assistance of all Treasury officials to your committee, and beg to state that several gentlemen of expert knowledge and long experience in these matters have tendered their services to the Treasury gratuitously. I shall be very glad, indeed, to arrange to have these gentlemen also place their services at your disposal in working out legislation so vital to the interests of the Government and to the whole people of the United States.

Very sincerely yours,

CARTER GLASS.

HON. ANDREW J. VOLSTEAD,

Chairman Committee on the Judiciary,

House of Representatives, Washington, D. C.

GOLD.

The monetary stock of gold in the United States, including coin and bullion, was estimated at \$2,739,043,566 on November 1, 1920, a decrease of \$133,481,500 as compared with November 1, 1919, and an increase of \$851,772,902 as compared with August 1, 1914, at the beginning of the war in Europe. This represents a reduction of \$352,994,133 from the estimated stock of June 1, 1919, one of the highest points. Somewhat less than one-third of the world's gold monetary stock, according to the estimates, is now held in the United States.

Monthly estimates of the United States stock of gold, from November 1, 1919, to November 1, 1920, follow:

Nov. 1, 1919-----	\$2, 872, 525, 066	June 1, 1920-----	\$2, 663, 730, 358
Dec. 1, 1919-----	2, 833, 221, 135	July 1, 1920-----	2, 687, 512, 862
Jan. 1, 1920-----	2, 787, 714, 306	Aug. 1, 1920-----	2, 695, 337, 608
Feb. 1, 1920-----	2, 762, 905, 481	Sept. 1, 1920-----	2, 688, 744, 140
Mar. 1, 1920-----	2, 720, 767, 606	Oct. 1, 1920-----	2, 704, 672, 504
Apr. 1, 1920-----	2, 662, 284, 553	Nov. 1, 1920-----	2, 739, 043, 566
May 1, 1920-----	2, 646, 615, 750		

Production.

High production costs in connection with a fixed sale value have continued to influence unfavorably the mining and reduction of gold, as evidenced by the continued decrease of output in practically all parts of the world. The United States stock has been affected in recent years, however, much more by withdrawals for export in settlement of trade balances than by decreased production of new gold.

The full report by the committee appointed by the Secretary of the Treasury to investigate and consider the subject of the production of gold, rendered February 11, 1919, appears on pages 108-110 of the annual report for 1919. During the past year there has been further discussion of the problem, and a bill, H. R. 13201, has been introduced in the House of Representatives—

To provide for the protection of the monetary gold reserve by the maintenance of the normal gold production of the United States to satisfy the requirements of the arts and trades, by imposing an excise upon all gold used for other than monetary purposes, and the payment of a premium to the producers of newly mined gold, and providing penalties for the violation thereof.

The Treasury is opposed to this bill, believing that the conclusions of the gold committee are sound and that it would be improper to subsidize the gold-mining industry. The producers of gold will, in the long run, benefit with the rest of the community from the ability of the country to maintain itself on a gold basis and, as the purchasing power of the dollar increases, it is to be expected that the production of gold will become more remunerative and that the problem will tend to solve itself.

The consumption of gold in the arts and industries in the United States materially increased in the calendar year 1919, the amount of new gold used, \$56,135,951, being not far below the amount of the domestic production of the year, \$60,333,400.

Gold payments.

Since the beginning of the war it has been the policy of the Treasury to conserve gold and discourage its circulation; and this policy has not changed with the cessation of hostilities or the removal of the embargo on the exportation of gold. It is just as important as ever that gold, which is the foundation of our reserves and the backbone of all credit transactions, should be concentrated in the Federal reserve banks as reserve and for use in the settlement of balances growing out of international transactions. It is the desire of the Treasury that the conservation of gold should continue and that there should be no revival of the use of gold coin or gold certificates for pay rolls and everyday transactions generally, in which it serves no useful purpose. The circulation of gold coin and gold certificates tends to dissipate the reserves. The circulation of gold coin involves a considerable loss due to abrasion, which is avoided by having the gold carried in the vaults of the Federal reserve banks and the Treasury.

In accordance with this policy, persons requesting gold are invited to accept other currency instead, but gold has not been, and will not

be, refused to persons who, after giving consideration to the Treasury's policy, demand it and are entitled to receive it by reason of the presentation and surrender of gold obligations. Wherever gold is demanded it is furthermore the Treasury's policy to pay out available, but not new, gold coin in the denomination of \$20 and gold certificates of large denominations, and to avoid so far as possible the use of gold coin in denominations of \$5 and \$10 and gold certificates in the denomination of \$10, though such denominations will not be refused if demanded. Payments of \$2.50 gold pieces, however, will not be made, inasmuch as no gold has been coined in this denomination for many years, and there is no available supply in Treasury offices. It is the view of the Treasury that the demands for gold coin for domestic use or for export should be satisfied by the issue of double eagles, of which an ample supply has been and will be maintained.

Gold certificates.

By the act approved December 24, 1919, gold certificates were made legal tender in payment of all debts and dues, public and private.

SILVER.

The year just passed has been characterized by extraordinary fluctuations in the price of silver. In November, 1919, even United States subsidiary silver coin reached the melting point, while less than six months later, in May, 1920, the price declined to a point where the repurchase provision of the Pittman Act became operative and the Director of the Mint began to make purchases of domestic silver at the fixed price of \$1 per ounce.

The price of silver rose with considerable regularity after the beginning of the fiscal year 1920, until a price surpassing all definitely known records was reached in New York on November 25, 1919, the rise being from \$1.08 to \$1.38 $\frac{1}{4}$. The maximum price in London, 89 $\frac{1}{2}$ pence, was attained on February 11, 1920, and it is understood that sales were made as high as \$1.42 per ounce in San Francisco. The coining value of silver for United States dollars is \$1.29+ per ounce, and for United States subsidiary silver coins \$1.38+ per ounce. For a time, therefore, the price of silver was sufficiently high to menace the silver circulation. At about this time the Treasury, acting in cooperation with the Federal Reserve Board and the Federal reserve banks, arranged to release free standard silver dollars to be employed in regulating our exchanges with countries having silver monetary standards, and pursuant to these arrangements about 13,000,000 of silver dollars went to the Orient, in addition to some 16,000,000 silver dollars which went through other sources between

November, 1919, and May, 1920. A copy of the public announcement issued by the Federal Reserve Board in this connection under date of December 6, 1919, appears on page 596 of this report.

The price of silver remained above the melting point for dollars until early in March, 1920, when it gradually began to recede until in May it went below the price of \$1 fixed in the Pittman Act for the purchase of silver bullion to replace the standard silver dollars melted under that act. In connection with the melting of standard silver dollars under the Pittman Act the Director of the Mint had received standing orders from the Secretary of the Treasury to buy silver at the fixed price of \$1 per ounce 1,000 fine within the conditions and limitations fixed under the act, which included the requirement that the silver purchased must be the product both of mines situated in the United States and of reduction works so located. Prompt action was taken as soon as the price fell below \$1 per ounce, and all purchases of silver by the Director of the Mint under the Pittman Act have been made with strict regard for the statutory requirement, in order to make certain that the benefits of the act inure to American producers, as contemplated by the Congress. With this in view, the Director of the Mint has insisted from the outset upon satisfactory proof of the domestic production and of settlement with the miner on the basis of \$1 per ounce 1,000 fine. Purchases under the Pittman Act by the end of October had reached a total of about 22,000,000 fine ounces.

Formal regulations governing sales of silver to the Director of the Mint under the Pittman Act were prescribed under date of August 30, 1920. Copies of these regulations, together with the supplemental regulations of October 6, 1920, are attached to this report as Exhibits 80 and 81, pages 538 and 543. It will be noted that the regulations of August 30 include as exhibits the public statements issued by the Director of the Mint on May 17, 1920, and June 18, 1920, announcing his readiness to purchase silver under the Pittman Act, and prescribing the preliminary forms for proof that the silver tendered satisfied the statutory requirement that the silver purchased must be the product both of mines situated in the United States and of reduction works so located. An additional 10,000,000 of standard silver dollars were melted during the year under the Pittman Act to provide metal for domestic subsidiary silver coinage.

The following tables show various operations under the Pittman Act relating to the melting of silver dollars from April 23, 1918, the date of its passage, to October 31, 1920:

TABLE I.—*Silver dollars melted.*

Silver dollars melted, of which \$3,177,554 represented dollars in Treasury, and the balance was made available by the retirement of silver certificates (of the total dollars melted 11,000,000 were for use in manufacturing subsidiary silver coin, 1,000,000 in fiscal year 1919).....	\$270, 121, 554
--	-----------------

TABLE II.—*Silver certificates withdrawn from circulation and retired.*

Denominations:	Amount.
\$1-----	\$172, 870, 717
\$2-----	38, 935, 078
\$5-----	78, 906, 185
\$10-----	817, 470
\$20-----	7, 583, 700
\$50 (issues in excess of retirements)-----	734, 150
\$100-----	39, 500
\$500-----	2, 000
\$1,000-----	1, 000
Total face value-----	298, 421, 500

TABLE III.—*Federal reserve bank notes issued from Apr. 30, 1918, to Oct. 31, 1920.*

Denominations:	Net issue.
\$1-----	\$160, 489, 136
\$2-----	40, 024, 364
\$5-----	29, 280, 735
\$10-----net decrease--	854, 890
\$20-----do-----	665, 100
\$50-----	195, 600
Total-----	228, 469, 845
Less notes redeemed but not assorted by denominations-----	1, 610, 900
Notes outstanding Oct. 31, 1920-----	226, 858, 945

The Federal reserve bank notes which have been issued, as stated in Table III, are secured as follows:

United States loan of 1925, 4 per cent-----	\$2, 593, 000
United States consols of 1930, 2 per cent-----	13, 888, 400
United States Panama loan, 1916-36, 2 per cent-----	383, 500
United States Panama loan, 1918-38, 2 per cent-----	285, 300
Special certificates of indebtedness, 2 per cent-----	259, 375, 000
Total-----	276, 525, 200

As stated in the annual report for 1919, the announcement of May 6, 1919, coupled with the removal on that day of all restrictions on export of silver, had the effect of freeing the silver market from the control of war prices. As the result of the repurchase provisions of the Pittman Act, however, the price of silver which is the product of domestic mines and reduction works has become stabilized at about \$1 per fine ounce, the fixed price provided for purchases by the mint, and a separate price has become established for foreign silver, so long as the world price does not exceed \$1 per ounce. The maximum and minimum prices of silver, by months, from May, 1919, to October, 1920 (for other than domestic product of the United States, after May, 1920), were as follows:

Date.	Maximum.	Minimum.	Date.	Maximum.	Minimum.
1919.			1920.		
May.....	\$1.215	\$1.0125	January.....	\$1.37875	\$1.3075
June.....	1.1425	1.085	February.....	1.35875	1.30
July.....	1.09375	1.035	March.....	1.33	1.1825
August.....	1.1675	1.0825	April.....	1.28125	1.12
September.....	1.2125	1.12	May.....	1.11625	1.0025
October.....	1.2575	1.1725	June.....	1.005	.815
November.....	1.3825	1.2325	July.....	.9575	.90125
December.....	1.3525	1.305	August.....	1.0225	.935
			September.....	.955	.9225
			October.....	.9225	.76875

Silver purchases, by months, under the terms of the Pittman Act, approved April 23, 1918, have been as follows:

1920:	Fine ounces.
May	332, 088
June	6, 168, 505
July	3, 288, 856
August	3, 429, 277
September	3, 815, 733
October	4, 634, 860
Total.....	21, 669, 319

Standard silver dollar transactions from April 23, 1918, to June 30, 1920, have been as follows:

Dollars melted, Apr. 23, 1918, to June 30, 1920.....	270, 121, 554
Dollars transferred to Federal reserve bank of New York for credit in Treasurer's account.....	55, 000, 000
Dollars exported, Nov. 25, 1919, to May 11, 1920.....	29, 287, 142
Probable additional export of dollars, which were separately reported only during the above-mentioned period; at other times included with subsidiary silver coin.....	1, 506, 387
	30, 793, 529
Net number of dollars released from Treasury stock, Apr. 23, 1918, to June 30, 1920 (on basis of daily statements) ..	355, 915, 083
Net withdrawal of silver certificates, Apr. 23, 1918, to June 30, 1920 (on basis of daily statements)	\$329, 612, 722
Net reduction of reserve for Treasury notes of 1890.....	213, 024
Net reduction of free stock of dollars (in general fund)	26, 089, 337
Total.....	355, 915, 083

THE FEDERAL FARM LOAN SYSTEM.

The Federal farm loan system, under the direction of the Federal Farm Loan Board, functioned normally for the first half of the fiscal year. Thereafter the pending suit challenging the constitutionality of the Federal farm loan act had its effect upon the lending operations of the banks as usually conducted and it was necessary to

adopt special means to meet the situation. The 12 Federal land banks made loans to 19,659 farmers in the aggregate sum of \$61,961,980 during the six months ended December 31, 1919. The loans by Federal land bank districts for this period were as follows:

Loans closed by Federal land banks during the six months ended Dec. 31, 1919.

District.	Federal land bank.	Number of loans.	Amount of loans.
1	Springfield, Mass.	1,002	\$3,225,800
2	Baltimore, Md.	1,218	3,288,300
3	Columbia, S. C.	1,388	3,651,445
4	Louisville, Ky.	1,536	5,521,700
5	New Orleans, La.	2,050	4,189,125
6	St. Louis, Mo.	2,001	4,942,615
7	St. Paul, Minn.	2,549	9,500,000
8	Omaha, Nebr.	878	5,072,100
9	Wichita, Kans.	1,234	4,132,900
10	Houston, Tex.	2,462	8,002,015
11	Berkeley, Calif.	896	3,172,100
12	Spokane, Wash.	2,445	7,263,880
	Total.	19,659	61,961,980

The funds for lending operations covering the six months' period ended December 31, 1919, had been procured by an advance sale of farm-loan bonds in the preceding June following the conclusion of the Victory Liberty loan campaign.

The suit challenging the constitutionality of the Federal farm-loan act was instituted in July, 1919, in the United States district court in the western district of Missouri. The case was heard before the judge of that district on October 30, 1919, and an immediate decision rendered sustaining the act in its entirety. From that decision appeal was taken to the United States Supreme Court, before which the case was argued January 6, 1920. On April 30, 1920, the Supreme Court ordered a reargument of the case and set that argument for October 11, 1920. On October 14, 1920, the case was reargued and finally submitted to the Supreme Court, and now awaits the decision of that tribunal.

The Federal land banks have no funds beyond their capital with which to make farm loans except such as they derive from the sale of farm-loan bonds. The natural and inevitable effect of the pendency of litigation challenging the validity of the act, and especially the tax-exemption feature of the bonds, was to depress the market for such bonds below a price at which they could be sold and permit continued lending operations.

As early as February, 1920, the Federal Farm Loan Board directed that all applications for loans be taken subject to a favorable decision of the pending litigation. In the initial process of receiving applications for loans and carrying them through to completion, there is of necessity a large volume always in hand, and notwithstanding

the precaution of taking applications subject to the decision of the court the Federal land banks found themselves, when the rearrangement of the test case was ordered, with a very large volume of applications in hand which had been carried to the point of appraisal and actual approval by the executive committees of the several banks. These amounted to bona fide commitments on behalf of the banks.

In addition, many of the banks had used their commercial credit practically to the limit in an effort to meet the normal demands of their borrowing constituencies. The continuance of the case from April 30 to October 11 made it apparent that those applications which had been approved could not be closed for a period of six or eight months and that short-time obligations of the banks could not be met by the sale of bonds.

Believing that this situation justified public intervention, Congress by the joint resolution approved May 26, 1920, authorized the purchase by the Treasury of a limited amount of farm-loan bonds to meet the emergency confronting the system. Previous sales of bonds by the Federal land banks had been at the rate of $4\frac{1}{2}$ per cent, but as the Treasury was paying in excess of 5 per cent for the money at the time the joint resolution became operative, it was deemed proper that the bonds should bear the maximum interest rate payable under the Federal farm loan act, namely, 5 per cent.

Pursuant to the resolution, the Secretary of the Treasury has authorized purchases and the Treasury has purchased 5 per cent bonds of the several Federal land banks in the aggregate sum of \$39,450,000, and the same are now held in the Treasury. The effect of these purchases by the Treasury was to enable the banks to close all of their more pressing commitments and liquidate their own short-time paper.

The absolute integrity of the security on which loans had been made under the farm-loan system is fully borne out by another year's experience, and the financial solidity of the banks has been made more manifest. Each of the banks has liquidated its initial operating deficit and has a substantial surplus.

Retirement of Government-owned stock.

On November 15, 1919, the amount of stock of the Federal land banks owned by the Government, as the result of original subscriptions, was \$7,693,240. During the following 12 months the banks retired this stock in the aggregate amount of \$860,560, reducing that in the several Federal land banks held by the Government on November 15, 1920, to \$6,832,680.

Earnings.

From November 1, 1919, to October 31, 1920, the net earnings of the 12 Federal land banks amounted to \$2,753,717.74, of which \$564,725 had been carried to reserve account, \$803,846.68 distributed in dividends paid by 10 of the banks upon stock owned by farm-loan associations and individuals, \$106,346.18 carried to suspense account, and \$1,278,799.88 carried to undivided profits.

Joint-stock land banks.

No joint-stock land banks have been chartered since the date covered by the last annual report. These banks were affected in the same way as the Federal land banks by the pendency of the litigation challenging the constitutionality of the act, and their lending operations have been practically suspended since the beginning of the present calendar year.

During the year, 27 joint-stock land banks were in more or less active operation, making loans in the aggregate of \$29,262,470 to 3,148 borrowers.

Liquidation of joint-stock land banks.

Under an amendment to the Federal farm loan act approved May 29, 1920, provision was made for the voluntary liquidation of joint-stock land banks, and in certain cases for the acquisition of their assets and the assumption of their liabilities by Federal land banks. Pursuant to this law three joint-stock land banks have gone into voluntary liquidation: The Colonial Joint Stock Land Bank of Norfolk, Va., and the Union Joint Stock Land Bank of Richmond, Va., each of which was organized to do business in the States of Virginia and North Carolina. Neither of these banks had made bond issues and neither had outstanding liabilities. Their assets, in the form of farm mortgages, were acquired—those in Virginia by the Federal Land Bank of Baltimore and those in North Carolina by the Federal Land Bank of Columbia. The Guaranty Joint Stock Land Bank of Wichita similarly went into voluntary liquidation, its assets being acquired and its outstanding bonds being assumed by the Federal Land Bank of Wichita, with the approval of the Federal Farm Loan Board.

Tax exemptions of farm-loan bonds.

I recommend that the exemptions from taxation be withdrawn from farm-loan bonds issued by joint-stock land banks in the future. These banks are organizations of private capital for commercial pur-

poses in which the profits accrue to the benefit of investing stockholders, as distinguished from the Federal land banks, which are mutual institutions, in which borrowing farmers are virtually the only stockholders receiving dividends, and, in the contemplation of the act, will be ultimately the only stockholders.

Tax exemptions in the case of joint-stock land banks amount to a gift at the expense of the Government and the taxpayers generally, and the privilege should not be continued with respect to these private-mortgage companies, organized for private profit. This fact is emphasized in this period of high taxes when the Government has established the policy of subjecting its own securities to partial taxation and when the Treasury can not afford to dispense with any of the receipts which otherwise would accrue on account of taxes.

It may be contended that the joint-stock land banks may make larger loans than the Federal land banks, under the provisions of the law, and that in this particular they occupy a field peculiar to themselves. It is sometimes further contended that the joint-stock land banks may make loans for purposes and to persons beyond the power of the Federal land banks. Obviously the latter banks may make these loans if the Congress grants the necessary authority. In other words, the Federal land banks, owned by borrowing farmers, who are the beneficiaries of their profits, can, if authorized by the Congress, make any loan which the joint-stock land banks are now permitted to negotiate. Consequently, if the withdrawal of the tax-exemption feature from farm-loan bonds issued by joint-stock land banks in the future were accompanied by an increase in the powers of the Federal land banks to make any loan which is now authorized by joint-stock land banks, there would be no curtailment of the financial benefits to agriculture provided by the act.

In view of the absence of compensating benefits for the loss in revenue resulting from the extension of the tax-exemption privilege to securities issued by institutions organized on an investment basis by private capital for private gain, I think it is clear that section 26 of the Federal farm-loan act should be amended so as to withdraw the tax-exemption privilege from farm-loan bonds issued by joint-stock land banks. In this connection it should be borne in mind, however, that the joint-stock land banks now in operation were organized under sanction of law and with the approval of the Government. In any legislation withdrawing the tax-exemption feature from farm-loan bonds issued by joint-stock land banks, it would appear to be necessary, however, to make provision to safeguard joint-stock land bank bonds already issued as well as the interests of existing joint-stock land banks.

SEED-GRAIN LOANS TO FARMERS.

During the past year the administration of the seed-grain loans made during 1918 and 1919, as the result of war conditions, to farmers in certain drouth-stricken areas of the West has advanced steadily under the joint direction of the Treasury Department and the Department of Agriculture. These loans were made through the Federal land banks of Wichita, St. Paul, and Spokane, as financial agents of the Government, acting under the supervision of the Federal Farm Loan Board, pursuant to joint circulars issued from time to time by the Treasury Department and the Department of Agriculture. The creation and scope of the plan under which these loans were made and the progress in administering them during 1918 and 1919 are set forth in detail in the annual reports of the Secretary of the Treasury for those years.

Loans were made in certain sections of the West to about 15,000 farmers who were without means of obtaining commercial credit to enable them to obtain seed grain for planting. If this aid had not been extended, some farms would probably have been abandoned and others lain idle, to the prejudice of the food supply of the Nation and the national security and defense in time of war. There were three distinct plantings covered by these loans: (1) The first fall planting in 1918; (2) the second fall planting in 1918 (restricted, however, to farmers whose first fall planting had failed); and (3) the spring planting in 1919. Upon obtaining a loan from the United States for any of these three plantings, the borrower was required to execute a guaranty fund agreement under the terms of which those farmers whose crops proved successful, as defined therein, were required to contribute to a guaranty fund. The proceeds from the guaranty funds were to be applied, under the direction of the Farm Loan Board, on the loans of those farmers whose crops had proved failures and who, therefore, would be unable to repay their loans from the proceeds of the crops. In this way a co-operative fund was created in connection with each of the three classes of loans for the mutual benefit and protection of the unsuccessful farmers and the United States. Loans for fall planting were made in the Wichita, St. Paul, and Spokane districts; second fall planting loans were made only in the Wichita district; and spring planting loans were made only in the St. Paul and Spokane districts.

As the appropriation under which these loans were extended expired June 30, 1919, all the loans under the plan adopted were closed by that time. There remained, however, the arduous task of collecting the principal and interest from the individual farmers as the loans matured, together with the contributions to the guaranty funds

in accordance with the terms of the guaranty fund agreements. It was mainly with these features of the seed-grain loans that the Treasury has been concerned during the past year. In view of the large number of loans made and the evident difficulties incident to collecting them, it may fairly be said that the work has progressed even more satisfactorily than could have been anticipated, and with a fair prospect of completion in the near future. While the amounts contributed to the guaranty funds have not yet been applied upon the indebtedness of those borrowers whose crops proved failures, the preliminary arrangements are progressing steadily, and it is hoped that a final settlement may be reached and the loans closed within the next few months. The prompt and satisfactory manner in which this large undertaking has been carried on by the Federal land banks concerned, as well as the effective cooperation of the Federal Farm Loan Board in supervising the activities of the land banks, has gone far to insure early completion of the operation and is a substantial testimonial to the efficiency of the farm loan organization.

As repayments of these loans began to come in, it was necessary, because of the large number involved, to institute some uniform method of accounting for the receipts. On September 18, 1919, letters were sent to the Federal land banks of Wichita, St. Paul, and Spokane prescribing a method of accounting for the receipts in payment of these loans and for depositing them with the Federal reserve banks of Kansas City, Minneapolis, and the Spokane branch of the Federal reserve bank of San Francisco, respectively, as depositaries of the Government. Under date of September 2, 1919, Joint Circular No. 5 (Exhibit 82, p. 545) was issued by the Treasury Department and the Department of Agriculture supplementing previous regulations relative to expenses incurred by Federal land banks in the administration of these loans.

As stated in the previous annual report, it developed during the summer of 1919 that, where the yield per acre would not exceed 4 bushels, it would barely pay the reasonable cost of harvesting and marketing, leaving no return to the farmer for his labor, and that the destitute farmer would probably abandon his farm and go elsewhere to labor for wages, unless he was permitted to retain the proceeds for the immediate needs of himself and his family. By letters dated August 13, 1919, to the Federal land bank of Spokane, and September 10, 1919, to the Federal land banks of St. Paul and Wichita, signed by the Secretary of the Treasury and the Secretary of Agriculture, the Federal land banks were authorized in such cases to release the Government's lien upon the receipt of a certificate from an agent of the Department of Agriculture. Pursuant to these letters the Federal land banks have executed releases of the

mortgages held by the United States covering the crops planted by virtue of these loans, as follows:

Bank.	State.	Number.	Amount of note secured by the mortgage released.
Wichita.....	Kansas.....	642	\$168, 126
	Oklahoma.....	68	12, 909
	Texas.....	16	3, 281
	New Mexico.....	1	120
Spokane.....	Montana.....	876	270, 768
	Washington.....	16	5, 585

It should be remembered that the release of these mortgages did not relieve the borrowers from their obligation to pay the principal and interest of their notes. The Secretary had no authority to discharge the borrowers from this obligation as distinguished from the lien on the crops planted. The Congress only could grant such release.

Since it appeared that many farmers who had sustained crop failures, as defined in the joint circulars, would be unable to pay their notes in whole or in part and that the continued obligation to do so might cause severe hardship, the Congress authorized the cancellation of the indebtedness in such cases by the following provision of law, which was incorporated in the Agricultural appropriation act for 1921, approved May 31, 1920:

That a yield of 5 bushels or less per acre of wheat on lands owned by those in the drought-stricken regions who borrowed money from the Government of the United States for the purchase of wheat for seed be, and the same is hereby, declared to be a failure, and the borrower whose yield was 5 bushels or less per acre be, and he is hereby, released from repayment of the amount borrowed by him from the Government: *Provided*, That nothing herein shall release the borrower who signed a guaranty fund agreement and whose crop was not a failure, from making the contribution provided for in such agreement, but said guaranty fund shall be used as stipulated in the agreement to the settlement of the loans to those whose crop was a failure.

The act authorizes the discharge of loans only for wheat planting, so that loans made to farmers for the planting of rye or other grains are not released, and as the act makes no provision for refunding payments made prior to the date on which the law became effective by borrowers whose crops had failed, such borrowers will be unable to obtain any benefits from the present legislation.

Pursuant to the provisions of this act, a circular entitled "Joint Circular No. 6," dated August 10, 1920, prescribing "Regulations relative to release of farmers' seed-grain loans for wheat planting in drought-stricken areas" (Exhibit 83, p. 545), was issued by the Treasury Department and the Department of Agriculture. Under the

terms of this circular applications for release of seed-grain loans for wheat planting may be filed with the Federal land bank from which the loan was received. These applications will be examined and, if the statements therein contained are true, will be approved and certified by the Federal land bank and forwarded to the Farm Loan Board which, in turn, will examine the application and transmit it, with its recommendation thereon, to the Treasury Department for approval. A copy of the form prepared by the Treasury Department to be used in making these applications for release is appended as Exhibit 84, page 547. Upon approval of the application, the Federal land bank will forthwith be authorized to cancel and deliver up the borrower's note and deliver a release of the mortgage given as security for the note. It is provided in the joint circular that the release of the mortgage shall not operate to waive the right of any insurance company to any lien thereunder which it may have acquired by virtue of any policy of insurance taken out by any of the Federal land banks pursuant to Joint Circular No. 4. No refunds of payments made prior to May 31, 1920, are authorized under the circular. Pursuant to this circular the notes of those borrowers who have sustained a crop failure as defined in the agricultural appropriation act for 1921, and whose obligations remain unpaid are being canceled and the mortgages on their crops held by the banks as financial agents of the Government are being released.

While it is too early as yet to determine finally the exact amount which the United States will realize as repayments on these loans, the collections to date, including the collections covering the principal and interest of the notes and the contributions to the guaranty funds, probably approximate the total amount which the Government may expect to receive. The following table shows the total disbursements made through the Federal land banks of Wichita, St. Paul, and Spokane in the form of loans to farmers, together with the amounts received up to October 20, 1920, as collections in payment of the loans, including the contributions to the guaranty funds:

Table showing disbursements and receipts covering seed-grain loans to farmers.

Bank.	Disbursements in form of loans.	Receipts in payment of loans.			
		Principal of note.	Interest on note.	Contributions to guaranty funds.	Total.
Wichita.....	\$1,801,955	\$1,341,630	\$72,235	\$243,456	\$1,657,321
St. Paul.....	358,370	66,823	1,746	443	69,012
Spokane.....	1,950,129	9,780	469	24	10,273
Total.....	4,110,454	1,418,233	74,450	243,923	1,736,606

As this table indicates, the majority of farmers in the Wichita district, i. e., Oklahoma, Texas, and a portion of Kansas, were favored with full harvests and were, therefore, able to pay not only their individual indebtedness, but also to make substantial contributions to the respective guaranty funds. In the St. Paul and Spokane districts, particularly the latter, unprecedented drouths, however, resulted in almost complete failures in these sections. It is for this reason that the collections made in these districts compare rather unfavorably with the amounts collected by the Wichita bank.

Under the terms of the guaranty-fund agreements, the contributions to the respective funds are to be applied in the first instance in payment of the obligations of those borrowers whose crops have proved to be failures. As the contributions to the guaranty funds will be insufficient to meet the total amount still due on the notes of those borrowers whose crops have proved unsuccessful, the contributions to the guaranty funds collected eventually will be received by the Government on the administration of these funds. It may be said, therefore, that of loans approximating in all slightly over \$4,000,000 the Government may expect to realize in return a little less than \$2,000,000. In view of the widespread assistance which these loans gave to the farmers in the sections involved, and the encouragement which they furnished to the communities as a whole through the realization that the Federal Government was interested in and desirous of assisting them to meet the problems growing out of war-time conditions, it may fairly be said that the cost to the United States is insignificant and is amply justified as a war emergency action.

BUREAU OF INTERNAL REVENUE.¹

Internal-revenue collections for the fiscal year ended June 30, 1920, aggregated \$5,407,580,251.81, as compared with \$3,850,150,078.56 for the preceding fiscal year, an increase of \$1,557,430,173.25. This increase in collections is due principally to an increase of \$1,356,152,100.90 in the collections of income and profits taxes, which aggregate for the fiscal year 1920, \$3,956,936,003.60, as compared with \$2,600,783,902.70 for the fiscal year 1919.

The larger collections of income and profits taxes is due, in part, to the fact that the provisions contained in the revenue act of 1918

¹ The figures concerning internal-revenue receipts as given in this chapter differ from such figures carried in other Treasury statements showing the financial condition of the Government, because the former represent collections by internal-revenue officers throughout the country, including deposits by postmasters of amounts received from sale of internal-revenue documentary stamps, while the latter represent the deposits of these collections in the Treasury or depositaries during the fiscal year concerned, the differences being due to the fact that some of the collections in the latter part of the fiscal year can not be deposited or are not reported to the Treasury as deposited until after June 30, thus carrying them into the following fiscal year as recorded in the statements showing the condition of the Treasury.

for installment payments of income and profits taxes threw forward from the fiscal year 1919 to the fiscal year 1920 the collections of the third and fourth installments of those taxes arising out of income in the calendar year 1918. A considerable part of the increase, however, is due to the assessment throughout the year of additional income and profits taxes on the basis of the audit and verification of returns for 1918 and prior years. As a result of this work an aggregate of \$376,977,667.49 was actually assessed during the fiscal year 1920.

Satisfactory progress has been made in auditing the large accumulation of income and profits tax returns for 1918 and prior years. Of the 1918 returns about 3,500,000, or more than 80 per cent of the total number, were examined in the offices of the 64 collectors of internal revenue. Returns of income of \$5,000 or more are forwarded to Washington for audit and verification by the bureau. The force engaged on this work is organized as the income tax unit of the bureau, the personnel of which was increased during the year from 2,672 to 4,317. The output of completed cases for each employee has also increased. Special attention is now being paid to the claims of taxpayers for refund of income and profits taxes erroneously assessed, and the time required to consider and finally adjudicate such claims is being gradually reduced.

The administration of the income and profits tax law has been facilitated by the greater proficiency which officers and employees of the bureau have acquired by experience and through special courses of training organized and conducted by the bureau. Taxpayers have been aided in familiarizing themselves with the requirements of the law by the issuance of a regular service of information containing the decisions and rulings of the department arising out of the settlement of specific cases.

The appellate function in income and profits tax cases, formerly discharged by the Advisory Tax Board, which was discontinued as announced in the last annual report, has been performed during the last year by a group of expert internal-revenue officers. The functioning of this committee in the careful consideration of difficult cases has tended to prevent unnecessary litigation and is believed to have impressed taxpayers with the avowed policy of the bureau to act in an open-minded and fair manner in determining tax liability in every case.

In the offices of the collectors of internal revenue a program of reorganization has been consummated, involving the establishment of branch offices in the principal cities and towns throughout the country, where taxpayers may secure such assistance in the transaction of their tax business as has heretofore been available only at the offices of collectors of internal revenue. At the end of the fiscal

year there were 318 such offices open for the convenience of taxpayers. In order to make these offices of practical value to the public, special effort has been made to improve the general efficiency of the field personnel. A correspondence study department, with over 3,000 employees regularly enrolled, has been engaged in the instruction of these student workers in the many subjects concerning which deputy collectors and other field employees should have complete knowledge. The added efficiency of this important branch of the service is reflected in the fact that a total of \$42,213,889 in delinquent and additional taxes was collected during the year as compared with corresponding collections of \$20,560,334 during the preceding fiscal year. This amount is independent of the large additional assessments based on the office audit of income-tax returns.

PROHIBITION ENFORCEMENT.

The obligations imposed upon all citizens by the national prohibition act, approved October 28, 1919, have been respected in large measure, and the far-reaching economic and social changes sought by that legislation are now in progress. The opportunity for individuals to obtain intoxicating liquors has been removed from the course of public and lawful business to the clandestine, criminal activities of a prohibited traffic.

The activities of the Bureau of Internal Revenue, which was charged with the duty of administering the national prohibition act, have been directed primarily toward the encouragement by educational methods of this general observance of the law. The act has been carefully studied. Interpretative regulations and general information have been issued as quickly as possible and given the most effective distribution. The cooperation of moral agencies of all kinds has been sought in order that correct public opinion on the subject might be stimulated. In States where prohibition laws are in effect and the local officials cooperate with the Federal officers the enforcement of the national prohibition act is not difficult and is a complete success. However, there are some States which have no prohibition laws, and in some of these there is but little cooperation on the part of local officials. In such instances the Bureau of Internal Revenue encounters many difficulties.

More definite activities of the bureau, ancillary to this general purpose, have been the organization and management of a force of investigators, who have been engaged in cooperation with State and local authorities in the detection of violations and the prosecution of offenders. In the brief time which has elapsed since the law went into effect this work has developed into considerable proportions, with 12 field departments and 948 investigators at the close of the year. This force will be augmented as may be necessary and under

such appropriations as Congress may provide for the purpose. It is obvious, however, that crimes and misdemeanors under this legislation do not differ essentially from those offenses which it is the province of State and municipal officers of peace and justice to detect and discourage by punishment. It is to be expected, moreover, that as all citizens become more and more accustomed to the restrictions and obligations imposed by the law the temptation to violate its provisions will diminish. Certainly with the passing of the generation familiar with the public and habitual use of intoxicating beverages the demand for this illicit commodity will be abated.

Recognition of the increasing importance of alcohol in industry, science, and the arts, as well as of the legitimate use of alcoholic preparations for other essential purposes, led to the inclusion in the national prohibition act of permissive provisions under which such commodities may be manufactured, distributed, and used, subject to control and regulation. The administration of these provisions of the law has been most difficult. The bureau has sought to interpose no unnecessary obstacle to lawful activities, economic or social, involving the manufacture and use of alcohol and has desired especially to encourage the manufacture of industrial alcohol.

On the other hand, it is through the abuse of permits issued by the bureau under the provisions of the act that many violations of the law, serious and difficult of detection, are consummated or attempted. Despite all safeguards with which the bureau has been able to surround the issuance of these permits, the aggregate volume of alcohol and intoxicating liquors withdrawn from bond indicates by comparison with recognized legitimate requirements that considerable quantities have been diverted to illicit purposes. The development of the bureau's organization and procedure and closer cooperation with the legitimate permittees should result in a modification of the present necessarily restrictive regulations affecting these important American industries without endangering in any way the enforcement of the prohibitive features of the law. It may confidently be expected that the same effective control which was exercised for the purpose of revenue over the manufacture and sale of beverage alcohol for many years before the national prohibition act became law will be brought about for the higher purpose of law enforcement and the moral and economic welfare of the people within a reasonable time.

WAR-RISK INSURANCE.

Much progress was made during the fiscal year in improving the executive, administrative, and clerical organization of the Bureau of War Risk Insurance and the service rendered by it to its great number of beneficiaries. The organization was divided into 10

major administrative units, as follows: Insurance, compensation and insurance claims, marine and seamen, allotment and allowance, medical, legal, finance and administrative, liaison, school teachers' retirement, and personnel. These divisions functioned with continuing improvement.

Within the director's immediate staff a statistical unit was established for the purpose of creating and maintaining administrative control records of every activity of the bureau. These records indicate accurately the bureau's progress from day to day and clearly point out weak spots requiring immediate attention. With the assistance of daily control records it has been possible to coordinate the various activities of the bureau, consolidate many of its functions, and avoid duplication of effort.

Military and naval compensation.

The military and naval compensation cases considered during the year related mainly to disability claims, rather than death claims, as during the previous year. The war-risk insurance act was amended by the act approved December 24, 1919 (Exhibit 85, p. 550), which greatly increased the amount of compensation payable for disability. The amendment necessitated the readjustment of virtually all disability claims.

Under the law, only men who are compensable—that is, whose disability is 10 per cent or greater—are entitled to medical care and treatment. Experience has shown that this works a hardship upon many men who were disabled by reason of their military service but whose disabilities have not been rated as high as 10 per cent. These men are nevertheless in need of medical care not only to relieve their present condition but to prevent their disabilities from becoming aggravated. The attention of the Congress is drawn to this situation.

The bureau has approved a total of 44,546 claims for compensation on account of death resulting from service and 184,405 claims for compensation on account of disabilities incident to service. During the month of June, 1920, payments were made by the bureau in this connection as follows:

42,945 death awards	\$1,395,588.49
134,408 disability awards	8,152,361.70
Accrued awards	5,675.96
For medical care	375,896.02
And in payment of burial awards	32,749.18
Making a total of	9,962,271.35

Military and naval insurance.

Much progress was made during the year in perfecting the organization of the Insurance Division and in placing its work upon

a plane of efficiency equal to that of modern commercial institutions. This result has been attained by systematizing and simplifying procedure and by the use of many labor-saving devices and office appliances. Duplication has been eliminated and the former volume of work has been maintained, and even increased, with a concurrent reduction in personnel of more than 50 per cent.

The amendatory act of December 24, 1919, increased the classes of beneficiaries of war-risk insurance by adding uncles, aunts, nephews, nieces, brothers-in-law, sisters-in-law, and persons who have stood in loco parentis to the insured for a period of one year or more prior to his enlistment or induction into the service.

United States Government life insurance.

The first permanent United States Government life insurance policies, representing conversions of term insurance policies, were issued and delivered on May 1, 1920. During the year 152,979 applications for United States Government life (converted) insurance were approved for an aggregate amount of \$511,821,500 of insurance. A total of 540,458 premium payments (including monthly, quarterly, semiannual, and annual) were received, aggregating \$10,047,463.61. Liberty bonds aggregating \$19,921,100 were held on November 15, 1920, as investments for the United States Government Life Insurance Fund.

The amendment of December 24, 1919, provided that United States Government life (converted) insurance might be paid at maturity in one lump sum or in 36 or more monthly installments, at the option of the insured. This option was not extended to the war-risk term insurance.

Summary of insurance operations.

The Bureau has written—

4,631,993 war-risk term policies covering insurance to the amount of (including some duplicate applications)-----	\$40, 284, 892, 500. 00
The gross premium remittances on war-risk term policies from all sources approximating-----	298, 864, 307. 07
128,300 claims for insurance on account of death are represented by insurance to the amount of-----	1, 141, 818, 133. 48
While 3,257 claims for insurance on account of permanent and total disability involve insurance to the amount of--	28, 536, 540. 00
During the month of June, 1920, the total disbursements on insurance claims amounted to-----	7, 670, 084. 56

In spite of the efforts of the bureau to reach all of the more than 4,000,000 discharged soldiers, sailors, and marines to advise them of their insurance rights and privileges under the war-risk insurance

act and the steps necessary to reinstate or convert their original insurance—

The war-risk term insurance in force on June 30, 1920, amounted to-----	\$3, 472, 624, 000
The United States Government life insurance (converted policy) in force on the same date amounted to-----	511, 821, 500
Making an approximate total liability of-----	3, 984, 445, 500

With the exception of those whose health will not permit reinstatement under the regulations, the total original amount of war-risk term insurance, being approximately \$40,284,892,500 on June 30, 1920, may be regarded as a remote potential liability. It can scarcely be regarded as a probable or prospective liability.

The ex-service men and women are reinstating their insurance at the rate of approximately \$100,000,000 a month. If reinstatements continue at this rate, and should ex-service men and women be allowed the privilege of reinstating during the next five years, there would be, in addition to the present war-risk term insurance of \$3,472,624,000, approximately \$6,000,000,000, making a total of about \$9,472,624,000.

The average policy of United States Government life insurance (converted term insurance) amounts to \$3,345.70. Assuming that reinstatements of term insurance and conversions thereof will continue at the present rate, the amount of permanent United States Government life insurance in force at the expiration of five years would be approximately \$3,643,347,850. This amount represents, in the circumstances stated, the theoretical prospective insurance liability under converted policies five years hence.

Of the \$40,284,892,500 war-risk term insurance written, there is a definite liability due to death and disability claims of \$1,170,354,673.48 to be paid in installments over a period of 240 months, or in the case of total and permanent disability during the lifetime of the insured. The sum of \$298,864,307.07 has been collected in war-risk term insurance premiums. This leaves a net current liability over premium payments of \$871,112,366.41.

In times of peace, premiums for term insurance ordinarily would be sufficient to pay all normal claims; but in the case of war-risk insurance it is to be remembered that many who are retaining their term policies are not normal risks, and also that the war-risk term insurance, as well as United States Government life (converted) insurance, provides for permanent and total disability without additional premiums. Therefore it is unlikely that the term insurance premiums collected will, in fact, be sufficient to cover the actual liabilities.

It is believed that premiums collected on converted policies (the United States Government life insurance) will be sufficient to pay all claims.

Military and naval allotments and family allowances.

Amendments of original awards of allotments and allowances constituted one of the most important problems of this feature of the bureau's work during the year. Adjustments of the claims of enlisted men who had been discharged from the service involved much correspondence, which is now decreasing as the allotment and allowance work approaches an end.

Applications and awards for family allowances for the period Oct. 6, 1917, to June 30, 1920.

Applications received.....	4, 473, 700
Number of awards made for men having dependents.....	2, 090, 893
Number of exemption cases submitted.....	111, 903
Amount of allotments paid.....	\$288, 704, 689. 73
Amount of allowances paid.....	265, 986, 936. 52
Total disbursements.....	554, 691, 626. 25

The current work of this division has greatly decreased since the armistice, but it is still of considerable volume.

Payments for the month of June, 1920, amounted to—

Allotments.....	\$1, 027, 166. 29
Allowances.....	1, 334, 491. 43
Total.....	2, 361, 657. 72

Marine and seamen's insurance.

As insurance provided for American vessels and their cargoes and for masters and crews of American vessels covered war risks only, it was possible to terminate these features of the Bureau's work soon after the signing of the armistice. The rates for both types of insurance were withdrawn on January 4, 1919.

From September 2, 1914, when the Bureau was created, to June 30, 1920, the marine section wrote insurance on American hulls and cargoes aggregating \$2,067,291,993. The net premiums received amounted to \$46,741,508.96 and salvage \$63,734.88. The net profit of these operations, representing the excess of premiums and salvage over expenses and paid and estimated losses was \$17,030,197.11.

The seamen section, from its beginning on June 12, 1917, to June 30, 1920, wrote insurance on the lives of masters, officers, and crews of American vessels aggregating \$322,782,391.82. The amount of net

premiums received was \$843,563.49. The net profit on the policies covering these risks, representing the excess of premiums over expenses and paid and estimated losses, was \$470,700.81.

Medical Division.

The work of the Medical Division has greatly increased during the fiscal year. To keep abreast of the work it has been necessary to augment both the professional and the clerical personnel. At the beginning of the fiscal year there were 35 medical officers and 196 clerical employees, and at the close there were 72 medical officers and 478 employees. At the beginning of the fiscal year there was an arrearage of approximately 39,000 cases awaiting action; on June 30, 1920, the arrearage was only 4,444 cases, less than one average day's work. At the beginning of the fiscal year the average output of cases per diem was approximately 1,000; at the end of the fiscal year it was 5,257.

The Medical Division acted upon 1,088,201 cases during the fiscal year. These figures do not indicate the total number of men whose cases were acted upon, but the number of times that cases received attention. Out of the 3,800 men suffering major amputations during the war, 3,616 have already been supplied with artificial limbs. Of these 1,249 were arms and 2,367 were legs.

The number of patients in hospitals increased from 3,279 on June 30, 1919, to 17,471 at the close of the fiscal year. During that period there were admitted to hospitals 48,983 patients, of whom 34,791 were discharged. Analyzing these figures, it is found that at the beginning of the fiscal year of the patients in hospitals, 864 were general, 1,362 were tuberculous, and 1,053 were neuro-psychiatric. At the close of the fiscal year, 6,411 were general patients, 6,018 were tuberculous, and 5,042 were nervous and mental patients. Of the claims made during the year 66.65 per cent were rated as temporary partial disability, 20.87 per cent as temporary total, 3.72 per cent as permanent partial, and 1.97 per cent as permanent total. Ninety-three and twenty one-hundredths per cent of the total number of cases were rated at 10 per cent of disability or greater; that is, were compensable; and 6.29 per cent at less than 10 per cent of disability; that is, noncompensable. Of the total number of claimants of the bureau, 2,629 have died during the year.

By an understanding with the Federal Board for Vocational Education an interchange of physical examination reports was arranged. This materially assisted the bureau in the speedy adjudication of claims and proved of great benefit to the claimants themselves, in that they were obliged to make only one contract to secure

a medical examination either for the purposes of the Bureau of War Risk Insurance or those of the Federal Board for Vocational Education. Every endeavor was made to provide physical examinations and medical treatment based upon the latest and best medical records, and arrangements were perfected whereby examinations and treatment were provided for claimants with the minimum of annoyance and disturbance of their personal affairs.

The Medical Division has maintained arrangements with the medical departments of the Army and Navy, whereby patients requiring further treatment when discharged from the service are immediately transferred from the Army or Navy hospital to a hospital for patients of the Bureau of War Risk Insurance.

In the fulfillment of its medical responsibilities to its claimants the Bureau of War Risk Insurance has maintained constantly a sympathetic attitude toward the claimant and his dependent relatives and has at all times endeavored to administer its several functions with justice both to the claimant and to the Government.

Personnel.

The bureau has made marked progress during the fiscal year in solving its difficult and extensive personnel problems. The force has been greatly reduced, placed upon a permanent civil-service basis, and mobilized to meet the needs of the bureau.

The maximum number of persons employed at any one time during the fiscal year was 15,480 and the minimum number was 7,862, the latter being the total on June 30, 1920. The output of work, nevertheless, increased. The volume during the last quarter of the fiscal year was very much greater than in any preceding quarter and the bureau was on a more current basis.

The total number of employees of the bureau on November 1, 1920, was 6,833, including the field force and additional medical personnel. The personnel program of the director contemplates a reduction in force to approximately 6,000 by January 1, 1921.

ENEMY OR ALLY OF ENEMY INSURANCE COMPANIES AND OTHER FOREIGN INSURANCE COMPANIES.

Federal supervision and regulation of foreign insurance companies doing business in the United States was continued throughout the year. It was performed through the Bureau of War Risk Insurance under authority of an Executive order issued under the trading with the enemy act. During the year applications of 12 companies to do business in the United States were approved and the necessary licenses issued.

SOLDIERS' AND SAILORS' CIVIL RELIEF ACT AND BONDS.

The department continued the administration of Article IV of the act approved March 8, 1918, generally known as the soldiers' and sailors' civil relief act. Under this law, the Government undertakes to protect payments of premiums in commercial companies on certain policies on the lives of men in the military and naval services to the extent of \$5,000 insurance on any one life. Premiums due life insurance companies in such instances are certified by the Bureau of War Risk Insurance to the Secretary of the Treasury, and, to secure the payment of such premiums, the Secretary issues bonds of the United States registered in the names of the respective insurers. To June 30, 1920, the Bureau of War Risk Insurance approved 7,745 applications for benefits under this law. These approved applications protected \$12,526,956.29 of insurance in private companies and societies on the lives of men in the military and naval services. The amount of premiums guaranteed was \$362,399.50. Some of the premiums were paid by the insured, and to the extent of such aggregate payments it was unnecessary to issue bonds as a guaranty.

To October 31, 1920, \$195,400 of bonds had been issued to guarantee the payment of such premiums, of which \$29,400 had been canceled and \$166,000 were outstanding on that date.

DISTRICT OF COLUMBIA SCHOOL-TEACHERS' RETIREMENT ACT.

The administration of certain provisions of the act approved January 15, 1920, providing retirement for the school-teachers of the District of Columbia, was vested in the Secretary of the Treasury. The law provided for the deduction and withholding from the basic salaries of every teacher in the public schools of the District of an amount sufficient, with interest thereon at 4 per cent per annum, compounded annually, to purchase an annuity under the provisions of the act. It also authorized the investment of the fund arising from such deductions. By Treasury Department Circular No. 190, dated May 25, 1920 (Exhibit 86, p. 557), the Director of the Bureau of War Risk Insurance was authorized to administer, under the direction of the Secretary of the Treasury, the duties conferred upon the Secretary by the retirement act, except those relating to the investment of the fund created thereunder. The commissioner of the public debt was authorized by the circular to perform, under the direction of the Secretary of the Treasury, the duties conferred upon the Secretary with respect to the investment of the fund. These arrangements continued until June 30, 1920, when, in accordance with the terms of the act approved June 5, 1920, the administration of the law was transferred to the Commissioners of the District of Columbia, the

duties with respect to investments being transferred to the Treasurer of the United States. Such transfer and the future investment of the fund were covered in Treasury Department Circular No. 205, dated July 6, 1920 (Exhibit 87, p. 559).

Liberty bonds aggregating \$48,350 on November 15, 1920, were held as investments for the District of Columbia Teachers' Retirement Fund.

HOSPITALIZATION.

The signing of the armistice, with the resulting rapid demobilization of the military forces, threw an extraordinary burden upon the hospital facilities of the United States to provide medical care and treatment for beneficiaries of the Bureau of War Risk Insurance. The United States Public Health Service constituted, with a few minor exceptions, the only civil agency of the Federal Government operating a general medical service. The Secretary of the Treasury consequently designated the service as the principal instrumentality for the performance of the hospitalization work of the Bureau of War Risk Insurance. This arrangement was confirmed by the Congress in the act of March 3, 1919, which authorized additional hospital facilities for the care of the beneficiaries of the Public Health Service and added to these beneficiaries patients of the Bureau of War Risk Insurance; and by the provisions of the sundry civil appropriation act for the fiscal year ending June 30, 1921, making appropriation for the care and treatment of patients of the War Risk Insurance Bureau.

Under the direction of the Secretary of the Treasury, on October 6, 1919, the War Risk Insurance Bureau and the Public Health Service prepared an estimate of the urgent hospital needs and a program to supply adequate hospital facilities to meet these needs. The estimate disclosed that there was an immediate need of 7,700 beds for war-risk insurance patients in addition to the other patients of the Public Health Service. Acting as the medical agency of the War Risk Insurance Bureau, the Public Health Service adopted as temporary expedients the following:

1. The expansion of existing facilities by such alterations, additions, or modifications as were immediately feasible.
2. The acquirement through congressional action of certain base hospitals at Army camps which were capable of utilization.
3. The transfer to the Public Health Service of certain hospitals leased by the War and Navy Departments.
4. The purchase, lease, and remodeling of other institutions.
5. The making of contracts for the treatment of patients in non-governmental hospitals.

From October, 1919, the number of patients requiring hospital care increased with great rapidity, until on June 30, 1920, it reached a total of approximately 20,000, without any prospect apparent of an abatement of increasing demands.

To meet this situation the Public Health Service had to find not only sufficient hospital facilities, already greatly overtaxed in this country prior to the war, and to find, and in many cases train, the professional personnel needed to man these hospitals, but it also had to develop the administrative machinery required to handle this large and growing organization and to make contact with sick and disabled former service men and women for the purpose of securing the medical examinations necessary to ascertain the character of treatment needed, to distribute them to hospitals, and for the other manifold purposes to which this task gave rise. For reasons of administration, the United States was divided by the Public Health Service into 14 districts, in each of which it opened an office and placed a district supervisor. The creation of this extensive machinery to permit the Public Health Service to reach the disabled soldiers and sailors and provide them with the care and treatment of which they stood in need required time. The expansion of the field agencies of the service went on rapidly, and was supplemented in its early stages, particularly in sparsely settled portions of the country, by physicians retained on a fee basis directly by the Bureau of War Risk Insurance. As the organization was developed the services of these physicians were made available to the Public Health Service in an effort to coordinate their activities under the supervision of that service.

Since the inception of this work, approximately 130,000 patients entitled to treatment under the war-risk insurance act have been cared for in hospitals, making a total of nearly 5,000,000 hospital relief days, the unit of computation. Over 500,000 out-patient treatments have been furnished—that is, treatment of cases not requiring confinement in a hospital. About 500,000 medical examinations have been completed. In addition, special services and attentions of various kinds have been afforded. For example, about 22,000 patients have been given dental treatment. At the present time over 2,000 patients are being given occupational therapy and over 3,000 physiotherapy each week. Thousands of patients have been furnished prosthetic appliances of many different kinds.

To carry on this work the Public Health Service has necessarily assembled a large personnel. The medical force (exclusive of designated examiners who act on a fee basis) now numbers approximately 2,700. A dental corps has been organized, comprising about 130 officers. There is in the service a corps of approximately 1,200

female nurses. A reconstruction service has been formed, and there are now in the employment of the service about 400 reconstruction aids. A dietetic service has been provided which includes 125 trained dietitians.

An inspection service has been instituted for general supervision of the field activities of the service, and a number of officers are kept constantly in the field investigating complaints and making reports. This inspection service covers not only the hospitals operated directly by the Public Health Service, but also civilian institutions receiving patients under contract with that service, so that the department may endeavor to see that the care and treatment furnished in such hospitals do not fall below the proper standard. In cooperation with the American Red Cross, which has devoted itself to the work with great zeal, there has been organized an extensive and effective medical social service, ministering to the needs of the discharged disabled soldier and sailor in many ways. The Public Health Service has supplied the Federal Board for Vocational Education with the medical personnel necessary to carry on the medical functions of the board, and, up to a short time ago, supplied the Bureau of War Risk Insurance with similar personnel to constitute the Medical Division of the bureau for the execution of the medical functions of the war-risk insurance act carried on in the bureau.

In order to assist the Public Health Service to meet the tremendous task suddenly placed upon it by the demobilization of the armed forces of the Nation following the cessation of hostilities, the Congress in the sundry civil appropriation act for the present fiscal year authorized the utilization by the Director of the Bureau of War Risk Insurance of such governmental facilities as might be made available, beginning July 1, 1920, in hospitals of the Army and Navy and in the National Homes for Disabled Volunteer Soldiers. In pursuance of this authorization there have been made available about 1,500 beds in hospitals of the Army, about 1,600 beds in hospitals of the Navy, and about 1,000 beds in the soldiers' homes. It is estimated by the Director of the War Risk Insurance Bureau that by January 1, 1921, there will be available in the soldiers' homes approximately 4,000 beds. This includes a hospital of 1,000 beds at Johnson City, Tenn., for tuberculous patients, and another of 1,000 beds at Marion, Ind., for patients suffering from mental and nervous disorders.

The work of making these beds available in the hospitals of the Army and Navy and in the National Homes for Disabled Volunteer Soldiers was intrusted by the Congress to the Bureau of War Risk Insurance, and has been performed by the Medical Division of that bureau in conjunction with the agencies of the Public Health Service, including the district supervisors of that service. The Chief

of the Medical Division of the Bureau of War Risk Insurance is a member of the hospital board of the Public Health Service. Under regulations approved by the Secretary of the Treasury, the Surgeon General of the Public Health Service and the Director of the Bureau of War Risk Insurance, acting conjointly, assemble through their respective organizations the data as to beds made available in hospitals operated by, controlled by, or under contract with the Public Health Service, in Army and Navy hospitals, and in soldiers' homes, and transfer this information at frequent intervals to the offices of the district supervisors of the Public Health Service who are charged with the distribution of patients. In addition to its duties in this connection, the Medical Division of the Bureau of War Risk Insurance transmits to district supervisors requests for medical examinations required in connection with claims for compensation and insurance under the war-risk insurance act, receives and reviews the reports of such examinations, and makes an advisory determination for the Director of the Bureau of War Risk Insurance of the extent of disability found, which is based upon a table of ratings established under the war-risk insurance act for that purpose. Such ratings are transmitted to the Compensation and Insurance Claims Division, and when confirmed or modified by the director of the bureau determine the payment of insurance or the amount of compensation due.

Every effort has been made to coordinate closely the work of the Medical Division of the Bureau of War Risk Insurance and the work of the Public Health Service. It was recently decided by the Secretary that the medical work in the Bureau of War Risk Insurance should be performed through a medical personnel, appointed in that bureau. The reorganization of the Medical Division of the bureau in accordance with this plan is now actively in hand and is nearing completion. In undertaking this task, the force was recruited in large part from the medical personnel assembled and trained by the Public Health Service and assigned to duty in the Bureau of War Risk Insurance. The personnel thus taken over continued the exercise of their functions without interruption or material change.

In carrying out this emergency hospitalization program it has been necessary to utilize many temporary facilities and to adopt many temporary expedients, which will be discontinued as rapidly as they can be replaced by measures of a more desirable and permanent nature. It has been necessary to act expeditiously and to organize on a constantly expanding scale. It is estimated that within the course of another year approximately 30,000 patients will require hospitalization, and to meet this immense increase in the number of patients within a period so short requires the unrelenting efforts of every

person engaged in the task. According to the best estimates available, it will cost approximately \$50,000,000 to carry on this hospital program during the coming fiscal year for patients of the Bureau of War Risk Insurance.

HOSPITAL CONSTRUCTION.

The Public Health Service now has in buildings either owned or leased by the service over 12,500 available hospital beds. Under commitments already made it is expected in the course of the next few months that this available bed capacity will be increased to a number in excess of 15,000. In addition there will be added to the permanent bed capacity of the Government 1,000 beds for neuropsychiatric patients in the soldiers' home at Marion, Ind., and 1,000 beds for tuberculous patients in the soldiers' home at Johnson City, Tenn. These two homes have been converted into hospitals exclusively. This will make a total of 17,000 Government beds in the near future. There are also at other soldiers' homes, either now available or shortly to be made available, approximately 2,000 beds; in Army and Navy hospitals there have been reported as available a total of 3,270 beds. The use of beds in hospitals of the Army and Navy has been adopted as a temporary expedient until more satisfactory facilities can be constructed. The use of beds in soldiers' homes should be of a more permanent nature, provided patients in these homes are kept entirely separate and are separately treated from persons who seek these homes for domiciliary purposes.

I should point out with respect to the hospitals operated directly by the Public Health Service that some are Government buildings on leased grounds transferred to the service by the Army or Navy; some are institutions leased by the Army and Navy and turned over to the Treasury Department by transfer of lease; some are buildings of temporary construction hastily put up by the Army at the beginning of the war; some are private institutions leased by the Public Health Service direct under the act of March 3, 1919; and others are hospitals bought or constructed especially for the service. The leases in some cases will expire after certain fixed periods following the declaration of peace, and are not renewable by their terms. The buildings of many of the hospitals are far from satisfactory for the use to which they are being put, and should be either substantially altered and repaired or abandoned as soon as more satisfactory institutions become available. Some of the leases carry a purchase clause, in pursuance of which the buildings may be bought if of a character desirable for permanent acquisition, provided the Congress sees fit to make the appropriations necessary.

The hospital facilities which the department now has are not so distributed geographically as to meet desirably the needs of the patients of the Bureau of War Risk Insurance. It is obvious that the supply of beds must be sufficient in number, of the requisite character, properly maintained, and so distributed throughout the country as to permit of their use in the various sections of the United States. In meeting the future needs for hospital facilities, the correct policy, in my judgment, is to hospitalize all patients, as far as practicable, in Government hospitals and that beds be provided accordingly. This policy is clearly indicated by the experience of the department with regard to the character of service afforded patients in Government-operated hospitals and hospitals treating patients under contract with the Public Health Service. Should this policy be adopted by the Congress, it will be necessary not only to supply the number of beds necessary to equal the difference between the number of patients now in hospitals and the beds now available in Government-operated hospitals, but it will be necessary, in addition, to increase the figure in order to provide such distribution of beds as will correct the present inconvenient geographical distribution and to provide for growing demands.

It will be readily appreciated that it is injurious to the patients in many instances, as well as expensive to the Government, to have to move them great distances in order to provide the character of care and treatment required in the individual case. Further than this, it will be necessary to increase the number, as rapidly as practicable, by the number of beds required to replace those in leased hospitals of the Public Health Service, the leases of which are not renewable, and in those hospitals which are of an undesirable character and the use of which should, therefore, be discontinued as speedily as possible.

As previously stated, there are at the present time approximately 20,000 patients now undergoing hospital treatment provided by the Treasury Department. After careful consideration of (1) the number of patients of the Bureau of War Risk Insurance and the Public Health Service now in hospitals; (2) the present Government hospital facilities; (3) the imminent necessity of replacing some of the undesirable hospitals; (4) the increase in the number of patients within the past year giving further support to the estimate that 30,000 hospital beds will be needed by the end of the next 12 months; and (5) the geographical distribution of the ex-service population of the country, it is believed that there is immediate and urgent need for 4,800 additional beds for tuberculous patients, 4,500 additional beds for patients suffering from mental and nervous disorders, and 900 additional beds for general medical and surgical patients. In round numbers, 10,000

additional beds are almost immediately required. At an estimated cost of \$3,000 per bed for construction and \$500 per bed for equipment, an appropriation of \$35,000,000 for this purpose would be required at this time.

Should the Congress decide further to utilize buildings already owned by the Government and erected on the grounds of soldiers' homes in different sections of the country, the amount of this appropriation could be reduced accordingly. There are highly desirable grounds surrounding and belonging to soldiers' homes in different sections of the United States upon which hospitals could be erected if these properties were made available for the purpose, thus reducing the expense of purchasing grounds for the erection of hospital buildings. Furthermore, if the Congress should see fit to authorize the extension of the privilege of existing Army and Navy hospitals for the use of War Risk Insurance patients, the total of the appropriation above suggested could be further reduced. The requisition of Army and Navy hospitals for this purpose is inadvisable except as to such as are both new and desirable.

Another matter which should be taken into consideration in connection with the hospital construction program is the possibility which has recently developed by the passage by the New York State Legislature of an act to provide for the construction of a 1,000-bed hospital for neuropsychiatric patients of the Bureau of War Risk Insurance, to be leased to the Government for 10 years at an annual rental of one-tenth of the entire cost, but containing a limitation to the effect that only patients who are citizens of New York State shall be admitted to the hospital. If this act of the New York State Legislature should be amended by removing this limitation and by adding the usual purchase clauses which would admit of the application of rent payments or a percentage thereof toward the purchase of the institution, the program for hospital needs for neuropsychiatric patients could be modified substantially. I should present for the consideration of the Congress the advisability of encouraging other States to construct hospitals at their own cost to be leased upon completion to the Government for the care and treatment of these patients, with the provision that the United States would have the privilege of buying the hospitals and of being credited in the purchase price with sums paid in rentals. In this way the Government could purchase such hospitals as, in the light of experience, might be needed permanently, and could release to the States for their use such hospitals as may prove to be needed only for a period of years.

The 20,000 patients now receiving hospital care may be classified, roughly, as one-third tuberculous, one-third suffering from mental and nervous disorders, and one-third general medical and surgical

cases. An analysis of the character and distribution of the present bed supply shows that the general medical and surgical cases are provided for in a reasonably satisfactory way, and it is believed that such cases, if necessary, can in great part be cared for adequately under contract in civilian institutions, since their ailments do not ordinarily require prolonged hospitalization. On the other hand, the care and treatment of tuberculous and neuropsychiatric cases constitute the more permanent phases of the hospital construction program. It is not possible, upon the basis of present knowledge and experience, to state when the maximum number of neuropsychiatric and tuberculous cases will be reached. The indications are that this may not occur in the near future. It will be affected by possible future legislation, such, for instance, as the pending proposal to extend the privilege to claim compensation payments under the war-risk insurance act beyond the time now fixed in that act. Such an extension would serve to admit a greatly increased number of patients to care and treatment by the Government.

It has been estimated by the Director of the Bureau of War Risk Insurance that the maximum will not be reached for these classes of patients until the years 1927 to 1929. In addition to the immediate construction program involving an appropriation of approximately \$35,000,000, the Government must make provision for the care of these two groups of patients in the years to come. It is my belief that in appropriating funds to care for the patients of these two services it would be wise to frame the authorization in a broad and general way, since this is an undertaking in a new and uncharted field which has, in the few months since its inception, afforded but very limited experience by which the Government may be guided. The legislation should authorize the use of funds for building units or additions of wards to existing State or private institutions, and should contain provision for the conclusion of long leases with such institutions as meet the required standard. The appropriation should, therefore, in my judgment be so framed as to provide additional hospital facilities (1) by purchase, gift, or lease of existing plants or parts of plants; (2) by construction on sites now owned by the Government or on sites acquired by purchase, condemnation, gift, or otherwise; and (3) by remodeling or extension of existing plants and their equipment owned or to be acquired by the United States.

In summarizing the need for the construction of hospitals to meet the requirements of ill and disabled ex soldiers and sailors, to whom the country owes so much, I should point out that, according to the best estimates obtainable, there will probably be need for a total of something like 30,000 permanent beds in the United States. It seems fitting in every sense that the National Government should adequately provide for the needs of these men, and I know of no way in which

this can be done except by the construction of permanent, suitable institutions, particularly for those who suffer from tuberculosis or nervous and mental disorders. The Nation earnestly desires that the medical and hospital needs of her heroic sons be met in a manner that will show America's appreciation of the glorious service they rendered to their country. I am satisfied that this need can not be met unless adequate provision be made in permanent governmental institutions.

The estimates which are being submitted to the Congress contemplate an expenditure of approximately \$35,000,000 for the construction of hospitals to meet the imperative demands of the situation, and in my judgment this sum is by no means excessive to care for this real emergency and immediate obligation of the Federal Government. I earnestly urge that the Congress appropriate the necessary funds for this purpose at the earliest practicable moment.

PUBLIC HEALTH.

In addition to the extensive and important work conducted for the patients of the Bureau of War Risk Insurance, as previously discussed, the Public Health Service continued to perform, with unremitting care throughout the year, its usual functions in the interest of the health of the people. These included the protection of the Nation against the introduction of epidemic diseases from foreign countries and the spread of sickness from State to State, as well as the continuation of scientific studies of medical treatment, diseases, sanitation, etc. The service pursued its customary activities in co-operation with the State and local health authorities of the country.

Precautions against foreign epidemics.

With the resumption of maritime intercourse among the nations of the world following the war, the prevention of the introduction of pestilential diseases into the United States from foreign countries became a problem for serious consideration by the Public Health Service. Devasted and famine conditions in many parts of Europe furnished fruitful soil for the propagation and spread of diseases throughout Europe and their introduction into this country unless strict precautionary measures were taken at ports of departure or entry of vessels engaged in trade with America. Officers of the Public Health Service were detailed during the fiscal year in increased numbers for duty in foreign countries to detect outbreaks of diseases, in order that proper quarantine restrictions might be exercised. The officers stationed in foreign ports are rendering valuable reports. Up to the present time, the service has been eminently successful in preventing the introduction of disease into the United States.

Transfer of State quarantine stations.

It was a fortunate coincidence that, with the increasing menace of disease conditions abroad, the three remaining States under which State quarantine stations were maintained transferred their quarantine facilities to the Public Health Service. During the fiscal year ended June 30, 1920, Congress appropriated funds for the payment for the quarantine stations at New York City, Baltimore, Md., and those in the State of Texas, and the necessary legal steps are now being taken to effect the transfer of these properties from State to Federal jurisdiction. This is a move of much importance in the direction of safeguarding the health of the country. It enables the quarantine procedure now being carried out at other stations to be made applicable at these places. This action now makes possible uniform practice at all the quarantine stations of the United States, with a resultant increase in quarantine efficiency and a decreased burden on maritime commerce.

National leprosarium.

Realizing the menace which existed in the presence and migration of persons afflicted with leprosy in various States throughout the country, the Congress, on February 3, 1917, appropriated \$250,000 for the establishment of a national leprosarium to be maintained under the jurisdiction of the Public Health Service and granted authority for the erection of suitable buildings to carry out the purposes of the act.

Since the date of the passage of the law repeated efforts were made to obtain a suitable site for the institution. A number of satisfactory locations were given serious consideration, but local opposition to the establishment of a leprosarium finally resulted in the abandonment of these projects. Within the last few months, however, arrangements have been perfected and necessary legislation enacted by the Legislature of the State of Louisiana, whereby its leper colony located at Carville, in that State, has been turned over to the Public Health Service to be operated as a national leprosarium. Final steps are being taken to consummate this transfer and to open the institution under Federal control.

Heretofore persons afflicted with leprosy frequently have become charges of States of which they were not legal residents. It is manifestly unfair to such communities that they should be charged with the expense and care of these patients and be subjected to the risk of the spread of the disease among their people. With the establishment of this Federal home, however, it is believed much can be done to relieve the States of this unjust burden.

In connection with the treatment of lepers it should be mentioned that as a result of investigations of leprosy the Public Health Service has developed a method for the treatment of the disease which gives extremely encouraging results. Should further observations of this treatment bear out present indications the Federal home for lepers will not only be the means of segregating persons suffering from one of the diseases most dreaded by man, but will also hold out in cases which have not advanced too far a very material hope for recovery.

National health program.

The efficient formulation and effective execution of an adequate national health program is of vital importance to the happiness and progress of the people of the United States. In the previous annual report of the Secretary of the Treasury attention was invited to the necessity of the development of a comprehensive plan to meet the urgent after-the-war health needs. It has been possible to make but little progress in this direction because of the lack of the necessary appropriations. Nevertheless, the Public Health Service already has made a beginning along certain lines and has employed the limited funds placed at its disposal by the Congress to the very best advantage practicable in developing the contemplated program.

For example, an appropriation of \$50,000 to enable the service to cooperate with the States in studies in and demonstrations of rural hygiene has been used to such advantage that, instead of the expenditure by States of an equivalent sum, such expenditures have been five times the amount contributed to the work by the Federal Government; that is to say, \$250,000. That does not include much larger sums for the same purpose expended by municipalities and private corporations which have authorized the issuance of bonds or directly expended sums in the neighborhood of \$800,000. In view of the encouraging results which have followed these very moderate expenditures, it is felt that a substantial increase should be made in these funds which go far toward making rural life more attractive and healthful.

The service has not been able to undertake its work in child hygiene along the extensive lines that are desirable. It has used the money appropriated, however, in intensive studies of the conditions of child hygiene in such a manner as to demonstrate the unusual value to the country of health work in this field. As a result, three States are now establishing departments of child hygiene along lines recommended by the Public Health Service. These investigations have shown so many adverse conditions which are easily preventable affecting the health of children that there can be no question as to the necessity for the Public Health Service continuing the work in a larger way.

In organizing its work on industrial hygiene the service has made intensive studies of many occupations, but what is of larger interest in this field is the fact that it has assumed sponsorship for a national code of industrial hygiene whereby minimum standards for the protection of the health of workers will be established.

It appears quite essential that the Public Health Service should be provided with adequate funds with which to support and conduct investigations. In this connection the Surgeon General calls attention to the fact that one-fifth of all deaths take place in children less than 5 years of age, that pneumonia is annually the cause of one-tenth of all deaths in the United States, that tuberculosis claims 150,000 persons annually, that 7,000,000 or 8,000,000 cases of malaria occur yearly with an estimated economic loss ranging from \$800,000,000 to \$1,000,000,000, and that the recent epidemic of influenza carried off in the space of six weeks some 500,000 lives.

Plague has made its appearance in the United States, and these outbreaks are drawn to the attention of the Congress in the hope that additional appropriations will be granted to the Public Health Service for combating the disease. The service is also in need of additional funds for the purpose of collecting information with respect to the presence of disease in the United States. It is important that a central national agency assemble this very important information currently and distribute it to State and local authorities for the purpose of taking the necessary steps to prevent the scourge of interstate epidemics. The attention of the Congress is further invited to the request of the Surgeon General for adequate appropriation and authority to publish and distribute additional health material for the use of the public.

COAST GUARD.

After distinguished service as a part of the Navy, to which it was temporarily transferred in accordance with law during the war, the Coast Guard has operated under the direction of the Treasury since August 28, 1919, pursuant to Executive order of that date. It is gratifying to record that the department's expectations with respect to the loyal, effective, and courageous performance of war-time duties by this historic service were fully realized. Its integrity, efficiency, and best traditions were sustained in a marked degree, and the record is a creditable one, of which officers and men may well be proud.

The Secretary of the Navy, in his annual report for the fiscal year ended June 30, 1919, had the following to say with regard to the operations of the Coast Guard as a part of the Navy during the war:

* * * Its vessels and personnel made a valuable addition to our forces afloat and its experienced officers and men proved their worth in service with those of the regular Navy and Naval Reserve Force.

In speaking of the performances of the Coast Guard cutters in European waters the Secretary of the Navy also said:

Six Coast Guard cutters were employed in convoy and escort duty in European waters, the *Ossipee*, *Seneca*, *Yamacraw*, *Algonquin*, *Manning*, and *Tampa* forming a part of our forces based on Gibraltar, which escorted hundreds of vessels between the Mediterranean and Great Britain. It was while engaged in this duty that the *Tampa* was lost, with all her gallant officers and men, sunk at night in the English Channel by mine or torpedo. Only a short time before Rear Admiral Niblack had commended the *Tampa* in the warmest terms, recalling that it had steamed an average of 3,566 miles a month, being under way more than 50 per cent of the time; had escorted 18 convoys, and had been kept in a state of high efficiency with an excellent ship spirit. This was typical of the service of the Coast Guard cutters in the war zone and of the excellent record made by the Coast Guard while operating with the Navy. I wish to express my appreciation of the hearty cooperation of its officers and men and of the way in which experience demonstrated the wisdom of the legislation which in time of war makes available the addition of this branch to our fighting forces.

It is my pleasure and privilege to express the Treasury's grateful appreciation of the achievements of the service during the war and to commend the officers and men for the splendid record they have written into the Nation's history.

Rescue and salvage.

Like other branches of the public service affected by postwar conditions, the Coast Guard has been compelled to do its work during the past year with a personnel far short of actual requirements. Nevertheless, the aid given to shipping in the face of these difficulties, and others, among which may be mentioned a winter season of more than ordinary severity, has far exceeded that of any former year in the history of the establishment. The value of the vessels (including cargoes) assisted by service stations and cutters during any former year did not exceed \$20,000,000; the value of such property aided during 1920 was somewhat in excess of \$65,000,000. The instances of service performed within the same period were approximately 2,700 and the number of lives saved or persons rescued from peril was 2,417. There was not a single day during the year in which service of some sort was not performed having for its object the saving of life or property or the relief of human distress.

Ice patrol to promote safety at sea.

The patrol of the ice regions in the North Atlantic Ocean, in accordance with the terms of the International Convention for Safety at Sea, which was temporarily suspended for the seasons of 1917 and 1918 on account of military exigencies, was resumed during the past year. The service was rendered by the Coast Guard cutters *Seneca*,

Ossipee, and *Androscoggin*, principally off the Grand Banks and along the trans-Atlantic steamship lane, where, during certain periods, the low visibility, due to rain, fog, and mist, renders floating icebergs a constant menace to navigation. Through the protective work of the cutters, daily reports were made to the Hydrographic Office of the Navy and warnings circulated by wireless for the information of shipping.

Winter cruising.

Winter cruising for the purpose of rendering aid to distressed navigators upon dangerous or storm-swept coasts of the United States, which was omitted for the season of 1918-19 on account of international conditions, was resumed during the year upon order of the President, designating the *Ossipee*, *Androscoggin*, *Gresham*, *Acushnet*, *Seneca*, *Manning*, *Apache*, *Pamlico*, *Seminole*, *Itasca*, and *Yamacraw* for the duty. These vessels, individually and collectively, made a commendable record, the number of persons rescued from peril in the course of the fleet's operations reaching nearly a thousand and the value of property saved (ships and cargoes) reaching far into the millions of dollars. This record was made in spite of a seriously crippled personnel, the cutters having been frequently undermanned, due to the inability of the service to offer attractive inducements for enlistment.

Cruises in northern waters.

During the year an arrangement was entered into between this department, the Navy Department, and the Department of Commerce whereby each department was to assign vessels to perform jointly the customary annual patrol of the waters of the North Pacific Ocean, Bering Sea, and Southeastern Alaska. Four vessels of the Coast Guard (the *Bear*, *Unalga*, *Algonquin*, and *Bothwell*), three vessels of the Navy, and four of the Department of Commerce (contributed by the Coast and Geodetic Survey), were assigned to this duty.

The cruise conducted last year in Alaskan waters was made by the Coast Guard cutters *Unalga* and *Bear*. The first-named vessel sailed in April and the other in May of 1919, and the cruise continued for several months. A notable feature of this cruise was a six weeks' fight made by officers and crew of the *Unalga* in combating a virulent epidemic of the Spanish influenza among the natives at Unalaska, in the Nushagak River district, and elsewhere. In the prosecution of this work the personnel of the *Unalga* were called upon to sacrifice every personal comfort, to risk health, and even seriously to hazard their lives. But for their self-sacrificing endeavors the native population in several localities would practically have been wiped out.

Anchorage and movements of vessels.

In accordance with Title II of the act approved June 15, 1917, providing, in part, that—

Whenever the President by proclamation or Executive order declares a national emergency to exist by reason of actual or threatened war, insurrection, or invasion, or disturbance of the international relations of the United States, the Secretary of the Treasury may make, subject to the approval of the President, rules and regulations governing the anchorage and movement of any vessel, foreign or domestic, in the territorial waters of the United States, may inspect such vessel at any time—

the Secretary of the Treasury continued to exercise jurisdiction over the anchorage and movements of vessels in the harbor of New York and vicinity, in Hampton Roads and the harbors of Norfolk and Newport News, in that portion of the Delaware River lying between the northerly limits of Philadelphia Harbor and the southerly limits of Newcastle, Del., and in the waters of St. Marys River from Point Iroquois on Lake Superior to Point Detour on Lake Huron, except those waters included in the St. Marys Falls Canals, at all of which places rules and regulations had been previously promulgated under authority of the above-mentioned act. With the resumption of peacetime commerce, it has been found necessary to amend the regulations at the various ports to meet the new conditions. The Board on Anchorage and Movements of Vessels, consisting of representatives of the Treasury, War, and Navy Departments, held public hearings at New York, Philadelphia, and Norfolk in order to determine what modifications of the rules and regulations in effect at the respective ports were deemed advisable, and, as a result of these hearings, the regulations have been amended to meet most effectively and satisfactorily the present needs and requirements regarding the anchorage and movements of vessels. The personnel and equipment of the Coast Guard were utilized in the enforcement of the rules and regulations, officers of that service being detailed as captains of the port at New York, Philadelphia, Norfolk, and Sault Ste. Marie.

International yacht races.

Beginning July 15 and concluding July 27, 1920, there were held off the entrance to New York Bay, under the auspices of the New York Yacht Club, the international yacht races in which the British yacht *Shamrock IV* competed with the American yacht *Resolute* for the *America's* cup, the possession of which carries with it the yachting supremacy of the world. Similar races have been held in previous years in the same locality and under the same auspices. These events are of world-wide interest, and to witness them there invariably assembles a large fleet of vessels, bearing thousands of

spectators. Under authority of law the Secretary of Commerce issues suitable regulations to promote the safety of life on navigable waters during regattas and, under the same authority, requests the services of vessels of the Coast Guard to enforce these regulations.

Accordingly, at the request of the Secretary of Commerce, there was assembled a fleet of eight Coast Guard vessels to patrol the international yacht races of 1920. This duty imposed great responsibilities upon the Coast Guard patrol force. They were required to regulate the movements of the numerous vessels of every size and description that gathered to witness each race, so as to prevent accidents that might imperil the lives of the thousands of spectators afloat, and also to regulate those movements so that the competing yachts might have an unobstructed course and that the spectators might receive every proper consideration in their desire to obtain a good view of this important sporting event. It readily will be understood that this task called for excellent organization and the exercise of the best of judgment. The work of the Coast Guard patrol force was performed with entire success and won the commendation of those under whose arrangements the international yacht races of 1920 were conducted.

Coastal communication.

The coastal telephone system has been improved and extended during the year, as the exigencies of the service have required. The utility of this activity of the Coast Guard for the peace-time duties of the service long ago became an established fact, and it more than justified the anticipated advantages to be derived from it as a protective agency of the Government along our coasts during the war.

Aviation.

A Coast Guard aviation station has been located at Morehead City, N. C. The establishment of this station has been accomplished at practically no expense to this department. The buildings and equipment were turned over to the Coast Guard by the Navy Department. The aircraft in use are the Navy H-S flying boats. The application of these aircraft to the problems of saving life and property along the seacoasts and in locating floating derelicts off the coasts is now possible, and experiments to demonstrate further the effectiveness of aircraft for these purposes have been outlined for the employment of this station. It is proposed to establish similar stations as funds become available.

Legislation.

During the year considerable beneficial and constructive legislation affecting the Coast Guard was enacted by Congress, perhaps the

most far-reaching being that contained in the act of May 18, 1920, entitled, "An act to increase the efficiency of the commissioned and enlisted personnel of the Army, Navy, Marine Corps, Coast Guard, Coast and Geodetic Survey, and Public Health Service," providing for increases in pay. It hardly could be expected that the service would immediately reap the benefits afforded by this legislation, but it is hoped that, as industrial and economic conditions throughout the country resume a more normal state, the advantages offered may result in stimulated recruiting.

Retention of the Coast Guard in the Treasury.

The transfer of the Coast Guard from the jurisdiction of the Treasury to the jurisdiction of the Navy has been periodically agitated for many years. The proposal was revived shortly before the Coast Guard was returned to the Treasury under the Executive order of August 28, 1919, and its consideration has been continued since. In the past the Treasury has opposed almost uniformly the enactment of legislation for this purpose and the Congress always has refused to sanction the proposal. In the present consideration of the matter, the views of the Treasury have been made known to the appropriate committees of the Congress. Recent discussions of the subject have brought forth no new material facts which in any way would warrant the Treasury in departing from its position. After very careful consideration of the matter, I am of the firm opinion that the Coast Guard in time of peace has no relation to the Navy and should not be transferred to the Navy, but should remain in the Treasury.

The department is attached to this historic service which has come down through the years with fine traditions and achievements. It has made a noble record under the Treasury. The department's position in this matter, however, is not based upon any selfish reluctance to be relieved of duties it has performed and powers it has exercised for so many years, for, as pointed out elsewhere in this report, the Secretary is willing that services that have no direct relation to the Treasury be released from the department and transferred to other jurisdictions. It is based, on the contrary, upon what is believed to be the best interests of the public service as well as of the Coast Guard.

A brief discussion of the origin and activities of the Coast Guard may serve to show why this establishment should not be transferred to the Navy. The Coast Guard is a consolidation of the old Revenue-Cutter and Life-Saving Services, and as the successor to the Revenue-Cutter Service is older than the Navy and almost as old as the Government itself. It was created in 1790 at the second session of the First Congress, upon the recommendation of Alexander Hamilton, the first Secretary of the Treasury, as the result of the need for the

services of a coast patrol for the enforcement of the customs laws and as an organized armed force for the protection of the seacoast. During its life of 130 years its functions have been increased, and to-day they may be summarized as follows:

1. Protection of the customs revenue.
2. Assistance to customs officers in the performance of their duties.
3. Aid to vessels in distress and the saving of life and property.
4. Destruction or removal of wrecks, derelicts, and other floating dangers to navigation.
5. Medical aid to American vessels engaged in deep-sea fisheries.
6. Enforcement of laws and regulations governing anchorage of vessels in navigable waters.
7. Enforcement of laws relating to quarantine and neutrality.
8. Suppression of mutinies on merchant vessels.
9. Enforcement of navigation and other laws governing merchant vessels and motorboats.
10. Enforcement of law to provide for safety of life on navigable waters during regattas and marine parades.
11. Protection of game and the seal and other fisheries in Alaska, etc.
12. Enforcement of the sponge-fishing law.
13. International ice patrol off the Grand Banks.
14. Service as a part of the Navy in time of war or when the President shall direct.

Many additional tasks fall to the Coast Guard, and it is generally recognized that all departments may call upon it for any special work of a maritime nature which is not specifically assigned or for which resources are not elsewhere obtainable.

From the beginning the Coast Guard has been an invaluable part of the Treasury organization in connection with the collection of the customs revenue and in the administration of the Customs Service. Apart from the humanitarian nature of other important duties of the Coast Guard, it may be stated that the Customs Service has at least an indirect interest in the relief of distressed vessels laden with importations for the United States. Furthermore, it should be said that while nowadays there is little or no smuggling in large cargo lots, it is believed that the very existence of the Coast Guard prevents such smuggling. With the advent of prohibition, it has been found necessary for the Coast Guard to be very vigilant in connection with smuggling by means of small boats. If this service is withdrawn from the Treasury and placed under the control of another jurisdiction where it may disappear as a separate unit or not always be subject to the request of the Treasury for specialized service, it is possible that smuggling might be resumed on a large scale, thereby causing loss to the revenue. In that event it is also likely that

smugglers might be particularly active with respect to violations of the prohibition act, the enforcement of which is imposed upon the Treasury.

It is true that some of the functions of the Coast Guard have no direct relation to the Treasury, but it is also true that such functions have no relation to the Navy. The Coast Guard is not a naval service in any sense, except in time of war, when properly the law provides that it shall be transferred to the jurisdiction of the Secretary of the Navy. The functions of the Coast Guard and those of the Navy normally are fundamentally different. The similarity ends when it is stated that the Navy is a fleet under military discipline and the Coast Guard possesses a fleet under military discipline. The question must be determined, not by the fact that both are floating services, but by the character of their duties. In the judgment of the Treasury there is no more reason to transfer the Coast Guard to the Navy in time of peace than there is to transfer the merchant marine to the Navy in time of peace.

The Coast Guard is an intensive organization and, particularly in its work relating to the conservation of life and property from the perils of the sea, demands special equipment, special training, and special qualifications. Its duties are not of an occasional nature, but call for vigorous prosecution at all times. I believe that they are of such character as to dictate that they remain under the supervision of a civilian department. It is very greatly to be feared that the absorption of the Coast Guard by the Navy in all probability would result eventually in the extinction of essential Coast Guard duties, to the great disadvantage and loss to the Government and the maritime interests of the Nation. It is obvious that the Navy does not need the Coast Guard in time of peace; it is equally obvious that the Treasury does need it in the performance of duties vested in this department by law. It seems clear that the permanent union of the two services would be an anomaly. The Congress is earnestly requested to withhold approval of any legislation designed to effect such a transfer.

In submitting this recommendation, I desire to enter an urgent plea that the Congress grant the authority and appropriations which are necessary to increase the efficiency and to extend the usefulness of the service. It appears to be felt by some proponents of the transfer that the Coast Guard would fare better at the hands of the Congress if placed within the jurisdiction of the Navy Department instead of the Treasury Department. I do not entertain that notion in any degree. I do not believe that the Congress would look with any more favor upon requests for appropriations coming from the Coast Guard as a part of the Navy than from the Coast Guard as a unit in the Treasury. In this spirit I invite attention in the following paragraphs to imperative needs of the service, with the confident

hope of favorable action. The Coast Guard contributes most essential and important service to the welfare of the Nation, accentuated and increased in value at the present time by the great growth of our commerce and merchant marine. Unless its obvious requirements are met in the near future, it can not be expected to fulfill its mission with the same degree of efficiency and effectiveness that has characterized its performances in the past. Its pressing needs consist of suitable recognition of the personnel, appropriations to keep the vessels in perfect condition, provision for additional ships to replace those not worth repairing, and adequate funds for the Coast Guard Academy. The service must be made attractive to men of courage and skill and its vessels and stations must be kept in perfect condition to meet every call of distress from the sea, and it should be noted that its vessels are compelled to go to sea in weather conditions that cause other vessels to seek port. It is an arduous and hazardous service.

Commissioned personnel.

The limited opportunity for advancement in the commissioned personnel grades, due to the comparatively small number of officers in the service, the absence of the higher grades which officers of long years of experience should attain, and the fact that promotions can be made only upon the occurrence of vacancies on the active list, are matters of serious concern. They have a direct bearing on the efficiency of the Coast Guard. These limitations can not fail to arouse some sense of injustice among fine and experienced officers of long service, and they operate especially to the disadvantage of younger men, who are prevented from reaching command rank until well along in life. Provision should be made for adequate periodical advancement in grade regardless of vacancies. This is a matter of the first importance. I earnestly hope that the Congress will recognize this serious obstacle to the improvement of the Coast Guard, and by appropriate legislation provide for promotion among the commissioned grades along lines more nearly parallel to those in the Navy.

Vessels and stations.

It is essential that early steps be taken to provide at least four or five additional vessels of such type and size as will best meet the present and future requirements of the service in rendering aid and protection to the increased and increasing marine commerce of the country. Five vessels are now under contract, and there is promise of their delivery within the next few months, but even these will not supply the deficiency which before long will result from the withdrawal of some of the older vessels from the heavy work of the service for lighter duty. The *Bear*, for example, which has done excellent

service in the Arctic for many years, is very old and should be replaced by a modern vessel better adapted to the present needs and conditions. The physical condition and the equipment of some of the vessels are not satisfactory. These conditions are due to the lack of sufficient funds to keep the vessels in a state of good repair and to provide them with all requisite facilities.

During the past year or so the Coast Guard has been able to obtain from the Navy a number of vessels of the Eagle and subchaser type, but these are not wholly suited to the needs of the service. Vessels adapted to the special work the Coast Guard is called upon to perform should be provided. In some instances they should be larger than the present class of vessels and have greater speed and more comfortable quarters.

Many of the shore stations of the service have reached a state of dilapidation. Repairs of considerable magnitude are absolutely essential in some cases and in others the station buildings will have to be replaced by new ones. It is earnestly hoped that the Congress will make the appropriations needed to relieve these conditions and, in addition, to establish a number of new stations authorized by law but deferred on account of the lack of funds.

Coast Guard Academy.

Steps should be taken without delay to improve conditions at the Coast Guard Academy. A board was recently convened to canvass this matter. It was instructed to present a carefully considered plan for the improvement of buildings and grounds and to suggest the necessary additions to equipment. This academy need not be large but it should be a model of its kind.

CUSTOMS.

Customs receipts largely increased during the fiscal year. They aggregated \$328,633,392, or \$142,391,956 more than in the preceding fiscal year, and \$29,720,157 more than in the fiscal year ended June 30, 1914, immediately prior to the outbreak of the war in Europe. Collections from duties and tonnage, covered into the Treasury, which represent the "official customs receipts" for 1920, amounted to \$323,536,559. This was only \$10,146,886 less than the "official customs receipts" of 1910, the largest collections in any fiscal year in the history of the service.

The number of vessels which entered and cleared foreign was 89,115, as compared with 83,874 during 1919; the entries of merchandise during 1920 numbered 6,061,369, as against 5,061,450 for the preceding fiscal year; and the drawback paid increased

\$12,474,815 during the same period. The removal of many of the war restrictions that had been placed upon transoceanic travel also resulted in a large increase in the number of passengers arriving in the United States as evidenced by 201,038 baggage declarations and \$2,456,565 in head-tax collections, as compared with 95,063 baggage declarations and \$877,776 head tax collected in 1919. The value of imports for 1920, inclusive of Porto Rico, amounted to \$5,238,621,668, an increase of \$2,142,901,600 over that of 1919, while the value of exports, inclusive of Porto Rico, amounted to \$8,111,039,733, an increase of \$878,757,047 over that of 1919. Notwithstanding the large increase in the volume of business transacted, the total expense of conducting the service was \$10,098,808 or \$48,768 less than that of 1919.

By reason of the large collections and the economic administration of the service, the cost of collecting \$1 decreased from \$0.0579 for 1919 to \$0.0307. The enormous volume of business was transacted with a steadily decreasing force of employees. On June 30, 1920, there were 6,633 employees, a reduction of 1,427 from the number employed in 1910, the highest point in the customs business in the history of the Government in the amount of duties collected and, up to that time, in the volume and value of imports.

The enforcement of the Federal prohibition law along the seaboard and the Mexican and Canadian borders imposed an added burden. The service was obliged to handle this burden without sufficient funds. A large number of seizures, arrests, and prosecutions were made in connection with attempts to smuggle intoxicating liquors into this country, and every possible means was taken to stamp out violations of this character; but with the limited force available for searching vessels and patrol work along the seacoast and frontiers it is safe to assume that the quantity of liquors seized is small in comparison with the quantity smuggled into the country. Moreover, the increase in the volume of customs business necessitated the return of a considerable number of employees whose services had been largely devoted to prohibition enforcement work to their regular customs assignment. The need for a larger force and a more adequate equipment for the customs enforcement of the prohibition act is even more urgent than it was last year, and it probably will be necessary to provide for increased customs force throughout the country.

THE MINT SERVICE.

The demands of the country for coins were very great during the fiscal year and imposed a large burden upon the Mint Service. The number of pieces coined is the most accurate measure of its accomplishment. In 1915, when the mints were operated upon the normal

basis of an eight-hour day, the coinage amounted to 148,000,000 pieces; during the year under review the mints made 810,000,000 pieces.

The funds at the disposal of the department for new equipment for the mints have been advantageously utilized. Every modern device available for efficient work has been installed in the coinage mints. This constructive advance has been met by the interested and skillful efforts of the officers and men. A year of creditable service has resulted.

The newly finished building for the New York Assay Office was damaged by an explosion on September 16, 1920. Emergency repairs, immediately made, permitted the business of the office to proceed with but little interruption. As a result of the presence of mind and discipline of the men and the heads of the departments during the crisis of the disaster, no loss of the precious metals stored in the assay office or in process was sustained by the Government. The building was not injured structurally, the damage being confined to the exterior stone facing, ornamental iron grilles, metal window sash, skylights, metal screens, marble finish of lobby, interior doors, and plaster throughout the building. The work of restoration will probably take from four to five months and will cost, it is estimated, \$75,000.

Proposed new mint.

It is recommended that the Congress consider the advisability of establishing a coinage mint in Chicago. A mint in that city would better adjust the facilities of coinage to present business conditions in the country; assist in meeting the demand for coinage, particularly in the Middle West and South; facilitate the distribution of coins to those points; reduce the expense of shipping, the cost of which is now burdensome to the Government and to banks by reason of the remoteness of existing mints from new business centers; and relax the present excessive pressure on the existing mints.

There are three coinage mints, located at Philadelphia, San Francisco, and Denver, the last to be established being that at Denver. The first coinage was issued from the Denver Mint in 1906. The following shows the coinage at that time as compared with the present:

	Pieces.
Coinage of three mints in 1906-----	174, 000, 000
Coinage of the same three mints in 1920-----	810, 000, 000

To produce the latter amount of coin it was necessary to operate the three mints on an overtime basis the greater part of the year. This condition has prevailed for the past three years. Overtime operations and every available improvement in the equipment of

the mints have not kept pace with the increased demands for coinage. It is physically impossible to extend to present business conditions the facilities that were provided 15 years ago. The process of expanding the output of the present mints has reached the utmost limits of safety. Neither men nor machinery can sustain greater pressure. The output of the Philadelphia Mint, even upon an overtime basis much of the year, could readily be absorbed by neighborhood transactions. During the year just closed it has been necessary for the Government to pay the cost of shipping coins from San Francisco and Denver to New York and other eastern points. Should Congress authorize the establishment of a mint at Chicago, the business interests of the entire country would be served. It is further suggested that the vaults of a mint at Chicago could be used for the storage of Government funds previously in the custody of the sub-treasury now discontinued.

BUREAU OF ENGRAVING AND PRINTING.

The bureau delivered 402,711,759 sheets of finished work during the year, embracing currency, permanent Victory Liberty loan gold notes and bonds, certificates of indebtedness, farm-loan bonds, war-savings stamps and thrift stamps, and postage and internal-revenue stamps. The value of the delivered sheets expressed in money aggregated the remarkable sum of \$27,738,032,147.91. The work of the bureau has been carried on under extreme pressure, and it has been with difficulty, owing to the large demands, that the currency and bond requirements of the Government have been met. The work of supplying permanent Liberty loan bonds of the various issues has now progressed to the stage that only the fourth Liberty loan issue is to be replaced, and the work on this issue is well under way and will be finished during the fiscal year 1921. The replacement issue of bonds for which the temporary bonds are being exchanged is necessarily slow, owing to the fact that only one bond is secured from a plate printed impression. During the present fiscal year 17,760,682 sheets of these large permanent bonds were produced, 8,000 sheets of 2 per cent and 4 per cent United States registered bonds, and 1,889,997 sheets of Victory Liberty loan gold notes. It has been necessary to operate three shifts of employees throughout the entire year.

It became necessary during the year to install an electrolytic plant in the engraving division in order to supply enough engraved plates to keep the plate-printing division in steady operation. The engraving division produced 10,367 engraved plates during the year by the usual methods. The installation of this plant was made under the supervision and direction of representatives of the Bureau of Stand-

ards. A maximum output of 20 plates in a given day has been reached. At the present time one of the power-press sections of the bureau consisting of 27 presses is equipped and supplied with plates made by the method of electro deposition, and the results obtained meet fully all expectations. The impressions from these plates are found to be superior in beauty and finish to that of the regular transferred steel plates, and the life of the plate compares favorably with that of the older method. The photolithographic section has been enlarged and reorganized with better equipment and a much improved service, and modern lithographic presses have been installed and the output increased without a large corresponding increase in cost.

PUBLIC BUILDINGS.

The first so-called omnibus public-building act of any magnitude was enacted into law in 1902, and contained a section authorizing the remodeling, enlargement, and extension of certain specified Federal buildings which had become congested by reason of the growth of the public service, and from other causes. Each succeeding public-building act has contained a similar section. There has been no general public-building legislation since 1913, the act which passed the House of Representatives in 1916 having failed of passage in the Senate, and during this interval there has been no possibility of affording relief from congestion in public buildings, although there has been a wonderful growth in the public business and a corresponding increase in the number of employees to handle it.

In the post-office workrooms an average per employee of 100 square feet, or a space 10 feet square, to accommodate the employee and his furniture, including aisle space, is considered ideal. The Postmaster General has reported that where this space is reduced below 60 square feet per employee there is a resulting loss in efficiency which increases in proportion as the space is diminished. There is a large number of post-office workrooms in Federal buildings in which the space per employee is less than 60 square feet; in some of them as small as 24 square feet per employee. These conditions have been brought to the attention of the proper committees.

Because of the congestion in public buildings it is not uncommon to find branches of the public service occupying rented quarters in cities in which there are large Federal buildings. Quite independently of the action Congress may conclude to take with respect to authorizing the construction of additional Federal buildings, steps should be taken to protect the present investment of the Government in its Federal buildings by improving and adapting the buildings to the increased activities of the public service. I therefore add my

recommendation to that of the Postmaster General that legislation be enacted which will furnish such relief as the exigencies of the situation may require.

Suspended building operations.

With the view of conserving the Government's resources, this department ordered the postponement during the war of the letting of contracts for the construction of public buildings in all but very urgent cases. About 150 buildings were affected by this order. It was intended to resume building operations as soon as hostilities ceased. The order for the resumption of building operations was given within a few days after the armistice was signed, but it was found when bids were taken that construction costs had increased meanwhile to such an extent that the buildings could not be constructed within the respective limits of cost therefor fixed by the Congress. Sites have been acquired, plans prepared, and appropriations made in full or in part for most of the buildings referred to, but there the matter rests until the Congress increases the limits of costs for such of the buildings as it desires to have constructed.

National archives building.

For several successive years my predecessors have brought to the attention of the Congress the need for a national archives building. This need is emphasized more than ever now that records of the war have been brought to this city from overseas and from various points in this country, and added to the vast accumulation of papers of permanent or historical value now insecurely cared for by the several executive departments and independent establishments of the Government. While there appears to be an abundance of space for office purposes in temporary buildings constructed by the Government to meet war-time conditions, no fireproof space is available for the care of records, the destruction of which would cause great loss to the Government and much embarrassment and delay to all concerned in the transaction of the public business.

Confronted on the one hand by the great need for a national archives building and on the other hand with the abnormally high cost of construction, this department submitted to the Congress during the period covered by this report for an appropriation sufficient to acquire a site and construct so much only of the contemplated building as would be used for storage purposes. It is proposed to construct this portion of reinforced concrete, and to leave its exterior facing to be placed when building costs reach a lower level and demands upon the Government's resources have become less pressing.

Contractors' war claims.

The legislation which was enacted in the fall of 1919 for the relief of contractors and subcontractors for the construction, etc., of Federal buildings, whose contracts were based on bids submitted prior to the entrance of the United States into the war, but completed after April 6, 1917, restricted the claims which might be presented to those arising from three causes, viz, increased cost of labor and materials due to war conditions, losses due to delays caused by the United States Priority Board or other governmental activities, and to commandeering by the United States Government of plants or materials. The scope of the relief afforded by this act was enlarged by amendatory legislation contained in the deficiency appropriation act of March 6, 1920, so as to include any and all loss (exclusive of profits) sustained by contractors and subcontractors in fulfilling their contracts due, in the opinion of the Secretary of the Treasury, to war conditions.

The settlement of these claims is progressing as rapidly as the nature of the examinations required and the sufficiency of the sustaining proofs will permit.

Supervising Architect.

The work of the Supervising Architect is chiefly administrative in character. His office supervises not only the professional and technical work involved in the drawing of plans for the construction, repair, and remodeling of public buildings and the overseeing of such construction work, but also the maintenance and operation of the great public building system of the United States. The personnel of the office should include men of high attainments in the architectural, engineering, and related professional fields. It should be coordinated and organized under the leadership of a trained executive in the person of the head of the office. The present title of the chief seems to suggest that the occupant must be an architect and to indicate that professional skill is the exclusive requirement; but the fact is that primarily and essentially the position demands executive ability of high order. The office is now vacant and the acting head, who is not an architect and who for several years has efficiently and effectively performed the necessary duties, would have been appointed Supervising Architect long ago had it not been that such appointment did not seem to be consistent with the title of the office. In view of the nature of the functions and responsibilities of the Supervising Architect, it is believed that the title of the office should be changed to that of Commissioner of Public Buildings. Such change would not prevent the appointment of an architect or a man trained in another profession, on the one hand, and would not

restrict it to any one technical class, on the other. It is respectfully recommended that the title of the office be changed accordingly.

THE INTER-AMERICAN HIGH COMMISSION.

The Second Pan American Financial Conference was held in Washington from January 19 to 24, 1920. Upon invitation of the President, the ministers of finance and other representatives of Mexico and the Central and South American countries attended the conference to discuss with the Secretary of the Treasury the financial and commercial problems of the American Republics. The International High Commission was charged with the preparation of the plans and arrangements for the conference. A staff of legal and economic experts collected and analyzed material of interest to the delegates and prepared reports on the financial and economic conditions and the public debt of the Latin-American Republics, as well as reports on maritime and land transportation and cable and radiotelegraphic communication between those countries and the United States. The material thus compiled served as a basis for authoritative information during the conference for the use of the official representatives and 300 financial and industrial leaders of the United States invited to confer with the foreign delegates. A review of the purposes and achievements of the Second Pan American Financial Conference is contained in my report to the President.

In order more definitely to indicate the constituency and sphere of work of the International High Commission, the Second Pan American Financial Conference changed, by resolution adopted on January 23, 1920, the name of the commission to "Inter-American High Commission." In public act 238 of the Sixty-sixth Congress the recommendation of the change of name was given effect in the United States, beginning July 1, 1920.

Although the executive council of the commission and the staff of the United States section were for the greater part of the year engaged in the preparations for the financial conference, careful attention was given to the ordinary tasks of the commission. One of the most important matters with which the commission has had to deal is the adoption of the International Trade-Mark Convention of 1910 and the establishment of two registration bureaus provided for by the convention—one bureau at Havana and the other at Rio de Janeiro. The bureau at Havana was opened in August, 1919, and is in actual operation. The Congress, by the act approved March 19, 1920, has given effect to certain provisions of the convention enabling the Commissioner of Patents to open a register for trade-marks transmitted to him by the Havana bureau. Efforts are being made by the commission to secure the ratification by the requisite number

of countries of the southern group in order to establish the bureau at Rio de Janeiro. Meanwhile arrangements have been made whereby all the ratifying countries may be served by the Havana bureau. The successful realization of the purposes of the convention will confer exclusive benefits on all the industries of this country which have occasion to protect their good will.

Another matter which engaged the commission's attention during the past year was the ratification of the commercial travelers' convention proposed at Buenos Aires in 1916. The convention contemplates the substitution of a national fee for all local license fees paid in the Provinces of some American countries. It further provides for the free admission of samples without value, and for the admission of those with value under bond for payment of duty in case they are not withdrawn. The convention has been ratified by Uruguay, Guatemala, Salvador, Panama, Venezuela, and Paraguay, and has been signed by Ecuador, Nicaragua, and Argentina. Other countries have approved the treaty in principle.

The principle of arbitration of commercial disputes between citizens of the United States and citizens of other American countries has made progress. It has occupied a prominent and permanent place in the program of the commission. The purpose is to facilitate the settlement, on a basis which would inspire complete confidence in our manufacturers and merchants, of any commercial disputes which might arise between them and their customers in Latin American countries. The first agreement of this character was entered into between the United States Chamber of Commerce and the National Chamber of Commerce of Argentina on April 10, 1916, and similar agreements have since been made between the United States Chamber of Commerce and the National Chambers of Commerce of Uruguay, Ecuador, Panama, Guatemala, Paraguay, Peru, Venezuela, and Brazil.

The commission has continued its interest in the subject of greater uniformity of the classification of merchandise for statistical purposes to permit of more accurate comparison of statistics of export and import trade. The basis of this classification is the Brussels convention of 1913 on the uniformity of classification which was adopted by the commission at Buenos Aires in 1916. The uniform system has been adopted by Salvador, Guatemala, Honduras, Bolivia, Panama, Paraguay, and Peru, and is favorably considered by several other countries.

In the field of uniformity of law, the efforts to diminish the diversity between our legislation and that of the several Latin American Republics with respect to checks and bills of exchange have met with considerable success. The basis for uniformity on this point are The

Hague rules adopted at the international convention at The Hague in 1912, which were modified at the meeting of the commission at Buenos Aires. Venezuela embodied in its new commercial code the modified form of the uniform rules on bills of exchange, and the legislatures of four other countries have before them, in various stages of progress, analogous revisions of their commercial code.

The executive council intends to direct its efforts to secure the adoption of uniform warehouse receipts, conditional sales and bills of lading acts. In the uniform fiscal and customs regulations a number of minor changes have been made, the cumulative effect of which is the facilitation of the course of international commerce. As more maritime transportation facilities are made available for the growing volume of our trade with Central and South America and the West Indies, the significance of these modifications will be discernible in increasing degree by each commercial community.

In addition to dealing with the subjects designated by the First Pan American Financial Conference for special treatment, and the execution of the program adopted at the Buenos Aires meeting, the commission has been charged by the Second Pan American Financial Conference with the investigation of new questions, including an analysis of the laws and regulations governing the organization of corporations and the treatment of foreign corporations in the various American Republics, the study of methods of avoiding the simultaneous double taxation of individuals and corporations in the various American countries, and the consideration of the creation of an inter-American tribunal for the adjustment of questions of a commercial or financial nature involving two or more countries.

In view of the growing importance of the commission's work, it is recommended that the sum of \$25,000 heretofore appropriated for the expenses of the United States section be increased to \$30,000 for the next fiscal year.

GENERAL SUPPLY COMMITTEE.

During the past year the General Supply Committee has rendered an important service, not only in contracting for supplies but also in the handling of all surplus materials and equipment falling into disuse in the District of Columbia, as well as maintaining a record of, and acting in an informative capacity with reference to, surplus articles located throughout the country.

Experience has demonstrated that the functions of the General Supply Committee should be expanded so as to include the purchase, storage, and distribution by the committee of all common supplies used by two or more executive departments or independent establish-

ments of the Government in the District of Columbia. It would seem proper to make the committee a central bureau in some department other than the Treasury, as suggested elsewhere in this report. Such bureau should consist of three divisions: (1) The division of contract, to handle the present contract duties of the General Supply Committee; (2) the division of purchase; (3) the division of stores, which would include the present division of property transfer of the committee. A bureau of this character would be able to buy at the most opportune time direct from manufacturers, and in quantities which would insure minimum prices. Competition would be broadened by the consolidation of quantities and the submission of proposals for specified quantities for delivery at a given time instead of a great number of individual orders for indefinite quantities covering a stated period. A suitable warehouse should be provided, stocked with all articles in common use for distribution to the Government service in the District of Columbia and to such points outside of the District of Columbia for use by the various field services desiring to obtain their supplies from the bureau. The creation of a central warehouse from which common supplies could be promptly furnished the services would obviate the necessity for open-market and exigency purchases, which, in the aggregate, are large and nearly always at prices much higher than if secured by a central agency.

The records of the Contracting Division of the General Supply Committee for the fiscal year 1920 show that the reported purchases made by executive departments and independent establishments of the Government under contracts negotiated by the Secretary of the Treasury through the committee amounted to \$7,627,064.82. Because certain establishments are not required by law to report purchases and others have failed to report fully, the total amount of purchases for the year probably exceeded \$10,000,000.

The Division of Property Transfer of the committee, under the provisions of the Executive order of December 3, 1918, and the act of February 25, 1919, serves as a clearing house for surplus articles of the Government agencies in the District of Columbia. It takes over all surplus material, supplies, and equipment; classifies, warehouses, repairs, and reissues them from time to time to the Federal Government service and the municipal government of the District of Columbia as their needs arise. The division received during the fiscal year materials to the value of \$1,339,759.60 and had on hand July 1, 1919, materials valued at \$476,753.20. The amount issued during the year was \$760,355.74. This includes \$133,913.72, or 17 $\frac{2}{3}$ per cent, as discounts allowed for usage. The invoice value of material, supplies, and equipment condemned as unserviceable and unfit for further Government use was \$36,026.20. The total net proceeds from the sale

of this material at public auction amounted to \$17,928.37. The invoice value of unissued supplies was \$1,020,130.86 on June 30, 1920.

In order that the executive agencies of the Government might utilize existing surplus materials, supplies, and equipment falling into disuse throughout the United States, as well as in the District of Columbia, because of the cessation of war activities, Congress, by section 5 of the deficiency act approved July 11, 1919, required the heads of such agencies to ascertain whether such surplus existed before purchases were made from commercial dealers. On August 27, 1919, the President issued an Executive order which designated the General Supply Committee as the central agency of information for this purpose, simplifying the procedure and consolidating the data for the service of administrative officers. Reports of surplus are submitted to the General Supply Committee by the various departments. This information is compiled on card records and made instantly available for reference. Under the Executive order administrative officers, before making purchase, are required to consult the General Supply Committee, which immediately furnishes information as to the location of existing surplus. At the date of this report the records of the Division of Property Transfer of the committee show 19,427 separate items listed. The quantities of individual items reported surplus are in many cases very large.

The temporary isolated buildings used for the storage of surplus property received under the provisions of the Executive order of December 3, 1918, are flimsy of construction, and a dangerous risk from fire and theft. Economical and efficient administration is rendered difficult. Rapid deterioration of these structures add to the present cost of operation, and will render them unfit for the housing of valuable Government property unless considerable sums are expended from time to time. The committee is greatly in need of suitable warehouse facilities.

CHECKING ACCOUNTS OF GOVERNMENT CORPORATIONS AND RAILROAD ADMINISTRATION MAINTAINED WITH TREASURER OF THE UNITED STATES.

The United States Shipping Board Emergency Fleet Corporation, the United States Housing Corporation, the War Finance Corporation, the United States Grain Corporation, the Russian Bureau of the War Trade Board, the several Federal land banks, and the Railroad Administration have maintained checking balances with the Treasurer of the United States in the manner outlined in previous annual reports of the Secretary of the Treasury.

The following table shows the amount of checks drawn by these agencies and paid by the Treasurer from the dates of the estab-

ishment of the accounts to October 31, 1920, and the balances on deposit with the Treasurer on the latter date:

	Checks paid by the Treasurer of the United States.	Dates.		Balances with the Treasurer of the United States Oct. 31, 1920.
		From—	To—	
Emergency Fleet Corporation.....	\$5,964,931,879.22	Feb. 28, 1918	Oct. 31, 1920	\$83,939,466.33
United States Housing Corporation..	135,282,058.24	July 27, 1918do.....	2,959,416.39
War Finance Corporation.....	2,997,964,687.63	June 2, 1918do.....	371,809,520.05
United States Grain Corporation.....	901,967,229.41	Oct. 31, 1918do.....	32,000,000.00
Russian Bureau of the War Trade Board.....	13,333,773.99	Nov. 30, 1918	Sept. 28, 1920	(¹)
Federal land banks.....	15,313,261.31	June 2, 1920	Oct. 31, 1920	1,359,950.61
Railroad Administration.....	1,811,786,554.72	Apr. 13, 1918do.....	28,774,524.79

¹ Closed Sept. 28, 1920.

At the request of the Director General of Railroads, the Treasurer of the United States was designated as his agency for the payment of the principal and interest of certain certificates of indebtedness issued in connection with Federal control of the roads described in the annual report for 1919. The Treasurer has paid these directly and through the Federal reserve banks. The Railroad Administration established a credit of \$288,526,150.13 with the Treasurer. Payments amounted to \$288,399,222.46. The balance, \$126,927.67, was returned to the Director General on February 19, 1920.

The total payments made by the Treasurer for these Government corporations and the Railroad Administration to October 31, 1920, were \$12,128,978,666.98.

The plans evolved by the Treasury for handling the accounts and disbursements of these agencies have been operated to the entire satisfaction of all concerned. The funds have been assured absolute security, and appropriated moneys running into large amounts have not been withdrawn from the Treasury until needed to pay obligations of the Government, thus reducing the amount of Government borrowings, with the consequent saving in interest charges.

HANDLING OF GOVERNMENT FUNDS BY DISBURSING OFFICERS.

The exigencies growing out of the enormous payments which the Government has been required to make on account of the war have necessitated revision of some of the regulations of long standing relative to the handling of public funds by Government disbursing agents. With a view to meet this situation Department Circular No. 195 (Exhibit 88, p. 561) was issued on June 18, 1920, superseding Department Circular No. 102, dated December 7, 1906, as amended. It was the aim of the department in promulgating this circular to throw the proper safeguards around the handling of public moneys by Government agents and to prevent excessive

holdings of cash by disbursing officers. As the Treasury has been a heavy borrower of funds to meet its current needs, the loss on account of interest on idle funds is obvious. On the other hand, it has been necessary to keep in mind the requirements of all departments and to insure the prompt payment of public creditors. It is believed that Treasury Department Circular No. 195 establishes a liberal policy in matters of detail and at the same time safeguards and reduces to a minimum the amount of public moneys in the hands of disbursing agents.

PROVISION FOR GOVERNMENT DISBURSEMENTS IN THE PHILIPPINE ISLANDS.

Under the provisions of Treasury Department Circular 194, dated June 18, 1920 (Exhibit 89, p. 565), all balances standing on the books of the treasury of the Philippine Islands at the close of business on September 30, 1920, to the credit of United States disbursing officers were transferred to the official credit of such disbursing officers with the Treasurer of the United States. Disbursing officers stationed in the Philippine Islands were directed, beginning October 1, 1920, to draw checks on the Treasurer of the United States for disbursements in the Philippine Islands, the checks to bear the restriction:

In current funds, at par, but only at the treasury of the Philippine Islands, Manila, P. I.

This plan is in accordance with the scheme under which Government disbursing officers in the continental United States carry their balances with the Treasurer of the United States, instead of with local depositaries. It obviates the necessity of maintaining large cash balances with the treasury of the Philippine Islands for the credit of each disbursing officer. It is now necessary to maintain only a cash balance in the Treasurer's account sufficient to meet the checks of disbursing officers drawn on the Treasurer of the United States which are being presented for payment. Arrangements have been made whereby the treasury of the Philippine Islands can secure restoration of the Treasurer's balance by cable when additional funds are needed to meet current payments. The reduction in the cash balance maintained with the treasury of the Philippine Islands serves to reduce the aggregate amount of Government balances with depositaries, with a consequent saving in interest.

NEW CURRENCY DESIGNS.

The Congress was advised in the Annual Report of the Secretary of the Treasury for 1919 of the adoption of a distinctive characteristic for each denomination of all forms of paper currency. De-

nominal portraits were prescribed for this purpose. In February, 1920, it was decided to revise other features of the designs in order to insure the highest possible degree of safety in the issues and to promote economy in printing. The latter consideration is quite important, not only from the standpoint of expense, but also from that of production. The greatly increased demands for currency have thrown an unprecedented strain upon the Bureau of Engraving and Printing. It has not been possible to produce currency in sufficient quantities to supply the demand and the result is that the condition of the currency in circulation is not satisfactory. A committee, consisting of the Commissioner of the Public Debt, the Chief of the Secret Service, and the Chief of the Engraving Division of the Bureau of Engraving and Printing, was appointed to study the subject. The committee will consider designs submitted by the Director of the Bureau of Engraving and Printing and will give particular attention to the protective features of such designs and of distinctive paper. While the committee has not yet presented its report, it may be stated that the new designs will include the denominational portraits adopted a year ago and, in addition, distinctive backs for each denomination of all issues. The legends required by law are to be placed on the face of the notes and not on the back. In addition to the usual safeguards in the way of denominational marks, lathe and other engraved work, denominations will be indicated in large colored numerals.

TREASURY ORGANIZATION.

The Treasury has endeavored to perfect its scheme of organization during the year by such changes and improvements as were possible under existing law. The Bureau of Internal Revenue, the Bureau of War Risk Insurance, the Public Health Service, and other individual units have been organized or reorganized to meet added responsibilities. During the fiscal year efforts were made to meet the situation in the fiscal bureaus and divisions where the work has so greatly increased and where it was apparent that the prewar machinery was not entirely adequate for permanent purposes. The great growth of these activities required the creation of additional coordinating and supervisory organization. This was brought about by the establishment of the offices of Commissioner of the Public Debt and Commissioner of Accounts and Deposits, and the coordination and supervision of the activities of the several auditors under the administrative control of the Comptroller of the Treasury. These three supervisory officers function under the immediate direction of the fiscal Assistant Secretary. They are the supervisory intermediaries between the fiscal Assistant Secretary and the bureaus and divisions concerned. The

arrangement has not only relieved the fiscal Assistant Secretary of many details and left him free to devote more time to the larger problems of administration, but it has also accomplished a logical coordination of related activities and the elimination of duplicated work. This reorganization concerns three fundamental operations of the fiscal service: (1) Transactions in the public debt, including the issue, exchange, conversion, and redemption of securities; (2) the receipts and disbursements of the Government, including the issue of warrants, the payment of warrants and checks, and the deposits of the public funds; and (3) the auditing of accounts.

Commissioner of the Public Debt.

In the very beginning of the war the Secretary of the Treasury realized that the public-debt operations of the Government would be of such magnitude that it would be utterly impossible to handle the entire matter from Washington. It was necessary that the machinery be decentralized as far as practicable. To prevent inevitable congestion in the Treasury the 12 Federal reserve banks, as fiscal agents of the Government, were made the headquarters of their respective districts for the handling of subscriptions to the several loans, the delivery of securities against payments, and the conduct of transactions in securities subsequent to their original delivery. Each bank constructed the requisite machinery to handle these operations throughout its district. This use of the Federal reserve banks as fiscal agents removed from the Treasury direct connection with original subscriptions, changed the procedure with respect to subsequent transactions, and eliminated much of the established routine. An effective field machinery to conduct these operations was thus created.

After the completion of the Victory Liberty loan, the last of the great popular war loans, the department gave its attention to the perfection of the permanent organization in Washington to handle transactions in the public debt. The branches of the Treasury immediately concerned in the issue, exchange, conversion, and redemption of Government securities and the payment of interest, together with the large bookkeeping operations connected with these activities, are the Division of Loans and Currency and the Office of the Register. The war has thrown a great burden upon these agencies. The public debt has increased from the neighborhood of \$1,000,000,000 to more than \$24,000,000,000, and at one period during the war it exceeded \$26,000,000,000. The number of employees in the Division of Loans and Currency before the war was 84; the number on September 30, 1920, was 2,275. The number of employees in the Reg-

ister's Office before the war was 21; the number on September 30, 1920, was 962. The increase in the public debt and the increase in the personnel serve to indicate the growth of the undertaking and the magnitude of the work involved.

The two offices mentioned, by mutual agreement and with the Secretary's approval, had consolidated much procedure and eliminated much duplication during the war. The Division of Loans and Currency controlled the issues of securities, although their distribution to subscribers and many subsequent transactions were made at the Federal reserve banks. Retired securities were received by the division and subjected to examination before being delivered to the register. A section of accounts in the division reflected the transactions in the public debt. The register's contact with transactions was remote, but canceled securities finally reached him. It was clear that the existing organization could not continue permanently.

To insure appropriate controls over issues and retirements, to avoid duplication in effort, and to provide for proper administration of the public-debt service the office of Commissioner of the Public Debt was created and a commissioner appointed in November, 1919. He was given administrative supervision, under the general direction of the Fiscal Assistant Secretary, of all transactions affecting the public debt. He was charged with the coordination and supervision of the Division of Loans and Currency, the Office of the Register of the Treasury, and the Division of Public Debt Accounts and Audit, which was created in January, 1920, as a result of this reorganization. Subsequently the audit section of the Division of Loans and Currency was transferred to and consolidated with the register's force. The unit in the register's office conducting the examination of registered bonds and notes issued by the Division of Loans and Currency was transferred to the Division of Loans and Currency and established as a final examination unit. The same check over registered issues remains.

The Division of Loans and Currency is now charged with all issues of securities, whether against paid subscriptions or against other securities surrendered. The Register of the Treasury is charged with the receipt from the Division of Loans and Currency, the Federal reserve banks, the Treasurer of the United States, and the Postmaster General of all securities canceled for any purpose whatever. The Division of Public Debt Accounts and Audit is charged with the controlling accounts of all public-debt transactions performed by the Division of Loans and Currency, the Register of the Treasury, and the Federal reserve banks, as well as those performed by the Treasurer of the United States and the Postmaster General. An administrative

audit has been established under the Commissioner of the Public Debt to insure accuracy of operations and the proper accounting for securities.

A complete organization has thus been erected with proper checks and safeguards in the Division of Loans and Currency for handling issues, maintaining registered accounts, and paying the interest thereon; in the office of the register for receiving and verifying paid and otherwise canceled securities, including interest coupons; and in the Division of Public Debt Accounts and Audit for recording public-debt transactions and bringing the various operating agencies into proper relation.

This new plan of organization has resulted in economy and in increasing the efficiency of the services concerned. The Commissioner of the Public Debt, by having supervision over these related activities, has eliminated much duplication of work in the public-debt transactions. To insure the permanence of this reorganization of the public-debt work the office of the Register of the Treasury, now established by law as a bureau, should be changed to a division in the Secretary's office. The annual estimates submitted for the next fiscal year contemplate the continuance of this new plan to meet greatly increased duties and responsibilities. It is hoped that it will receive the sanction of the Congress.

Commissioner of Accounts and Deposits.

The Office of Commissioner of Accounts and Deposits was created in January, 1920, on account of the large increase in the accounting transactions of the Treasury in connection with receipts and expenditures and the deposit of public funds throughout the country. The commissioner, under the Fiscal Assistant Secretary, was given administrative supervision over the Division of Bookkeeping and Warrants and the Division of Public Moneys and their relations to the office of the Treasurer of the United States. He was later given supervisory direction over the Division of Deposits which was created on May 19, 1920, as a part of this reorganization. The commissioner likewise was given control of all accounts of investments of the Government and was made responsible for the proper custody with the Treasurer of the United States, the Assistant Treasurers of the United States, and the Federal reserve banks of all investments and securities for which the Secretary is responsible, other than those related to the public-debt operations. On August 27, 1920, the work formerly performed in the Division of Public Moneys relating to the covering of moneys into the Treasury was transferred to the Division of Bookkeeping and Warrants, and the employees engaged upon these duties were detailed to the latter division. This eliminated

duplication of work and coordinated all aspects of this particular activity within the Division of Bookkeeping and Warrants.

The commissioner has made much progress in coordinating, simplifying, and expediting the interrelated work of the divisions under his supervision. In the absence of a budget system the Treasury has been handicapped, particularly during the war and since, by the lack of information with respect to prospective Government expenditures. It has been necessary for the department to make the shrewdest guess possible in the circumstances and to formulate plans accordingly. The coordination of these accounting and bookkeeping offices dealing with receipts and disbursements has made it possible for the Treasury to assemble the most trustworthy data obtainable upon which to base its estimates.

The accounting offices.

In order to obtain more expeditious auditing results and to coordinate the work of the accounting offices as far as possible under existing law, the Secretary, on October 25, 1918, placed all of the auditing offices under the administrative supervision and direction of the Comptroller of the Treasury. The comptroller is the chief accounting officer of the Government and has the power to revise any settlement made by an auditor. The auditors must construe the statutes in the first instance and then apply that construction which is approved by the comptroller. The latter may direct an officer forthwith to settle any account pending before the auditor, but with this statutory power over the settlement of accounts, the comptroller, previous to the order of the Secretary mentioned, had no administrative control over the auditing offices. The war greatly increased the work of these offices and it was necessary to coordinate their activities under the control of a responsible accounting officer. This was as far as the department was able to go without additional authority of law. In exercising this administrative power the comptroller has accomplished definite results in the way of expediting much important work and simplifying complicated methods.

The present organization consists of six segregated auditing bureaus, unrelated one to the other except by such coordination as the comptroller has been able to bring about under the Secretary's order. There is no question as to the pressing need of remodeling the organization and by law placing the direct administrative supervision over all accounting offices in the hands of one central authority. This requires the consolidation of the accounting offices into a single unit. It would be accomplished under the budget scheme. If unfortunately there should be any delay in the creation of a budgetary system, there should be no postponement of the reorganization of

the accounting offices. It is sincerely hoped that the Congress will authorize this reform.

Audit of Army foreign accounts.

Under the plan of administrative control at present exercised by the Comptroller of the Treasury, the audit of the foreign-service accounts of the Army has been completed for the pay periods prior to March 1, 1920, embracing such accounts as were rendered to the Treasury prior to July 1, 1920. Accounts arising and received since those dates will be absorbed in the routine work of the office of Auditor for the War Department, the Foreign Service Division of that office having been abolished on October 1, 1920. The supervision which brought this result was begun July 1, 1920. During the following three months 1,749 accounts were examined and disposed of, as against 5,864 for the three prior fiscal years, covering a working period of 30 months. The relative accomplishment is thus seen to be in the proportion of 1,749 to 586, the latter being the average number of accounts settled in previous periods of equal length. The total achievement in the audit of foreign accounts by working periods, number of accounts received and settled, and amounts involved in settlements, is shown by the following figures:

Working period.	Accounts received.	Accounts settled.	Amounts audited.
1918.....	1,058	184	\$7,385,032.94
1919.....	2,594	2,240	341,470,613.15
1920.....	3,889	3,440	843,895,962.51
July, August, and September, 1920.....	72	1,749	483,852,862.87
Total.....	7,613	7,613	1,676,584,471.47

SALARIES.

The attention of the Congress is invited to the pressing need of the readjustment of the salaries of Government officers and employees. The great business of the Federal Government has grown in magnitude through increased and increasing activities, particularly as a result of the war. No one will dispute the fact that the Government should pay a living wage to every employee and that the amount should be in due relation to the value of the services rendered. If the business of the departments is to proceed along efficient and economical lines the salaries in the public service and the opportunities for promotion must be sufficient to offer a career to men and women of ability. In many of the supervisory grades particularly, the compensation paid is unattractive and far below the standards of private enterprise. It is of the highest importance that the Government secure and retain in certain positions of great re-

sponsibility individuals of the highest integrity, of wide experience, and of exceptionally ability. The public business in higher degree even than private enterprise needs the service of persons of talent. If it is not available the people's interests will suffer. The Government need not pay salaries as high as those given in many industrial establishments, but it should pay enough to retain able and experienced servants. It should pay enough to enable them to live decently, to save something, and to work without undue apprehension as to the future of their families. Democracy for us is the best form of government, but it is a difficult one. Its performance will depend in no small measure on the quality of its administrators. If these are mediocre our democracy, it is true, is not likely to fail, but its performances will probably be below the high standard to which it aspires and which it should set.

The question of the readjustment of salaries and the reclassification of positions is a very large one. It involves the consideration of the Government service as a whole, as well as the standards of pay in private life. In the circumstances the Treasury, of course, has been unable to make any special study of the matter and has no concrete suggestions to offer. It has cooperated with the Joint Commission on the Reclassification of Salaries, created by the Congress, in rendering such assistance as was possible. In response to the request of the Chief of the Bureau of Efficiency, it has likewise placed information respecting salaries and employments in this department at the disposal of that bureau.

In the estimates submitted for the next fiscal year the department has not undertaken to make a general revision of the salary scale. That matter already is under consideration by the Congress. Recommendations have been submitted, however, for increases in some salaries where it was thought such increases were imperatively necessary. It may be that in any general readjustment of salaries these increases should be greater. Unquestionably there are other salaries which should be increased, but the determination of the amount, it was felt, should await the standardization and reclassification that the Congress plans to make. The present pay rolls are haphazard and clearly need revision. That is particularly true of many statutory salaries. It is earnestly recommended that the Congress act upon this important question at the present session.

UNDERSECRETARY OF THE TREASURY.

Two additional Assistant Secretaries of the Treasury, of temporary tenure, were authorized in the urgent deficiency act approved October 6, 1917. These positions will continue until the close of the war and six months thereafter. It is respectfully recommended that,

in lieu of the two additional Assistant Secretaries, there be created, beginning July 1, 1921, the position of Undersecretary of the Treasury, at \$10,000 per annum.

The duties and responsibilities of the Treasury have been increased manyfold as a result of the war. This department is chief heir to the burdens growing out of the war. Taxes are greater than ever before, and the public debt is more than 24 times the debt before the war. Every function and activity of the Treasury has grown in magnitude and in importance. To perform the duties effectively and efficiently the Secretary of the Treasury must have the help of men who are executives of exceptional ability. It is believed that after the close of the current fiscal year it will be possible for the Secretary adequately to supervise the bureaus and the divisions of the department through three Assistant Secretaries, provided the office of Undersecretary is created. The number of Assistant Secretaries may be decreased by one if the Congress authorizes the transfer of the Bureau of War Risk Insurance, Public Health Service, the Office of the Supervising Architect, the General Supply Committee, and the Prohibition Unit from the Treasury as recommended below.

The functions of an Undersecretary of the Treasury, who should be appointed by the President, by and with the advice and consent of the Senate, would be to serve as chief adviser to the Secretary in matters of fiscal policy and to assume supervision of the budget if that function is committed to the Treasury. The Secretary of the Treasury will need the services of an assistant who will specialize in matters of financial policy and who will be able to devote his undivided time to such questions uninterrupted by administrative control of present bureaus and divisions. The supervision of the latter is likewise a matter of very great importance and requires men of large ability in the capacity of Assistant Secretaries. Recommendation for this new position is incorporated in the estimates for the fiscal year 1922 and it is hoped that it will receive the approval of the Congress. There can be nothing of greater concern to the people of America than the efficient management of the public Treasury which can not be accomplished without a competent staff to assist the head of the department.

The estimates also include recommendations for increases in the salary of the assistant secretaries and the assistant to the Secretary from \$5,000 to \$7,500 per annum. The figure mentioned is far below the value of the services rendered in these positions. It is not made higher because it was believed that the Congress would not grant a greater increase in advance of the general standardization and reclassification of salaries. These positions demand men of execu-

tive skill and great ability and it is urgently recommended that at least this increase in salary be granted.

ACTIVITIES WHICH SHOULD BE SEPARATED FROM THE TREASURY.

There are some activities of the Treasury having little or no relation to the fiscal operations of the Government which could appropriately be transferred elsewhere, relieving this department of large administrative burdens. These are the Bureau of War Risk Insurance, the Public Health Service, the Office of the Supervising Architect, the General Supply Committee, and the prohibition unit of the Bureau of Internal Revenue.

The Bureau of War Risk Insurance and the Public Health Service are associated in serving the former service men who are beneficiaries of the war-risk insurance act. These two services and closely related activities should be placed in one department under the immediate supervision of the same assistant secretary. This department is glad to have been connected with the service which they are rendering; but it has no relation, however, to the financial operations of the Government. In the interest of good organization, it would appear that both bureaus should be transferred to another department.

The Bureau of War Risk Insurance is an outgrowth of the war. It was established, on the recommendation of the Secretary of the Treasury, when the war broke out in Europe in 1914, to grant insurance on American vessels and cargoes for protection against the risks of war. It was originally placed under the Treasury because it was a temporary operation and the customs service of this department was available to act as its field force. In June, 1917, its powers were enlarged to include the granting of insurance on the lives of masters, officers, and crews of American vessels against the hazards of war. These functions are now ended. While the activities of the bureau in these directions involved large aggregate amounts, their administration was a simple process. The act of October 6, 1917, however, granting allotments and allowances, compensation, insurance and medical care and treatment to members of the military and naval forces, greatly expanded the functions of the bureau and made it the largest single administrative unit in the service of this Government and probably of any other. Its operations will continue for many years to come. As the bureau has no connection with the fiscal affairs of the Treasury, it could properly be transferred to another jurisdiction.

The Public Health Service is an ancient institution in the Treasury, where it has been located from the date of its creation. It had its origin in the old Marine-Hospital Service which was authorized

by the act approved July 16, 1798. In 1902 its name was changed to the Public Health and Marine-Hospital Service, and by the act approved October 14, 1912, it became known as the Public Health Service. During its life of 122 years, the service has grown from a small institution designed to furnish medical care to sick and disabled seamen of the American merchant marine to a great national health agency, operating the maritime quarantine stations of the United States, protecting the Nation against foreign epidemics, preventing the interstate spread of disease, cooperating with State and local health authorities in the control of sickness and the improvement of the health of the people, and, under recent authority, giving medical care and treatment to disabled ex-service men and women who are beneficiaries of the war-risk insurance act. In suggesting the association of the Bureau of War Risk Insurance and the Public Health Service in the manner mentioned above, it is not meant to imply that their work is on a comparable basis, except in so far as it relates to the care of ex-service men and women. This function in the Public Health Service forms only a part of its important duties. Backed by fine traditions and a proud record, it operates a general medical and surgical service that is nation wide in scope. Its supervision is an administrative problem of large proportions and obviously has no relation to the fiscal functions of the Government. The Treasury should relinquish control.

The Office of the Supervising Architect likewise has always been in the Treasury. It was provided for by section 235 of the Revised Statutes. The office is charged with the construction, repair, furnishing, equipment, and maintenance of public buildings, including post offices, courthouses, customhouses, assay offices, subtreasuries, marine hospital, and quarantine stations, in which quarters are provided for the several branches of the public service located outside of Washington. The extent of its operation is reflected in the statement that the number of completed and occupied public buildings at this time is approximately 1,200 and their total cost, including sites, was over \$323,000,000. The Office of the Supervising Architect performs an essential and important function, but it has no relation to distinctly Treasury work. For that reason it should be transferred to another department.

The General Supply Committee is of more recent origin. It is an important activity and performs an essential service. The work, however, has no relation to the fiscal service and could with propriety be transferred from the Treasury.

The national prohibition act is a penal statute and relates only indirectly to taxes. When this responsibility was placed upon the

Commissioner of Internal Revenue he already was carrying a heavy and unusual burden. This will be increased if the revenue act is revised. The duty of searching out and prosecuting offenders under the prohibition law should not be imposed upon an agency that should devote its attention exclusively, as far as possible, to the collection of taxes. If that part of the work which relates to the detection and prosecution of crime should be transferred to some other department, the features of the law which relate to taxes and penalties, as distinguished from fines and punishment which may be imposed through the courts, could be left with the Treasury.

It is perhaps seldom that departments voluntarily suggest that they be relieved of large powers they are exercising and interesting and important duties they are performing. It is natural that they should cling to their responsibilities. It is hoped that this recommendation will have all the more force because it is unusual. Officials of the Treasury concerned with the supervision of the activities mentioned above are interested in the work and realize its tremendous value to the Nation; and the bureaus and offices themselves are strongly attached to this department. These are considerations of sentiment which I likewise entertain. Very grave problems, however, face the Treasury, and matters of this kind must be decided by the requirements of proper and logical organization. Burdens growing out of the war naturally have fallen principally upon this department. They will continue and will not end until the war debt has been redeemed. The growth of the fiscal work of the Treasury has been unprecedented. The department should be given the opportunity of centering its attention upon its primary functions and should not be encumbered with large activities unrelated to fiscal operations. That is the basis for these proposals. They are offered particularly in contemplation of the establishment of a budget system. If the budget bureau is placed in the Treasury, which I believe is clearly the correct policy, it would seem to be extremely important that this department be relieved of administrative burdens involved in the supervision of the spending services herein discussed. It is hoped that the Congress will give the question serious consideration. If the transfers are made, it will be possible to eliminate one Assistant Secretary from the Treasury organization suggested in this report.

PERSONNEL.

The magnitude of the burdens imposed upon the Treasury during and since the war is reflected in the growth of its personnel. Every war activity found its reflex in this department. The Treasury touched every operation of war. Here the money was provided to

meet any and all demands, and here the bills were paid and the accounts audited. Every increase in appropriations meant more work for the Treasury, and every added expenditure augmented the burden. The growth of the work was due to the inevitable expansion of fiscal operations, and also to new activities assigned to the department, such, for instance, as the Bureau of War Risk Insurance.

When war was declared on April 6, 1917, the number of employees in the Treasury Department in Washington was 8,138. On December 31, 1917, the force had grown to 13,182; to 20,080 on June 30, 1918; to 29,526 on December 31, 1918; to 32,246 on June 30, 1919; and to 35,267 on October 31, 1919, when the highest point was reached. The number has since gradually decreased, until on September 30, 1920, the total was 29,955. In the 11 months from October 31, 1919, to September 30, 1920, there was an aggregate reduction of 8,402, and an aggregate increase of 3,090, making a net reduction of 5,312 in the personnel of the department at Washington. Every effort has been made to reduce the force as rapidly as the work would permit, and this program of retrenchment will continue.

Much of the temporary war work of the Treasury continued after the signing of the armistice. That has now disappeared, or will soon do so, but the war placed upon the Treasury duties and responsibilities that will last for many years to come. For that reason the personnel in certain of the department's activities will continue relatively large as compared with prewar standards. That is particularly true with respect to the Bureau of Internal Revenue, the Division of Loans and Currency, the Register's Office, the Public Health Service, and the Bureau of War Risk Insurance.

The Bureau of War Risk Insurance, at the outbreak of the war on April 6, 1917, had 23 people on its rolls. The act of October 6, 1917, enlarging the functions of the bureau, necessitated an unprecedented enlargement in the force. As the work poured in, the number rose in rapid strides. The maximum of 17,336 was reached on March 6, 1919. That was more than twice the total number of employees for the entire Treasury Department in Washington at the outbreak of the war. There has since been a rapid reduction in the force of the bureau. On September 30, 1920, the number employed was 7,059, a decrease of 10,277 from the peak on March 6, 1919.

The Washington force of the Public Health Service consisted of 45 employees at the outbreak of the war, while on September 30, 1920, the number was 565. This increase was due to the added responsibilities of the Public Health Service in rendering medical care and treatment to patients of the Bureau of War Risk Insurance.

The Bureau of Engraving and Printing, charged with the duty of printing and engraving the securities of the Government, almost

doubled its force during the war. In the beginning, the bureau had 4,411 people on its rolls. The number was raised until on October 31, 1918, it reached 8,402. Since that date the force has been considerably reduced, and on September 30, 1920, the total number of employees was 6,874, a decrease of 1,528 persons.

The great transactions in the public debt have necessarily caused large additions to the personnel of the Division of Loans and Currency and the Office of the Register of the Treasury. The force in the Division of Loans and Currency rose from 84 at the beginning of the war to 2,930 on February 29, 1920, the largest number reached at any time. On September 30, 1920, the number had been reduced to 2,275. At the outbreak of the war, the force of the Register of the Treasury consisted of 21 employees. The tremendous expansion of the work of the office necessitated a gradual increase in the personnel until on March 31, 1920, the number reached 1,140. Since that date the force has been reduced, the number on September 30, 1920, being 962.

The work of the Treasurer's office in connection with the receipts and expenditures of the Government was likewise greatly augmented. The force was increased from 562 in the beginning to 1,341 on November 30, 1919. On September 30, 1920, the number employed in that office was 1,286.

To collect the great amount of taxes imposed in recent years the force of the Bureau of Internal Revenue has necessarily been greatly extended. In addition to the collection of taxes, the bureau has been charged with the enforcement of the prohibition act. That has further increased its personnel. On September 30, 1920, the bureau's employees in Washington numbered 6,301, as compared with 604 at the outbreak of the war.

These statements cover the personnel in Washington. At the beginning of the war the field force of the several Treasury services numbered approximately 30,000. On September 30, 1920, it had been raised to about 45,000. These figures do not include the enlisted men in the Coast Guard, who on September 30, 1920, numbered 3,562. The increase in the field force occurred chiefly in the services of the Bureau of Internal Revenue and the Public Health Bureau. On April 6, 1917, the Bureau of Internal Revenue had approximately 4,500 employees in the field service, while on September 30, 1920, the field force reached 13,067. On April 6, 1917, there were 2,044 employees in the field service of the Public Health Bureau; on September 30, 1920, the number was approximately 18,250, of which number about 1,500 are surgeons and consultants who are part-time employees.

The following table indicates the offices in which the larger increases in the Washington force occurred and shows the number of

employees at the beginning of the war, the greatest number reached, and the number employed on September 30, 1920:

Treasury Department, Washington.

Bureau or office.	Number employed at beginning of war.	Largest number employed.		Number employed Sept. 30, 1920.	Decrease from peak.
		Number.	Date.		
Loans and Currency.....	84	2,930	Feb. 29, 1920	2,275	655
Register of Treasury.....	21	1,140	Mar. 31, 1920	962	178
Treasurer of the United States.....	564	1,341	Nov. 30, 1919	1,286	55
Engraving and Printing.....	4,502	8,402	Oct. 31, 1918	6,874	1,528
Internal Revenue.....	607	6,301	Sept. 30, 1920	6,301
War Risk Insurance.....	23	17,336	Mar. 6, 1919	7,059	10,277
Chief clerk.....	335	1,084	Mar. 31, 1920	1,055	29
Auditor for War Department.....	207	1,072	Jan. 31, 1920	982	90
Auditor for Navy Department.....	100	318	Sept. 30, 1920	318
Public Health.....	45	565do.....	565

A table showing the number of employees in the Treasury Department in Washington, by months, from January, 1917, to September, 1920, is attached to this report as Exhibit 90, page 568.

RETIREMENT OF CIVIL-SERVICE EMPLOYEES.

Under the provisions of the act approved May 22, 1920, providing for the retirement of employees in the classified civil service, 236 employees of the department in Washington were retired, with annuity, under the age limitations, and 11 retired without annuity. The total compensation of those retired, excluding piece-rate workers, amounted to \$295,635.51. Four hundred and twenty-nine employees of the various field services of the department were retired with annuity and 24 field employees were retired without annuity. The total amount of compensation of retired field employees was \$443,795. Two hundred and six employees of the departmental service and 371 employees of the field service of the department, who had reached the retirement age were retained for a period not to exceed two years. The average age of the retired employees in the department was 75 years, while the average age of those retained for two years was 71 years. The average age of field employees retired was 76, while that of the field employees retained was 73 years.

Employees throughout the department who had reached the age of retirement did not generally avail themselves of the provisions of the act as readily as had been expected. This, no doubt, was due to the fact that the annuity granted by the act was so low that the average employee could not comfortably maintain himself upon the amount. Employees who had worked for years to secure a retirement law were unwilling in many cases to accept its provisions.

In dealing with retirement cases a policy was adopted throughout the department to make the good of the service the real test as

to whether an employee who had reached the retirement age should be retired or retained. A committee was selected to work out the details connected with this undertaking. An exhaustive study was made of each case and decision was based upon the merits as shown by the facts presented. The committee recommended that the best interests of the service would be subserved by retiring all employees who had reached the age of 80 years. Their recommendation in this regard was approved and retirements were made accordingly. In exercising the discretion allowed by the statute, every effort was made in each individual case to carry out the intent of the law with respect to both retirements and retentions.

The retirement act required the Secretary of the Treasury to make deductions from appropriations for salaries, pay, or compensation for transfer to the "Civil service retirement and disability fund." The regulations covering such deductions were issued in Department Circular No. 197, dated June 25, 1920 (Exhibit 91, p. 572.) Department Circular No. 196, dated June 25, 1920 (Exhibit 92, p. 577), covered the question of forms of pay rolls and retirement deductions.

SPACE PROBLEMS OF THE DEPARTMENT.

One of the pressing problems confronting the Treasury is the imperative need of adequate and safe housing facilities for its manifold activities. Before the war the department had become greatly congested. The sudden expansion due to war-time activities created an unprecedentedly acute situation, and buildings of all kinds were utilized to provide shelter for many new functions. The offices of the Treasury were strewn over the city of Washington. With the cessation of hostilities the condition somewhat improved, but many of the new tasks are permanent in their nature, as the aftermath of the war falls chiefly on the Treasury. Some activities are still expanding, and may continue heavy for years to come. These include, for example, the collection of taxes by the Internal Revenue Bureau; the enforcement of national prohibition; the extensive work of the Division of Loans and Currency, the office of the Register of the Treasury and the Bureau of Engraving and Printing in connection with the public debt, and particularly the war debt; and the storage and custody of supplies transferred to the General Supply Committee under Executive order of December 3, 1918. A securities building fitted to house the public-debt service and other Treasury offices dealing with securities is particularly necessary.

The Bureau of Internal Revenue is housed in six separate buildings and the Division of Loans and Currency in five widely separated buildings. Many of these are wholly unsuited for office work and are of nonfireproof construction. The supplies in the custody

of the General Supply Committee, valued at about \$1,750,000, are stored in 51 barracks buildings in Potomac Park. They are of flimsy construction, and in the event of fire the entire group would be endangered. Valuable documents and papers in the custody of the Treasury are housed in temporary wooden structures erected during the period of active warfare for the housing of temporary war-time organizations. These records are irreplaceable.

The Treasury has also repeatedly called the attention of the Congress to the necessity of a modern Treasury vault in Washington, originally estimated to cost in the neighborhood of \$1,250,000, to replace the antiquated vaults now used to safeguard the Government's reserves and securities. The Treasury's appeals for new vault facilities were renewed and given additional emphasis in connection with the recent legislation authorizing the discontinuance of the subtreasuries. It is of the first importance that an appropriation for this purpose be made at this session of Congress, in order that construction of the vault may proceed without further delay.

The problem of adequate space to meet the needs of the department has demanded almost constant attention. A recent survey indicates that, exclusive of the Bureau of Engraving and Printing and the Hygienic Laboratory, the office and filing space of the permanent buildings occupied by the department aggregates only 1,039,037 square feet, while the requirements are 2,107,400 square feet, leaving a deficiency of more than 1,000,000 square feet. In other words, the permanent buildings occupied by the Treasury meet less than 50 per cent of the permanent space requirements. The erection of permanent fireproof structures for the accommodation of these important agencies is an imperative necessity, and it is hoped that the matter will have the immediate consideration of the Congress.

PANAMA CANAL.

The general fund of the Treasury was charged during the fiscal year 1920 with \$9,465,056.54 on account of the Panama Canal, including \$6,031,463.72 for maintenance and construction work and \$3,433,592.82 for fortifications and miscellaneous expenditures. The general fund was credited during the year with \$9,039,670.95 receipts from tolls, etc., making a net expenditure for the year of \$425,385.59. The total amount expended for canal construction, fortifications, maintenance, etc., from the general fund to June 30, 1920, exclusive of reimbursements from sales of bonds, was \$322,939,563.56, while the amounts received from Panama Canal bonds, including premiums thereon, issued in 1907, 1908, 1909, 1911, and 1912, was \$138,600,869.02, making the total expenditures on account of the Panama Canal to the close of the fiscal year 1920 \$461,540,432.58.

FINANCES.

The following statements showing receipts, disbursements, estimates, and the condition of the Treasury are submitted:

RECEIPTS AND DISBURSEMENTS.¹

Fiscal year 1920.

The receipts and disbursements of the Government during the fiscal year ended June 30, 1920, were as follows:

(See details on pages 262 to 272.)

GENERAL FUND.

Receipts into the general fund, including trust-fund receipts, but excluding postal revenues:

Customs.....		\$323, 536, 559. 25
Internal revenue—		
Income and excess-profits taxes.....	\$3, 956, 936, 003. 60	
Miscellaneous.....	1, 442, 213, 241. 46	
		5, 399, 149, 245. 06
Sales of public lands.....		1, 910, 140. 20
Miscellaneous.....		971, 409, 074. 63
Panama Canal tolls, etc.....		9, 039, 670. 95
		6, 705, 044, 690. 09

Deduct difference arising in adjustment of receipt accounts.....

630, 252. 46

Total ordinary receipts..... 6, 704, 414, 437. 63

Disbursements,¹ from the general fund for current expenses and capital outlays, including trust-fund disbursements, but excluding Postal Service paid from postal revenues:

For civil establishment—

Legislative establishment.....	\$19, 739, 707. 70
Executive proper, including Tariff Commission and Alien Property Custodian.....	1, 603, 633. 41
State Department.....	13, 590, 288. 51
Treasury Department proper.....	149, 413, 542. 85
Bureau of War Risk Insurance.....	² 74, 888, 559. 30
Public buildings, construction, sites, equipment, and maintenance.....	14, 027, 068. 17
War Department proper.....	8, 734, 269. 52
Department of Justice.....	18, 667, 245. 63
Post Office Department proper.....	2, 680, 470. 81
Additional compensation, Postal Service.....	35, 698, 400. 00
Navy Department proper.....	2, 797, 152. 07

¹ "Disbursements," as used in the following tables, in addition to actual expenditures, include unexpended balances to the credit of disbursing officers.

² Exclusive of allotments of pay.

Disbursements, etc.—Continued.

For civil establishment—Continued.

Interior Department proper.....	\$28, 199, 495. 23
Department of Agriculture.....	66, 611, 066. 69
Department of Commerce.....	35, 765, 045. 92
Department of Labor.....	6, 125, 231. 15
United States Shipping Board.....	469, 094, 549. 35
Federal control of transportation systems, and transportation act, 1920..	1, 038, 614, 901. 18
Federal control of telegraph and telephone systems.....	12, 018, 557. 68
War Finance Corporation.....	150, 000, 000. 00
Food and Fuel Administrations.....	¹ 1, 633, 859. 11
Council of National Defense.....	107, 758. 20
Housing Corporation.....	¹ 2, 038, 712. 77
European food relief.....	93, 236, 117. 80
Wheat guarantee fund.....	350, 000. 000. 00
State, War, and Navy Department buildings.....	2, 483, 462. 33
Interdepartmental Social Hygiene Board.....	1, 791, 071. 03
Interstate Commerce Commission.....	5, 847, 961. 96
Federal Trade Commission.....	1, 021, 653. 58

¹ "Disbursements," as used in these tables, in addition to actual expenditures, include unexpended balances to the credit of the disbursing officers.² Exclusive of principal of the public debt and Postal Service.

The following tabulation summarizes the estimated receipts and expenditures for the fiscal year 1921 and, on the basis of the latest information received from the various departments, shows the estimated results at the close of the year:

FISCAL YEAR 1921.

Balance in the Treasury June 30, 1920.....	\$359, 947, 020. 33
Estimated receipts:	
Ordinary.....	\$5, 739, 565, 000
Public debt.....	60, 193, 375
Total.....	\$5, 799, 758, 375
Estimated expenditures:	
Ordinary.....	4, 851, 298, 931
Public debt (including \$2,509,550,500 certificates of indebtedness outstanding June 30, 1920, maturing within the year, but not including Pittman Act cer- tificates).....	3, 063, 443, 584
Total.....	7, 914, 742, 515
Excess of estimated expenditures over estimated receipts.....	2, 114, 984, 140. 00
Estimated deficit in the general fund June 30, 1921.....	1, 755, 037, 119. 67
Estimated amount necessary for balance in the general fund June 30, 1921.....	250, 000, 000. 00
Estimated gross deficiency June 30, 1921.....	2, 005, 037, 119. 67

The following is a summary of the estimated receipts and expenditures for the fiscal year 1922 and, on the basis of the latest information from the various departments, shows the estimated results at the close of the year:

FISCAL YEAR 1922.

Estimated deficit in general fund June 30, 1921 (as above).....	\$1, 755, 037, 119. 67
Estimated receipts:	
Ordinary.....	\$4, 859, 530, 000
Public debt.....	60, 200, 000
Total.....	\$4, 919, 730, 000
13799—FI 1920—18	

Estimated expenditures:

Ordinary (exclusive of expenditures on account of increased compensation of Government employees, of expenditures on account of additional compensation in the Postal Service, and of expenditures on account of new construction in the Navy) . .	\$3, 897, 419, 227
Public debt	465, 854, 865

Total	\$4, 363, 274, 092
-----------------	--------------------

Excess of estimated receipts over estimated expenditures	\$556, 455, 908. 00
--	---------------------

Estimated deficit in the general fund June 30, 1922	1, 198, 581, 211. 67
---	----------------------

Estimated amount necessary for balance in the general fund June 30, 1922	250, 000, 000. 00
---	-------------------

Estimated gross deficiency June 30, 1922	1, 448, 581, 211. 67
--	----------------------

The estimates of receipts and expenditures for the two fiscal years are given in further detail in the following tables. It is obvious that the hope, expressed earlier in this report, of a more favorable outcome on June 30, 1922, can be realized only if the appropriations and expenditures are reduced substantially below the estimates given in the tables.

NOTE.—The estimates do not include possible miscellaneous receipts on account of further reduction of capital stock of the United States Grain Corporation or reduction of capital stock of the War Finance Corporation, inasmuch as payments on these accounts would be made principally from deposits carried to the credit of said corporations with the Treasurer of the United States.

Fiscal year 1921.

RECEIPTS.

Ordinary receipts:

From customs	\$350, 000, 000
From internal revenue—

[Department Circular No. 167. Loans and Currency.]

UNITED STATES OF AMERICA—FOUR AND ONE-QUARTER PER CENT TREASURY CERTIFICATES OF INDEBTEDNESS, SERIES T M 3-1920. DATED AND BEARING INTEREST FROM DECEMBER 1, 1919. DUE MARCH 15, 1920.

The Secretary of the Treasury, under the authority of the act approved September 24, 1917, as amended, offers for subscription, at par and accrued interest, through the Federal Reserve Banks, Treasury certificates of indebtedness, Series T M 3-1920, dated and bearing interest from December 1, 1919, payable March 15, 1920, with interest at the rate of four and one-quarter per cent per annum.

Applications will be received at the Federal Reserve Banks.

Bearer certificates with one interest coupon attached will be issued in denominations of \$500, \$1,000, \$5,000, \$10,000, and \$100,000.

Said certificates shall be exempt, both as to principal and interest, from all taxation now or hereafter imposed by the United States, any State, or any of the possessions of the United States, or by any local taxing authority, except (a) estate or inheritance taxes, and (b) graduated additional income taxes, commonly known as surtaxes, and excess-profits and war-profits taxes, now or hereafter imposed by the United States, upon the income or profits of individuals, partnerships, associations, or corporations. The interest on an amount of bonds and certificates authorized by said act approved September 24, 1917, and amendments thereto, the principal of which does not exceed in the aggregate \$5,000, owned by any individual, partnership, association, or corporation, shall be exempt from the taxes provided for in clause (b) above.

Certificates of this series will be accepted at par, with an adjustment of accrued interest, during such time and under such rules and regulations as shall be prescribed or approved by the Secretary of the Treasury, in payment of income and profits taxes payable at the maturity of the certificates. The certificates of this series do not bear the circulation privilege.

The right is reserved to reject any subscriptions and to allot less than the amount of certificates applied for and to close the subscriptions at any time without notice. Payment at par and accrued interest for certificates allotted must be made on or before December 1, 1919, or on later allotment. After allotment and upon payment Federal Reserve Banks will issue interim receipts pending delivery of the definitive certificates. Qualified depositories will be permitted to make payment by credit for certificates allotted to them for themselves and their customers up to an amount for which each shall have qualified in excess of existing deposits when so notified by Federal Reserve Banks. Treasury certificates of indebtedness of any and all series now outstanding and not overdue, maturing on or before February 2, 1920 (with any unmatured coupons at-

tached), will be accepted at par with an adjustment of accrued interest in payment for any certificates of the Series T M 3-1920 now offered which shall be subscribed for and allotted.

As fiscal agents of the United States, Federal Reserve Banks are authorized and requested to receive subscriptions and to make allotment in full in the order of the receipt of applications up to amounts indicated by the Secretary of the Treasury to the Federal Reserve Banks of the respective districts.

CARTER GLASS,
Secretary of the Treasury.

TREASURY DEPARTMENT
OFFICE OF THE SECRETARY,
November 24, 1919.

TO THE INVESTOR:

Almost any banking institution in the United States will handle your subscription for you, or you may make subscription direct to the Federal Reserve Bank of your district.

EXHIBIT 4.

[Department Circular No. 168. Loans and Currency.]

UNITED STATES OF AMERICA—FOUR AND ONE-QUARTER PER CENT TREASURY CERTIFICATES OF INDEBTEDNESS, SERIES D 1920. DATED AND BEARING INTEREST FROM DECEMBER 1, 1919. DUE FEBRUARY 16, 1920.

The Secretary of the Treasury, under the authority of the act approved September 24, 1917, as amended, offers for subscription, at par and accrued interest, through the Federal Reserve Banks, Treasury certificates of indebtedness, Series D 1920, dated and bearing interest from December 1, 1919, payable February 16, 1920, with interest at the rate of four and one-quarter per cent per annum.

Applications will be received at the Federal Reserve Banks.

Bearer certificates, without coupons, will be issued in denominations of \$500, \$1,000, \$5,000, \$10,000, and \$100,000.

Said certificates shall be exempt, both as to principal and interest, from all taxation now or hereafter imposed by the United States, any State, or any of the possessions of the United States, or by any local taxing authority, except (a) estate or inheritance taxes, and (b) graduated additional income taxes, commonly known as surtaxes, and excess-profits and war-profits taxes, now or hereafter imposed by the United States, upon the income or profits of individuals, partnerships, associations, or corporations. The interest on an amount of bonds and certificates authorized by said act approved September 24, 1917, and amendments thereto, the principal of which does not exceed in the aggregate \$5,000, owned by any individual, partnership, association, or corporation, shall be exempt from the taxes provided for in clause (b) above.

If any notes should be offered for subscription by the United States after the offering and before the maturity of such certificates, and the subscription price of such notes or the first installment thereof be payable on a date occurring at or before the maturity of such certificates, then on and after such date (a) such certificates will be accepted at par with an adjustment of accrued interest in payment on the subscription price, when payable, at or before the

maturity or redemption of such certificates, of any such notes subscribed for by and allotted to holders of such certificates; and (b) upon ten days' public notice given in such manner as may be determined by the Secretary of the Treasury the certificates of this series may be redeemed as a whole at par and accrued interest. The certificates of this series do not bear the circulation privilege and will not be accepted in payment of taxes.

The right is reserved to reject any subscription and to allot less than the amount of certificates applied for and to close the subscriptions at any time without notice. Payment at par and accrued interest for certificates allotted must be made on or before December 1, 1919, or on later allotment. After allotment and upon payment Federal Reserve Banks may issue interim receipts pending delivery of the definitive certificates. Any qualified depository will be permitted to make payment by credit for certificates allotted to it for itself and its customers up to any amount for which it shall be qualified in excess of existing deposits, when so notified by the Federal Reserve Bank of its district. Treasury certificates of indebtedness of any and all series now outstanding and not overdue, maturing on or before February 2, 1920 (with any unmatured interest coupons attached), will be accepted at par with an adjustment of accrued interest in payment for any certificates of the Series D 1920 now offered which shall be subscribed for and allotted.

As fiscal agents of the United States, Federal Reserve Banks are authorized and requested to receive subscriptions and to make allotment in full in the order of the receipt of applications up to amounts indicated by the Secretary of the Treasury to the Federal Reserve Banks of the respective districts.

CARTER GLASS,
Secretary of the Treasury.

TO THE INVESTOR:

Almost any banking institution in the United States will handle your subscription for you, or you may make subscription direct to the Federal Reserve Bank of your district.

EXHIBIT 5.

[Department Circular No. 174. Loans and Currency.]

**UNITED STATES OF AMERICA—FOUR AND ONE-HALF PER CENT
TREASURY CERTIFICATES OF INDEBTEDNESS, SERIES T J—1920.
DATED AND BEARING INTEREST FROM DECEMBER 15, 1919.
DUE JUNE 15, 1920.**

The Secretary of the Treasury, under the authority of the act approved September 24, 1917, as amended, offers for subscription, at par and accrued interest, through the Federal Reserve Banks, Treasury certificates of indebtedness, Series T J—1920, dated and bearing interest from December 15, 1919, payable June 15, 1920, with interest at the rate of four and one-half per cent per annum, semiannually.

Applications will be received at the Federal Reserve Banks.

Bearer certificates with one interest coupon attached will be issued in denominations of \$500, \$1,000, \$5,000, \$10,000, and \$100,000.

Said certificates shall be exempt, both as to principal and interest, from all taxation now or hereafter imposed by the United States, any State, or any of the possessions of the United States, or by any local taxing authority, except (a) estate or inheritance taxes, and (b) graduated additional income taxes, commonly known as surtaxes, and excess-profits and war-profits taxes, now or hereafter imposed by the United States, upon the income or profits of individuals, partnerships, associations, or corporations. The interest on an amount of bonds and certificates authorized by said act approved September 24, 1917, and amendments thereto, the principal of which does not exceed in the aggregate \$5,000, owned by any individual, partnership, association, or corporation, shall be exempt from the taxes provided for in clause (b) above.

Certificates of this series will be accepted at par, with an adjustment of accrued interest, during such time and under such rules and regulations as shall be prescribed or approved by the Secretary of the Treasury, in payment of income and profits taxes payable at the maturity of the certificates. The certificates of this series do not bear the circulation privilege.

The right is reserved to reject any subscription and to allot less than the amount of certificates applied for and to close the subscriptions at any time without notice. Payment at par and accrued interest for certificates allotted must be made on or before December 15, 1919, or on later allotment. After allotment and upon payment Federal Reserve Banks will issue interim receipts pending delivery of the definitive certificates. Any qualified depository will be permitted to make payment by credit for certificates allotted to it for itself and its customers up to any amount for which it shall have qualified in excess of existing deposits, when so notified by the Federal Reserve Bank of its district. Treasury certificates of indebtedness of any and all series now outstanding and not overdue, maturing on or before March 15, 1920 (with any unmatured coupons attached), will be accepted at par with an adjustment of accrued interest in payment for any certificates of the Series T J-1920 now offered which shall be subscribed for and allotted.

As fiscal agents of the United States, Federal Reserve Banks are authorized and requested to receive subscriptions and to make allotment in full in the order of the receipt of applications up to amounts indicated by the Secretary of the Treasury to the Federal Reserve Banks of the respective districts.

EXHIBIT 12.

[Department Circular No. 193. Loans and Currency.]

UNITED STATES OF AMERICA—TREASURY CERTIFICATES OF INDEBTEDNESS. DATED AND BEARING INTEREST FROM JUNE 15, 1920. SERIES A 1921, 5½ PER CENT, DUE JANUARY 3, 1921. SERIES T J—1921, 6 PER CENT, DUE JUNE 15, 1921.

The Secretary of the Treasury, under the authority of the act approved September 24, 1917, as amended, offers for subscription, at par and accrued interest, through the Federal Reserve Banks, Treasury certificates of indebtedness, in two series, both dated and bearing interest from June 15, 1920, the certificates of Series A 1921 being payable on January 3, 1921, with interest at the rate of five and three-quarters per cent per annum, and the certificates of Series T J—1921 being payable on June 15, 1921, and bearing interest at the rate of six per cent per annum payable semiannually.

Applications will be received at the Federal Reserve Banks.

Bearer certificates will be issued in denominations of \$500, \$1,000, \$5,000, \$10,000, and \$100,000. The certificates of Series A 1921 will be issued without coupons. The certificates of Series T J—1921 will have two interest coupons attached, payable December 15, 1920, and June 15, 1921.

The certificates of both said series shall be exempt, both as to principal and interest, from all taxation now or hereafter imposed by the United States, any State, or any of the possessions of the United States, or by any local taxing authority, except (a) estate or inheritance taxes, and (b) graduated additional income taxes, commonly known as surtaxes, and excess-profits and war-profits taxes, now or hereafter imposed by the United States, upon the income or profits of individuals, partnerships, associations, or corporations. The interest on an amount of bonds and certificates authorized by said act approved September 24, 1917, and amendments thereto, the principal of which does not exceed in the aggregate \$5,000, owned by any individual, partnership, association, or corporation, shall be exempt from the taxes provided for in clause (b) above.

The certificates of these series do not bear the circulation privilege. The certificates of Series A 1921 will not be accepted in payment of taxes. The certificates of Series T J—1921 will be accepted at par, with an adjustment of accrued interest, during such time and under such rules and regulations as shall be prescribed or approved by the

Secretary of the Treasury, in payment of income and profits taxes payable at the maturity of the certificates.

The right is reserved to reject any subscription and to allot less than the amount of certificates of either or both series applied for and to close the subscriptions as to either or both series at any time without notice. Payment at par and accrued interest for certificates allotted must be made on or before June 15, 1920, or on later allotment. After allotment and upon payment Federal Reserve Banks may issue interim receipts pending delivery of the definitive certificates. Any qualified depository will be permitted to make payment by credit for certificates allotted to it for itself and its customers up to any amount for which it shall be qualified in excess of existing deposits when so notified by the Federal Reserve Bank of its district. Treasury certificates of indebtedness of Series T J-1920, maturing June 15, 1920, of Series E 1920, maturing July 1, 1920, and of Series F 1920, maturing July 15, 1920, will be accepted at par, with an adjustment of accrued interest, in payment for any certificates of the Series A 1921 or T J-1921 now offered which shall be subscribed for and allotted.

As fiscal agents of the United States, Federal Reserve Banks are authorized and requested to receive subscriptions and to make allotment in full in the order of the receipt of applications up to amounts indicated by the Secretary of the Treasury to the Federal Reserve Banks of the respective districts.

D. F. HOUSTON,
Secretary of the Treasury.

TREASURY DEPARTMENT,
OFFICE OF THE SECRETARY,
June 10, 1920.

TO THE INVESTOR:

Almost any banking institution in the United States will handle your subscription for you, or you may make subscription direct to the Federal Reserve Bank of your district. If you desire to purchase certificates of the above issues after the subscriptions close, or certificates of any outstanding issue, you should make application to your own bank, or if it can not obtain them for you, to the Federal Reserve Bank of your district.

EXHIBIT 13.

[Department Circular No. 199. Loans and Currency.]

UNITED STATES OF AMERICA—TREASURY CERTIFICATES OF INDEBTEDNESS. DATED AND BEARING INTEREST FROM JULY 15, 1920. SERIES B 1921, 5½ PER CENT, DUE JANUARY 15, 1921. SERIES T M 2-1921, 5½ PER CENT, DUE MARCH 15, 1921.

The Secretary of the Treasury, under the authority of the act approved September 24, 1917, as amended, offers for subscription, at par and accrued interest, through the Federal Reserve Banks, Treasury certificates of indebtedness, in two series, both dated and bearing interest from July 15, 1920, the certificates of Series B 1921 being payable on January 15, 1921, with interest at the rate of five and three-quarters per cent per annum payable semiannually, and the certificates of Series T M 2-1921 being payable on March 15, 1921, and bearing interest at the rate of five and three-quarters per cent per annum.

Applications will be received at the Federal Reserve Banks.

Bearer certificates will be issued in denominations of \$500, \$1,000, \$5,000, \$10,000, and \$100,000. The certificates of Series B 1921 will be issued without coupons. The certificates of Series T M 2-1921 will have one interest coupon attached, payable March 15, 1921.

The certificates of both said series shall be exempt, both as to principal and interest, from all taxation now or hereafter imposed by the United States, any State, or any of the possessions of the United States, or by any local taxing authority, except (a) estate or inheritance taxes, and (b) graduated additional income taxes, commonly known as surtaxes, and excess-profits and war-profits taxes, now or hereafter imposed by the United States, upon the income or profits of individuals, partnerships, associations, or corporations. The interest on an amount of bonds and certificates authorized by said act approved September 24, 1917, and amendments thereto, the principal of which does not exceed in the aggregate \$5,000, owned by any individual, partnership, association, or corporation, shall be exempt from the taxes provided for in clause (b) above.

The certificates of these series do not bear the circulation privilege. The certificates of Series B 1921 will not be accepted in payment of taxes. The certificates of Series T M 2-1921 will be accepted at par, with an adjustment of accrued interest, during such time and under such rules and regulations as shall be prescribed or approved by the Secretary of the Treasury, in payment of income and profits taxes payable at the maturity of the certificates.

The right is reserved to reject any subscription and to allot less than the amount of certificates of either or both series applied for and to close the subscriptions as to either or both series at any time without notice. Payment at par and accrued interest for certificates allotted must be made on or before July 15, 1920, or on later allotment. After allotment and upon payment Federal Reserve Banks may issue interim receipts pending delivery of the definitive certificates. Any qualified depository will be permitted to make payment by credit for certificates allotted to it for itself and its customers up to any amount for which it shall be qualified in excess of existing deposits when so notified by the Federal Reserve Bank of its district. Treasury certificates of indebtedness of Series F 1920, maturing July 15, 1920, will be accepted at par, with an adjustment of accrued interest, in payment for any certificates of the Series B 1921 or T M 2-1921 now offered which shall be subscribed for and allotted.

As fiscal agents of the United States, Federal Reserve Banks are authorized and requested to receive subscriptions and to make allotment in full in the order of the receipt of applications up to amounts indicated by the Secretary of the Treasury to the Federal Reserve Banks of the respective districts.

D. F. HOUSTON,
Secretary of the Treasury.

TREASURY DEPARTMENT,
OFFICE OF THE SECRETARY,
July 9, 1920.

TO THE INVESTOR:

Almost any banking institution in the United States will handle your subscription for you, or you may make subscription direct to the Federal Reserve Bank of your district. If you desire to purchase certificates of the above issues after the subscriptions close, or certificates of any outstanding issue, you should make application to your own bank, or if it can not obtain them for you, to the Federal Reserve Bank of your district.

[Department Circular No. 201. Loans and Currency.]

UNITED STATES OF AMERICA—SIX PER CENT TREASURY CERTIFICATES OF INDEBTEDNESS, SERIES C 1921. DATED AND BEARING INTEREST FROM AUGUST 16, 1920. DUE AUGUST 16, 1921.

The Secretary of the Treasury, under the authority of the act approved September 24, 1917, as amended, offers for subscription, at par and accrued interest, through the Federal Reserve Banks, Treasury certificates of indebtedness, Series C 1921, dated and bearing interest from August 16, 1920, payable August 16, 1921, with interest at the rate of six per cent per annum payable semi-annually.

Applications will be received at the Federal Reserve Banks.

Bearer certificates will be issued in denominations of \$500, \$1,000, \$5,000, \$10,000, and \$100,000. The certificates will have two interest coupons attached, payable February 16, 1921, and August 16, 1921.

Said certificates shall be exempt, both as to principal and interest, from all taxation now or hereafter imposed by the United States, any State, or any of the possessions of the United States, or by any local taxing authority, except (a) estate or inheritance taxes, and (b) graduated additional income taxes, commonly known as surtaxes, and excess-profits and war-profits taxes, now or hereafter imposed by the United States, upon the income or profits of individuals, partnerships, associations, or corporations. The interest on an amount of bonds and certificates authorized by said act approved September 24, 1917, and amendments thereto, the principal of which does not exceed in the aggregate \$5,000, owned by any individual, partnership, association, or corporation, shall be exempt from the taxes provided for in clause (b) above.

The certificates of this series do not bear the circulation privilege and will not be accepted in payment of taxes.

The right is reserved to reject any subscription and to allot less than the amount of certificates applied for and to close the subscriptions at any time without notice. Payment at par and accrued interest for certificates allotted must be made on or before August 16, 1920, or on later allotment. After allotment and upon payment Federal Reserve Banks may issue interim receipts pending delivery of the definitive certificates. Any qualified depository will be permitted to make payment by credit for certificates allotted to it for itself and its customers up to any amount for which it shall be qualified in excess of existing deposits, when so notified by the Federal Reserve Bank of its district.

As fiscal agents of the United States, Federal Reserve Banks are authorized and requested to receive subscriptions and to make allotment in full in the order of the receipt of applications up to amounts indicated by the Secretary of the Treasury to the Federal Reserve Banks of the respective districts.

D. F. HOUSTON,
Secretary of the Treasury.

TO THE INVESTOR:

Almost any banking institution in the United States will handle your subscription for you, or you may make subscription direct to the Federal Reserve Bank of your district. If you desire to purchase certificates of the above issue after the subscriptions close, or certificates of any outstanding issue, you should make application to your own bank, or if it can not obtain them for you, to the Federal Reserve Bank of your district.

EXHIBIT 15.

[Department Circular No. 204. Loans and Currency.]

UNITED STATES OF AMERICA—TREASURY CERTIFICATES OF INDEBTEDNESS. DATED AND BEARING INTEREST FROM SEPTEMBER 15, 1920. SERIES T M 3-1921, 5½ PER CENT, DUE MARCH 15, 1921. SERIES T S-1921, 6 PER CENT, DUE SEPTEMBER 15, 1921.

The Secretary of the Treasury, under the authority of the act approved September 24, 1917, as amended, offers for subscription at par and accrued interest, through the Federal Reserve Banks, Treasury certificates of indebtedness, in two series, both dated and bearing interest from September 15, 1920, the certificates of Series T M 3-1921 being payable on March 15, 1921, with interest at the rate of five and three-quarters per cent per annum, and the certificates of Series T S-1921 being payable on September 15, 1921, and bearing interest at the rate of six per cent per annum, payable semiannually.

Applications will be received at the Federal Reserve Banks.

Bearer certificates will be issued in denominations of \$500, \$1,000, \$5,000, \$10,000, and \$100,000. The certificates of Series T M 3-1921 will have one interest coupon attached payable March 15, 1921, and the certificates of Series T S-1921 two interest coupons attached, payable March 15 and September 15, 1921.

The certificates of both said series shall be exempt, both as to principal and interest, from all taxation now or hereafter imposed by the United States, any State, or any of the possessions of the United States, or by any local taxing authority, except (a) estate or inheritance taxes, and (b) graduated additional income taxes, commonly known as surtaxes, and excess-profits and war-profits taxes, now or hereafter imposed by the United States, upon the income or profits of individuals, partnerships, associations, or corporations. The interest on an amount of bonds and certificates authorized by said act approved September 24, 1917, and amendments thereto, the principal of which does not exceed in the aggregate \$5,000, owned by any individual, partnership, association, or corporation, shall be exempt from the taxes provided for in clause (b) above.

Certificates of these series will be accepted at par, with an adjustment of accrued interest, during such time and under such rules and regulations as shall be prescribed or approved by the Secretary of the Treasury, in payment of income and profits taxes payable at the maturity of the certificates, respectively. The certificates of these series do not bear the circulation privilege.

The right is reserved to reject any subscription and to allot less than the amount of certificates of either or both series applied for and to close the subscriptions as to either or both series at any time without notice. Payment at par and accrued interest for certificates allotted must be made on or before September 15, 1920, or on later allotment. After allotment and upon payment Federal Reserve

Banks may issue interim receipts pending delivery of the definitive certificates. Any qualified depository will be permitted to make payment by credit for certificates allotted to it for itself and its customers up to any amount for which it shall be qualified in excess of existing deposits when so notified by the Federal Reserve Bank of its district. Treasury certificates of indebtedness of Series T 10, maturing September 15, 1920, and of Series G 1920, maturing October 15, 1920, will be accepted at par, with an adjustment of accrued interest, in payment for any certificates of the Series T M 3-1921 or T S-1921 now offered which shall be subscribed for and allotted.

As fiscal agents of the United States, Federal Reserve Banks are authorized and requested to receive subscriptions and to make allotment in full in the order of the receipt of applications up to amounts indicated by the Secretary of the Treasury to the Federal Reserve Banks of the respective districts.

D. F. HOUSTON,
Secretary of the Treasury.

LETTER FROM THE SECRETARY OF TREASURY, TRANSMITTING, IN RESPONSE TO A SENATE RESOLUTION OF OCTOBER 17, 1919, A STATEMENT BASED ON INFORMATION RECEIVED BY THE TREASURY SHOWING THE FINANCIAL OBLIGATIONS OF FOREIGN GOVERNMENTS OFFERED IN THE UNITED STATES SINCE AUGUST 1, 1914.

WASHINGTON, *January 27, 1920.*

SIR: Pursuant to Senate resolution No. 214, October 17, 1919, I have the honor to transmit herewith a statement based on information which the Treasury has received showing the financial obligations of foreign Governments offered in the United States since August 1, 1914, and the information concerning the same requested in said resolution. The Treasury can not vouch for the correctness or the completeness of this information, which was received principally from unofficial sources. The Treasury is without information as to what proportion of such obligations offered in this country was purchased here. Certain issues of Canadian obligations were offered simultaneously in this country and in Canada. To the extent of the great domestic purchases of such issues in Canada, it is clear that the amount of those issues placed in the United States was less than the nominal offerings. It must not be overlooked that current exchange rates between the United States and Canada have for months past offered strong inducements to American investors to buy Canadian bonds. The amount of any such purchases in the market is, of course, quite impossible to determine.

Respectfully,

CARTER GLASS.

The PRESIDENT OF THE SENATE,
Washington, D. C.

Estimate of financial obligations of foreign Governments offered in the United States since Aug. 1, 1914 (as disclosed from unofficial information in possession of the Treasury Department).

Title.	Amount.	Term.	Rate.	Issued.	Maturity.	Interest payable.	Offering price.	By whom held or offered.	Remarks.
Anglo-French.....	\$500,000,000.00	5 years.	<i>P. ct.</i> 5	Oct. 15, 1915...	Oct. 15, 1920...	Apr. 15-Oct. 15...	\$98.00	Syndicate of 288 national banks headed by J. P. Morgan & Co.	Joint and several obligations of France and Great Britain. One-half for France, of which one-tenth is for Russia; and one-half for Great Britain, of which one-tenth is for Russia. Treasury notes; to redeem maturing obligations and for sanitary work.

The Treasury can not vouch for the correctness or the completeness of the foregoing information, which was received principally from unofficial sources. The Treasury is without information as to what proportion of such obligations offered in this country was purchased here. Certain issues of Canadian obligations were offered simultaneously in this country and in Canada. To the extent of the great domestic purchases of such issues in Canada it is clear that the amount of those issues placed in the United States was less than the nominal offerings. It must not be overlooked that current exchange rates between the United States and Canada have for months past offered strong inducements to American investors to buy Canadian bonds. The amount of any such purchases in the market it is, of course, quite impossible to determine.

EXHIBIT 34.

SECTIONS 204, 209, AND 210 OF TRANSPORTATION ACT, 1920, AS AMENDED.

REIMBURSEMENT OF DEFICITS DURING FEDERAL CONTROL.

SEC. 204. (a) When used in this section—

The term "carrier" means a carrier by railroad which during any part of the period of Federal control, engaged as a common carrier in general transportation, and competed for traffic, or connected, with a railroad under Federal control, and which sustained a deficit in its railway operating income for that portion (as a whole) of the period of Federal control during which it operated its own railroad or system of transportation; but does not include any street or interurban electric railway which has as its principal source of operating revenue urban, suburban, or interurban passenger traffic or sale of power, heat, and light, or both; and

The term "test period" means the three years ending June 30, 1917.

(b) For the purposes of this section—

Railway operating income or any deficit therein for the period of Federal control shall be computed in a manner similar to that provided in section 209 with respect to such income or deficit for the guaranty period; and

Railway operating income or any deficit therein for the test period shall be computed in the manner provided in section 1 of the Federal control act.

(c) As soon as practicable after March 1, 1920, the commission shall ascertain for every carrier, for every month of the period of Federal control during which its railroad or system of transportation was not under Federal operation, its deficit in railway operating income, if any, and its railway operating income, if any, (hereinafter called "Federal control return"), and the average of its deficit in railway operating income, if any, and of its railway operating income, if any, for the three corresponding months of the test period taken together, (hereinafter called "test period return"): *Provided*, That "test period return," in the case of a carrier which operated its railroad or system of transportation for at least one year during, but not for the whole of the test period, means its railway operating income, or the deficit therein, for the corresponding month during the test period, or the average thereof for the corresponding months during the test period taken together, during which the carrier operated its railroad or system of transportation.

(d) For every month of the period of Federal control during which the railroad or system of transportation of the carrier was not under Federal operation, the commission shall then ascertain (1) the difference between its Federal control return, if a deficit, and its test period return, if a smaller deficit, or (2) the difference between its test period return, if an income, and its Federal control return, if a smaller income, or (3) the sum of its Federal control

return, if a deficit, plus its test period return, if an income. The sum of such amounts shall be credited to the carrier.

(e) For every such month the commission shall then ascertain (1) the difference between the carrier's Federal control return, if an income, and its test period return, if a smaller income, or (2) the difference between its test period return, if a deficit, and its Federal control return, if a smaller deficit, or (3) the sum of its Federal control return, if an income, plus its test period return, if a deficit. The sum of such amounts shall be credited to the United States.

(f) If the sum of the amounts so credited to the carrier under subdivision (d) exceeds the sum of the amounts so credited to the United States under subdivision (e), the difference shall be payable to the carrier. In the case of a carrier which operated its railroad or system of transportation for less than a year during, or for none of, the test period, the foregoing computations shall not be used, but there shall be payable to such carrier its deficit in railway operating income for that portion (as a whole) of the period of Federal control during which it operated its own railroad or system of transportation.

(g) The commission shall promptly certify to the Secretary of the Treasury the several amounts payable to carriers under paragraph (f). The Secretary of the Treasury is hereby authorized and directed thereupon to draw warrants in favor of each such carrier upon the Treasury of the United States for the amount shown in such certificate as payable thereto. An amount sufficient to pay such warrants is hereby appropriated out of any money in the Treasury not otherwise appropriated.

GUARANTY TO CARRIERS AFTER TERMINATION OF FEDERAL CONTROL.

SEC. 209. (a) When used in this section---

The term "carrier" means (1) a carrier by railroad or partly by railroad and partly by water, whose railroad or system of transportation is under Federal control at the time Federal control terminates, or which has heretofore engaged as a common carrier in general transportation and competed for traffic, or connected with a railroad at any time under Federal control; and (2) a sleeping car company whose system of transportation is under Federal control at the time Federal control terminates; but does not include a street or interurban electric railway not under Federal control at the time Federal control terminates, which has as its principal source of operating revenue urban, suburban, or interurban passenger traffic or sale of power, heat and light, or both.

The term "guaranty period" means the six months beginning March 1, 1920.

The term "test period" means the three years ending June 30, 1917; and

The term "railway operating income" and other references to accounts of carriers by railroad shall, in the case of a sleeping car company, be construed as indicating the appropriate corresponding accounts in the accounting system prescribed by the commission.

(b) This section shall not be applicable to any carrier which does not on or before March 15, 1920, file with the commission a written statement that it accepts all the provisions of this section.

(c) The United States hereby guarantees—

(1) With respect to any carrier with which a contract (exclusive of so-called cooperative contracts or waivers) has been made fixing the amount of just compensation under the Federal control act, that the railway operating income of such carrier for the guaranty period as a whole shall not be less than one-half the amount named in such contract as annual compensation, or, where the contract fixed a lump sum as compensation for the whole period of Federal operation, that the railway operating income of such carrier for the guaranty period as a whole shall not be less than an amount which shall bear the same proportion to the lump sum so fixed as six months bears to the number of months during which such carrier was under Federal operation, including in both cases the increases in such compensation provided for in section 4 of the Federal control act;

(2) With respect to any carrier entitled to just compensation under the Federal control act, with which such a contract has not been made, that the railway operating income of such carrier for the guaranty period as a whole shall not be less than one-half of the annual amount estimated by the President as just compensation for such carrier under the Federal control act, including the increases in such compensation provided for in section 4 of the Federal control act. If any such carrier does not accept the President's estimate respecting its just compensation, and if in proceedings under section 3 of the Federal control act it is determined that a larger or smaller annual amount is due as just compensation, the guaranty under this paragraph shall be increased or decreased accordingly;

(3) With respect to any carrier, whether or not entitled to just compensation under the Federal control act, with which such a contract has not been made, and for which no estimate of just compensation is made by the President, and which for the test period as a whole sustained a deficit in railway operating income, the guaranty shall be a sum equal to (a) the amount by which any deficit in its railway operating income for the guaranty period as a whole exceeds one-half of its average annual deficit in railway operating income for the test period, plus (b) an amount equal to one-half the annual sum fixed by the President under section 4 of the Federal control act;

(4) With respect to any carrier not entitled to just compensation under the Federal control act, which for the test period as a whole had an average annual railway operating income, that the railway operating income of such carrier for the guaranty period as a whole shall not be less than one-half the average annual railway operating income of such carrier during the test period.

(d) If for the guaranty period as a whole the railway operating income of any carrier entitled to a guaranty under paragraph (1), (2), or (4) of subdivision (c) is in excess of the minimum railway operating income guaranteed in such paragraph, such carrier shall forthwith pay the amount of such excess into the Treasury of the United States. If for the guaranty period as a whole the railway operating income of any carrier entitled to a guaranty under paragraph (3) of subdivision (c) is in excess of one-half of the annual sum fixed by the President with respect to such carrier under section 4 of the Federal control act, such carrier shall forthwith pay the amount of such excess into the Treasury of the United States. The amounts so paid into the Treasury of the United States shall be added to the funds made available under section 202 for the purposes indicated in such section.

Notwithstanding the provisions of this subdivision any carrier may retain out of any such excess any amount necessary to enable it to pay its fixed charges accruing during the guaranty period.

(e) For the purposes of this section railway operating income or any deficit therein for the test period shall be computed in the manner provided for in section 1 of the Federal control act.

(f) In computing railway operating income, or any deficit therein, for the guaranty period for the purposes of this section—

(1) Debits and credits arising from the accounts, called in the monthly reports to the commission equipment rents and joint facility rents, shall be included, but debits and credits arising from the operation of such street electric passenger railways, including railways commonly called interurbans, as are not under Federal control at the time of termination thereof, shall be excluded;

(2) Proper adjustments shall be made (a) in case any lines which were, during any portion of the period of Federal control, a part of the railroad or system of transportation of the carrier, and whose railway operating income was included in such income of the carrier for the test period, do not continue to be a part of such railroad or system of transportation during the entire guaranty period, and (b) in case of any lines acquired by, leased to, or consolidated with, the railroad or system of transportation of the carrier at any time since the end of the test period and prior to the expiration of the guaranty period, for which separate operating returns to the commission are not made in respect to the entire portion of the guaranty period;

(3) There shall not be included in operating expenses, for maintenance of way and structures, or for maintenance of equipment, more than an amount fixed by the commission. In fixing such amount the commission shall so far as practicable apply the rule set forth in the proviso in paragraph (a) of section 5 of the "standard contract" between the United States and the carriers (whether or not such contract has been entered into with the carrier whose railway operating income is being computed);

(4) There shall not be included any taxes paid under Title I or II of the revenue act of 1917, or such portion of the taxes paid under Title II or III of the revenue act of 1918 as by the terms of such act are to be treated as levied by an act in amendment of Title I or II of the revenue act of 1917; and

(5) The commission shall require the elimination and restatement of the operating expenses and revenues (other than for maintenance of way and structures, or maintenance of equipment) for the guaranty period, to the extent necessary to correct and exclude any disproportionate or unreasonable charge to such expenses or revenues for such period, or any charge to such expenses or revenues for such period which under a proper system of accounting is attributable to another period.

(g) The commission shall, as soon as practicable after the expiration of the guaranty period, ascertain and certify to the Secretary of the Treasury the several amounts necessary to make good the foregoing guaranty to each carrier. The Secretary of the Treasury is hereby authorized and directed thereupon to draw warrants in favor of each such carrier upon the Treasury of the United States, for the amount shown in such certificate as necessary to make good such guaranty. An amount sufficient to pay such warrants is hereby ap-

appropriated out of any money in the Treasury not otherwise appropriated.

(h) Upon application of any carrier to the commission, asking that during the guaranty period there may be advanced to it from time to time such sums, not in excess of the estimated amount necessary to make good the guaranty, as are necessary to enable it to meet its fixed charges and operating expenses, the commission may certify to the Secretary of the Treasury the amount of, and times at which, such advances, if any, shall be made. The Secretary of the Treasury, on receipt of such certificate, is authorized and directed to make the advances in the amounts and at the times specified in the certificate, upon the execution by the carrier of a contract, secured in such manner as the Secretary may determine, that upon final determination of the amount of the guaranty provided for by this section such carrier will repay to the United States any amounts which it has received from such advances in excess of the guaranty, with interest at the rate of 6 per centum per annum from the time such excess was paid. There is hereby appropriated, out of any money in the Treasury not otherwise appropriated, a sum sufficient to enable the Secretary of the Treasury to make the advances referred to in this subdivision.

(i) If the American Railway Express Company shall, on or before March 15, 1920, file with the commission a written statement that it accepts all the provisions of this subdivision, the contract of June 26, 1918, between such company and the Director General of Railroads, as amended and continued by agreement dated November 21, 1918, shall remain in full force and effect during the guaranty period in so far as the same constitutes a guaranty on the part of the United States to such company against a deficit in operating income.

In computing operating income, and any deficit therein, for the guaranty period for the purposes of this subdivision, the commission shall require the elimination and restatement of the operating expenses and revenues for the guaranty period, to the extent necessary to correct and exclude any disproportionate or unreasonable charge to such expenses or revenues for such period, or any charge to such expenses or revenues for such period which under a proper system of accounting is attributable to another period, and to exclude from operating expenses so much of the charge for payment for express privileges to carriers on whose lines the express traffic is carried as is in excess of 50.25 per centum of gross express revenue.

For the guaranty period the American Railway Express Company shall pay to every carrier which accepts the provisions of this section, as provided in subdivision (b) hereof, 50.25 per centum of the gross revenue earned on the transportation of all its express traffic on the carrier's lines, and every such carrier shall accept from the American Railway Express Company such percentage of the gross revenue as its compensation. In arriving at the gross revenue on through or joint express traffic, the method of dividing the revenue between the carriers shall be that agreed upon between the carriers and such express company and approved by the commission.

If for the guaranty period as a whole the American Railway Express Company does not have a deficit in operating income, it shall forthwith pay the amount of its operating income for such period into the Treasury of the United States. The amount so paid shall be

added to the funds made available under section 202 for the purposes indicated in such section.

The commission shall, as soon as practicable after the expiration of the guaranty period, certify to the Secretary of the Treasury the amount necessary to make good the foregoing guaranty to the American Railway Express Company. The Secretary of the Treasury is hereby authorized and directed thereupon to draw warrants in favor of such company upon the Treasury of the United States for the amount shown in such certificate as necessary to make good such guaranty. An amount sufficient to pay such warrants is hereby appropriated out of any money in the Treasury not otherwise appropriated.

Upon application of the American Railway Express Company to the commission, asking that during the guaranty period there may be advanced to it from time to time such sums, not in excess of the estimated amount necessary to make good the guaranty, as are necessary to enable it to meet its operating expenses, the commission may certify to the Secretary of the Treasury the amount of, and times at which, such advances, if any, shall be made. The Secretary of the Treasury, on receipt of such certificate, is authorized and directed to make the advances in the amounts and at the times specified in the certificate, upon the execution by such company of a contract, secured in such manner as the Secretary may determine, that upon final determination of the amount of the guaranty provided for by this subdivision such company will repay to the United States any amounts which it has received from such advances in excess of the guaranty, with interest at the rate of 6 per centum per annum from the time such excess was paid. There is hereby appropriated out of any money in the Treasury not otherwise appropriated a sum sufficient to enable the Secretary of the Treasury to make the advances referred to in this subdivision.

NEW LOANS TO RAILROADS.

SEC. 210. (a) For the purpose of enabling carriers by railroad subject to the interstate commerce act properly to serve the public during the transition period immediately following the termination of Federal control, any such carrier may, at any time after the passage of this act, and before the expiration of two years after the termination of Federal control make application to the commission for a loan from the United States to meet its maturing indebtedness, or to provide itself with equipment or other additions and betterments, setting forth the amount of the loan; the term for which it is desired; the purpose of the loan and the use to which it will be applied; the present and prospective ability of the applicant to repay the loan and meet the requirements of its obligations in that regard; the character and value of the security offered; and the extent to which the public convenience and necessity will be served. The application shall be accompanied by statements showing such facts in detail as the commission may require with respect to the physical situation, ownership, capitalization, indebtedness, contract obligations, operation, and earning power of the applicant, together with such other facts relating to the propriety and expediency of granting the loan applied for, and the ability of the applicant to make good the obligation as the commission may deem pertinent to the inquiry.

(b) If the commission, after such hearing and investigation, with or without notice, as it may direct, finds that the making, in whole or in part, of the proposed loan by the United States, for one or more of the aforesaid purposes, is necessary to enable the applicant properly to meet the transportation needs of the public, and that the prospective earning power of the applicant and the character and value of the security offered are such as to furnish reasonable assurance of the applicant's ability to repay the loan within the time fixed therefor, and to meet its other obligations in connection with such loan the commission shall certify to the Secretary of the Treasury its findings of such facts; also the amount of the loan which is to be made; the time, not exceeding fifteen years from the making thereof, within which it is to be repaid; the terms and conditions of the loan, including the security to be given for repayment: that the prospective earning power of the applicant, together with the character and value of the security offered, furnish, in the opinion of the commission, reasonable assurance of the applicant's ability to repay the loan within the time fixed therefor and reasonable protection to the United States; and that the applicant, in the opinion of the commission, is unable to provide itself with the funds necessary for the aforesaid purposes from other sources.

(c) Upon receipt of such certificate from the commission the Secretary of the Treasury shall immediately, or as soon as practicable, make a loan of the amount recommended in such certificate out of any funds in the revolving fund provided for in this section and accept the security prescribed therefor by the commission. All such loans shall bear interest at the rate of 6 per centum per annum, payable semiannually to the Secretary of the Treasury, and to be placed to the credit of said revolving fund. The form of obligation to be entered into shall be prescribed by the Secretary of the Treasury, but the time, not exceeding fifteen years from the making thereof, within which such loan is to be repaid, the security which is to be taken therefor, and the terms and the conditions of the loan shall be in accordance with the findings and the certificate of the commission.

The loans for equipment authorized by section 210, transportation act, 1920, may be made to or through such organization, car trust or other agency as may be determined upon or approved or organized for the purpose by the commission as most appropriate in the public interest for the construction, and sale or lease of equipment to carriers, upon such general terms as to security and payment or lease as provided in this section or in subsections 11 and 13 of section 422 of the transportation act, 1920.

(d) The commission or the Secretary of the Treasury may call upon the Federal Reserve Board for advice and assistance with respect to any such application or loan.

(e) There is hereby appropriated out of any moneys in the Treasury not otherwise appropriated the sum of \$300,000,000, which shall be used as a revolving fund for the purpose of making the loans provided for in this section, and for paying the judgments, decrees, and awards referred to in subdivision (e) of section 206.

(f) A carrier may issue evidences of indebtedness to the United States pursuant to this section without the authorization or approval of any authority, State or Federal, and without compliance with any requirement, State or Federal, as to notification.

EXHIBIT 35.

**STATEMENT OF D. F. HOUSTON, SECRETARY OF THE TREASURY,
BEFORE THE COMMITTEE ON WAYS AND MEANS OF THE HOUSE
OF REPRESENTATIVES, MARCH 11, 1920, ON THE SOLDIERS'
BONUS PROPOSAL.**

Secretary HOUSTON. Mr. Chairman, on what point do you wish to hear the Treasury?

The CHAIRMAN. We had asked the Treasury officials and asked Mr. Harding to be present to-day and give us their opinion on the matters that are before this committee; that is, a bonus to the soldiers of the late war. There are many bills before the committee—some 50, I believe, in number—some providing for a cash bonus, as it is called, some for the issuing of a Government bond in an amount due the soldier, some for permitting the soldier to take irrigated lands or reclaimed lands by draining swamp lands, etc., others by furnishing the soldier an amount of money to purchase a home, and loaning him up to any amount the total amount of the purchase price of a home, whether it be a farm, or a home in the city, and some for loaning a less amount, and so on.

There are various propositions before the committee, all of which have for their purpose in some way to aid the soldiers for what might be thought to be due them for services rendered, over and above that they have already received.

I have stated that so that you will understand me, and we will be very glad to hear what you think about these various propositions, or each or any of them.

Mr. KITCHIN. Mr. Secretary, some other members of the committee desire to hear your views especially with reference to the wisdom of issuing bonds in an amount of, say, \$1,300,000,000 up to \$2,500,000,000, in order to pay a bonus to the ex-service men, and what effect it would have upon prices, what effect it would have upon credit, what effect it would have upon the bonds now outstanding, etc. We are very anxious to hear your opinion on that.

The CHAIRMAN. That, I think, is the side of the question upon which we would expect the Secretary of the Treasury to express himself more fully than upon any other feature of any of the bills.

Secretary HOUSTON. Mr. Chairman, I assume that the committee knows the condition of the finances so far as it has been revealed in the official statements. The proposal to expend a sum ranging from \$1,000,000,000 to \$2,000,000,000, is a very serious one for the people of the Nation at this time and the proposal to meet such an expenditure by the sale of bonds presents or suggests very grave possibilities.

I am not alarmed as to the condition of the Nation's finances at present. I do not think that the situation is critical. I believe that with economy on the part of individuals throughout the Nation, with the avoidance of waste and extravagant living, with economy on the part of Congress in making appropriations, and prudence in

handling our financial problems, this Nation, in spite of disturbed European conditions and their effects here, can proceed in an orderly fashion. I think, however, that to float bonds in the amount of \$2,000,000,000, or to meet such an additional expenditure out of taxes, will present very grave problems and might bring disaster.

I do not know how we could float bonds for \$2,000,000,000 at rates of interest borne by the existing bonds and I do not know just what would happen if we undertook to float bonds for \$2,000,000,000 at a higher rate of interest. I assume that there would be very great difficulty in floating bonds at existing rates of interest. I do not know that we could sell \$2,000,000,000 worth of bonds even at a higher rate of interest. I am confident that if such volume of bonds were floated it would depress the value of the obligations of the Government now held by 20,000,000 or 30,000,000 of our citizens; to what point, of course, I can not say. I think that it would lead to a further credit expansion, which has been one of the factors in the upward movement of prices. It would, therefore, add to the cost of living of the 110,000,000 people of the Nation; and one of the many results of this would be that laborers would say: "The cost of living is rising and we must have more wages." The vicious price and wage circles would persist and extend.

We are prudently doing what we can to bring about something like a gradual return toward a stable condition of industry and finance. I am not prepared to say that we shall ever reach the prewar normal; but I imagine everybody wishes the country to return to a stable condition. We are having difficulty enough at present in effecting this result.

A proposal to float bonds as suggested would, in my judgment, not only counteract any effort in that direction, but would produce a very grave situation which I am not sure we could handle.

If the Congress deems it wise to extend aid to the soldiers, the less harmful way of meeting the expenditures would be by increasing taxes. Taxes in themselves tend toward economy if they are properly laid, because they take so much out of the control of individuals for the time being, and they would not cause further credit expansion.

But existing taxes are burdensome and in some cases very disturbing to industry. Instead of increasing them we should survey the present tax system with a view to its modification or simplification, with a view to raising the necessary revenue with as little inconvenience as possible to taxpayers. If we have to find new sources of revenue or if we increase present taxes, we shall further burden industry, probably curtail production, and in any event increase the cost of living.

The proposal would mean an addition to the cost of living, whatever method of financing it you employ. I can not escape the conclusion that it would add to the burden of every man, woman, and child in this nation if you undertake to meet the expenditure by taxes; and it will add even more if you undertake to do so by increasing the credit structure of the Nation.

That, in brief, is the way the matter presents itself to my mind.

Mr. HAWLEY. Mr. Secretary, how much will the recent decision of the Supreme Court cost the Government in refunds of taxes on

stock dividends; for the years 1917, 1918, and 1919? How much will it deplete the revenues for the future?

Secretary HOUSTON. Any estimate, Mr. Chairman, I could give would be crude. It has been only a few days since the decision was rendered, but it has been estimated roughly, I think, that the total deductions from the income and profit tax receipts would be \$75,000,000 for the fiscal year 1920, and \$180,000,000 for the fiscal year 1921, and \$100,000,000 for the fiscal year 1922. This would make a total deduction of about \$355,000,000.

Mr. HAWLEY. And that does not give any estimate of the refunds in taxes already collected?

Secretary HOUSTON. That is the deduction, as I understand it, from previous estimates. It is possible that it might run to half a billion dollars. I can not now tell what the net operations will be under existing appropriations and taxes.

We do not know what burden the recent railroad legislation will impose. We do not yet know what demands the railroads, under the law, will make upon the Treasury. There is no way of exactly estimating them or those of other agencies whose operations are not sufficiently defined at present.

Mr. HAWLEY. Mr. Secretary, suppose Congress should think it right to enact legislation providing some measure for adjusting compensation for the ex-service men and women, and should levy taxes sufficient to meet it extending over a period of 1, 2, or 3 years, or whatever period might be necessary, could we finance the situation by the sale of Treasury certificates of indebtedness, in anticipation of taxes?

Secretary HOUSTON. That would depend upon the extent of the provision Congress made, and on what Congress will do with respect to taxes in the future.

Mr. HAWLEY. Suppose the amount should be approximately two billion, and the taxes should be levied to collect that within two years, would it be possible to finance that situation by the issuance of Treasury certificates of indebtedness?

Secretary HOUSTON. Our present demands are such as to absorb all our taxes. I am not prepared to say offhand just what point—

Mr. HAWLEY. This would be a new tax?

Secretary HOUSTON. I should say that we could not meet the situation by certificates anticipating present taxes.

Mr. TILSON. It has been proposed that this money be raised by increasing taxes on large incomes, say above \$50,000. It has been proposed this morning by one gentleman, Mr. Summers, of Washington, this tax be placed upon luxuries. I should like to ask you as to the practicability of these methods of raising this increased amount of revenue, and the general effect of an attempt to raise it by such means?

Secretary HOUSTON. Mr. Adams, who has been dealing with that matter, is here in the room. I should be glad if the committee would ask his views on those two points.

Mr. TILSON. I shall defer the question until Mr. Adams is heard.

Mr. HAWLEY. It has been proposed that additional taxes be levied on large incomes, beginning with incomes from \$25,000 or \$50,000 per year, and a graduated tax be levied upon such incomes. What

do you think of that? What would be your judgment on that proposition?

Secretary HOUSTON. I should have to look more carefully, Mr. Hawley, than I have had opportunity to do so far into the effects of present taxation on those incomes, to see whether it would yield more revenue or whether it would dry up these sources of revenue.

Mr. HAWLEY. That is, whether it would cause them to put their money into tax-free securities?

Secretary HOUSTON. Yes; Dr. Adams has these matters definitely in mind and could answer those questions more satisfactorily than I can.

I have heard proposals to cover the expenditure by placing Government paper in the hands of the soldiers. I should regard this as very much more vicious than a proposal to issue bonds or to raise taxes.

Mr. GARNER. Mr. Secretary, if I understood you correctly, you expressed the thought that rather than issue new bonds, float new securities, or to levy new taxes, probably the better method to reach normal conditions would be to look over the present taxing system and readjust that, in view of our experience in the last year or two?

Secretary HOUSTON. Yes.

Mr. GARNER. Could we, with the present anticipated expenditures, materially reduce taxation?

Secretary HOUSTON. Could we materially reduce taxes?

Mr. GARNER. Yes; materially reduce the taxes that we are now levying? I am not speaking of the need of readjusting the taxes, but I am trying to get at the amount of taxes that we are now collecting compared with the amount of probable expenditure for the next year or two, to ascertain whether or not we could reduce our total collections.

Secretary HOUSTON. Under existing laws?

Mr. GARNER. Yes.

Secretary HOUSTON. On the basis of the present prospective expenditures, I should say, "No."

Mr. GARNER. We can not materially reduce taxes under the present prospective expenditures?

Secretary HOUSTON. No.

Mr. HULL. You mean the amount of the present taxes?

Secretary HOUSTON. Yes; from existing law.

Mr. GARNER. But you do believe they should be readjusted?

Secretary HOUSTON. I think it is not unlikely, in the light of experience with laws that were necessarily somewhat hastily framed, that we could make modifications which would cause the burden to rest less heavily on the people and on business. I should be very glad to submit suggestions to the committee, if it desires them.

Mr. GARNER. In other words, if the committee decided to consider the question of readjusting our tax laws you would be very happy——

Mr. HOUSTON. I would be very happy to place the Treasury at the disposal of the committee.

Mr. WATSON. I understood you to say that if we issued \$2,000,000,000 more of bonds it would create a very grave financial situation?

Secretary HOUSTON. That is my judgment.

Mr. WATSON. What is the estimated wealth of our country to-day?
Secretary HOUSTON. I have seen it estimated from \$230,000,000,000 to \$250,000,000,000.

Mr. WATSON. I understand that our debt is \$25,688,000,000.

Secretary HOUSTON. Approximately.

Mr. WATSON. Our wealth is ten times greater than our debt. After the Civil War our debt was \$4,000,000,000 and our wealth was \$16,000,000,000, so our debt was one-quarter of our wealth. We paid that debt in 20 years, and the South was devastated on account of the war. Why is it to-day, when our national wealth is ten times as great as our debt, that the issuance of \$2,000,000,000 of bonds would create a serious financial situation to our people?

Secretary HOUSTON. I have already endeavored to answer that, Mr. Chairman, by saying that in my judgment floating \$2,000,000,000 of bonds at the present time would cause further credit expansion and increase the cost of living. It might cause a grave credit situation. I do not assert that it will. I am not prophet enough for that; but it would certainly very greatly increase the present strain. In a measure, the same result would follow from further addition to taxes.

I am not prepared to say that the people of the Nation could not pay additional taxes to the extent of \$2,000,000,000; but I do say that it would very greatly add to their burdens and would increase the cost of living. Whether they desire to do so, or not, or whether you desire to ask them to do so, is a matter for you to determine.

Mr. WATSON. Do you not think we are in a better position to-day than we were after the Civil War?

Secretary HOUSTON. I am not prepared, offhand, to answer that question.

Mr. GREEN. Let me make a suggestion right there in reference to the Civil War, and that is, as you will doubtless remember, that in less than a year after the Civil War our revenue exceeded our expenses, and in a few years our revenues were so much in excess of our expenditures that Congress hardly knew what to do with the money, and a commission was appointed to adjust matters in some way so that the Government would not be getting in so much money and tend to extravagance and waste. The immediate trouble shortly after the war seemed to be to in some way cut down the revenue.

Our great trouble at this time is to find revenue to meet the expenses.

Secretary HOUSTON. I assume, as a matter of course, if we come through the present strain, which is considerable, if the Congress cuts expenditures down to the minimum and retains in substance the present tax arrangement, modifying it as may be found wise, that in a comparatively few years we shall be on a much more satisfactory basis; but I do not know what the Congress will do in respect to appropriations in the next few years or what it may do in respect to taxes. I do know this: Our pre-war budget was approximately \$1,000,000,000. Because of the growth of the Nation, because of military and naval expenditures on a scale which the war has taught us must prevail, and because of the large interest payment on our existing debt, the national budget for several years will be in the neighborhood of \$3,500,000,000. That is a crude estimate, but it is probably not much out of the way. We shall be compelled to

keep taxes up to a very high point for the time being. What the conditions will be in two or three years from now I have no means of knowing.

Mr. FREAR. What is your idea, Mr. Secretary, in regard to the proposal of Secretary McAdoo to reduce the taxes a billion dollars or thereabouts and issue bonds? Did you care to be heard upon that? That is a proposition that is before us.

Secretary HOUSTON. I am not aware that that proposal has received any approval from the Treasury.

Mr. FREAR. I know, but I am inquiring if you would care to be heard on it. Do you care to speak in regard to that?

Secretary HOUSTON. My own judgment is that the thinking of the Congress should be directed to the tasks of reducing expenditure to the minimum consistent with the public interests and of simplifying the tax systems, so far as possible. We should continue to cover a large part of the expenditures with taxes, as at present, and should reduce taxes as expenditure falls.

Mr. FREAR. You do not want to be quoted as approving or disapproving that proposition?

Secretary HOUSTON. I do disapprove it.

Mr. FREAR. You suggested to the committee a few moments ago that it would be a vicious proposition to place bonds in the hands of the individual soldiers. For what reason especially would it be vicious, over and above the idea of floating bonds by the sale?

Secretary HOUSTON. Placing bonds in the hands of soldiers would be floating them.

Mr. FREAR. Of course, there is some contention that a large per cent of the soldiers would retain the bonds. I was wondering if there was any exceptional reason why it would be vicious to place them in their hands. Do you mean that every bond sale would be vicious?

Secretary HOUSTON. Yes; at present; certainly on the scale proposed.

Mr. FREAR. We have had as a committee these four specific propositions put to us. The first is this question of raising funds through increased income taxes which have been suggested, for instance, on incomes in excess of \$25,000, which would reach something like 49,000 holdings. Then the next proposition has been suggested by Mr. McFadden, of the issuance of bonds based upon the foreign bonds, the British bonds, and others. The third suggestion, of course, is the general issuance of bonds, and the last is a consumption tax which has been proposed. Do you care to discuss those different propositions?

Secretary HOUSTON. I would rather not undertake, without time for consideration, to discuss the income tax or a consumption tax.

Mr. FREAR. Now, taking the second proposition, which, of course, is based upon foreign bonds as security, which we were supposed to hold, can you tell the committee in what form those obligations exist, and about the amount of them? I understand obligations are in the neighborhood of \$10,000,000,000.

Secretary HOUSTON. \$10,000,000,000; yes.

Mr. FREAR. In what form do they exist? I am trying to learn whether Mr. McFadden's proposition is practical, in view of the situation.

Secretary HOUSTON. What is that proposition?

Mr. FREAR. His proposition is to have the British Government, or any Government that is considered responsible, issue their bonds and have them used as the basis for the issuance of certificates or bonds to the individual soldiers.

Secretary HOUSTON. Pyramiding a debt? I do not think that would get us anywhere. I think that is simply a proposition to increase the debt.

Mr. FREAR. What is the condition in regard to those obligations? How are they evidenced?

Secretary HOUSTON. I shall have to ask Mr. Leffingwell to answer. I have not had an occasion to examine them.

Mr. LEFFINGWELL. They are formal obligations which are in the vaults of our Treasury, signed by the authorized representatives of those Governments.

Mr. FREAR. That is, you have received letters of assurance to that effect?

Mr. LEFFINGWELL. They were passed upon by the Secretary of State or the Acting Secretary of State. He determined who was authorized to sign them.

Mr. FREAR. Is it the purpose to put them in the form of some specific obligation, some specific bonds from foreign Governments, or what is the purpose?

Mr. GARNER. The law directs how it shall be done.

Mr. LEFFINGWELL. The purpose is stated in the acts under which the loans were made, and negotiations for transforming the demand obligations to time obligations are in progress.

Mr. FREAR. That has not been done up to this time?

Mr. LEFFINGWELL. It is now being done.

Mr. TREADWAY. You hold the original form of the obligations as given when the money was first loaned?

Mr. LEFFINGWELL. Yes.

Mr. FREAR. Mr. Secretary, can you tell us about how the French bonds are quoted today?

Secretary HOUSTON. No; I do not remember.

Mr. FREAR. I asked that for this reason: The Federal obligations, as we understand it, are about \$34,000,000,000, and their ability to pay is about one-third that of the United States. Our obligations are about 60 per cent of their obligations, that is, after deducting a reasonable amount of the foreign indebtedness to our credit. That would put our obligations on a basis of about one-fifth of that of France. In view of our wealth, as brought out by Mr. Watson, do you believe that the issuance of \$1,300,000,000 or \$2,000,000,000 of bonds would seriously embarrass conditions here in this country?

Secretary HOUSTON. I do.

Mr. FREAR. Will you explain why?

Secretary HOUSTON. I have already undertaken to explain why. It would simply tend to bring us into the very sad condition in which many of the continental European nations find themselves. The great difficulty confronting them is that they have a vast credit expansion, that they have not resorted to taxation, and that they have been pursuing fiscal policies which have resulted in mounting prices to the extent, according to the latest calculations I have seen, of 300 per cent, as against about one hundred and odd per cent here.

Mr. FREAR. Are their living expenses higher than ours?

Secretary HOUSTON. That is the estimate I saw yesterday. Of course, I do not know that it is reliable, but I do know, or I think I know, that the great trouble confronting continental Europe particularly to-day is that nations there have been trying to meet expenses largely by credit devices; by bad fiscal methods; that they have not been trying to balance expenditures sufficiently by taxes; that they have not kept down expenditures to balance their budgets; that there has been increasing inflation, and that the unfortunate financial condition of Europe has had its effect both on Great Britain, which is in a much sounder condition, and on this country, and has contributed to our difficulty.

For us to pursue a similar policy at this time would to that extent put us in a class with those nations which are struggling to back-track. You doubtless noticed in yesterday's paper a statement from the Economic Council of Europe, which in most respects was a very admirable and sound document, calling upon the nations of Europe to pursue a fiscal policy somewhat similar, in reality, to that we pursued during the war, and to take somewhat the same steps we are trying to take now to keep things under control, urging them to stop fighting, urging them to reduce their military expenditures, urging them to individual and public economies, urging them to stop the bad fiscal practice of issuing Government, Provincial, or municipal obligations; urging them to tax, etc., with a view to get on their feet.

Of course, they could go ahead and issue securities until they became as worthless as the paper they were printed on. Just to the extent that we pursue that policy we shall get into the condition in which continental Europe is to-day.

Mr. FREAR. There was a suggestion that you made, Mr. Secretary, in regard to the high cost of living. Have we issued any new obligations in the last year?

Secretary HOUSTON. We have issued some tax certificates in anticipation of taxes.

Mr. FREAR. Would those have any effect, do you think, on the high cost of living? The reason I ask is simply because expenses have gone up during the last year, and I am wondering if it had a direct relation. Of course, it has an indirect relation.

Secretary HOUSTON. Perhaps the continuance of any sort of credit device, even in anticipation of taxes, may have some effect, but I should say it would be very small.

Mr. FREAR. The average man to-day seems to be getting all he can, irrespective of what the obligation of the Government may be.

Mr. GREEN. I thought, Mr. Secretary, that the cost-of-living curve had not varied materially in the last year.

Secretary HOUSTON. I think there is a tendency in certain directions downward, and I should expect a further movement in that direction, provided the world keeps its head and does not pursue policies which will inevitably increase it, such as are being suggested.

I do not want to take the time of the committee to enter upon a discussion of the factors that have led to the present scale of prices or the present cost of living. That, I imagine, would carry us too far afield, but it is very clear to my mind, the direction in which we must proceed if we wish to retrace our steps. It would involve discriminating economy on the part of private individuals and public

bodies and discrimination on the part of business men and bankers as to the enterprises they will promote. They can freely embark upon enterprises in anticipation of high profits either for foreign purposes or domestic, which will set up pressure for credit expansion which we are trying to control. They can continue a course which would ultimately lead to collapse; but that is what we must not permit, and there is no reason why we should, if private and public bodies, including Congress and legislatures, will pursue a sound fiscal policy.

The CHAIRMAN. Mr. Secretary, two minutes ago the gentleman from Texas asked you if you thought that taxes could not be reduced a little below the amount now being raised by the Government, and you answered that you did not think so. I agree with you. If Mr. McAdoo were correctly quoted, he recently stated that taxes should be materially reduced. I must mention these things to bear out that statement and my opinion with yours. Because of the loss of revenue in the amount of interest due this Government from the Allies on loans made to them, of about \$475,000,000 a year, as I understand they are asking for the deferment of payment on this interest, one, two, or three years, a like amount of money must be provided for the Treasury on taxes to that extent, because we had depended upon getting that money as a part of our revenue to meet our annual expenditures. Will you tell me, Mr. Secretary, how many certificates of indebtedness are now outstanding, in round numbers?

Secretary HOUSTON. I think about \$3,000,000,000.

The CHAIRMAN. With the \$3,000,000,000 deficit this year staring us in the face, an increased Army and increased Navy, and \$3,000,000,000 of short-time certificates outstanding which either must be renewed or paid in a limited time, I agree with you that there is not much possibility of reducing taxes in the near future. I think the ex-Secretary, Mr. McAdoo, forgot those things. He is so absorbed in other matters that he overlooked these, but he made that statement.

Secretary HOUSTON. I think it would be unwise to embark on a policy of substituting credit devices for the present taxes. I think it would be unwise to tamper with the sinking fund arrangement. It is very easy to do that sort of thing, but usually nations which begin to temporize get into trouble.

Mr. GARNER. Mr. Secretary, you do believe, however, in view of the fact that we have lost considerable revenue by the Supreme Court decision and in view of the fact that the Allies can not pay the interest due on their loans, that you will, with the present system of our taxes, be able to take care of the Treasury in the next fiscal year?

Secretary HOUSTON. In the light of present action?

Mr. GARNER. I say in light of the present prospective demands upon it.

Secretary HOUSTON. And with the hope of very careful future action.

Mr. GARNER. On the part of Congress with the appropriations.

Secretary HOUSTON. Yes.

Mr. GARNER. Now, Mr. Secretary, I want to get your opinion, as far as you can give it, with reference to the effect it would have on the outstanding bonded indebtedness of the United States if we should attempt to issue \$2,000,000,000 worth of bonds at a rate of interest that would make them sell at par when put on the market.

What is your best judgment as to the effect it would have on the country on these \$24,000,000,000 of outstanding indebtedness?

Secretary HOUSTON. Mr. Chairman, I am not prophet enough to indicate the exact figure, but I should say it would mean a very considerable lowering of the value of our present outstanding indebtedness. The lowest bond now is about 89 and a fraction. Others run as high as 97.50. Whether it would carry the lowest down to 80 I do not know, but I think it would make a very considerable depression.

Mr. GARNER. Mr. Secretary, if the Congress did decide to issue bonds of any character, would you care to express an opinion as to whether they should be tax free, or whether they should be subject to surtaxes?

Secretary HOUSTON. I should not like to answer that, offhand.

Mr. RAINEY. What would be the economic effect of this sort of proposition, in the event that Congress should determine to reimburse the soldiers or give them adjusted compensation, or whatever they call it, and we should adopt legislation providing for a bond issue covering a comparatively short period of time, say from three to five years, with an interest rate sufficient to keep those bonds at par, and with a consumption tax or sales tax levied for the period of time the bonds run, with the proceeds from the consumption or sales tax segregated for the purpose of meeting the interest and also the principal of those bonds at maturity, starting on the scheme now when the patriotism aroused by the war has not entirely disappeared, calling the bond issue a service issue to reimburse the soldiers, and arranging for it in a short time? Of course, the taxes would be burdensome to start with, and burdensome while they last, but what would be the economic effect of a proposition like that? What effect would it have on our outstanding bond issues?

Secretary HOUSTON. I think it would lead to some depression. The course you suggest would add to the expenses of the Nation. It would therefore add to the cost of living, and the issue of any form of obligation, no matter how secured, would, in my judgment, form an additional foundation for credit expansions which would add to the difficulty we are confronted with.

Mr. RAINEY. I agree with you, Mr. Secretary. One more question. In discussing the fiscal condition of the country now it is usual to compare with conditions which prevailed just after the Civil War, and to call attention to the fact that the national indebtedness now per capita is not more than it was then or is not as much, and also to call attention to our tremendous development and national wealth at the present time as compared with that period. Is it not true that after the Civil War our indebtedness of a public character, upon which the people of the country were compelled to pay directly or indirectly interest or taxes, was negligible as compared to what it is now? In other words, the indebtedness assumed by our national Government is not all the debt the people of this country carry. At the present time there is the railroad indebtedness and municipal indebtedness, the indebtedness of the States, the indebtedness of school districts and road district indebtedness, all of a public character and all drawing interest and all increasing the cost of living, amounting now, as I have seen it estimated, to over \$50,000,000,000 in addi-

tion to our national debt, making our debt \$80,000,000,000. Is it not true that at the expiration of the Civil War we did not have those elements of indebtedness of a public character to which I have referred, to anything like the estimate we have now per capita.

Secretary HOUSTON. Certainly; nothing even approximating it in volume; but I am drawing on my recollection merely from former studies. I should say, however, that the aggregate of State and local and municipal issues of that sort within the years immediately following the Civil War did not approximate what we now have.

Mr. RAINEY. Which is, in all, \$50,000,000,000 now, in addition to our \$30,000,000,000.

Secretary HOUSTON. Yes. Of course, it is well known to all of us that the Nation did not begin to get on a normal fiscal basis or financial basis until after 1879. It was not until 1875 that Congress decreed that specie payments should be resumed in 1879, and that would not have taken place then if it had not been for the opening up of the West and the flow of commodities. It was not until 14 years after the war that we actually resumed specie payments and got off of the paper basis with all the disturbances.

Mr. KITCHIN. The paper dollar did not go to 100 cents until 1879; it did not go up until the declaration of 1875—was it 1875 or 1877?

Secretary HOUSTON. Congress passed an act in 1875 providing for resumption in 1879.

Mr. KITCHIN. Was it 1875 or 1877?

Secretary HOUSTON. I would have to check my memory on that.

Mr. GARNER. It was 1875.

Secretary HOUSTON. That was a period of 14 years. Now, we are discussing doing these things within a year in addition to what we have done in three years. When you speak of the Civil War period and think of the disturbances that followed it, you think of the period from 1865 to 1880, and it took the country that long to readjust. It took some parts of the country longer than that to readjust. I should say that the South, for instance, did not get back to where it was economically in 1860 until about 1881 or 1882. But what I think we ought to do is to try to save this country the pains and penalties which would result from false steps in finance, the pains we would have to suffer for a generation, in addition to what we will have to suffer, if these financial problems are not prudently handled.

Mr. GARNER. This would merely add to it?

The CHAIRMAN. Mr. Secretary, I think I am correct in saying that after the Civil War, there being at least one third to two thirds of the population in the South in great financial straits, the country having been destroyed by the ravages of war, and so on, that the indebtedness of the country at that time, the public debt of the country at that time, in proportion to the wealth per capita, was greater than the public debt at the present time, in proportion to the wealth of the Nation per capita to-day; in other words, that we are in a better condition to-day to pay the debt we now owe by far than we were right after the Civil War. I think I am somewhere nearly correct in that statement, but whether that is true or not, we are in a better financial condition now, a great deal, to meet our obligations than we were then, because we had had the war upon our own soil at that

time, a great deal of property had been destroyed, and the production of the country had greatly decreased, whereas during this war we have suffered nothing of that kind, and our productive capacity is greater to-day than before the war.

I thank you, Mr. Secretary. It was very kind of you to come before the committee, and I am very glad to have heard what you have had to say.

Secretary Houstox. There is nobody, Mr. Chairman, who has a higher estimate of the power of this country than I have. I think it takes a very alert man to keep up with it. But we must not forget that this shock that we are trying to weather came upon us suddenly and has been with us for only three years, and that within that time this Nation expended a sum greater by \$10,000,000,000 than it had expended since the Constitution was drawn up.

The CHAIRMAN. Yes, sir; I know that.

Secretary Houstox. When the Civil War came on we had been doing business on the simplest sort of basis, and it really taught us the power of organization and development. The burden was not very heavy, considering the fact that a comparatively few people were pioneering a continent. But we have reached a somewhat more sensitive and delicate financial condition. You have asked me to present my opinion simply as to the financial and fiscal situation of the Nation, and I have tried to do my duty by telling you that in the jam confronting us we ought to be careful, very careful, about adding to the burden of the people, about increasing prices, adding to the cost of living of 110,000,000 of people and depressing the bonds bought by 20,000,000 people, arousing apprehension on the part of the holders.

The CHAIRMAN. Mr. Leffingwell, do you want Mr. Harding to be heard now?

Mr. LEFFINGWELL. Yes, sir.

The CHAIRMAN. Mr. Harding, we will be very glad to hear you now.

Mr. HAWLEY. May I ask Mr. Leffingwell one question?

The CHAIRMAN. Yes.

Mr. HAWLEY. What was the largest amount of certificates of indebtedness outstanding at any time?

Mr. LEFFINGWELL. It was approximately \$6,000,000,000 just before the Victory loan.

STATEMENT OF R. C. LEFFINGWELL, ASSISTANT SECRETARY OF THE TREASURY, BEFORE THE COMMITTEE ON WAYS AND MEANS OF THE HOUSE OF REPRESENTATIVES, MARCH 11, 1920, ON THE SOLDIERS' BONUS PROPOSAL.

Mr. LEFFINGWELL. Mr. Chairman, I was present this morning, and shall address myself to the questions you asked of the Secretary. I do not know that there is anything that I can add to what he said. Perhaps I shall only succeed in saying the same thing over again.

I understand the committee wants to know my opinion as to various financial plans proposed for financing a soldiers' bonus should Congress determine to grant one. Perhaps the simplest way will be to follow the process of elimination, and I shall speak in inverse order of choice of the various methods.

Very clearly, to my mind, the worst thing you could possibly do would be to give away bonds or other securities of the United States to the soldiers. I think that method should be eliminated first. No one in good credit ever pays his bills by distributing his promissory notes. Those governments which have been unwise enough or unfortunate enough to be obliged to adopt that method have been subjected to enormous increases in claims against them and to grave impairment of their credit.

Actually I take it that what is required in this situation is money for the soldiers. Assuming a plan which contemplates the distribution of as much as \$1,000 to certain men who were longest in the service, I do not conceive that it is in their minds or in yours to endow them by the payment of \$50 a year. I do not conceive that the demand made upon you is that you should present, say, a long-time bond to be retained by the soldier in order that he may enjoy a revenue of some \$50 a year from it.

Mr. DICKINSON. From the bond?

Mr. LEFFINGWELL. From the bond. If I understand the proposal, it is based upon the assumption that the soldiers need this money as money to put them in a better financial condition at present.

The CHAIRMAN. For their immediate needs.

Mr. LEFFINGWELL. Similar to what they conceive they would have been in if they had stayed at home and had been engaged in productive labor. Now the actual effect of giving them bonds does not give them cash for their present need, and the obvious thing for them to do is to sell the bonds. You put the bonds in their possession without having made any effort to create a market for them, and no investment demand for them will exist.

You will put out, say, at the highest figure I have heard mentioned, \$2,000,000,000 of securities of the United States, not sold to investors, not placed in the hands of people who have saved the money to buy them and who are, to begin with, reluctant to part with them for less than they cost; but so much depreciated money, money that is not good for the payment of current bills at its face value. You will not satisfy the soldiers, because you will have given them something they can not cash readily. There isn't any rate of interest thinkable which will serve to place and keep a bond so distributed at par, simply because the process of distribution among investors has not been undertaken. The Liberty loans were characterized by an intensive drive at the money of the investor. When you issue bonds you should seek to find those who have saved capital to invest in them. If you distribute them not to men who have saved capital but to men seeking money to spend, to men who by very definition need the bonds because they have no saved capital, there will be the greatest recrudescence of the scandalous business of the sharks who preyed upon the Liberty bond holders after the armistice. It will become, to my judgment, a national scandal, and the inevitable consequence of it will be disaster to all of us. You must not play tricks with the credit of the greatest Nation on earth; and a bonus in bonds is a credit trick which is unworthy and sure to be destructive. Its influence upon the holders of Liberty bonds—upon 20,000,000 Americans who did their part to win the war by buying Liberty bonds until it hurt, because they were told by all of us to buy Liberty bonds as a patriotic duty—will be disastrous. Those

people are trying to hold their bonds. They have seen them go down in the market, some below 90. The Victory notes of the last issue are selling on a 5.60 basis, or thereabouts. The punishment which has been administered to the patriotic citizens, who subscribed for those loans, by the existing credit stringency is sufficiently severe; and we ought not, of all things, to accept the method of meeting the problem which the ex-service men present which would be most disastrous to the Government's credit and therefore to the values of existing securities.

The second method proposed is to sell bonds or certificates of indebtedness.

In answer to a question this morning I said the maximum amount of certificates of indebtedness which was outstanding at any one time was approximately \$6,000,000,000. That was just before the Victory Liberty loan campaign came to a conclusion. The bulk of those certificates were refunded into the Victory Liberty loan. They were issued in anticipation of the Victory Liberty loan. We had an organization of 2,000,000 patriotic people who were giving their services to the Government in connection with the Liberty loans. After the armistice we kept that organization together by the express promise made to the organization and made again to the country that the Victory loan would be the last Liberty loan. The distribution of those certificates of indebtedness was predicated upon the fact that there would be a Liberty loan to pay them off. It would be quite impossible to have any similar amount of certificates of indebtedness outstanding now upon terms not injurious to the credit of the Government and to the general credit situation.

Mr. HAWLEY. How would it do to increase the taxation to meet that situation?

Mr. LEFFINGWELL. I was going to come to that after I got through with the bonds, on the theory of elimination, because clearly the taxation method is the least objectionable.

Mr. HADLEY. When do the first of the Liberty bonds mature?

Mr. LEFFINGWELL. The third Liberty bonds mature in eight years. The Victory notes mature in three years and two months.

Mr. HADLEY. Will we have to have a popular subscription to take that up?

Mr. LEFFINGWELL. That is three years and two months from to-day. I don't want to undertake to say how you are going to deal with that loan at the present time. Clearly the process of amortization is an essential step in the problem of dealing with that loan.

Mr. KITCHIN. If they were due to-day, Mr. Leffingwell, it would be almost impossible to sell four or five billion dollars' worth of bonds now, wouldn't it?

Mr. LEFFINGWELL. No; not impossible; but if a large loan had to be floated to-day, I think the only thing to do to-day would be to announce that war conditions had returned and the country would have to be called upon to drop its other business and save the Nation from itself, as three years ago we undertook to save it from the Hun. You can't sell billions of anything on a commercial basis to-day.

Mr. HAWLEY. Mr. Leffingwell, you do not believe we would be called upon for that?

Mr. LEFFINGWELL. Never in the world. We ought to begin to pay our debts. The best way of keeping in good credit——

Mr. HAWLEY (interposing). As soon as we can.

Mr. LEFFINGWELL. Yes. The best way of keeping in good credit and not paying twice for everything we get is to pay as we go. I think the very moderate measures which have been taken looking to that end ought to be kept up in full vigor. What I meant to say in answer to Mr. Kitchin, Mr. Chairman, was that the dimensions of the operation are so great that unusual measures must be taken to put through such an operation. The old way of selling bonds sufficed to reach a few hundred thousand investors. It is calculated that before the war there were some four hundred thousand bondholders in the United States. The Liberty loan organization reached some 22,000,000 people. Now, a truly successful distribution of bonds requires an herculean effort. What may be the conditions in respect to capital and credit three years from now no one can tell. Obviously, to sell notes upon the maturity of notes is easier than to sell new bonds. There exists automatically a market, and the problem would be to find out how to reach it.

Mr. FREAR. That is the very subject, Mr. Leffingwell, that we want to hear about. Mr. McAdoo, who has just left the office of Secretary of the Treasury, suggests that we sell a billion and a half in bonds. Has he any organization, or what is his proposal in floating this bond issue, can you tell us?

Mr. LEFFINGWELL. No.

Mr. FREAR. Do you think that was an unwise proposition to make? He is a man of considerable standing in the financial world and he has made this suggestion just now. We have it before us.

Mr. LEFFINGWELL. I can only say I do not agree with him.

Mr. FREAR. But doesn't that answer, in his judgment, in a way, your argument; because there is no organization to which to float the bonds to-day, and he is making this proposal seriously, I take it, that we float a billion and a half dollars, and that is more than has been contemplated by some of the soldiers' bills that have come before us.

Mr. LEFFINGWELL. You will have to cross-examine Mr. McAdoo as to the methods for carrying out his plan before you cross-examine me as to whether it is a good one.

Mr. FREAR. I don't care to cross-examine. I just wanted to see if you knew what organization he had for floating the loan.

Mr. LEFFINGWELL. I want to be perfectly clear about it. I do not think it is wise or feasible to carry out the plan which was suggested by Mr. McAdoo. I do not think that the Government of the United States should fail to carry out the terms of the bond purchase fund and sinking fund created in the Liberty loan acts, on the faith of which those bonds and notes were sold. And I don't think the Government of the United States should borrow money to meet its interest charges.

Mr. FREAR. But you do not propose to reduce taxes as he proposed?

Mr. LEFFINGWELL. I don't believe the taxes should be reduced until Congress determines that the expenditures of the Government shall be less than the amount provided by those taxes after meeting interest charges and the sinking fund created by the Victory loan act. I think not only that that is as it should be, but that the attempt to raise money on the nonpayment of sinking fund and interest would be injurious to the credit of the United States.

Mr. KITCHIN. Just for my own information—the Treasury Department does propose to begin to set aside the amount contemplated by the act as a sinking fund?

Mr. LEFFINGWELL. It does; yes.

Mr. KITCHIN. And keep that intact if it can possibly do so?

Mr. LEFFINGWELL. Nothing can stop the Treasury Department except the failure of the Congress to keep its expenditures within its revenues.

Mr. KITCHIN. We have got to collect enough taxes to pay our expenditures plus the amount of sinking fund.

Mr. LEFFINGWELL. Undoubtedly.

Mr. KITCHIN. If we don't raise that, you can't put aside a sinking fund.

Mr. LEFFINGWELL. The sinking fund was part of the arrangement.

Mr. GARNER. It was part of the contract.

Mr. LEFFINGWELL. I won't go so far as to say the contract, but it was part of the arrangements made by Congress for the purpose of inducing holders of these securities to buy them, and I regard it as a moral obligation of the highest sanction to keep faith with them, more particularly when the withdrawal of the support from the market which the sinking fund provides would cause further depreciation.

Mr. KITCHIN. There would be another attack upon the value of the bonds outstanding if we fail to provide for that sinking fund or wipe the sinking fund out.

Mr. LEFFINGWELL. That is my judgment.

Mr. DICKINSON. Right there, you speak of using this sinking fund. Can that be used for any purpose except the retirement of bonds?

Mr. LEFFINGWELL. None in the world. The suggestion was that it should not be used at all and the corresponding amount of taxes remitted.

Mr. GARNER. Mr. Leffingwell, it is my impression—I think the country so understood it—that when they gave their money to the Government and got in exchange these bonds, that it was part of the contract conferred by the statute itself, if not expressed in the bond, that you would create a sinking fund for the purpose of meeting these matters when they came due.

Mr. LEFFINGWELL. The terms of the sinking fund and of the bond purchase fund were quoted in the circulars upon which the securities were sold and they undoubtedly were relied upon by the purchasers of the securities and constituted a declaration in the most solemn form of the Congress of the United States that that particular method would be used toward gradual retirement of those bonds and notes, so that they should be protected in their investment to that extent. I may add that as a matter of public policy the best time to make a reduction of indebtedness, a program for the reduction of indebtedness, is on the conclusion of war. The deferment of it would result in its abandonment and perpetuate the burden upon the people of the taxes incident to the payment of the interest charges.

Mr. HAWLEY. You are discussing certificates of indebtedness?

Mr. LEFFINGWELL. What I was going to say with respect to certificates of indebtedness is this: Unless they were issued in accordance with the plan suggested this morning, in anticipation of taxes already levied, they would have to be issued in anticipation of a

Liberty loan. There ought not be any Liberty loan at this time. Although the creation of a Liberty loan, the effort to float a Liberty loan is, next to the imposition of additional taxes, the least disadvantageous way of handling it, it ought not to be done. It clearly ought not to be done at this time. And we can not issue certificates of indebtedness in anticipation of a loan that we don't dare to issue. We can't sell certificates of indebtedness except in anticipation of loans or taxes. The attempt to create instruments of credit without a very definite program for their payment would be futile.

The collection of additional taxes is obviously the only way of meeting this problem which would not add an unreasonable and almost intolerable burden to the financial requirements of the Government at this time.

Mr. KITCHIN. Let me ask you a question there. In your judgment what effect would an issue of \$2,000,000,000 of bonds put upon the market have upon the value of the present bonds in the hands of the 20,000,000 holders?

Mr. LEFFINGWELL. It would depreciate them proportionately. That brings out what is the real situation, the financial and credit situation to-day. And I am going to answer it, if I may, at some length, Mr. Kitchin.

Mr. KITCHIN. Then when you do that I want you to explain what effect it would have on prices, the inflation of prices, also.

Mr. LEFFINGWELL. The difficulty that the world confronts to-day seems to me to be about this: For five years we have destroyed more than we produced. The world lived beyond its income. We worked very hard destroying each other and the wealth that we created. We blew it up and ate it up; we took our young men and our strong men and set them about the business of destruction. Then because we could not save, we could not retard consumption commensurately, the governments of the world issued evidences of indebtedness against the wealth destroyed. Ordinarily an obligation issued against wealth destroyed is not attractive. It would not have been attractive as an investment proposal. Unfortunately, with the end of hostilities the condition which I have described of progressive impoverishment of the world continued and was even exaggerated.

We find the condition of Continental Europe to-day far from improved after 15 months of armistice. The world has become a very homogeneous community—homogeneous economically and financially, if not politically—and the destruction of wealth and the creation of currency and evidences of indebtedness in Europe has proceeded so far that prices have been affected all over the world. The actual amount of evidences of wealth that have been issued against the diminishing base of wealth has been increasing. You can't borrow wealth that doesn't exist. You can create credit instruments but you can't borrow wealth that doesn't exist.

The reason Liberty bonds and Victory notes are depreciated to-day is not to be found in the terms of the bonds and notes; it is not to be found in the interest rate or in the tax exemption; it is to be found in the fact that the demands for capital exceed the supply, and the demands exceed the supply because the whole world has been living beyond its income for five years.

The CHAIRMAN. Why does that condition have a different effect upon the various kinds of Government bonds that are outstanding to-day—3½, 4½, and 4¾ per cent bonds?

Mr. LEFFINGWELL. May I answer that in just a minute? I want to pursue this particular thought. I have it very distinctly in mind, and it is a part of the very thought I am trying to develop.

Now, the depreciation of all the securities in this country has been progressive. It results from the stupendous demands for capital which are being made upon America by the Old World, and to some extent by the new. Wealth is accumulating in parts of the world where capital is not saved and made available for new business. The wealth which India has accumulated is not made available; it is not a reservoir of available funds for the development of new enterprises in this country or reconstruction in Europe. The Argentine is as we were in our youth, a land of great resources and of great needs for further capital for the development of those resources. And so it goes all through the Far East, and South and Central America. The wealth which is accumulating is not accumulating in hands which will make it available for the capital requirements of the world. That is throwing upon American markets the demands of Europe. Hundreds of millions of dollars of good securities, some of our own issuing years ago, are being gradually forced back into our markets. The depreciation which exists in the market value of Liberty and Victory securities is less than the depreciation which exists in the average market value of high-grade bonds of industrial and railroad companies, and particularly of public-service companies. Of course, all those vary according to conditions.

Now, answering your question, Mr. Chairman, we have got a certain supply of wealth and we are trying to support upon that wealth a certain number of credit instruments. We can move about the relative position of any given security by the technical skill and ingenuity and devices which we adopt, but you can not support on that base any more than so many credit instruments. So when you ask me about Victory notes being higher than Fourth Liberty bonds, and the other variations in prices of Liberty securities, the answer is that they vary according to their terms, but all within that one single mass of securities, supported on that single base.

If you take a full glass of water and try to pour some more water in, some of the water that you pour in may go into that glass, but some other water has got to come out, just as sure as fate, and when you undertake to erect upon the base of existing wealth additional credit instruments you are going to do just what happens with the glass of water—something else has got to come off. Actually what will happen will be that the market value of the securities in the pile will be diminished about proportionately and you will have the same number of dollars' worth of securities exactly, piled up on that base, but they will all be of a reduced market value. Each individual security will be of a reduced market value.

The CHAIRMAN. Will you permit me to make a statement there?

Now, then, the glass is full of Government bonds.

Mr. LEFFINGWELL. And all kinds of other bonds.

The CHAIRMAN. And the fact is, when you put another drop of water in there, a $4\frac{3}{4}$ per cent bond comes out and a $3\frac{1}{2}$ per cent tax free bond stays in. That is the market condition to-day. Why does that extra drop of water cause the retention of the bond that draws the less amount of interest but is tax free, and throw off the $4\frac{3}{4}$ per cent bond that is subject to taxation?

Mr. LEFFINGWELL. We will have to change the metaphor for a minute, because nothing drops out. You do not cancel the $4\frac{1}{4}$ per cent bond. They all stay in. We must take something, unlike water, which will contract.

The CHAIRMAN. Mr. Leffingwell, I have been a money borrower all my life and I know that when my credit is strained is when the bank begins to think that I have borrowed about to the limit of my ability to pay, unless there is something about the security that I offer on which I am asking money. I don't think the Government's credit has reached that point where, because of the security back of the Government bonds these bonds have depreciated in value one below the other, or are selling at a price one below the other. That is what I wanted to illustrate to you at that point. I think you will agree with me.

Mr. LEFFINGWELL. I do.

The CHAIRMAN. I don't think our Government has reached the limit of its credit, where its securities will be depreciated because of the fear of the ability of the Government to pay.

Mr. LEFFINGWELL. No; not at all.

The CHAIRMAN. It is because of conditions set forth in the bond that I am trying to get through my head—to get information on.

Mr. LEFFINGWELL. I entirely agree with you, Mr. Chairman, the credit of this Government has not been strained to the limit; it has not been strained at all. There is no question of the soundness and strength of the finances of the Government of the United States. On the other hand, we are now engaged in considering what would be the effect of certain proposed methods of dealing with a very large expenditure, and what I am attempting to bring out is the fact that we can not, by issuing bonds or notes or levying taxes, add to the fund of wealth which exists in this country at the present time. The fact of the matter is, we have anticipated our income for a number of years—and we are proud of having done it, because we did it to win the war.

To illustrate from the recent stock dividend decision roughly what happens when you issue more bonds without creating new wealth: The Supreme Court, if I understand it, said: "You have simply issued a number of additional shares and have not changed the wealth of the stockholders; therefore the stockholder has had no income." What would happen if you should issue additional bonds before we were able to catch up with the excess of expenditure over savings would be that you would simply make a stock dividend, as it were. You would create a number of additional evidences of indebtedness without any increase in wealth, and the values in the whole pyramid would have to be marked down proportionately.

The variations in the prices of securities are due to a number of factors. One is the quantity of the issue in relation to the demand for it. That was well illustrated by the course of the market in the $3\frac{1}{2}$ per cent bonds of the first Liberty loan. The issue was limited to \$2,000,000,000 originally. Until Congress passed the bill which provided that future issues should be subject to surtaxes, those bonds were marking themselves down, and my recollection is that the market value of the $3\frac{1}{2}$ per cent first Liberty bonds had gotten down to 97 and a fraction before the second Liberty bond

act was passed. That was because there existed the anticipation of an unlimited further issue of exempt securities. After the second Liberty bond act their value, the thing that sustained them in the market, until recently when money became very high, was their scarcity value and the announced policy of the Government not to issue more of them.

I remember when this committee was questioning me about the Victory loan act—I think Mr. Kitchin asked whether the Government could not sell the entire loan at $3\frac{1}{2}$ per cent, tax exempt, and I said no. Now, what happened? We issued the Victory loan with full privileges of conversion, in accordance with the act, between a $3\frac{3}{4}$ per cent Victory note and a $4\frac{1}{4}$ per cent Victory note, one wholly exempt and the other subject to surtaxes. The issue stands now about four of the taxable $4\frac{1}{4}$ to one of the exempt $3\frac{3}{4}$. The holders of only about \$900,000,000 odd of those \$4,500,000,000 notes, which are interconvertible, were willing to pay 1 per cent for the privilege of total exemption. The market for exempt securities is limited. There is a limited number of people who are rich enough to be able to pay 1 per cent for the exemption. Now spread that total exemption over not two billion and a quarter of bonds and notes, as it is to-day, but over twenty-five billions, and the value of the exemption will be wholly imperceptible in the market quotations. The result of continuing the grand total exemption would have been that the money would have cost in interest charges just about the same amount and you would have lost whatever taxes you are now collecting from the holders of Government bonds. That, of course, is the smaller part of the argument. The major argument which the Treasury advanced when the second Liberty bond bill was presented to this committee was that there was a social injustice involved in creating billions of exempt bonds, carrying exemptions of variable value to the people who had them, because of the graduated surtax rates—that such issue in itself constituted a limitation upon and might ultimately effect an actual reversal of the policy of Congress in establishing a graduated surtax.

Have I answered your question according to my lights, Mr. Chairman?

The CHAIRMAN. Yes.

Mr. FREAR. Before you leave the bond question, Mr. Leffingwell, let us suppose that we only have \$2,000,000,000 altogether in Government indebtedness; but if the market outside offers a premium that is a more desirable investment on commercial paper for the purchaser, wouldn't in like manner these bonds depreciate in value? That is, doesn't the commercial world outside become a large factor in determining the value of these bonds?

Mr. LEFFINGWELL. Unquestionably.

Mr. FREAR. So that it is a question of where the money can be best placed by the investor. He seeks the best returns, considering security and all.

Mr. LEFFINGWELL. That is the situation. You are trying to support a certain amount of credit instruments on a certain base of wealth. You can get them in a different relative position with reference to each other, you can contract their values in dollar units, but you can't make the supply of real capital any greater than it is by any amount of human ingenuity.

Mr. FREAR. The valuation is made by means of comparison?

Mr. LEFFINGWELL. Undoubtedly. It depends upon the intrinsic value and the skill you exhibit in planning your securities what price you will get for them as against others; but the market level of all will be determined by the real wealth behind them.

Mr. FREAR. You spoke of the stock dividend decision and said in regard to that that there was no difference in the change of wealth. Supposing that the court had held that that was an interest or profit investment, would there be any difference then? If it is a profit that is realized from being a stock dividend? It is the same amount of wealth in existence, is it not? I am trying to get your illustration.

Mr. LEFFINGWELL. I was not trying at all to make a legal analysis of the decision; indeed, I have not made such a study of it as to enable me to do that. What I have in mind is this: A company has a capital stock of \$100,000 and assets which are worth \$1,000,000. Then, presumably, the book value of its stock is \$1,000 a share. They decide to make a stock dividend and issue 10 shares for 1. Nobody is any richer than he was before.

Mr. FREAR. Instead of declaring a profit?

Mr. LEFFINGWELL. The shares are worth just as much as they were before; no more. The thing that is in my mind is that America won't be any richer by our issuing \$2,000,000,000 worth of bonds; the only possible result will be that the existing instruments of credit will decrease in market value by an amount sufficient to enable space to be made in this pyramid to let in the new bonds.

Mr. TREADWAY. May I ask a question there, Mr. Chairman? May I see if I understand that idea, Mr. Leffingwell? We have now outstanding about \$25,000,000,000 of bonds?

Mr. LEFFINGWELL. Yes, sir; bonds and certificates and notes.

Mr. TREADWAY. Having to do with the war?

Mr. LEFFINGWELL. That is the gross debt.

Mr. TREADWAY. Now, if we should issue two billions more, that would be one-twelfth—one twelve-and-a-half part of what we now have—do I understand from your argument that you would expect to see the outstanding twenty-five billions depreciate in value that $12\frac{1}{2}$ per cent?

Mr. LEFFINGWELL. No; I would not go as far as that.

Mr. TREADWAY. Well, isn't that the line of your argument?

Mr. LEFFINGWELL. No. The Government instruments of credit are part of the whole mass of instruments of credit erected on this base of wealth. Government securities will be depreciated to a greater extent in proportion than any others, because the securities you issue will be those which will compete most directly with those Government securities outstanding, but the displacement will be in respect to the whole credit structure. Now, that brings me—if I have answered your question—it brings me to Mr. Kitchin's question.

Mr. GREEN. Just a moment there, if you will allow me; you said—and I agree with you—that the credit of the Government had not been strained at all, but what is the situation with reference to the general reservoir of loanable funds?

Mr. LEFFINGWELL. The situation is that there aren't enough to go around, and in order to get the same number of securities on the base

of real capital, they have to squeeze down each one a little. That is the reason that Panama threes, a very small issue—probably you remember it was greatly oversubscribed when issued—were selling at 88 and a fraction last month. It is simply because there are too many credit instruments outstanding and the demands upon American capital are too great. The consequence is that there must be a displacement or a shrinkage in the market value of the existing securities in order to put any others on the pile.

Mr. GREEN. That, as I understand you, spreads over all of the securities of the country?

Mr. LEFFINGWELL. Yes; but it affects most injuriously those which come into direct competition with those you are issuing—namely, the Government securities.

Mr. FREAR. As near as can be ascertained, what is the total amount, including Government securities, in existence—what would you say, in a general way, or could you offer an estimate of the amount of securities?

Mr. LEFFINGWELL. I should not dare to offer an estimate.

Mr. HAWLEY. On account of the stock-dividend decision, how much revenue that was collected for the year 1917 do you expect to be called upon to repay, and for the year 1918?

Mr. LEFFINGWELL. The Secretary made a tentative answer this morning on that.

Mr. HAWLEY. He spoke of the revenue for the year 1919, that it would be \$75,000,000; 1920, \$125,000,000; and 1921, \$100,000,000; but he did not state how much it would be for the year 1917 and the year 1918.

Mr. KITCHIN. Mr. Roper estimated that, but said it would be simply a guess.

Mr. HAWLEY. I did not know but what you had some figures. I wanted to know the refund that you would be expected to pay for the years 1917 and 1918.

Mr. LEFFINGWELL. I have a memorandum here which has been handed to me—I gathered as much information as I could hastily, but I can't vouch for it—from which I will read:

Deductions from estimated amounts of income and profits tax deposited during the fiscal years 1920 and 1921, due to the stock dividend decision of the United States Supreme Court.

FISCAL YEAR 1920.

Income collected on stock dividends in 1917.....	\$35,000,000
Income collected on stock dividends in 1918.....	35,000,000
	<hr/>
	70,000,000
Deduct additional income account of profits on dividend stock sales made during years 1917, 1918, and 1919.....	35,000,000
	<hr/>
Net deductions, account stock dividend income collected in 1917 and 1918.....	35,000,000
Add decrease in income and profits taxes in fiscal year 1920 account stock dividends.....	40,000,000
	<hr/>
Total deduction from income and profits taxes in fiscal year 1920..	<u>75,000,000</u>

FISCAL YEAR 1921.

Deductions from estimated amount of income and profits taxes on last two payments in calendar year 1920.....	\$30, 000, 000
Add decreased collection in first two payments of calendar year 1921 (or the last two payments in fiscal year 1921).....	150, 000, 000
Total deductions from estimated income and profits tax receipts (fiscal year 1921).....	<u>180, 000, 000</u>

This decision has only been down a day or two, and I don't want the Treasury to make itself responsible for any estimate of its effect. Generally, the consequences of such things are not fully understood until some time after they have been in operation.

Mr. HAWLEY. Is it safe to say that the total reduction of income including the repayment will be in the neighborhood of \$300,000,000?

Mr. LEFFINGWELL. I am not prepared to go so far as to say anything more than that these two estimates have been furnished to us by experts in the department, as tentative calculations. I don't think it is safe to say anything definite yet, Mr. Congressman.

The CHAIRMAN. These are really estimates.

Mr. LEFFINGWELL. Of course, the first thing we did Monday was to ask what would be the effect of the decision, and they have been making these calculations. But it takes experience to show the effect of a decision of that sort. There are compensations, undoubtedly, in additional revenue in other directions.

Mr. KITCHIN. But in the future don't you presume there will be a lot more of stock dividends issued and less cash dividends paid?

Mr. LEFFINGWELL. Yes; though that is a process that can only go to a certain point. The holders of the securities of large corporations are a good deal like the soldiers who want this bonus. They want money to spend and you can't substitute a stock certificate for hard cash very often without having the stock dragged down to a basis that is not very creditable. You can't go very far with that process.

The CHAIRMAN. Mr. Leffingwell, I assume that this is true, too, that while there is a large loss from the payment of taxes on those stock dividends under the decision of the court, there will be some increased revenue to the Government on the capital stock tax, on whatever additional stock may be issued as a stock dividend that heretofore did not pay a stock tax and will now pay a stock tax, of course, and in a small way the loss will be made up.

Mr. LEFFINGWELL. I imagine that will be in a very small way.

The CHAIRMAN. I do, too, but it will be some. Certainly if a very large amount goes out in stock dividends the stock tax will amount to considerable, but a small portion of the loss.

Mr. LEFFINGWELL. Yes; but profits will be realized by the people who receive those dividends, and there will be some compensation there.

The CHAIRMAN. Mr. Leffingwell, if you will permit me, I want to know whether you think I am right about that. The average stockholder in a corporation where there is a profit on hand or undivided profits or surplus, does not want that money to be transferred into a stock dividend if it does not actually need the money in the business, because when it has once been transferred into a

stock dividend, as the court said in its opinion, it is then removed absolutely from the stockholders for all time to come, until the corporation liquidates and begins to pay back a portion of the capital. Therefore, the average stockholder is not anxious to have the money transferred into a stock dividend instead of an actual cash dividend for that very reason. It removes it from him forever until the corporation begins to liquidate, then he gets back his money on his capital, but not until then.

Mr. LEFFINGWELL. I think the general appetite for stock dividends grows partly out of the expectation that the whole body of stock will ultimately sell on a higher basis after the dividend, partly on account of the reluctance of the average investor to pay a large premium. When shares sell on the market at a big premium, public interest in them decreases; there isn't apt to be the same public participation in dealings in the shares of a company whose stock has reached so high a figure that one can't get any considerable number of shares for a small sum of money. It is partly psychological. In some cases it grows out of an expectation of the continuance of the previously established rate of cash dividends with respect to the increased number of shares.

Mr. OLDFIELD. Kind of a training proposition, isn't it, Mr. Leffingwell?

Mr. LEFFINGWELL. Yes.

Mr. OLDFIELD. For example, I notice the General Motors Co. has divided up their shares. They were 250 a few days ago, and they have divided them up and are making them \$25 par value—selling certificates in some way in order to get the public interested in the shares and buying and trading in them. That is my understanding.

Mr. LEFFINGWELL. It is a fact that when the shares of any given company have reached a market quotation that is pretty high, that seems to exercise some restraining influence upon the public participation in that market, and that is one reason why stock dividends are declared and companies recapitalized.

Mr. GARNER. Mr. Leffingwell, let me see if I understand your conclusions. Now, as to the effect on the Treasury of the action of this committee and the Congress.

You believe, if I understand you, that the worst possible method to distribute \$2,000,000,000 worth of bonds, United States bonds, would be by issuing them direct to the soldiers?

Mr. LEFFINGWELL. Unquestionably.

Mr. GARNER. Unquestionably that would be the most disastrous process by which the Congress could distribute these bonds?

Mr. LEFFINGWELL. Yes. I don't think it is exaggerating to say that that would be disastrous in its effect.

Mr. GARNER. And to issue \$2,000,000,000 worth of bonds and sell them through the Treasury as we have sold bonds in the past would have a detrimental effect upon the securities of the entire country, and especially the securities now outstanding issued by the Treasury?

Mr. LEFFINGWELL. It would depreciate all of them.

Mr. GARNER. It would depreciate all of them, and especially these?

Mr. LEFFINGWELL. Especially Government securities and those of the Liberty loans.

Mr. GARNER. And to issue certificates of indebtedness of the Treasury Department would be impossible unless we provided or anti-

pated a bond issue in the future, or provided specially by legislation in advance for the collection of taxes to pay the certificates of indebtedness according to their face.

Mr. LEFFINGWELL. Yes; and in that case it would be extremely difficult.

Mr. GARNER. It would be extremely difficult, because certificates of indebtedness will not run more than 12 months?

Mr. LEFFINGWELL. Under existing law they can not run more than 12 months.

Mr. GARNER. Under existing law they can not run more than 12 months, so if you issued certificates of indebtedness under present law and provided for taxes, it must be collected within 12 months?

Mr. LEFFINGWELL. You would not be able to collect taxes enough to pay them this year. That would mean that in issuing the certificates we should have to plan to go on renewing them until we did get those taxes. That would not be a liquid certificate and therefore it would not be readily salable. The amount of certificates of indebtedness outstanding to-day, which will be reduced on the 15th of March out of the tax payments then to be made, is approximately \$3,000,000,000. That covers a year's income and profits taxes. One reason why we have been able to sell those certificates without a further advance in interest rates than has been made is that they are issued against taxes that have been levied and are now on our books, or will be, without any refunding. The Treasury was able to say in January that it had shifted its floating debt to maturities such that the certificates would be paid out of taxes when they matured. Now, if the Treasury were put back in the position it was in six months or nine months ago, or even three months ago, when it had certificates of indebtedness maturing with nothing to cover them at maturity, it would simply mean that every time the indebtedness matured the Treasury must make a bargain according to the existing credit conditions at the time. The very existence of this bulk of uncovered maturities would drive interest rates up, and the transaction would be improvident in the extreme under the existing circumstances. The thing to do, if it must be done, is to levy taxes payable within the year in which the disbursement is to be made.

Mr. GARNER. Now, Mr. Leffingwell, I don't believe you have discussed the probable effect upon the market price of products of the country, or the effect upon the credits of the country, of the issuance of \$2,000,000,000 worth of bonds.

Mr. LEFFINGWELL. I was trying by a discourse, which I am afraid was unconscionably long, to lead to that point. When we recall that we have got an existing base of wealth and that what we are going to try to do is to declare a sort of a stock dividend, it simply means that the buying power of the dollar in everybody's pocket is going to be decreased by just the amount of the additional payments that this Government makes. We can not allow ourselves to suppose that wealth is going to be added to the country by what we do. What we are going to do, whether we adopt one method or the other at the present time, even though it be by taxation, is to decrease the buying power of the dollars in all of our pockets, because we are not going to increase the wealth against which these securities are issued. The present situation of this country is this: We have imposed

taxes which are adequate to pay our expenses, our interest charges, and our sinking fund charges. We are using salvage to retire the overhang of the war, which is much too heavy now for the general welfare. If we add another straw to the camel's back, if we seek to add \$2,000,000,000 more of evidences of indebtedness to the pile which the base of wealth is supporting, then in any way we do it, we are bound directly or indirectly to reach the pockets of all of us and tear a piece off the corner of every dollar bill in every pocket. It isn't going to buy as much as it would before, in my judgment.

Mr. GARNER. In other words, to follow any one of these processes which have been outlined—the three processes that I have referred to—will inevitably result in the increased cost of living?

Mr. LEFFINGWELL. Inevitably it will. We can't pile any more evidence of indebtedness on that base. The people have not caught up yet; they haven't begun to save, and the demands upon our credit, our capital funds, are not being met out of savings yet.

Mr. GARNER. You inflate the credit to the extent of \$2,000,000,000; you increase the cost of living; you reduce the market value of all securities and especially the securities due by the Treasury Department.

Mr. LEFFINGWELL. That is correct. Now, on the subject of taxation I want to elaborate a little.

The CHAIRMAN. Before you get away from his question will you permit me? I want to ask you which of the two propositions in your opinion would be the most difficult for this Government and most disastrous—to issue bonds to the soldier boys up to a billion and a half or two billions of dollars or issue that amount of Government bonds and sell them outright and get the money and pay the soldier boys, or loan every soldier boy up to \$5,000 to buy a farm and provide that money and furnish him the cash right away quick to do it. Which of the two would be most disastrous for Uncle Sam?

Mr. LEFFINGWELL. Five thousand dollars, Mr. Chairman? How much does that come to as a total?

The CHAIRMAN. About twenty-two and a half billion dollars. And that is the proposition of the gentleman from Texas, as I read it from his testimony before the Committee on Public Lands.

Mr. LEFFINGWELL. Well, I shall have to repudiate the gentleman from Texas on that proposition. [Laughter.]

The CHAIRMAN. I read his testimony very carefully last night, and that is his proposition before the Committee on Public Lands, if I understood it.

Mr. LEFFINGWELL. I hope you have not understood it.

Mr. GARNER. No; he did not understand it.

The CHAIRMAN. He has locked horns with me on this proposition and I wanted to see whether or not he understands it as I do.

Mr. FREAR. There is one other question that has come before the committee, Mr. Leffingwell, and that is the idea of basing these bonds upon the foreign bonds. Is there anything in that? That is, basing them on the indebtedness due us from Great Britain and elsewhere; to base these bonds given to the soldiers upon that foreign indebtedness.

Mr. LEFFINGWELL. No; it would be as injurious to the credit of our debtors as it would be to the credit of the United States to distribute our own bonds in that way.

Mr. FREAR. In other words, the security is good in any event; that is, the eventual payment of the bonds is assured. It is just a question of the present value and effect upon the bond market.

Mr. LEFFINGWELL. I place the proposal along with the proposal to distribute bonds of the United States. That is not the way to finance any operation. If you must raise money, borrow it on terms which are discussed with the lender and suit the market. To my mind, it is unthinkable that we should value so lightly the credit of the Allies who fought the war with us, that we would do with their obligations what I hope we will not think of doing with our own, and that is pass them out in lieu of ready cash to be kicked about in the hands of scalpers who would deal with their securities no more charily than with our own. If you seek to sell bonds you must find investors and not use them in place of cash.

Mr. FREAR. In your judgment, it would not make any difference in the financial situation whether we adopted one plan or the other? That is, I mean it would not have any advantage?

Mr. LEFFINGWELL. No.

Mr. TREADWAY. Mr. Leffingwell, several witnesses here have advocated putting the man's name into the bond, in view of the expectation that he would receive it as an honorable document. To what extent would you consider the likelihood of those bonds getting into the general market?

Mr. LEFFINGWELL. That would just mean that he would get 30 cents on the dollar instead of some larger amount. If you give a man something that is not negotiable, and he wants money, then he doesn't get so much money when he sells it as he otherwise would.

Mr. TREADWAY. The suggestion has not been made, I think, that they would not be negotiable, but would be issued to the individual soldier boy and then he could do as he saw fit. The testimony was given this morning by one of the Members of the House that in his opinion the instrument would be retained by the man, or if he was obliged to negotiate it he would negotiate it with some member of his family if he must have the money on it, so it would not get into the actual market.

Mr. LEFFINGWELL. I think that is a self-contradictory proposal, because I can't conceive of the Congress of the United States voting \$2,000,000,000 to people who don't need it enough to go and raise the money when they get the instrument of credit. It is not thinkable, to my mind, that the Government of the United States is going to bond itself for \$2,000,000,000 if what soldiers need is not cash but a semiannual distribution of a trifling amount throughout their lives or in order that they may join the bond-holding class. It seems to me that that proposal is self-contradictory. I am sure that nothing that has been said in my presence would indicate a feeling on the part of the ex-service man that this was not a claim based upon present need of money.

Mr. TREADWAY. One of the principal advocates of this legislation, Representative Swope, of Kentucky, in his testimony yesterday advocated the very proposition that I am asking your opinion about, and Representative Sumners this morning, who also has a bill before us, advocated that form of a bond issue.

Mr. LEFFINGWELL. Isn't my comment on it a fair one? Haven't you got to sit on one side of the fence or the other? Either these

men need money—and I assumed it was because you thought that they needed it, that you were giving this careful consideration to their demand—or they don't need it.

Mr. HADLEY. It seems, Mr. Leffingwell, from the communications that come to the committee, that they are not all based upon the idea of absolute necessity so much as upon the sense of inherent justice of an adjusted compensation by reason of certain domestic conditions that existed during their absence winning the war, and therefore the proposal seems to rest upon that basis rather than upon the basis of actual need when they discuss the subject of registered bonds.

Mr. LEFFINGWELL. It seems to me the best test to apply to that is the effectiveness of the measures proposed to insure that the bonds will not be sold. If the proposal is, instead of to spend \$2,000,000,000, to pay an annuity of 5 per cent of \$2,000,000,000 per annum during the life of the ex-service man, to each man, then make effective provision for it and the comments I have made as to the financial difficulties to some extent become irrelevant.

Mr. BOWERS. If it were a registered bond and negotiable, why couldn't its value be maintained?

Mr. LEFFINGWELL. As a matter of fact, the value of the registered Liberty bonds always moves below the value of the coupon bonds, because of the delay in transferring them.

Mr. BOWERS. What is responsible for the present depreciation of the Liberty bond?

Mr. LEFFINGWELL. The registered bond?

Mr. BOWERS. Yes..

Mr. LEFFINGWELL. Because when a man has a bond and he wants to sell it, he wants to sell it now. He generally waits until he wants the cash. The broker has to take it from him and send it in to the Federal Reserve Bank, and the Federal Reserve Bank has to put it through its books and send it down to Washington to the Treasury Department, and the Treasury Department has to put it through one of 3,000,000 registered-bond accounts which are maintained on its books. All those steps take time. Meanwhile either the seller or the broker is without his money, and that costs something in the price.

Mr. BOWERS. Isn't the present depreciation really caused because the investor has a much better opportunity of lending his money at a higher rate of interest? Isn't it because the dollar has depreciated to such an extent that the investors must buy cheaply to realize on their investments?

Mr. LEFFINGWELL. The reason, as I have been explaining—or seeking to explain—is that the supply of capital is less than the demand. That grows out of five years of war and war conditions, during which the world has spent more than it has produced.

Mr. BOWERS. Well, I do know to-day that the local farming communities are buying a great many Government bonds, fourth and second Liberty loans, at 89.60 to 89.90; and I do know that in my own locality recently, a small community, there has been \$300,000 worth of those bonds bought from 92 down to 89.60.

Mr. LEFFINGWELL. Your community is very fortunate to be among purchasers instead of sellers.

Mr. BOWERS. No; that is the case everywhere. I sold some myself at 92, which I can buy back to-day for 89.60. And I think the condition is simply because the investor has a much better opportunity to get a better investment at a larger rate of interest and that money or the purchasing power has depreciated and that money in fact is the only thing left in America that is cheap.

Mr. LEFFINGWELL. Money has not depreciated, in my opinion. The amount of commodities you can get for it has decreased. Your money is the same money, but the price of commodities has increased.

Mr. GREEN. It seems to me that Mr. Bowers is simply saying it in another way when he says that a man can get a higher rate of interest on other investments. When funds are scarce, when the loanable supply is nearly exhausted it causes interest rates to go up because there is not enough to supply the demand.

Mr. LEFFINGWELL. Yes.

Mr. GREEN. And the investor can get these higher rates.

Mr. LEFFINGWELL. Maybe we are trying to say the same thing in a different way.

Mr. GREEN. Let me ask you a little further with reference to this proposal to take the foreign indebtedness and turn that over to the soldiers. It was argued very earnestly before the committee by one member that it would be a good plan to have these foreign bonds issued to the soldiers or a bond with the foreign bond as security in the several amounts. As I understood you to say, you thought that in that event these bonds would be hawked or peddled around, and with what effect on their market value?

Mr. LEFFINGWELL. Well, the same effect in a greater degree as would result from similar treatment of our bonds. You must always sell your securities for whatever money you want to raise to investors; figure out your market, get the best method of distribution you possibly can. Then at least you have adopted the method of financing least injurious. If you distribute to people who want spending money bonds of any Government or any company or any person, you are bound to have an operation which is injurious to the credit of everyone concerned. The object of all bond selling campaigns, of all bond houses, is to place the securities they have to offer well. Every now and then when an issue is brought out of new securities you hear that they were not well distributed. First, there will be an announcement that the issue was closed and oversubscribed; pretty soon you will find the new securities going down in the market. That means often that while the original underwriters paid up, they had not been able to get the securities distributed among real investors. That is the end of the business the bond house is really concerned with if it wants to have a permanent good will and a permanent clientele. A bond house seeks to distribute such securities as it has to distribute among people who will keep them and not use them as spending money.

Mr. GREEN. Now, with reference to a point right there; as I understand you, not only the general credit will be impaired but the soldiers themselves will not be likely to get a very great amount out of it.

Mr. LEFFINGWELL. They will certainly be disappointed, because you would not have adopted a method calculated to find investors with money to invest, and no one who ever thought about it would want to buy securities which had been distributed in that manner,

because he would realize how badly they had been placed and how many were bound to come out on the market, with the consequence of further depreciation as time went on.

Mr. BOWERS. How can more of these bonds come out on the market than have already been sold if the rate of interest is not attractive? If the individual soldier had his own bond, what is the difference if he sees fit to keep that bond than if he had so many dollars to spend?

Mr. LEFFINGWELL. If he sees fit to keep the bond?

Mr. BOWERS. If he doesn't see fit to keep it, it is negotiable, a registered bond and negotiable, and can be sold again. Don't the local banking communities take care of that bond the same as they do of other bonds?

Mr. LEFFINGWELL. They will have just so many more to take care of, and they will not have been as well distributed.

Mr. BOWERS. There is no reason why the soldiers could not be given the most attractive of all bonds that the Government issues. So far as I am concerned that is my idea of how it should be done.

Mr. FREAR. I understand Mr. Leffingwell's statement is that it is better to issue the bonds directly of our Government than to base it upon our foreign bonds.

Mr. LEFFINGWELL. No; my statement is that either of those methods would be disastrous, and that the only way in which the thing can be done without injury to the Government's credit in the present banking and credit situation would be to impose additional taxes, sufficient to provide the necessary funds as those funds are required.

Mr. FREAR. Disastrous because there is no immediate market for them?

Mr. LEFFINGWELL. Because the supply of credit and capital is less than the demand to-day.

Mr. BOWERS. Suppose this bond were a 10-year bond, wouldn't that be sufficiently attractive at 4½ per cent to enable the public to want them?

Mr. LEFFINGWELL. Well, the Victory notes are selling on a 5.60 basis now, and I see no reason to suppose that a bond of the kind you describe could be sold at par. I see no reason to suppose you could do it.

Mr. TREADWAY. Mr. Leffingwell, you have said several times that the least injurious method would be, in your opinion, some additional method of taxation?

Mr. LEFFINGWELL. Yes, sir.

Mr. TREADWAY. Have you any views to express as to the form of taxation?

Mr. LEFFINGWELL. The only method that occurs to me would be the imposition of additional normal income taxes.

Mr. TREADWAY. That would be on the normal income?

Mr. LEFFINGWELL. Normal income taxes.

Mr. TREADWAY. There have been several suggestions of placing it on incomes above \$25,000.

Mr. LEFFINGWELL. The situation, in my opinion, is this: We have gone beyond the point of productivity with respect to surtaxes. To-day the country is suffering from a lack of capital for investment purposes. That is because you can not get the same dollar twice from any one man. If you take money from any given taxpayer

for taxes you can't sell him bonds for the same money, nor can the railroads sell him bonds. The surtax rates are so high that they drive the capital of rich men to exempt securities and out of the country, with the result to-day that we are subsidizing wasteful expenditures by States and municipalities, or encouraging expenditures by them at a time when they might be deferred until the supply of capital was larger and sufficient for all; and we are discouraging investments by such men in other high-grade securities. This will have a very serious effect upon the economic position of the country. The railroads have been returned to private ownership. The first question there, of course, is what rates they will charge; whether rates will be permitted to them which will restore their credit. Even then the railroads must come into competition with the Government of the United States and every other borrower to get capital sufficient to make betterments, improvements, extensions, and provide equipment; and if that is not provided our whole industrial and economic life will be set back for lack of means of transportation. I don't feel that you can go further with surtaxes.

Mr. TREADWAY. Even starting with \$25,000?

Mr. LEFFINGWELL. Well, it may be that you can straighten out the line a little. I think there is a bit of sag in some of the lower brackets.

Mr. TREADWAY. Just where do you consider that sag is?

Mr. LEFFINGWELL. I would not be able to say offhand. It is a long time since I studied the figures, but my impression is that the line sags in just a little bit, and it might move up a little bit straighter. I question, though, whether there is any considerable amount of revenue to be had by that method.

There is one thing about the productivity of taxes that we must all bear in mind. The taxes we are collecting are on the present basis of industrial activity, and one can not feel perfect confidence that business is going to remain speeded up, or prices are going to remain so high. It is obvious that if prices were lower and business slower incomes would be smaller and the taxes on incomes would be smaller.

I think it would be a great mistake to predicate—to assume that any considerable amount of taxes could be collected by additions to surtaxes.

Mr. TREADWAY. Then you get back to the normal tax. What would be your suggestion?

Mr. LEFFINGWELL. Well, I don't carry the figures in my mind. I suppose that you could raise substantial additional revenue by bringing the normal tax up from 8 to 18 per cent.

Mr. HAWLEY. When you speak of the "normal tax" you mean the normal tax on individuals and corporation tax on corporations?

Mr. LEFFINGWELL. Yes.

Mr. HAWLEY. Both of them?

Mr. LEFFINGWELL. Yes.

Mr. TREADWAY. You would not change the exemption?

Mr. LEFFINGWELL. That is purely by way of illustration. I have made no study of it.

Mr. TREADWAY. You would not change the exemption—that is, the \$2,000?

Mr. LEFFINGWELL. No; I think not. I am not advocating an increase in the normal tax; I am trying to give you my best judgment as to a possible source of revenue. I don't anticipate getting additional revenue from surtaxes; I believe that they have passed the point of productivity. I believe that they have not only passed the point of productivity, but are actually decreasing the fund of real income in the country by driving capital away from productive enterprise and into State and municipal securities, or into wasteful speculative enterprises. It is almost impossible to get a rich man to invest in anything except a State or municipal bond, a Government bond, or some highly speculative thing, so speculative that the profits might be very large; and he has figured that if losses occurred, the United States would take its share.

Mr. GREEN. Mr. Leffingwell, just one further question on the rates of the bonds. You stated a moment ago that the Victory issue was selling on a 5.60 basis; that is, money invested in those bonds bring 5.60 per cent. Now, if bonds running a longer time were issued, you would expect the rate to be even higher, would you not?

Mr. LEFFINGWELL. It doesn't work exactly that way. The depreciation in the price of Liberty bonds and notes doesn't represent an exact calculation of their value on an interest basis. That is for the reason that when the war was over a good many of those 20,000,000 people who bought them in the enthusiasm of a patriotic campaign and as an act of patriotism felt quite free to dispose of them and were unable or unwilling to limit further their expenditures. To many they seemed like so much spending money. Now, when it came to selling them to find spending money, there was a tendency to sell the issue—a tendency which you find everywhere among investors—to sell the bonds or notes which could be sold with least loss, and that has brought the shorter maturities to higher interest bases than the longer maturities. For instance, the fourth Liberty bonds were selling on February 28 on a 5.07 basis, and the Victory $4\frac{3}{4}$ on a 5.66 basis. The totally exempt Victory $3\frac{3}{4}$ were selling on a 4.64 basis, and there are only \$900,000,000 and odd of those.

Furthermore there is a tendency in the secondary market for purchasers to prefer the longer maturities at a time like the present when all show a very high income return, because of the confident expectation that the present opportunity to buy Government securities on a high income basis is unique and that the sagacious thing to do is to obtain that high rate of income for the longest possible time by buying the longest maturities. The market has shown a marked preference for fourth Liberty bonds because all other issues mature or may be redeemed at the option of the United States before the date when the United States may redeem the fourth Liberty bonds. This evidences the expectation of the market that the Government will be able to pay off or refund its debts upon a more advantageous basis before the expiration of 15 years—or 14 years from last fall. Indeed, the general rule is that short maturities will establish a higher interest basis than longer maturities, although this does not extend to extremely short maturities such as Treasury certificates. Of course, all of these calculations which investors are making are predicated upon the assumption that the Government will pursue the course upon which it has embarked upon paying off the existing floating debt out of taxes and

salvage and in the future meeting its current expenses, including interest and sinking fund charges, from taxation. All of these calculations which investors are making will be vitiated if Congress grants the bonus. It will upset all calculations and depress market values.

Mr. GREEN. I was trying to get at the rate if we issued a long-time bond.

Mr. LEFFINGWELL. The rate of interest?

Mr. GREEN. What we might expect we would have to pay.

Mr. LEFFINGWELL. I should not want to hazard a guess. You remember when we considered it as an immediate practical problem at the time of the Victory loan, I explained to this committee very fully how impracticable it would be to state more than a few days beforehand just what terms we should have to make to meet the then market conditions; and this committee recognized the validity of the argument and extended power to the Secretary of the Treasury to meet the problem. Now, if the problem is to be presented, the Secretary of the Treasury will have to face it, I suppose. I think that the best indication that you can get of what its effect would be is to be had in this report of the Government actuary, which is a monthly report, dated March 1, which shows the market values and the interest basis of all the outstanding issues of Government securities on each day of the last month, and I will make this part of the record if you care to have it.

(The paper referred to follows:)

Mr. GREEN. From what you have said, I suppose the rate would have to be higher?

Mr. LEFFINGWELL. It would. The mere fact that a further large issue was to be made would greatly depreciate all outstanding issues.

Mr. HAWLEY. Mr. Leffingwell, it has been proposed that two kinds of taxes be levied on sales, one a general consumption tax to be collected from retail sales, and the other tax to be collected on the goods when sold by the manufacturer, jobber, or wholesaler. Would you comment on those two propositions?

Mr. LEFFINGWELL. I think that the reasons for advocating an income tax are the same as for opposing the sales tax. I take it that the increase of the cost of living which must inevitably result from putting out \$2,000,000,000 of spending money would be bad enough

without raising that money in a way directly calculated to add to the cost of living. Unquestionably every consumption tax has the vice that it burdens most heavily the people least able to bear it. The income of the poor man is altogether absorbed in the things he consumes. A negligible proportion of the income of the rich man goes into the things he consumes. If you undertake to impose a consumption tax you will, in the first place, add to the cost of living to raise the money, and then add to the cost again by putting that much spending power in the form of new money or credit in the hands of the ex-service men. I should say that the operation would in that way be made more burdensome even than it need be.

MR. HAWLEY. Now, it is proposed in another tax proposition that has been submitted that we increase the list of luxuries and levy a luxury tax, a tax which would be paid by those who are well to do.

MR. LEFFINGWELL. I was always very much interested in the luxury tax. Theoretically it is splendid, but practically it doesn't work. You can't collect it. The machinery of collection is more expensive than the productivity of the tax justifies; and you get into inextricable confusion as to what is a luxury. I speak dogmatically. I imagine the committee has its own opinion on this subject, even clearer than mine, based on experience.

MR. GREEN. That has been presented a number of times before the committee, and I may say the committee levied a luxury tax and had all sorts of difficulties along the line you have described. The Senate took out part of it, and there has been much evasion.

MR. LEFFINGWELL. Take the question, What is a luxury? Are tea, coffee, cigars, luxuries? I am not prepared to say that I know of many things that are going to be really productive of large amounts of revenue and of which I think the poor man ought to be deprived.

MR. HAWLEY. Can we raise the tax on tobacco?

MR. LEFFINGWELL. I don't pretend to be an expert on specific taxes. We have about reached the point where most of us regard a moderate amount of tobacco as a necessity.

MR. GARNER. You can get \$150,000,000 more than you are getting now on tobacco, but that wouldn't go very far toward paying \$2,000,000,000.

MR. GREEN. I agree with Mr. Garner, and I think we ought to get it.

MR. GARNER. Mr. Leffingwell, I don't ask you, or don't request you to commit yourself to the rate of interest that would be necessary in order to float \$2,000,000,000 worth of bonds—and, of course, it is unthinkable that we should sell them for less than par—but you were in here when Gov. Harding was testifying. Gov. Harding was quite emphatic that, under present conditions, his opinion was that you would have to make the rate of interest on 20-year bonds 6 per cent in order to get \$2,000,000,000 and sell them at par. I heard Mr. Madden—Martin Madden—who is, I think, one of the best business men in Congress, make the statement on the floor of the House to the same effect.

MR. LEFFINGWELL. I should not be willing, Congressman, to express an opinion on that.

MR. GARNER. Taking the hypothesis that you would have to make the rate of interest 6 per cent in order to sell \$2,000,000,000 worth of bonds, about how much reduction do you anticipate would result

from that sale in the present outstanding indebtedness of the United States?

Mr. LEFFINGWELL. Whatever rate you establish for any new issue of securities, all the other issues will adjust themselves to that interest basis. In other words, they will depreciate until they record an appropriate interest basis adjusted to the interest basis of the new issue.

Mr. GARNER. That probably would reduce some of them under the present market value by 2 to 3 per cent.

Mr. LEFFINGWELL. I should like to add this, Congressman: You assume that there is an interest rate which will sell \$2,000,000,000 of bonds. Now, I want to say that in my judgment there isn't any thinkable interest rate which will automatically sell \$2,000,000,000 of anything. If you contemplate the sale of \$2,000,000,000 of long-time bonds, you must contemplate also the creation or re-creation of an organization like that of the Liberty loans and a nation-wide campaign to float it. Two billion dollars, remember, is the amount of the first Liberty loan. We must not lose our sense of proportion. We have got used to big figures. The Treasury was the first to recognize that the things we could do in war-time we could not do in peace-time. I should like to see somebody now tell everybody to keep his motor car home on Sunday—just one Sunday—or to do without white bread. The things we were doing in war-time were possible because it was war-time and because there were 100,000,000 people looking for ways to take their part in the war.

If you know how to re-create the Liberty loan organization, which consisted of 2,000,000 patriotic men and women giving their time without compensation or hope of reward to the Government, if you know how to replace that machine, then you know how to sell \$2,000,000,000 of securities. But don't think for a minute that \$2,000,000,000 of securities can be devised in such terms that they will sell themselves. That operation does not exist in the world of finance.

Mr. GARNER. In other words, you have to revivify the patriotic spirit of the American people in order to sell \$2,000,000,000 worth of any money?

Mr. LEFFINGWELL. Yes, sir; nothing sells itself. As a very great banker said to me, when we were discussing the probable course of the market in one of the Liberty issues after the offering—I had asked him whether he thought it would go off, and he said—"Why, Leffingwell, if you were to offer billions of gold dollars they would go down the day after you offered them." There isn't any way to get people to buy more of anything than they want except by appealing to their patriotism. Now, they have got all the Government securities they want and more, and you are going to ask them to take \$2,000,000,000 more than that. It isn't a question of price; it isn't a question of interest rate; it is a question of getting the investment market, which is already overloaded with undigested securities, to take some more.

The only way to do it is to go out and preach patriotism, and if you can fire the American people with the same feeling about this bonus that they had about buying war bonds, then you can do it. And I don't believe you can do it in any other way. Now, if it is to be taxes, the strong arm of the Government will come down, and if the taxes are levied right you will raise it unless your taxes prove

to be so burdensome as to dry up the very sources of wealth—and that is a very real danger. You are not going to create new wealth by taxes. The Government credit will be protected by that method, and that is the least disastrous method which occurs to me. But we will have the other evils from the bonus, even if we try to provide for it from current taxes.

Mr. HADLEY. Suppose a soldier holding a Government bond issued under these circumstances, a service bond, presented it in the bond market, do you not think that an investor would look upon it with some degree of patriotism and not entirely commercialize the situation? In other words, are you not basing your statement in anticipation of what these bonds would meet on the market purely on the ordinary market basis? I have the idea that the patriotism of the buying public would assert itself and that the organization would pretty well be effected if the soldiers had the bonds in their hands.

Mr. LEFFINGWELL. I don't think that you can make any such rule. I think that the greatest patriotic force lies behind the motive of not selling your Liberty bond if you can help it. I think that there are millions of American citizens who have not sold their Liberty bonds and will not sell their Liberty bonds until the very last ditch of their financial resources is reached. I think that motive is very strong. I am very proud of it. It is because we got two million patriotic Americans to sell them, in the first place, that the distribution is so good and that the market price has not reacted further, in the face of the stupendous demand upon our capital which has grown out of the war itself and of the conditions existing in Europe since the end of hostilities.

Mr. HADLEY. I fear I did not make my question quite clear. Assume that a soldier holding a bond presented it to you as a possible investor, and you were in a position to buy, would you look upon it as you would if a bond broker presented you a bond of the same character and under the same circumstances? Wouldn't you look more favorably upon it and be inclined to invest in it not only as a matter of investment but as a matter of patriotism, having in view what lay behind that bond?

Mr. LEFFINGWELL. No, Congressman; I don't think there are degrees of patriotism. I think a man who would not pay more than the market price for a Liberty bond of his Government issued to win the war would not pay more than the market price for a bonus bond. I don't know of any patriotic obligation to pay more than the market price on the secondary distribution of Government bonds. The most you could say for the impulse of patriotism, after the war is over, is that it leads a man not to sell a bond he has bought if he can help it. I don't believe there are many who have bought Liberty bonds in the secondary market except they thought they were a good investment at the price, and they had funds to buy with.

Mr. WATSON. Recently I received a number of letters in favor of collecting a greater portion of our taxes by a system of stamps. Have you given that thought consideration?

Mr. LEFFINGWELL. No. Stamp taxes, of course, have many advantages. The principal one is that stamp taxes of certain sorts are easy to collect.

Mr. WATSON. Would you be in favor of collecting a larger portion of our taxes by stamps?

Mr. LEFFINGWELL. I don't suppose that you can do anything more than supplement the revenue by stamp taxes. I think there are some stamp taxes which are admissible and probably desirable, but I question your getting enough revenue out of stamp taxes to enter seriously into this problem. I have not made, however, Congressman, a detailed study of the kinds of stamp taxes proposed.

Mr. HAWLEY. Have you any other taxes in mind that might be levied in the event this legislation is enacted—any other sources of revenue?

Mr. LEFFINGWELL. I don't think I have, Congressman. I think this committee pretty well scoured the field. I don't believe that there is any source of revenue that you have not considered in financing the war. You remember you got us up to \$6,000,000,000—in-
deed, you had a bill that went up to \$8,000,000,000—and I don't believe there is anything I can tell you about possible fields of taxation. I have my own opinions about the relative advantages of them, and I feel as one whose business it is to watch security markets very strongly concerning the matters I have expressed to-day.

Mr. HAWLEY. Are you prepared to say how much you think can be raised by increasing the normal tax on individual or corporation taxes?

Mr. LEFFINGWELL. No; I should have to get some of our experts to give you a calculation.

Mr. HAWLEY. Could you put that in the record as part of your hearings?

Mr. LEFFINGWELL. Yes; I will ask for such an estimate.

(The matter referred to follows:)

TREASURY DEPARTMENT,
OFFICE OF THE SECRETARY,
Washington, March 17, 1920.

Mr. R. C. LEFFINGWELL,
Assistant Secretary of the Treasury,
Treasury Department.

DEAR MR. LEFFINGWELL: In answer to your inquiry as to the effect upon the revenue of increasing the normal tax rates from 4 per cent and 8 per cent, as at present (6 per cent and 12 per cent last year) to 9 per cent and 18 per cent, and the corporation income tax to 18 per cent, I have prepared the following:

Estimated revenue for 1919 from the normal income tax.

First \$4,000 over exemptions:	
At 4 per cent.....	\$95, 700, 844
At 9 per cent.....	215, 326, 898
Increase.....	\$119, 626, 054
Remainder of income:	
At 8 per cent.....	206, 183, 113
At 18 per cent.....	463, 912, 004
Increase.....	257, 728, 891
Corporation income tax:	
At 10 per cent.....	594, 500, 000
At 18 per cent.....	1, 070, 100, 000
Increase.....	475, 600, 000
Total increase.....	852, 954, 945

Respectfully,

Jos. S. McCox,
Government Actuary.

Mr. GARNER. You speak about having your own opinions about the readjustment of the taxes levied. I assume you mean by that statement that you would probably continue to collect the same amount of taxes now being collected, but you would change the law and readjust the present rates and subjects that are taxed?

Mr. LEFFINGWELL. Yes; I think it would be a great mistake to make any reduction in the amount of taxes—at least until we find where salvage and new appropriations will leave us.

Mr. GARNER. But you do believe that Congress could put in some very profitable time considering the question of a readjustment of the taxes now being levied?

Mr. LEFFINGWELL. I do. I think it is very important that such a readjustment should be considered. The views of the Treasury were, in a general way, stated in the annual report of Secretary Glass, and I am in full accord with those views. I think that furnishes the Treasury the opinion as to the general line of approach which would be desirable toward readjusting, but not reducing the bulk, of the taxes.

Mr. GARNER. I just wanted to bring that to the chairman's attention so that he might get the full benefit of yours and the Secretary's suggestions that we might profitably examine our tax system so as to get the same amount of money under a readjustment.

The CHAIRMAN. I am delighted to get the gentleman's opinion on this subject. I have heard so little of it, but I thought that was the position he would take.

Mr. GREEN. Mr. Leffingwell, just a little further on this situation. You have had very extensive and full knowledge with reference to the banking business, and can you inform me in a general way what portion of the banking business is done by private concerns—that is, that are neither under State nor National charter?

Mr. LEFFINGWELL. No, sir; I could not say what proportion is done by those institutions. It varies in the several States.

Mr. GREEN. It has occurred to me that there was a place there where we might get some more revenue, because it has seemed to me that the private banking concerns are not contributing in proportion to what the State and National institutions are in paying their share of the taxes. Now, whether they are to simply pay the same as a corporation would I have not been able to fully make up my mind. I am quite clear that they ought to pay more than they probably are paying and that some method ought to be devised to bring that about, and I suppose it would not make any very great difference with our revenues if that were done.

Mr. LEFFINGWELL. The business of private bankers divides itself into two classes: That of banks of deposit and that of merchants in investment securities.

Mr. GREEN. I meant the banks of deposit.

Mr. LEFFINGWELL. I should not expect that you would find that an important revenue would be derived from taxing their business as banks of deposit as distinguished from the mercantile enterprise of selling securities.

Mr. GREEN. The larger amount of capital, I presume, is in the mercantile institutions that do not receive the deposits subject to check, but carry on investment business principally?

Mr. LEFFINGWELL. I don't know; most of them do some deposit business.

The CHAIRMAN. Mr. Leffingwell, I want to ask for information here. What is the volume of Treasury notes outstanding at the present time—short-time Treasury notes?

Mr. LEFFINGWELL. Certificates of indebtedness?

The CHAIRMAN. No, not certificates of indebtedness; Treasury notes that were issued for a limitation of 1 to 10 years?

Mr. LEFFINGWELL. You mean currency?

The CHAIRMAN. No.

Mr. LEFFINGWELL. Victory notes?

The CHAIRMAN. Victory notes. I thought they were called Treasury notes?

Mr. LEFFINGWELL. No; Victory notes.

The CHAIRMAN. Bonds and certificates of indebtedness and these Treasury notes.

Mr. LEFFINGWELL. Mr. Chairman, I brought with me a copy of the preliminary financial statement of the United States Government, February 29. That shows the amount of Victory notes outstanding on that date as \$4,458,957,000. I will make this part of my testimony if I may. It shows also a preliminary figure of the public debt.

(The paper referred to follows:)

Preliminary financial statement of the United States Government, Feb. 29, 1920.

[On the basis of daily Treasury statements.]

RECEIPTS AND DISBURSEMENTS.

Net balance in the general fund Jan. 31, 1920.....	\$725, 770, 078. 06

Noninterest-bearing debt.....		232,856,332.82
		<hr/>
Total gross debt.....		25,404,331,707.62

The CHAIRMAN. We are glad to have that statement in the record. Now, what I have in mind, Mr. Leffingwell, is a Treasury note, a Victory note.

Mr. LEFFINGWELL. That is the note we issued for the last Liberty loan?

The CHAIRMAN. Yes.

Mr. LEFFINGWELL. Victory notes.

I wonder, Mr. Chairman, if you would be interested in these preliminary figures for the war period from April 6, 1917, to February 29, 1920?

The CHAIRMAN. We would be very much interested in that.

Mr. LEFFINGWELL. This shows the disbursements and receipts of the Government according to the daily statement, and giving a preliminary financial statement.

Mr. GARNER. I wish you would put that in the record.

Mr. LEFFINGWELL. I will put that in.

The CHAIRMAN. We will be very glad indeed to have that in the record, or anything else you wish to add to what you have already stated.

Mr. LEFFINGWELL. Those may be convenient to you as a matter of reference.

(The paper referred to follows:)

Preliminary financial statement of the United States Government for the period from Apr. 6, 1917, to Feb. 29, 1920.

[On the basis of daily Treasury statements.]

RECEIPTS AND DISBURSEMENTS.

Net balance in the general fund Apr. 5, 1917.....	\$92,317,710.27
Receipts, exclusive of principal of public debt, Apr. 6, 1917, to Feb. 29, 1920.....	13,099,207,169.58
Public debt receipts Apr. 6, 1917, to Feb. 29, 1920.....	59,196,212,111.45
Total.....	<hr/> 72,387,736,991.30
Disbursements, exclusive of principal of public debt, Apr. 6, 1917, to Feb. 29, 1920.....	36,918,105,294.26
Public debt disbursements Apr. 6, 1917, to Feb. 29, 1920.....	35,073,849,100.11
Net balance in the general fund Feb. 29, 1920.....	395,782,596.93
Total.....	<hr/> 72,387,736,991.30

PUBLIC DEBT AND EXPENDITURES.

Total disbursements for war period, exclusive of principal of public debt.....	\$36,918,105,294.26
Total receipts for war period, exclusive of principal of public debt.....	13,099,207,169.58
Excess of disbursements over receipts for war period.....	23,818,898,124.68
Total gross debt Feb. 29, 1920.....	25,404,331,707.62
Total gross debt Apr. 5, 1917.....	1,281,968,696.23
Gross debt increase for war period.....	24,122,363,011.34
Net balance in the general fund Feb. 29, 1920..	\$395,782,596.93

Mr. FREAR. Mr. Leffingwell, is there anything that you can inform the committee in regard to those outstanding obligations of foreign Governments, as to what percentage is likely to be realized on them?

Mr. LEFFINGWELL. Our position necessarily is that we expect to realize on all of them.

Mr. FREAR. You do?

Mr. LEFFINGWELL. We can not take any other position.

Mr. FREAR. Well, I would take it that you would not care to make a public statement, but I am wondering if there has been any estimate or any understanding on the part of the Treasury Department.

Mr. LEFFINGWELL. No estimate and no understanding except that they are to be paid.

Mr. FREAR. One other thing, is there any place where an estimate can be found of the general securities in addition to the Government securities? Here are outside commercial securities, I suppose, representing \$100,000,000,000, possibly, and I ask whether there is any basis at all for estimating their amount or any authority to indicate the extent of such securities.

Mr. LEFFINGWELL. I imagine that the statisticians must have some figures as to the whole bulk of securities.

Mr. FREAR. Do you have anything on that which you would be willing to give? If so, just mention the authority, because it seems to me that is very material along this line, the estimated value of all securities on the market?

Mr. LEFFINGWELL. I will see if I can get that data. I would not be able to give you anything that I can vouch for, because when statisticians take to making figures of that sort without a census, they are bound to use figures that are not precisely accurate.

Mr. FREAR. But anyway, give us some information.

Mr. LEFFINGWELL. Yes.

(The matter referred to follows:)

Par value of stock and bonds outstanding in the United States, 1905.

	Stock.		Bonds.	
	Amount.	Per cent of total.	Amount.	Per cent of total.
1. United States bonds.....			\$895,158,340	6.64

Taken from Charles A. Conant's *The World's Wealth in Negotiable Securities* (Atlantic Monthly, January, 1908, p. 102).

Mr. TREADWAY. If Mr. Leffingwell has finished I would like to offer a suggestion, in view of the fact that ex-Secretary McAdoo's statement in the press a few days ago has been referred to several times to-day, that we ought to have the clerk authorized to print that statement as a part of our records.

The CHAIRMAN. If there is no objection that course will be taken.

Mr. GARNER. Let him get an authentic statement from Mr. McAdoo as to what he said. I am perfectly willing to have it go into the record, but we ought to write to Mr. McAdoo and ask him to send a copy of the statement that he made. I would not like to put into the record a newspaper report of what he is alleged to have said.

Mr. TREADWAY. Certainly, it ought to be a correct statement.

The CHAIRMAN. Then if that is agreeable to the committee we will instruct the clerk to send to Mr. McAdoo a copy of his statement as it appeared in the press here and ask him to advise us by return mail whether or not that statement correctly reports him, and if not to give such statement as he did issue.

Mr. GARNER. That is all right.

The CHAIRMAN. That will be printed in the record.

Mr. HAWLEY. One question, if you will, Mr. Leffingwell. You suggested an increase in the normal tax. Now, take it in the case of individuals up to an income of \$36,000, the normal tax and the surtax would be very nearly the same; then an increase in the normal tax would bear more heavily proportionately on persons who received small incomes than on the person who received large incomes.

Mr. LEFFINGWELL. Yes. There is one compensating factor, and that is that the Liberty securities all carry exemptions from normal tax, and there would be an element of justice in imposing this burden on those of our fellow citizens who have not done their part to finance the war. I think that if you must raise taxes it is no more than just that the burden should fall more heavily upon those who have not already done their part than upon those who have.

EXHIBIT 36.

The following statement shows the transactions of the fiscal year 1920, on the basis of the daily Treasury statements. This does not include receipts and expenditures on account of the Postal Service, other than salaries and expenses of the Post Office Department in Washington, postal deficiencies, and items appropriated by Congress, payable from the general fund of the Treasury:

RECEIPTS.

Ordinary:

Customs.....	\$322, 902, 650. 39
Internal revenue—	
Income and profits tax.....	3, 944, 949, 287. 75
Miscellaneous.....	1, 460, 082, 286. 91
Miscellaneous revenue (note 1).....	960, 966, 422. 38
Panama Canal, tolls, etc.....	5, 664, 741. 45

Total ordinary.....	6, 694, 565, 388. 88
---------------------	----------------------

<i>Excess of current ordinary disbursements over ordinary receipts (net current deficit) (note 2).....</i>	71, 879, 072. 21
--	------------------

<i>Excess of ordinary receipts over net ordinary disbursements (ad- justed surplus) (note 2).....</i>	291, 221, 547. 67
---	-------------------

Public debt:

First Liberty bonds.....	¹ 230. 00
Second Liberty bonds.....	¹ 969. 00
Third Liberty bonds.....	498, 492. 50
Fourth Liberty bonds.....	5, 078, 756. 00
Victory notes.....	1, 027, 546, 073. 23
Certificates of indebtedness.....	14, 728, 725, 968. 53
War-savings securities.....	73, 699, 515. 26
Postal savings bonds.....	189, 400. 00
Deposits for retirement of national bank notes and Federal reserve bank notes (acts of July 14, 1890, and Dec. 23, 1913).....	17, 118, 024. 12

Total.....	15, 852, 855, 030. 64
------------	-----------------------

Grand total receipts.....	22, 547, 420, 419. 52
---------------------------	-----------------------

DISBURSEMENTS.

Ordinary:

Legislative establishment.....	\$19, 327, 708. 72
Executive proper.....	6, 675, 517. 58
State Department.....	13, 586, 024. 42
Treasury Department.....	322, 315, 627. 43
War Department.....	1, 610, 587, 380. 86
Department of Justice.....	17, 814, 398. 18
Post Office Department.....	50, 049, 295. 07
Navy Department.....	736, 021, 456. 43
Interior Department.....	279, 244, 660. 87
Department of Agriculture.....	65, 546, 293. 14
Department of Commerce.....	30, 010, 737. 75
Department of Labor.....	5, 415, 358. 40
United States Shipping Board.....	530, 565, 649. 61
Federal control of transportation systems and transportation act, 1920.....	² 1, 036, 672, 157. 53

¹ Counter entry (deduct).

² Includes \$288,399,222.46 payments on certificates of indebtedness of Director General of Railroads, due July 15, 1919.

Ordinary—Continued.

War Finance Corporation.....	³ \$134, 628, 433. 27
Grain Corporation.....	⁴ 350, 328, 494. 70
Other independent offices and commissions.....	59, 469, 305. 17
District of Columbia.....	19, 987, 898. 41
Interest on public debt.....	1, 020, 251, 622. 28
Total.....	6, 308, 498, 019. 82
Deduct unclassified repayments, etc.....	4, 399, 847. 00
Panama Canal.....	6, 304, 098, 172. 82
Purchase of obligations of foreign Governments.....	11, 365, 714. 01
Purchase of Federal farm loan bonds.....	421, 337, 028. 09
Current ordinary.....	29, 643, 546. 17
Special deposit of War Finance Corporation (note 2).....	6, 766, 444, 461. 09
Net ordinary.....	363, 100, 619. 88
	6, 403, 343, 841. 21

Public debt:

Certificates of indebtedness redeemed.....	15, 589, 117, 458. 53
War savings securities redeemed.....	200, 982, 934. 62
Old debt items retired.....	509, 165. 97
First Liberty bonds retired.....	32, 336, 700. 00
Second Liberty bonds retired.....	241, 144, 200. 00
Third Liberty bonds retired.....	296, 300, 800. 00
Fourth Liberty bonds retired.....	405, 222, 800. 00
Victory notes retired.....	249, 001, 500. 00
National bank notes and Federal reserve bank notes retired (acts of July 14, 1890 and Dec. 23, 1913).....	23, 424, 164. 50
Total public debt.....	17, 038, 039, 723. 62

Grand total expenditures, as per daily Treasury statement, June 30, 1920.....

23, 441, 383, 564. 83

NOTE 1.—The \$350,000,000 reduction in the capital stock of the United States Grain Corporation effected at the close of the fiscal year is reflected in an increase by that amount of both receipts and disbursements on June 30.

NOTE 2.—Pursuant to plans outlined by the Secretary of the Treasury in public announcements on April 18 and May 10, the War Finance Corporation's holdings of Liberty bonds and Victory notes, to the extent of the bond purchase fund quota to and including June 30, 1920, and its holdings of Treasury certificates of indebtedness, except those held in its reserve fund, have been redeemed and canceled with consequent reduction of the total gross debt in the amount of \$367,053,650, which is offset to the extent of the redemption price by a special deposit to the credit of the War Finance Corporation. As only a part of this is applicable to the fiscal year 1920 and the greater part of it is applicable to the preceding fiscal year, the current surplus and deficit and the adjusted surplus are reported separately.

Because of legislation establishing revolving funds and providing for the reimbursement of appropriations, commented upon in the annual report for the fiscal year 1919, page 126, ff., and in this report on pp. 47-49, the gross expenditures in the case of some departments and agencies, notably the War Department, the Railroad Administration, and the Shipping Board, have been considerably larger than above stated. This statement does not include expenditures on account of the Postal Service other than salaries and expenses of the Post Office Department in Washington, postal deficiencies, and items appropriated by Congress payable from the general fund of the Treasury.

SUMMARY.

Net balance in the general fund June 30, 1919.....	\$1, 251, 664, 827. 54
Receipts exclusive of principal of the public debt (see above)....	6, 694, 565, 388. 88
Public debt receipts (see above).....	15, 852, 855, 030. 64
Total.....	23, 799, 085, 247. 06
Disbursements, exclusive of principal of public debt (see above)..<	6, 403, 343, 841. 21
Public debt disbursements.....	17, 038, 039, 723. 62
Total.....	23, 441, 383, 564. 83
Net balance in general fund June 30, 1920.....	357, 701, 682. 23

³ Without deduction of the special deposit in the amount of \$363,100,619.88 of War Finance Corporation representing proceeds of redemptions of its holdings of United States securities. See note 2.

⁴ Includes \$350,000,000 applied by United States Grain Corporation to reduction of capital stock and reflected in miscellaneous receipts for fiscal year 1920. See note 1.

EXHIBIT 37.

The following table shows the cash expenditures of the Government for the fiscal years ended June 30, 1917, June 30, 1918, June 30, 1919, and June 30, 1920, as published in the daily Treasury statements and classified according to departments and establishments:

EXPENDITURES.

Grand total expenditures, as per daily Treasury statement, June 30, 1919.....			34,841,386,515.44	
Grand total expenditures, as per daily Treasury statement, June 30, 1920.....				23,441,383,564.83

NOTE.—Because of legislation establishing revolving funds and providing for the reimbursement of appropriations, commented upon in the annual report of the Secretary of the Treasury for the fiscal year 1919, page 126, ff., and in this report on pp. 47–49 the gross expenditures in the case of some departments and agencies, notably the War Department, the Railroad Administration, and the Shipping Board, have been considerably larger than above stated. This statement does not include expenditures on account of the Postal Service other than salaries and expenses of the Post Office Department in Washington, postal deficiencies, and items appropriated by Congress payable from the general fund of the Treasury.

EXHIBIT 38.

STATEMENTS SHOWING CLASSIFIED RECEIPTS AND DISBURSEMENTS OF THE UNITED STATES GOVERNMENT, EXCLUSIVE OF THE PRINCIPAL OF THE PUBLIC DEBT, BY MONTHS, FROM APR. 6, 1917, TO OCT. 31, 1920, AS PUBLISHED IN DAILY TREASURY STATEMENTS.

[1920. Department Circular No. 183. Loans and Currency.]

THIRD LIBERTY LOAN SUBSCRIPTIONS IN DEFAULT.

TREASURY DEPARTMENT,
OFFICE OF THE SECRETARY,
Washington, February 20, 1920.

Pursuant to the provisions of Treasury Department Circular No. 111, dated April 6, 1918, any and all installment payments made to the Treasury Department or to a Federal Reserve Bank upon subscriptions to Third Liberty Loan 4½ per cent gold bonds of 1928 filed with an official agency designated in said circular, upon which bonds have been allotted, and upon which one or more of the subsequent installment payments due pursuant to such circular and allotment has not been paid, are hereby declared to be forfeited to the United States; and such subscriptions and all right and interest in the bonds allotted thereon are hereby declared to be forfeited because of the failure to make payments when and as required by said circular.

Pursuant to the provisions of said Treasury Department Circular No. 111, dated April 6, 1918, and the Regulations dated April 9, 1918, as amended and supplemented June 22, 1918, defining special arrangements for subscriptions from persons in the military forces of the United States, any and all installment payments made by allotment of pay to the Secretary of the Treasury upon subscriptions to Third Liberty Loan 4½ per cent gold bonds of 1928 filed by persons in the military forces of the United States in accordance with such regulations, upon which bonds have been allotted, and upon which one or more of the subsequent installment payments due pursuant to such regulations and allotment has not been paid, are hereby declared to be forfeited to the United States; and such subscriptions and all right and interest in the bonds allotted thereon are hereby declared to be forfeited because of the failure to make payments when and as required by such regulations: *Provided, however,* That no forfeiture shall occur hereunder in respect to subscriptions on which allotments have been terminated or reduced pursuant to such regulations, except for failure to make payments when and as required by such regulations and reduced allotment.

Installment payments hereby forfeited shall be credited to the general account of the Treasurer of the United States (if not already credited) as "Forfeited Third Liberty Loan installment payments," and shall be covered into the Treasury to the credit of "Miscellaneous Receipts." Federal Reserve Banks will attach to every transcript showing such credits a schedule giving with respect to each such subscription the name of the subscriber, the amount of bonds allotted, and the amount of the payment or payments received against the subscription and therewith credited. If such installment payments have already been credited to the general account of the Treasurer of the United States, Federal Reserve Banks will forthwith send to the Treasurer a like schedule to accompany the transcript on which such credits appeared, identifying such transcript by date. Upon receipt of all such forfeited installment payments against any such

subscription, the allotment will be reduced accordingly, by the face amount of the forfeited subscription.

The Treasury Department or Federal Reserve Bank, as the case may be, with which a subscription has been filed on which any installment payment is forfeited pursuant hereto, will advise the subscriber of the forfeiture by registered mail at the last known address of such subscriber. The Treasury Department will advise any persons in the military forces of the United States, who subscribed pursuant to the above-described regulations, of any forfeiture hereunder, by registered mail at the last known address of such subscriber.

D. F. HOUSTON,
Secretary of the Treasury.

EXHIBIT 53.

[1920. Department Circular No. 200. Loans and Currency.]

FOURTH LIBERTY LOAN SUBSCRIPTIONS IN DEFAULT.

TREASURY DEPARTMENT,
OFFICE OF THE SECRETARY,
Washington, July 30, 1920.

Pursuant to the provisions of Treasury Department Circular No. 121, dated September 28, 1918, any and all installment payments made to the Treasury Department or to a Federal Reserve Bank upon subscriptions to Fourth Liberty Loan 4½ per cent gold bonds of 1933-1938 filed with an official agency designated in said circular, upon which bonds have been allotted, and upon which one or more of the subsequent installment payments due pursuant to such circular and allotment has not been paid, are hereby declared to be forfeited to the United States; and such subscriptions and all right and interest in the bonds allotted thereon are hereby declared to be forfeited because of the failure to make payments when and as required by said circular.

Pursuant to the provisions of said Treasury Department Circular No. 121, dated September 28, 1918, and the Regulations dated September 25, 1918, defining special arrangements for subscriptions from persons in the military forces of the United States, any and all installment payments made by allotment of pay to the Secretary of the Treasury upon subscriptions to Fourth Liberty Loan 4½ per cent gold bonds of 1933-1938 filed by persons in the military forces of the United States in accordance with such regulations, upon which bonds have been allotted, and upon which one or more of the subsequent installment payments due pursuant to such regulations and allotment has not been paid, are hereby declared to be forfeited to the United States; and such subscriptions and all right and interest in the bonds allotted thereon are hereby declared to be forfeited because of the failure to make payments when and as required by such regulations: *Provided, however,* That no forfeiture shall occur hereunder in respect to subscriptions on which allotments have been terminated or reduced pursuant to such regulations, except for failure to make payments when and as required by such regulations and reduced allotment.

Installment payments hereby forfeited shall be credited to the general account of the Treasurer of the United States (if not already credited) as "Forfeited Fourth Liberty Loan installment payments," and shall be covered into the Treasury to the credit of "Miscellaneous Receipts." Federal Reserve Banks will attach to every transcript showing such credits a schedule giving with respect to each such subscription the name of the subscriber, the amount of bonds allotted, and the amount of the payment or payments received against the subscription and therewith credited. If such installment payments have already been credited to the general account of the Treasurer of the United States, Federal Reserve Banks will forthwith send to the Treasurer a like schedule to accompany the transcript on which such credits appeared, identifying such transcript

by date. Upon receipt of all such forfeited installment payments against any such subscription, the allotment will be reduced accordingly by the face amount of the forfeited subscription.

The Treasury Department or Federal Reserve Bank, as the case may be, with which a subscription has been filed on which any installment payment is forfeited pursuant hereto, will advise the subscriber of the forfeiture by registered mail at the last known address of such subscriber. The Treasury Department will advise any person in the military forces of the United States, who subscribed pursuant to the above-described regulations, of any forfeiture hereunder, by registered mail at the last known address of such subscriber.

D. F. HOUSTON,
Secretary of the Treasury.

EXHIBIT 54.

[1919. Department Circular No. 142. Loans and Currency]

ASSIGNMENTS OF UNITED STATES REGISTERED BONDS AND NOTES FOR EXCHANGE FOR COUPON BONDS AND NOTES.

TREASURY DEPARTMENT,
OFFICE OF THE SECRETARY,
Washington, November 15, 1919.

The following additional rules and regulations will govern assignments of United States registered bonds and notes to the Secretary of the Treasury for exchange for coupon bonds and notes:

1. Registered bonds or notes which are assigned to "The Secretary of the Treasury for exchange for coupon bonds/notes" or to "The Secretary of the Treasury for exchange" or in any form which clearly indicates the intent of the assignor to exchange for coupon bonds or notes, will be regarded as in effect assigned in blank, unless accompanied by written instructions, restricting delivery of the coupon bonds or notes to be issued upon exchange. The coupon bonds or notes, in the absence of written instructions to the contrary, will be issued and delivered to the person by whom the registered bonds or notes are presented for such exchange, but the delivery of the coupon bonds or notes issued upon such exchange may be restricted by adding to the assignment express instructions as to delivery, as, for example, by inserting the words "to be delivered to.....",

(Name of person to whom delivery is to be made.)

2. Registered bonds or notes assigned for exchange in the manner above described, without instructions restricting delivery, lack the protection which registration affords and therefore may not safely be shipped without insurance. Accordingly, arrangements may be made as between Federal Reserve Banks and incorporated banks and trust companies for the transportation of registered bonds and notes so assigned to and from Federal Reserve Banks by registered mail insured, the charges in each case to be paid by the respective holders and to be remitted by the incorporated bank or trust company to the Federal Reserve Bank, in the same manner as if the bonds or notes were in coupon form. Full information as to such arrangements for the shipment of coupon bonds and notes by registered mail insured will be found in paragraph 27 of Treasury Department Circular No. 141, dated September 15, 1919.

3. Under existing law, no relief can be given in case of the loss or theft of registered bonds or notes which have been assigned for exchange in the manner above described, without instructions restricting delivery.

4. The Secretary of the Treasury may withdraw or amend at any time or from time to time all or any of the provisions of this circular.

CARTER GLASS,
Secretary of the Treasury.

EXHIBIT 55.

[1920. Department Circular No. 182. Loans and Currency.]

ASSIGNMENTS OF UNITED STATES REGISTERED BONDS AND NOTES.

TREASURY DEPARTMENT,
OFFICE OF THE SECRETARY,
Washington, February 14, 1920.

1. In cases where United States bonds or notes are registered on the books of the Treasury Department in the name of a trustee, executor, administrator, agent, or attorney in fact, or officer of a corporation or unincorporated association, lodge, or organization, and the registration shows both the name and the representative capacity, as, for example, A. B., administrator of the estate of C. D., assignments by the identical person so named, when executed under the representative title in the same form as set forth in the registration, will be recognized by the Treasury Department without requiring proof of his appointment or authority to act: *Provided, however,* That no assignment by any such person to himself individually, or by any such persons acting jointly to one or more of their number individually, will be recognized unless accompanied by a duly authenticated copy of an order or decree of court of competent jurisdiction specifically authorizing the assignment, in accordance with the provisions of Treasury Department Circular No. 147, dated July 22, 1919, or expressly authorized by the instrument of authority, in the case of a trustee, executor, agent, or attorney in fact.

2. Nothing herein contained shall be deemed to apply to assignments of United States registered bonds or notes by guardians for minors, or to affect the requirement imposed by the general regulation of the Treasury Department that if an assignment of a United States registered bond or note is made by anyone other than the registered owner, appropriate evidence of his authority to act must be produced, and must accompany the bond or note (unless already on file in the Treasury Department, Division of Loans and Currency).

3. The regulations herein prescribed will govern assignments by assignees of United States registered bonds and notes, as well as assignments by registered owners.

4. The Secretary of the Treasury may withdraw or amend at any time or from time to time all or any of the provisions of this circular.

D. F. HOUSTON,
Secretary of the Treasury.

EXHIBIT 56.

[1920. Supplement to Department Circular No. 141, of September 15, 1919. Loans and Currency.]

SUPPLEMENTAL RULES AND REGULATIONS CONCERNING TRANSACTIONS IN LIBERTY BONDS AND VICTORY NOTES.

TREASURY DEPARTMENT,
OFFICE OF THE SECRETARY,
Washington, April 30, 1920.

1. Treasury Department Circular No. 141, dated September 15, 1919, prescribing rules and regulations governing transactions in Liberty bonds and Victory notes, is hereby amended by striking out paragraph 27 and inserting in lieu thereof a new paragraph 27, reading as follows:

TRANSPORTATION CHARGES AND RISKS ON BONDS AND NOTES.

27. Transportation charges and risks upon bonds and notes presented to the Treasury Department, Washington, or a Federal Reserve Bank, for exchange or transfer, or for other transactions included within the scope of this circular, must be borne by the holders of the bonds or notes presented, and the bonds or notes must be delivered to the Treasury Department or the Federal Reserve Bank with all transportation charges prepaid. Registered bonds and notes to be delivered upon exchange or transfer, or otherwise, unless delivered in person to the registered owner or his duly authorized representative, will be delivered by registered mail without expense to, but at the risk of, the registered owner, except that such registered bonds or notes will be delivered by express collect at the risk and expense of the registered owner if written request for such delivery be made. Coupon bonds and notes to be delivered upon exchange or otherwise, unless delivered in person to the owner or his duly authorized representative, will be delivered at the owner's risk and expense, and, unless complete arrangements for delivery by registered mail insured have been made by the owner in advance of presentation of the bonds or notes, will be delivered by express collect. Remittances to the Treasury Department to cover expenses of postage and insurance for shipments of coupon bonds and notes by registered mail insured from the Treasury Department direct, will not be accepted, and notwithstanding such remittances and specific request for insurance, the Treasury Department will deliver such coupon bonds and notes by express collect. Inasmuch as the cost of transportation of coupon bonds and notes by express is greater than by registered mail insured, holders of bonds and notes are advised to consult with their own banks and trust companies in cases where transactions involve the transportation of coupon bonds or notes, for arrangements may be made as between Federal Reserve Banks and incorporated banks and trust companies for the transportation of such coupon bonds and notes to and from Federal Reserve Banks by registered mail insured, the charges in each case to be paid by the respective holders and to be remitted by the incorporated banks and trust companies to the Federal Reserve Banks. Such arrangements for the transportation

of coupon bonds and notes by registered mail insured can not be effected if transactions are submitted direct to the Treasury Department, Washington, instead of through an incorporated bank or trust company to the appropriate Federal Reserve Bank. Registered bonds and notes assigned in blank, and registered bonds and notes assigned to the Secretary of the Treasury for exchange for coupon bonds/notes, without instructions restricting delivery, lack the protection which registration affords, and will therefore be regarded, for the purposes of this paragraph, as in effect coupon bonds and notes. Transportation charges and risks on bonds and notes transmitted between Federal Reserve Banks and the Treasury Department under the provisions of this circular will be borne by the United States.

2. Notwithstanding the provisions of Treasury Department Circular No. 137, dated March 7, 1919, as amended and supplemented June 10 and November 1, 1919, and Treasury Department Circular No. 139, dated May 20, 1919, as amended and supplemented November 1, 1919, the provisions of said paragraph 27, as amended, shall apply to and govern transactions involving the conversion of 4 per cent bonds of the first Liberty loan converted and the second Liberty loan, or the conversion of Victory notes.

3. Nothing herein contained shall be deemed to modify or affect the provisions of Treasury Department Circular No. 164, dated December 15, 1919, as amended and supplemented March 13, 1920, as to transportation charges and risks in connection with exchanges and conversions of coupon Liberty bonds in temporary form.

4. The Secretary of the Treasury may withdraw or amend at any time or from time to time all or any of the provisions of this supplemental circular.

D. F. HOUSTON,
Secretary of the Treasury.

EXHIBIT 57.

[1920. Second Supplement to Department Circular No. 141, of September 15, 1919. Loans and Currency.]

SUPPLEMENTAL RULES AND REGULATIONS CONCERNING TRANSACTIONS IN LIBERTY BONDS AND VICTORY NOTES.

TREASURY DEPARTMENT,
OFFICE OF THE SECRETARY,
October 12, 1920.

1. Treasury Department Circular No. 141, dated September 15, 1919, prescribing rules and regulations governing transactions in Liberty bonds and Victory notes, is hereby amended by striking out paragraph 12 and inserting in lieu thereof a new paragraph 12, reading as follows:

"12. ASSIGNMENTS IN CASE OF DEATH OF REGISTERED HOLDER.—In case of the death of the holder of United States registered bonds or notes, if the decedent leave a will which is duly admitted to probate, or die intestate and the estate is administered in a court of competent jurisdiction, assignment may be made only by the duly appointed representative of the estate. Assignments made by executors or administrators, or other duly appointed representatives, should be supported by a duly executed certificate under seal of the court appointing such representative, dated not more than 90 days prior to the execution of the assignments, showing the appointment and qualification of such representative and that the appointment is still in force, or, in the absence of such a certificate, by duly certified copies of the representative's letters of appointment, the certification of which should be dated not more than 90 days prior to the execution of the assignment and should show that at the date of certification the appointment was still in force. If the decedent die intestate and the gross value of the estate, both real and personal, does not exceed \$500, or it is shown by proof satisfactory to the Secretary of the Treasury that administration of the estate of such decedent is not required in the State of the decedent's domicile, assignments by the person or persons entitled to the bonds or notes under the laws of the State of the decedent's domicile may be recognized, without administration, upon presentation of proof satisfactory to the Secretary of the Treasury that the debts of the decedent and of his estate have been paid or provided for, and that such person or persons are entitled to the bonds or notes. Such proof will, in general, include affidavits of the persons claiming to be entitled, setting forth the facts in detail, supported by affidavits of at least two disinterested persons, preferably public officers of the United States, or executive officers of incorporated banks or trust companies, having personal knowledge of such facts and by the official certificate or other proof of death of the registered holder. (See Form L & C 285, copies of which may be obtained at any Federal Reserve Bank or branch thereof, or at the Treasury Department, Washington.) In addition to the above, if the gross value of the estate exceeds \$500, proof that administration of the estate of the decedent is not required should be submitted in the form of an affidavit or certificate from a practicing attorney or judicial

officer of the State of the decedent's domicile. If in any such case any of the persons entitled are minors or under disability, no assignment without administration will be permitted unless to them, or upon compliance with the Treasury Department regulations as to assignments by or for such persons, or upon proof satisfactory to the Secretary of the Treasury that the right, title, and interest of such minors or incompetents in and to the bonds or notes are properly provided for. The Secretary of the Treasury may in any case require such other or further evidence as may be deemed necessary and may also require a bond of indemnity with sureties satisfactory to the Secretary of the Treasury."

2. The Secretary of the Treasury may withdraw or amend at any time or from time to time all or any of the provisions of this supplemental circular.

D. F. HOUSTON,
Secretary of the Treasury.

Second Liberty loan: 4% bonds of 1927- 1942.	Second 4's.	240,003,250	Nov. 15, 1917	Redeemable on or after Nov. 15, 1927. Payable Nov. 15, 1942.	May 15, Nov. 15.
Converted 4½% bonds of 1927-1942.	Second 4½'s	3,085,303,750	May 9, 1918		
Third Liberty loan: 4½% bonds of 1928..	Third 4½'s.	3,662,715,800	May 9, 1918	Payable Sept. 15, 1928.	Mar. 15, Sept. 15.
Fourth Liberty loan: 4½% bonds of 1933- 1938.	Fourth 4½'s	6,394,354,500	Oct. 24, 1918	Redeemable on or after Oct. 15, 1933. Payable Oct. 15, 1938.	Apr. 15, Oct. 15.
Victory Liberty loan: 4½% Notes of 1922- 1923.	Victory 4½'s	3,427,969,700	May 20, 1919		
3¾% Notes of 1922- 1923.	Victory 3¾'s	818,395,650	May 20, 1919	Redeemable June 15 or Dec. 15, 1922. Payable May 20, 1923.	June 15, Dec. 15 and May 20, 1923.

Form and denominations.—Liberty Bonds and Victory Notes are issued in both coupon and registered form in the following denominations: Coupon, \$50, \$100, \$500, \$1,000, \$5,000, \$10,000; registered, \$50, \$100, \$500, \$1,000, \$5,000, \$10,000, \$50,000, \$100,000; except that the First 3½'s are not issued in coupon form in denominations of \$5,000 and \$10,000, nor in registered form in the denomination of \$50.

3½ Per Cent Liberty Bonds and 3¾ Per Cent Victory Notes exempt from Federal, State, and local taxation: Such bonds and notes are exempt, both as to principal and interest, from all taxation (except estate or inheritance taxes) now or hereafter imposed by the United States, any State, or any of the possessions of the United States, or by any local taxing authority.

4 Per Cent and 4½ Per Cent Liberty Bonds and 4¾ Per Cent Victory Notes exempt from State and local taxation and from normal Federal Income Tax: Such bonds and notes are exempt, both as to principal and interest, from all taxation now or hereafter imposed by the United States, any State, or any of the possessions of the United States, or by any local taxing authority, except (a) estate or inheritance taxes, and (b) graduated additional income taxes, commonly known as surtaxes, and excess profits and war-profits taxes, now or hereafter imposed by the United States, upon the income or profits of individuals, partnerships, associations, or corporations.

4 Per Cent and 4½ Per Cent Liberty Bonds entitled to limited exemptions from Federal Income Surtaxes and Profits Taxes: Such

bonds are entitled to certain limited exemptions from graduated additional income taxes, commonly known as surtaxes, and excess-profits and war-profits taxes, now or hereafter imposed by the United States, upon the income or profits of individuals, partnerships, associations, or corporations, in respect to the interest on principal amounts thereof as follows:

- \$5,000 in the aggregate of First 4's, First $4\frac{1}{4}$'s, First Second $4\frac{1}{4}$'s, Second 4's and $4\frac{1}{4}$'s, Third $4\frac{1}{4}$'s, Fourth $4\frac{1}{4}$'s, Treasury Certificates, and United States War-Savings Certificates.
- 30, 000 of First Second $4\frac{1}{4}$'s, until the expiration of two years after the termination of the war, as fixed by proclamation of the President.
- 30, 000 of Fourth $4\frac{1}{4}$'s, until the expiration of two years after the termination of the war.
- 30,000 in the aggregate of First 4's, First $4\frac{1}{4}$'s, First Second $4\frac{1}{4}$'s, Second 4's and $4\frac{1}{4}$'s, Third $4\frac{1}{4}$'s, and Fourth $4\frac{1}{4}$'s, as to the interest received on and after January 1, 1919, until the expiration of five years after the termination of the war.
- 45,000 in the aggregate of First 4's, First $4\frac{1}{4}$'s, Second 4's and $4\frac{1}{4}$'s, and Third $4\frac{1}{4}$'s, as to the interest received after January 1, 1918, until the expiration of two years after the termination of the war; this exemption conditional upon original subscription to, and continued holding at the date of the tax return of, two-thirds as many bonds of the Fourth Liberty Loan.
- 20, 000 in the aggregate of First 4's, First $4\frac{1}{4}$'s, First Second $4\frac{1}{4}$'s, Second 4's and $4\frac{1}{4}$'s, Third $4\frac{1}{4}$'s, and Fourth $4\frac{1}{4}$'s, as to the interest received on and after January 1, 1919; this exemption conditional upon original subscription to, and continued holding at the date of the tax return of, one-third as many notes of the Victory Liberty Loan, and extending through the life of such notes of the Victory Liberty Loan.

\$160, 000 total possible exemptions from Federal income surtaxes and profits taxes, subject to conditions above summarized.

All Liberty Bonds and Victory Notes exempt from taxes in hands of foreign holders: Bonds, notes, and certificates of indebtedness of the United States are, while beneficially owned by a nonresident alien individual, or a foreign corporation, partnership, or association, not engaged in business in the United States, exempt, both as to principal and interest, from any and all taxation now or hereafter imposed by the United States, any State, or any of the possessions of the United States, or by any local taxing authority.

$4\frac{1}{4}$ Per Cent Liberty Bonds and $4\frac{3}{4}$ Per Cent Victory Notes receivable at par in payment of Federal Estate and Inheritance Taxes: All such bonds and notes which have been owned by any person continuously for at least six months prior to the date of his death and which upon such date constitute part of his estate are receivable by the United States at par and accrued interest in payment of Federal estate or inheritance taxes.

$2\frac{1}{2}$ Per Cent Cumulative Sinking Fund.—For the fiscal year beginning July 1, 1920, and for each fiscal year thereafter until all Liberty Bonds and Victory Notes are retired, the Victory Liberty Loan Act appropriates, out of any money in the Treasury not otherwise ap-

propriated, for the purpose of a sinking fund, an amount equal to the sum of (1) $2\frac{1}{2}$ per cent of the aggregate amount of such bonds and notes outstanding on July 1, 1920, less an amount equal to the par amount of any obligations of foreign Governments held by the United States on July 1, 1920, and (2) the interest which would have been payable during the fiscal year for which the appropriation is made on the bonds and notes purchased, redeemed, or paid out of the sinking fund during such year or in previous years.

Conversion Privileges.— $4\frac{3}{4}$ per cent and $3\frac{3}{4}$ per cent Victory Notes are interconvertible. Liberty First 4's are convertible into Liberty First $4\frac{1}{4}$'s. Liberty Second 4's are convertible into Liberty Second $4\frac{1}{4}$'s. No other conversion privileges are extant.

The principal and interest of all Liberty Bonds and Victory Notes are payable in United States gold coin of the present standard of value.

Liberty Bonds and Victory Notes are issued under authority of the acts of Congress approved April 24, 1917, September 24, 1917, April 4, 1918, July 9, 1918, September 24, 1918, and March 3, 1919, and pursuant to official Treasury Department circulars, from which the statements in this form are summarized and to which they are subject.

Treasury Department, Form L & C 400.
Revised June 30, 1920.

EXHIBIT 59.

[1919. Department Circular No. 164. Loans and Currency.]

**EXCHANGES OF TEMPORARY 4 PER CENT AND 4 1-4 PER CENT
COUPON LIBERTY BONDS FOR PERMANENT BONDS.**

TREASURY DEPARTMENT,

OFFICE OF THE SECRETARY,

Washington, December 15, 1919.

To Holders of 4 per cent and 4½ per cent coupon Liberty Bonds, Federal Reserve Banks, banks and trust companies incorporated under the laws of the United States or of any State, and others concerned:

1. The rules and regulations herein prescribed will govern exchanges of the 4 per cent and 4½ per cent coupon Liberty bonds originally issued, hereinafter called temporary bonds, for like bonds with all subsequent coupons covering interest payments to maturity attached, hereinafter called permanent bonds, exchanges of temporary bonds for registered bonds, and conversions and exchanges of temporary 4 per cent bonds. The temporary bonds referred to in this circular were issued, respectively, pursuant to Treasury Department Circulars No. 90, dated October 1, 1917, No. 93, dated October 19, 1917, No. 111, dated April 6, 1918, No. 114, dated May 9, 1918, No. 121, dated September 28, 1918, and No. 123, dated October 24, 1918.

2. The temporary 4 per cent and 4½ per cent coupon Liberty bonds, pursuant to their terms and the terms of the Treasury Department circulars under which they were respectively issued, have no interest coupons attached covering interest payments after the following dates, respectively:

Title.	Date of last coupon.
First Liberty Loan Converted 4 per cent bonds of 1932-1947.....	Dec. 15, 1919
First Liberty Loan Converted 4½ per cent bonds of 1932-1947.....	June 15, 1920
First Liberty Loan Second Converted 4½ per cent bonds of 1932-1947.....	Dec. 15, 1920
Second Liberty Loan 4 per cent bonds of 1927-1942.....	Nov. 15, 1919
Second Liberty Loan Converted 4½ per cent bonds of 1927-1942.....	May 15, 1920
Third Liberty Loan 4½ per cent bonds of 1923.....	Mar. 15, 1920
Fourth Liberty Loan 4½ per cent bonds of 1933-1938.....	Oct. 15, 1920

All temporary bonds presented for exchange under the provisions of this circular must by their terms be exchangeable on and after said dates, respectively, for like bonds with all subsequent coupons attached. Temporary bonds presented for exchange should have all interest coupons detached, for collection in ordinary course when due. The permanent coupon bonds will have the same dates of issue, respectively, as the temporary bonds, and will bear the facsimile signatures of the Secretary of the Treasury and Register of the Treasury in office on said dates, respectively.

EXCHANGES OF TEMPORARY BONDS FOR REGISTERED BONDS.

3. *Important.*—All 4 per cent and $4\frac{1}{4}$ per cent *registered* Liberty bonds are in permanent form and need not be exchanged for other bonds, except that 4 per cent registered bonds may be converted into $4\frac{1}{4}$ per cent bonds pursuant to the regulations governing the extended conversion privilege set forth in Treasury Department Circular No. 137, dated March 7, 1919, as amended and supplemented June 10 and November 1, 1919. Holders of temporary 4 per cent and $4\frac{1}{4}$ per cent coupon Liberty bonds are, therefore, strongly urged to present their coupon bonds for exchange into registered bonds instead of for coupon bonds in permanent form, and in that event will promptly receive registered bonds upon exchange. All temporary 4 per cent coupon Liberty bonds presented on or after November 15, 1919, and December 15, 1919, respectively, for exchange into registered bonds (and all 4 per cent registered Liberty bonds presented on or after said dates, respectively, for exchange for coupon bonds), will, unless otherwise expressly indicated in writing by the holder, be deemed to be presented also for conversion into $4\frac{1}{4}$ per cent bonds. Arrangements similar to those described in paragraph 7 hereof may be made for the transportation of the temporary bonds so surrendered in exchange for registered bonds from incorporated banks and trust companies to Federal Reserve Banks by registered mail insured, at the expense and risk of the United States. The registered bonds issued in exchange for temporary coupon bonds so surrendered will be delivered by registered mail at the expense and risk of the United States.

GENERAL PROVISIONS.

4. In view of the extension of the conversion privilege, Treasury Department Circular No. 158, dated September 8, 1919, to which reference is hereby made, has prescribed special rules and regulations governing the exchange and conversion of 4 per cent coupon Liberty bonds. This circular provides, among other things, that while permanent 4 per cent bonds of the Second Liberty Loan and of the First Liberty Loan Converted will be issued in exchange for temporary 4 per cent bonds after November 15, 1919, and December 15, 1919, respectively, if specifically requested, it is not expected that such permanent bonds will be available for delivery before March 15, 1920. Said circular provides further that all temporary 4 per cent bonds presented on or after November 15, 1919, and December 15, 1919, respectively, for exchange into permanent bonds, will, unless otherwise expressly indicated in writing by the holder, be deemed to be presented for conversion into $4\frac{1}{4}$ per cent bonds, as well as for exchange into permanent bonds, and will be held in suspense pending the date when the permanent $4\frac{1}{4}$ per cent bonds of the Second Liberty Loan Converted and of the First Liberty Loan Converted will be available for delivery, which, it is expected, will be about March 15, 1920. In view of the provisions of said circular, therefore, there will be no exchanges of temporary 4 per cent bonds for permanent coupon bonds before March 15, 1920, and by that date it is expected that permanent $4\frac{1}{4}$ per cent bonds of the Second Liberty Loan Converted and of the First Liberty Loan Converted will be available for delivery,

not only upon exchange and conversion of temporary 4 per cent bonds, but also in exchange for the temporary $4\frac{1}{4}$ per cent bonds.

5. The dates upon which the permanent coupon bonds of the several issues may be expected to begin to be available for delivery in exchange for temporary bonds are accordingly as follows:

Title.	Date for exchange.
First Liberty Loan Converted 4 per cent bonds of 1932-1947.....	Mar. 15, 1920
First Liberty Loan Converted $4\frac{1}{4}$ per cent bonds of 1932-1947.....	Mar. 15, 1920
First Liberty Loan Second Converted $4\frac{1}{4}$ per cent bonds of 1932-1947.....	Dec. 15, 1920
Second Liberty Loan 4 per cent bonds of 1927-1942.....	Mar. 15, 1920
Second Liberty Loan Converted $4\frac{1}{4}$ per cent bonds of 1927-1942.....	Mar. 15, 1920
Third Liberty Loan $4\frac{1}{4}$ per cent bonds of 1928.....	Mar. 15, 1920
Fourth Liberty Loan $4\frac{1}{4}$ per cent bonds of 1933-1938.....	Oct. 15, 1920

EXCHANGES AT OFFICIAL AGENCIES.

6. Exchanges of temporary for permanent bonds may be effected at any Federal Reserve Bank, or at the Treasury Department, Division of Loans and Currency, Washington, beginning on or about the respective dates set forth in paragraph 5 hereof. No charge for the exchange will be imposed by the United States. Denominational exchanges may be effected at the same time as exchanges of temporary for permanent bonds. The several Federal Reserve Banks located in Boston, New York, Philadelphia, Cleveland, Richmond, Atlanta, Chicago, St. Louis, Minneapolis, Kansas City, Dallas, and San Francisco have been designated as fiscal agents of the United States, to receive and collate applications for the permanent bonds, to accept surrenders of the temporary bonds, to effect exchanges of the temporary bonds for permanent bonds, and to make deliveries of the permanent bonds upon exchange. The temporary bonds to be exchanged must be presented and surrendered to a Federal Reserve Bank or to the Treasury Department accompanied by Request for Exchange on Form L & C 305, or a substantially similar form, signed with the respective autograph signatures of the holders of the bonds presented for exchange, and must be delivered at the risk and expense of the respective holders with all transportation charges prepaid (unless presented to Federal Reserve Banks by incorporated banks and trust companies pursuant to the special arrangements described in paragraph 7 hereof). Specific instructions for the issue and delivery of the permanent bonds should accompany the request for exchange. (Use Form L & C 305, copies of which, or of a substantially similar form, may be obtained, upon application, from any Federal Reserve Bank or from the Treasury Department.) Deliveries of the permanent bonds issued upon exchange in accordance with the provisions of this circular will be made within the United States, its Territories, and insular possessions at the expense and risk of the United States.

7. Many incorporated banks and trust companies within the United States will, it is expected, offer to undertake exchanges of temporary bonds for permanent bonds for their customers without expense to the holders. Holders of temporary bonds who avail themselves of the assistance of their own banks and trust companies in effecting the exchanges, will, of course, present and surrender the temporary bonds

through such institutions. Special arrangements may be made by such incorporated banks and trust companies with the Federal Reserve Banks of their respective districts for the transportation of temporary bonds from the incorporated banks and trust companies to the Federal Reserve Banks by registered mail insured, at the expense and risk of the United States, provided that the shipments are made in accordance with the instructions of the Federal Reserve Bank, and the postage and registration charges on such shipments, if paid in the first instance by the incorporated bank or trust company, will be reimbursed to it by the United States through the Federal Reserve Bank upon appropriate voucher. Full information concerning such arrangements will be furnished by Federal Reserve Banks to incorporated banks and trust companies upon application. Such arrangements for the transportation of the temporary bonds can not be effected if the bonds are submitted direct to the Treasury Department instead of to a Federal Reserve Bank, or if submitted to a Federal Reserve Bank by any person other than an incorporated bank or trust company. All temporary bonds forwarded by incorporated banks and trust companies to the Federal Reserve Banks for exchange pursuant to such arrangements must be indelibly stamped on the face with a legend reading as follows: "Presented for exchange for permanent bonds, by _____"; all such bonds so stamped

(Name of bank or trust company.)

shall thenceforth be deemed nonnegotiable, and will be accepted by the Federal Reserve Banks or the Treasury Department only when presented for exchange by or for account of the bank or trust company named thereon. Deliveries of the permanent bonds issued upon such exchanges will be made to the incorporated bank or trust company presenting the temporary bonds for exchange, and will be made within the United States, its Territories and insular possessions, at the expense and risk of the United States. Incorporated banks and trust companies in effecting exchanges pursuant to this paragraph act as agents of the holders of the bonds and not as agents of the United States, and the United States will not be responsible for the receipt or custody of the temporary bonds by any such incorporated bank or trust company, nor for the custody or delivery by the bank or trust company of the permanent bonds issued upon exchange.

DELIVERIES OF PERMANENT BONDS TO INCORPORATED BANKS AND TRUST COMPANIES FOR PURPOSES OF EXCHANGE.

8. In order to facilitate exchanges of temporary for permanent bonds, limited amounts of permanent bonds will be made available, from time to time, until the expiration of six months from the respective dates named in paragraph 5 hereof, through the Federal Reserve Banks to incorporated banks and trust companies within the continental United States which are duly designated as special depositories of public moneys pursuant to Treasury Department Circular No. 92, of April 17, 1919, and which qualify therefor, before receiving such deliveries of permanent bonds, by pledging as collateral security for the permanent bonds to be delivered a like face amount of bonds, notes, or certificates of indebtedness of the United States Government, of any issue, and otherwise comply with the terms and conditions set out in the official application blank provided for that purpose (Form L & C 304, copies of which, or of a substantially similar form, may be obtained, upon application, from the Federal Reserve Banks of the

respective districts). Applications for such deliveries of permanent bonds must be filed upon the official application blank with the Federal Reserve Bank of the district in which the bank or trust company is located; and designated depositories receiving permanent bonds on such applications will be conclusively presumed to have assented to all the terms and provisions hereof and of such applications and to the retention of the collateral security pledged or to be pledged as collateral security thereunder and hereunder. The Federal Reserve Bank may reject any application or allow it for a smaller amount of bonds than that applied for; in fixing the amount of permanent bonds for which it will apply, the applicant bank or trust company should be guided by the amount of exchanges which it expects to make for itself and its customers within a reasonable period of time after the date of the application. All securities tendered as collateral security for deliveries of permanent bonds on such applications must be deposited with the Federal Reserve Bank of the district, as fiscal agent of the United States, and the right is reserved to call for additional collateral security at any time. The examination and approval of the securities is committed to the several Federal Reserve Banks, acting under the direction of the Secretary of the Treasury; the withdrawal of securities, the pledge of additional securities, and the substitution of securities shall be made from time to time as required or permitted by the Federal Reserve Banks acting under like direction.

9. Unless and until delivered by the applicant bank or trust company in exchange for temporary bonds in accordance with the terms of the application and of this circular, the permanent bonds obtained on such applications shall remain unissued and be subject to withdrawal by the Federal Reserve Bank on demand; and all temporary bonds received and stamped by such banks and trust companies in accordance therewith will thenceforth be deemed nonnegotiable and will cease to have validity for any purpose except for credit to the account of the bank or trust company named thereon with the Federal Reserve Bank. For all temporary bonds received and stamped and delivered to the Federal Reserve Bank in accordance with such applications, the applicant bank or trust company will receive appropriate credit in its "permanent bond" account with the Federal Reserve Bank.

10. The transportation charges and risks upon shipments of temporary bonds from and deliveries of permanent bonds to incorporated banks and trust companies making application for deliveries of permanent bonds under this title and receiving permanent bonds thereon, and the transportation charges and risks upon shipments of the collateral security required upon such applications to and from the Federal Reserve Banks, will be borne by the United States, provided that the shipments are made in accordance with the instructions of the Federal Reserve Bank from which the permanent bonds are obtained, and the postage and registration charges on such shipments, if paid in the first instance by the bank or trust company, will be reimbursed to it by the United States through the Federal Reserve Banks upon appropriate voucher. Full information as to such shipments must first be secured by incorporated banks and trust companies from the Federal Reserve Banks of the respective districts. Incorporated banks and trust companies will not be reimbursed for other expenses arising in connection with such exchanges.

11. The United States will not be responsible for the receipt or custody of temporary bonds received by any incorporated bank or trust company securing permanent bonds upon applications pursuant to paragraph 8 hereof, nor for the custody or delivery of permanent bonds by any such bank or trust company.

CONVERSION AND EXCHANGE OF TEMPORARY FOUR PER CENT BONDS.

12. In cases where temporary 4 per cent coupon bonds of the Second Liberty Loan or of the First Liberty Loan Converted are presented for both conversion and exchange after November 15 and December 15, 1919, respectively, and before May 15 or June 15, 1920, as the case may be, in accordance with the provisions of said Treasury Department Circular No. 158, dated September 8, 1919, holders of the surrendered 4 per cent bonds will receive with the 4½ per cent coupon bonds in permanent form issued upon such conversion and exchange, a special interest coupon, payable on May 15, 1920, or June 15, 1920, as the case may be, and covering the interest payment at 4 per cent per annum to which they may be entitled up to and including said dates, respectively. Such special interest coupons will accompany, or be attached to, the permanent 4½ per cent bonds so issued, and such bonds, with coupons, will be subject otherwise in all respects to the provisions of this circular, except as herein otherwise specifically provided. Incorporated banks and trust companies receiving permanent bonds upon applications pursuant to paragraph 8 hereof will not be authorized, however, to deliver any such permanent 4½ per cent bonds in exchange for 4 per cent coupon Liberty bonds presented for both exchange and conversion pursuant to the provisions of this circular or of said Treasury Department Circular No. 158. Such combined conversions and exchanges can be effected only at the several Federal Reserve Banks and at the Treasury Department, Division of Loans and Currency, Washington, but special arrangements therefor may be made by incorporated banks and trust companies in accordance with the provisions of paragraph 7 hereof.

13. As provided in said Treasury Department Circular No. 158, holders of temporary 4 per cent coupon Liberty bonds who present them for conversion into 4½ per cent bonds as well as for exchange into registered bonds will promptly receive registered 4½ per cent bonds, bearing interest at the rate of 4½ per cent per annum from the interest payment date next succeeding the date of presentation for conversion, in accordance with the terms of the extended conversion privilege. Any interest at 4 per cent per annum accruing after November 15, 1919, and December 15, 1919, respectively, to which the holders of such bonds so surrendered may be entitled, will be paid to the holders by check.

OTHER PROVISIONS.

14. The Secretary of the Treasury may withdraw or amend at any time or from time to time any or all of the provisions of this circular, and may make at any time special arrangements for exchanges of temporary for permanent bonds in the Territories and insular possessions of the United States.

CARTER GLASS,
Secretary of the Treasury.

EXHIBIT 60.

[1920. Supplement to Department Circular No. 164, of December 15, 1919. Loans and Currency.]

**EXCHANGES OF TEMPORARY 4 PER CENT AND 4 1-4 PER CENT
COUPON LIBERTY BONDS FOR PERMANENT BONDS.**

TREASURY DEPARTMENT,
OFFICE OF THE SECRETARY,
Washington, March 13, 1920.

Treasury Department Circular No. 164, dated December 15, 1919, in relation to exchanges of temporary 4 per cent and 4½ per cent coupon Liberty bonds for permanent bonds, is hereby amended and supplemented as follows:

The provisions of paragraphs 3, 7 and 12 of said circular, under which special arrangements may be made by incorporated banks and trust companies with the Federal Reserve Banks for the transportation of bonds at the expense and risk of the United States, are hereby extended, subject to the provisions hereof, to cover private banks doing a recognized banking business and approved by the Federal Reserve Bank of the district in which they are located, upon the same terms and conditions provided in said paragraphs for incorporated banks and trust companies. Full information as to such arrangements will be furnished by Federal Reserve Banks to private banks upon application. All temporary bonds forwarded by such private banks to the Federal Reserve Banks for exchange pursuant to such arrangements must be indelibly stamped on the face thereof with a legend reading as follows: "Presented for exchange for permanent bonds, by -----"; all such bonds so

(Name of private bank.)

stamped shall thenceforth be deemed nonnegotiable, and will be accepted by the Federal Reserve Banks or the Treasury Department only when presented for exchange by or for account of the bank named thereon.

D. F. HOUSTON,
Secretary of the Treasury.

EXHIBIT 61.

1920. Second Supplement to Department Circular No. 164, of December 15, 1919. Loans and Currency.]

**EXCHANGES OF TEMPORARY 4 PER CENT AND 4 1-4 PER CENT
COUPON LIBERTY BONDS FOR PERMANENT BONDS.**

TREASURY DEPARTMENT,
OFFICE OF THE SECRETARY,
Washington, August 27, 1920.

Treasury Department Circular No. 164, dated December 15, 1919, in relation to exchanges of temporary 4 per cent and 4½ per cent coupon Liberty bonds for permanent bonds, as amended and supplemented March 13, 1920, is hereby further amended and supplemented as follows:

The period during which limited amounts of permanent bonds may be made available from time to time through the Federal Reserve

Banks to incorporated banks and trust companies within the continental United States, pursuant to paragraph 8 of said circular, is hereby extended until the expiration of twelve months from the respective dates named in paragraph 5 of said circular, or until such earlier or later date or dates as the Secretary of the Treasury may hereafter from time to time prescribe by memorandum to the several Federal Reserve Banks, as fiscal agents of the United States.

D. F. HOUSTON,
Secretary of the Treasury.

EXHIBIT 62.

[Treasury Department, Loans and Currency. Form L & C 305. Use separate form for each issue of bonds.]

REQUEST FOR EXCHANGE OF TEMPORARY COUPON LIBERTY BONDS FOR PERMANENT BONDS.

Important note.—This request should be submitted to a Federal Reserve Bank, or to the Secretary of the Treasury, Division of Loans and Currency, Washington. Transactions will be expedited if submitted to Federal Reserve Banks. If submitted through an incorporated bank or trust company, special arrangements may be made for the transportation of the bonds from the bank or trust company to the Federal Reserve Bank at the expense and risk of the United States. Each issue of bonds is separately handled, and accordingly must be separately submitted. Use typewriter if possible; otherwise write legibly.

Dated, 19.....
To the FEDERAL RESERVE BANK OF,
Fiscal Agent of the United States,

Or

The SECRETARY OF THE TREASURY,
Division of Loans and Currency, Washington, D. C.

The undersigned presents and surrenders herewith \$..... face amount of temporary coupon Liberty bonds as indicated and as listed below, and requests that said bonds be exchanged for an equal face amount of permanent bonds of the same issue (see notes I and II), in the denominations hereinafter set forth, to be delivered to the undersigned at the address given next below, all in accordance with the provisions of Treasury Department Circular No. 164, dated December 15, 1919.

(Signature),

(Address),

If submitted by a bank or other corporation, or by an unincorporated body, the request should be signed in its name by a duly authorized officer thereof, whose name and title should be given.

NOTE I.—*Unless otherwise indicated over the signature of the applicant below, temporary 4 per cent bonds presented for exchange for permanent coupon (or registered) bonds on this application will be deemed to be presented also for conversion into 4½ per cent bonds.*

Please deliver permanent 4 per cent bonds on this application.

.....
(Signature of applicant.)

NOTE II.—*If registered bonds are desired upon exchange, use this form:*

The undersigned hereby requests the issue of registered bonds upon this application, inscribed in the name of.....

(First name in full. Indicate whether Mrs. or Miss, in cases of women.)

.....
(Middle name or initial.)

(Last name.)

(Or complete legal name of corporation, partnership, or other person.)

Address for interest checks.....

(Give full address.)

(Number.)

(Street.)

.....
(City.)

(State.)

Signature of applicant.....

TEMPORARY COUPON BONDS SURRENDERED.

Indicate with X the issue of bonds presented for exchange. Do not X more than one item on this form. If more than one issue of bonds are to be presented, separate forms must be used for each.

- First Liberty Loan Converted 4 per cent bonds of 1932-1947.
- First Liberty Loan Converted $4\frac{1}{2}$ per cent bonds of 1932-1947.
- First Liberty Loan Second Converted $4\frac{1}{2}$ per cent bonds of 1932-1947.
- Second Liberty Loan 4 per cent bonds of 1927-1942.
- Second Liberty Loan Converted $4\frac{1}{2}$ per cent bonds of 1927-1942.
- Third Liberty Loan $4\frac{1}{2}$ per cent bonds of 1928.

**APPLICATION BY AN INCORPORATED BANK OR TRUST COMPANY
FOR COUPON LIBERTY BONDS IN PERMANENT FORM FOR
DELIVERY IN EXCHANGE FOR TEMPORARY BONDS.**

Dated _____, 192__.

TO THE FEDERAL RESERVE BANK OF _____
AS FISCAL AGENT OF THE UNITED STATES.

The undersigned, a designated depository of public moneys under Treasury Department Circular No. 92, of April 17, 1919 (see note 1), hereby applies for \$_____, face amount, of coupon Liberty bonds in permanent form, of the issue and in the denominations indicated below, to be held by the undersigned for delivery in exchange for temporary coupon bonds of the same issue in accordance with the terms of Treasury Department Circular No. 164, dated December 15, 1919, and otherwise upon the terms and conditions hereinafter set forth. Please deliver such bonds to the undersigned at the address given below as soon as they are available.

The undersigned desires to receive upon this application permanent coupon bonds as follows:

Title.*	Number of pieces.	Denomination.	Total.
.... First Liberty Loan Converted 4% bonds of 1932-1947.....	of \$50 each.....
.... First Liberty Loan Converted 4½% bonds of 1932-1947.....	of \$100 each.....
.... First Liberty Loan Second Converted 4½% bonds of 1932-1947.....	of \$500 each.....
.... Second Liberty Loan 4% bonds of 1927-1942.....	of \$1,000 each.....
.... Second Liberty Loan Converted 4½% bonds of 1927-1942.....	of \$5,000 each.....
.... Third Liberty Loan 4½% bonds of 1928.....	of \$10,000 each.....
.... Fourth Liberty Loan 4½% bonds of 1933-1938.....

* Indicate with X the issue of bonds desired. Do not X more than one issue. Separate forms must be used for each issue.

The undersigned hereby assigns and agrees to pledge to and with the above-named Federal Reserve Bank, as collateral security for the bonds delivered to it upon this application, a like face amount of United States bonds, notes or Treasury certificates of indebtedness. In consideration of the delivery of permanent bonds upon this application, the undersigned agrees to hold the permanent bonds so obtained unissued and subject to withdrawal by the above-named Federal Reserve Bank on demand, unless and until delivered in exchange for temporary bonds in accordance herewith; to deliver said permanent bonds only in exchange for a like face amount of temporary coupon bonds of the same issue, by their terms exchangeable for like bonds with all subsequent coupons attached; to stamp indelibly on the face of all temporary coupon bonds so received, promptly upon receipt, a legend reading as follows: "Accepted in exchange for permanent bonds of same issue and receivable only for credit of the undersigned: _____"; to deliver to the

(Name of bank or trust company.)

above-named Federal Reserve Bank not less frequently than weekly all temporary coupon bonds so received, maintaining a record in triplicate of all such temporary bonds by title, serial number, and denomination, the original to be sent by separate mail to the Federal

Reserve Bank, the duplicate to be sent with the bonds, and the triplicate to be retained by the undersigned; to maintain such accounts and make such reports in connection with such exchanges as may be required by the above-named Federal Reserve Bank or the Treasury Department; to account to the above-named Federal Reserve Bank, as fiscal agent of the United States, for all permanent bonds delivered upon this application; and to redeliver to the above-named Federal Reserve Bank, as fiscal agent of the United States, not later than six months from the respective dates named in paragraph 5 of said Treasury Department Circular No. 164, all permanent bonds delivered hereon, with all the original coupons thereto attached, against which temporary coupon bonds of the same issue duly received and stamped have not been delivered to the Federal Reserve Bank by the undersigned.

It is understood and agreed that the "permanent bond" account of the undersigned with the above-named Federal Reserve Bank, as fiscal agent of the United States, will be charged with the permanent bonds delivered to the undersigned upon this application, and that, in case of any default in the performance of any of the stipulations or agreements herein contained, the Federal Reserve Bank is authorized and empowered to collect the collateral security pledged therefor or any part thereof then matured, or to sell, assign, and transfer such collateral security, or any part thereof, with or without notice, at public or private sale, free from any equity of redemption and without appraisalment or valuation, and to apply the proceeds of any such sale or collection to the satisfaction of any damages, demands, costs, or deficiencies arising by reason of such default.

As collateral security for the bonds delivered hereon and charged in its "permanent bond" account with the Federal Reserve Bank, and for the performance of the obligations of the undersigned hereunder, the undersigned hereby pledges—

A. United States bonds.....	\$.....
B. United States notes.....	\$.....
C. Treasury certificates of indebtedness.....	\$.....
Total.....	\$.....

In witness whereof the undersigned has executed this application under its seal by the officer below named, thereunto duly authorized by action of its governing board.

Signature in full of
applicant incorpo-
rated bank or trust
company.

(CORPORATE SEAL.) Official title.....

Address in full.....

NOTE 1.—In order to secure permanent bonds upon this application, the applicant must first be duly designated as a special depository of public moneys under Treasury Department Circular No. 92, of April 17, 1919, as from time to time amended and supplemented. NOTE 2.—Before receiving bonds upon this application, the applicant will be required to pledge as collateral security for the performance of its obligations thereunder, a face amount of United States bonds or notes, or Treasury certificates of indebtedness, at least equal to the face amount of the bonds to be delivered thereon. All securities pledged must be in negotiable form. NOTE 3.—For all temporary bonds duly received and stamped and delivered to the Federal Reserve Bank in accordance with this application, the applicant will receive appropriate credit in its "permanent bond" account with the Federal Reserve Bank.

EXHIBIT 64.

[Letter from the Secretary of the Treasury to banks and trust companies inclosing placard respecting exchange of temporary bonds for permanent bonds.]

WASHINGTON, *August 18, 1920.*

DEAR SIR: The most recently compiled figures available indicate with respect to exchanges of temporary bonds of the Third Liberty Loan for permanent bonds; which exchanges commenced March 15, last, that while seventy per cent of the face amount of temporary bonds outstanding have been exchanged for permanent bonds, only fifty-three per cent of the number of pieces have been so exchanged. The Department feels that the matter has not been brought to the attention of large numbers of holders of temporary bonds and that some embarrassment may thereby be caused such holders on September 15 when they find themselves in possession of bonds without coupons attached, with no means for collecting the interest then due. The same situation also exists with respect to exchanges of temporary bonds of the First and Second Liberty Loans for permanent bonds, but the next interest payment dates with respect thereto fall at later dates.

With a view to calling the matter to the attention of holders of temporary bonds without coupons attached, the Treasury has prepared placards for public display, copies of which are inclosed. Your courtesy will be appreciated if you will cause such placards to be given prominent public display in your banking quarters.

Very truly yours,

D. F. HOUSTON,
Secretary of the Treasury.

TO THE PRESIDENT OF THE BANK OR TRUST COMPANY ADDRESSED.

[Placard displayed in post offices and other public buildings and banks and trust companies.]

LIBERTY BONDS—INFORMATION AS TO EXCHANGE OF TEMPORARY BONDS FOR PERMANENT BONDS.

Holders of temporary coupon bonds of the first, second, and third Liberty loans, from which all interest coupons have been detached, should now exchange them for permanent bonds in coupon or registered form. Permanent bonds of these issues are now ready for delivery. Holders of temporary bonds of the fourth Liberty loan, which by their terms are not exchangeable for permanent bonds until on and after October 15, 1920, should retain such temporary bonds until public announcement is made that the permanent bonds are ready for delivery, which will be some time after October 15th.

Exchanges may be made direct at any Federal Reserve Bank or at the Treasury Department, Washington, but holders of temporary bonds who present them for exchange direct to a Federal Reserve Bank or the Treasury Department must make their own arrangements for transportation and insurance of the temporary bonds. No charge for the exchange will be made by the United States, and the permanent bonds will be delivered within the United States at the risk and expense of the United States.

Exchanges may be effected through almost any recognized banking institution in the United States without expense or risk to the holder on account of the transportation of the temporary bonds surrendered or the permanent bonds issued upon exchange, and many incorporated banks and trust companies maintain stocks of permanent bonds available for over-the-counter exchange. Banking institutions generally have undertaken to effect exchanges for their customers without charge. Holders of temporary bonds, therefore, are urged to consult their own banks in order to avail themselves of these arrangements for securing the exchange of their temporary bonds without expense to themselves.

Registered bonds are already in permanent form and need not be exchanged, but 4 per cent registered bonds may be converted into $4\frac{1}{4}$ per cent bonds. Holders of temporary coupon bonds are urged to present their bonds for exchange for registered bonds, and in that event will promptly receive registered bonds in exchange.

D. F. HOUSTON,
Secretary of the Treasury.

WASHINGTON, D. C., *August 17, 1920.*

The postmaster will display this notice conspicuously in the post office lobby. •

A. S. BURLESON,
Postmaster General.

EXHIBIT 65.

[1919. Department Circular No. 170. Loans and Currency.]

**UNITED STATES OF AMERICA—WAR-SAVINGS CERTIFICATES
AND TREASURY SAVINGS CERTIFICATES, SERIES OF 1920.**

TREASURY DEPARTMENT,
OFFICE OF THE SECRETARY,
Washington, December 10, 1919.

1. Under authority of an act of Congress approved September 24, 1917, as amended and supplemented, the Secretary of the Treasury offers for sale to the people of the United States (a) an issue of United States War-Savings Certificates, Series of 1920, hereinafter called War-Savings Certificates, Series of 1920, payments for or on account of which will be evidenced by United States War-Savings Certificate Stamps, Series of 1920, which are to be affixed thereto, and (b) an issue of United States War-Savings Certificates, Series of 1920, Treasury Savings Certificate issue, in registered form, in denominations of \$100 and \$1,000 (maturity value), hereinafter called Treasury Savings Certificates, Series of 1920. The issue of Treasury Savings Certificates, Series of 1920, is in addition to the issue of War-Savings Certificates, Series of 1920, but both issues of certificates are included within the Series of 1920 of United States War-Savings Certificates. It shall not be lawful for any one person at any one time to hold United States War-Savings Certificates of the Series of 1920 (of whatever issue or denomination) to an aggregate amount exceeding \$1,000 (maturity value). The sum of United States War-Savings Certificates of all issues outstanding shall not at any one time exceed in the aggregate \$4,000,000,000 (maturity value).

2. War-Savings Certificates, Series of 1920, War-Savings Certificate Stamps, Series of 1920, and United States Thrift Stamps (described below) may be purchased during the calendar year 1920, at the prices hereinafter mentioned, at the Treasury Department, Washington, and at post offices, Federal Reserve Banks, incorporated banks and trust companies which are duly qualified as agents for the sale of War-Savings Certificates, Series of 1920, and such other agencies as may be designated by the Secretary of the Treasury.

3. Treasury Savings Certificates, Series of 1920, in the denomination of \$100 (maturity value), may be purchased during the calendar year 1920, at the prices hereinafter mentioned, at post offices of the first and second class, and such other post offices as the Postmaster General may from time to time designate for that purpose; and Treasury Savings Certificates, Series of 1920, in denominations of \$100 and \$1,000 (maturity value), may be purchased during the calendar year 1920, at the prices hereinafter mentioned, at the Treasury Department, Washington, the Federal Reserve Banks, and incorporated banks and trust companies which are duly qualified as agents for the sale of Treasury Savings Certificates, Series of 1920.

War-savings certificates, series of 1920.

4. *Description of certificates.*—A War-Savings Certificate, Series of 1920, will be an obligation of the United States when, and only when, one or more United States War-Savings Certificate Stamps, Series of 1920, shall be affixed thereto. Each of such War-Savings Certificates will have spaces for 20 War-Savings Certificate Stamps, Series of 1920, and each of such stamps thereto affixed will have a maturity value of \$5 on January 1, 1925, which will accordingly give each such certificate, when bearing its full complement of such stamps, a maturity value of \$100 on said date. No War-Savings Certificate, Series of 1920, will be issued unless at the same time one or more War-Savings Certificate Stamps, Series of 1920, shall be purchased and affixed thereto, but no additional charge will be made for the War-Savings Certificate itself. The name of the owner of each War-Savings Certificate must be written upon such certificate at the time of the issue thereof. War-Savings Certificates, Series of 1920, will be dated January 2, 1920, and will bear the facsimile signature of the present Secretary of the Treasury.

5. *Tax exemptions.*—War-Savings Certificates, Series of 1920, shall be exempt, both as to principal and interest, from all taxation now or hereafter imposed by the United States, any State, or any of the possessions of the United States, or by any local taxing authority, except (a) estate or inheritance taxes, and (b) graduated additional income taxes, commonly known as surtaxes, and excess-profits and war-profits taxes, now or hereafter imposed by the United States, upon the income or profits of individuals, partnerships, associations, or corporations. The interest on an amount of bonds and certificates authorized by said act approved September 24, 1917, and amendments thereto, the principal of which does not exceed in the aggregate \$5,000, owned by any individual, partnership, association, or corporation, shall be exempt from the taxes provided for in clause (b) above.

6. *Issue prices.*—War-Savings Certificate Stamps, Series of 1920, will be issued in 1920 at the following prices:

January.....	\$4. 12	May.....	\$4. 16	September.....	\$4. 20
February.....	4. 13	June.....	4. 17	October.....	4. 21
March.....	4. 14	July.....	4. 18	November.....	4. 22
April.....	4. 15	August.....	4. 19	December.....	4. 23

The average issue price above fixed for the year 1920 with interest at 4 per cent per annum compounded quarterly for the average period to maturity will amount to \$5 on January 1, 1925.

7. *Affixing stamps to certificates.*—War-Savings Certificate Stamps of the Series of 1918, or of the Series of 1919, shall not be affixed to War-Savings Certificates of the Series of 1920, and War-Savings Certificate Stamps of the Series of 1920 shall not be affixed to War-Savings Certificates of the Series of 1918 or of the Series of 1919. War-Savings Certificate Stamps of one series affixed to War-Savings Certificates of another series will not add to the value thereof.

8. *Thrift Cards and Thrift Stamps.*—Payments on account of War-Savings Certificates, Series of 1920, may also be evidenced by United States Thrift Stamps, issued at any time on or after December 3, 1917, having a face value of 25 cents each but bearing no interest. United States Thrift Stamps, however, must not be affixed to War-Savings Certificates but only to Thrift Cards, which may be obtained without

cost. Thrift Stamps as such are not directly redeemable in cash, but each Thrift Card will have spaces for 16 such Thrift Stamps, and a Thrift Card, when bearing its full complement of such stamps, may be exchanged at a post office, or other authorized agency, during the calendar year 1920, for a War-Savings Certificate Stamp, Series of 1920, provided that upon such exchange the owner of such Thrift Card shall pay the difference between \$4 and the current issue price of War-Savings Certificate Stamps, Series of 1920, during the month in which such exchange is made, as shown by the table set forth in paragraph 6 hereof. The Secretary of the Treasury will make provision for the exchange of Thrift Stamps after December 31, 1920, into War-Savings Certificate Stamps, Series of 1920, upon payment of the additional amount then required, or into some other series, or will otherwise protect the interest of holders of Thrift Stamps.

9. *Payment at maturity.*—Owners of War-Savings Certificates, Series of 1920, will be entitled to receive on January 1, 1925, at the Treasury Department in Washington, or at a money-order post office (but only at the post office where registered in the case of a registered certificate), upon surrender of such certificates and upon compliance with all other provisions thereof, \$5 in respect of each War-Savings Certificate Stamp, Series of 1920, then affixed thereto, but no post office shall be required to make any such payment until 10 days after receiving written demand therefor.

10. *Payment prior to maturity.*—The owner of a War-Savings Certificate, Series of 1920, at his option, will be entitled to receive, at any time after January 10, 1920, and prior to January 1, 1925, at a money-order post office (but only at the post office where registered in the case of a registered certificate), upon surrender of his certificate and upon compliance with all other provisions thereof, in respect of each War-Savings Certificate Stamp, Series of 1920, then affixed to such certificate, the lesser amount indicated in the following table, but no post office shall be required to make any such payment until 10 days after receiving written demand therefor, and such certificate must be surrendered for payment within 60 days after such demand, otherwise the demand will be deemed to be waived and a new demand will be required before payment.

Table showing how War-Savings Certificate Stamps, Series of 1920, increase in value.

Month.	1920	1921	1922	1923	1924
January.....	\$4.12	\$4.24	\$4.36	\$4.48	\$4.60
February.....	4.13	4.25	4.37	4.49	4.61
March.....	4.14	4.26	4.38	4.50	4.62
April.....	4.15	4.27	4.39	4.51	4.63
May.....	4.16	4.28	4.40	4.52	4.64
June.....	4.17	4.29	4.41	4.53	4.65
July.....	4.18	4.30	4.42	4.54	4.66
August.....	4.19	4.31	4.43	4.55	4.67
September.....	4.20	4.32	4.44	4.56	4.68
October.....	4.21	4.33	4.45	4.57	4.69
November.....	4.22	4.34	4.46	4.58	4.70
December.....	4.23	4.35	4.47	4.59	4.71
January 1, 1925.....					5.00

11. *Registration.*—War-Savings Certificates, Series of 1920, may be registered without cost to the owner at any post office of the first, second, or third class, or at certain specially authorized post offices of the fourth class, subject to such regulations as the Post-

master General may from time to time prescribe, and payment in respect of any certificate so registered will be made only at the post office where registered. Unless registered, the United States will not be liable if payment in respect of any certificate or certificates be made to a person not the rightful owner thereof. The Postmaster General may, by regulation, provide for the transmission of registered certificates by mail to the post office of registration for payment, and the return of proceeds by money-order, in cases in which it appears that the owner is unable to secure payment personally, or by a representative, pursuant to regulations therefor.

12. *Exchange for Treasury Savings Certificates.*—War-Savings Certificates, Series of 1920, bearing the full complement of 20 War-Savings Certificate Stamps, Series of 1920, may be exchanged for Treasury Savings Certificates, Series of 1920, inscribed in the same name, under the rules and regulations hereinafter provided. Treasury Savings Certificates are registered on the books of the Treasury Department, Washington. Holders of War-Savings Certificates, Series of 1920, bearing the full complement of 20 War-Savings Certificate Stamps, Series of 1920, are accordingly urged to exchange such certificates for Treasury Savings Certificates, Series of 1920, instead of presenting them simply for registration.

13. *Certificates not transferable.*—War-Savings Certificates, Series of 1920, are not transferable and will be payable only to the respective owners named thereon, except in the case of the death or disability of any such owner. In case of the death or disability of the owner, such certificates will be payable in accordance with regulations prescribed by the Secretary of the Treasury.

14. *Rights of holders of certificates.*—All the provisions of Treasury Department Circular No. 108, dated January 21, 1918, further defining rights of holders of War-Savings Certificates, apply to and govern rights of holders of War-Savings Certificates, Series of 1920, except as herein expressly modified with respect to War-Savings Certificates, Series of 1920, to wit:

(a) In paragraph I thereof, the maturity date specified shall read "January 1, 1925."

(b) In paragraph VI thereof, the \$1,000 limitation on the holdings of a single person will refer to a maturity value of \$1,000 of certificates of the Series of 1920, of whatever issue or denomination, without reference to any holdings of certificates of any other series.

(c) In paragraph XI there shall be inserted in the receipt thereby required to be signed after the words "War-Savings Certificates" the words "of any one series."

(d) In paragraph XIV the aggregate amount of certificates received and held as therein provided will refer to the aggregate amount of certificates of the Series of 1920 without reference to any holdings of certificates of any other series.

TREASURY SAVINGS CERTIFICATES, SERIES OF 1920.

15. *Description of certificates.*—Treasury Savings Certificates, Series of 1920, will be issued only in registered form, and shall bear the name of the owner thereof, which shall be inscribed thereon by the issuing agent at the time of the issue thereof. At the time of issue of each such certificate the registration stub attached thereto shall be inscribed in the same manner by the issuing agent, and shall be de-

tached and forwarded in the manner hereinafter directed for transmission to the Treasury Department at Washington. The registration stubs will remain at the Treasury Department at Washington and will constitute the basis for the Department's record of the registered owner of the certificates. In addition to the registration stub above described, each certificate will be provided with an additional or duplicate stub, which shall be executed at the same time and in the same manner as the original registration stub and retained by issuing post offices in such manner as the Postmaster General shall direct, and by Federal Reserve Banks and issuing agent banks and trust companies subject to the order of the Secretary of the Treasury. The certificates will not be transferable, and will be payable only to the owner named thereon except in case of death or disability of the owner and in such cases will be payable as provided in regulations prescribed by the Secretary of the Treasury. The certificates will not be valid unless the owner's name is duly inscribed thereon by an authorized agent at the time of the issue thereof. Treasury Savings Certificates, Series of 1920, will be dated January 2, 1920, and will bear the facsimile signature of the present Secretary of the Treasury.

16. *Tax exemption.*—Treasury Savings Certificates, Series of 1920, shall be exempt, both as to principal and interest, from all taxation now or hereafter imposed by the United States, any State, or any of the possessions of the United States, or by any local taxing authority, except (a) estate or inheritance taxes, and (b) graduated additional income taxes, commonly known as surtaxes, and excess-profits and war-profits taxes, now or hereafter imposed by the United States, upon the income or profits of individuals, partnerships, associations, or corporations. The interest on an amount of bonds and certificates authorized by said act approved September 24, 1917, and amendments thereto, the principal of which does not exceed in the aggregate \$5,000, owned by any individual, partnership, association, or corporation, shall be exempt from the taxes provided for in clause (b) above.

17. *Issue prices.*—Treasury Savings Certificates, Series of 1920, will be issued in 1920 at the following prices:

DENOMINATION OF \$100.

January.....	\$82. 40	May.....	\$83. 20	September.....	\$84. 00
February.....	82. 60	June.....	83. 40	October.....	84. 20
March.....	82. 80	July.....	83. 60	November.....	84. 40
April.....	83. 00	August.....	83. 80	December.....	84. 60

DENOMINATION OF \$1,000.

January.....	\$824. 00	May.....	\$832. 00	September.....	\$840. 00
February.....	826. 00	June.....	834. 00	October.....	842. 00
March.....	828. 00	July.....	836. 00	November.....	844. 00
April.....	830. 00	August.....	838. 00	December.....	846. 00

The average issue prices above fixed for the year 1920, with interest at 4 per cent per annum compounded quarterly for the average period to maturity, will amount to \$100 and \$1,000, respectively, on January 1, 1925.

18. *Issue in exchange for unregistered War-Savings Certificates, Series of 1920.*—A War-Savings Certificate, Series of 1920, which has not been registered and which bears the full complement of 20 War-

Savings Certificate Stamps, Series of 1920, may be received in exchange for a Treasury Savings Certificate, Series of 1920, in the denomination of \$100 (maturity value) inscribed in the same name as the certificate presented in exchange, upon presentation and surrender to any post office authorized to issue and sell Treasury Savings Certificates, Series of 1920, or to any other agent for the sale of Treasury Savings Certificates, Series of 1920, and 10 such War-Savings Certificates may in like manner be received in exchange for a Treasury Savings Certificate, Series of 1920, in the denomination of \$1,000 (maturity value) inscribed in the same name as the certificates presented in exchange, upon presentation and surrender to any authorized agent for the sale of Treasury Savings Certificates, Series of 1920, in the denomination of \$1,000 (maturity value).

19. *Issue in exchange for registered War-Savings Certificates, Series of 1920.*—A War-Savings Certificate, Series of 1920, which has been registered and which bears the full complement of 20 War-Savings Certificate Stamps, Series of 1920, may in like manner be received in exchange for a Treasury Savings Certificate, Series of 1920, in the denomination of \$100 (maturity value) inscribed in the same name as such registered certificate, when presented for that purpose by the registered owner to the post office of registration, provided that such post office is authorized to issue and sell Treasury Savings Certificates, Series of 1920.

20. *Other regulations governing exchanges.*—No previous demand for payment of War-Savings Certificates, Series of 1920, surrendered in exchange for Treasury Savings Certificates, Series of 1920, pursuant to paragraphs 18 and 19 hereof, will be required, and the exchange will be made in each case without payment to or by the United States. The receipt form on such War-Savings Certificates, Series of 1920, so received in exchange for Treasury Savings Certificates, Series of 1920, must be duly executed by the owner thereof, and appropriate notation on the War-Savings Certificates so received in exchange shall be made by the issuing agent to the effect that such certificates have been received in exchange for Treasury Savings Certificates, Series of 1920. War-Savings Certificates, Series of 1918, and Series of 1919, Treasury Savings Certificates of any series, detached War-Savings Certificate Stamps, War-Savings Certificates bearing less than 20 War-Savings Certificate Stamps, Thrift Cards with Thrift Stamps affixed, and Thrift Stamps will not be received in exchange or payment for Treasury Savings Certificates, Series of 1920.

21. *Payment at maturity.*—Owners of Treasury Savings Certificates, Series of 1920, will be entitled to receive on January 1, 1925, the respective face amounts as stated thereon. On and after January 1, 1925, payment of the certificates will be made upon presentation and surrender thereof by mail or otherwise at the Office of the Secretary of the Treasury, Division of Loans and Currency, Washington, and upon compliance with all other provisions thereof, provided the form of demand for payment appearing on the back thereof shall be properly signed by the owner in the presence of, and duly certified by, a United States Postmaster, an executive officer of an incorporated bank or trust company, or any other person duly designated by the Secretary of the Treasury for the purpose. In case of the death or disability of the owner a special form of demand for payment prescribed by the Secretary of the Treasury must be duly executed.

22. *Payment prior to maturity.*—The owner of a Treasury Savings Certificate, Series of 1920, at his option, will be entitled to receive, prior to January 1, 1925, the lesser amount indicated in the following tables (and in the table appearing on the back of the certificate) with respect to certificates of the denomination concerned. Payment prior to January 1, 1925, of the amount payable in respect of any such certificate will be made upon presentation, surrender, and demand, made as aforesaid at the Office of the Secretary of the Treasury, Division of Loans and Currency, Washington, and upon compliance with all other provisions thereof, but in no event prior to the second calendar month following the calendar month in which the certificate is issued to the owner.

Tables showing how Treasury Savings Certificates, Series of 1920, increase in value.

23. *Transmission of registration stubs by post offices.*—The original registration stubs detached from Treasury Savings Certificates, Series of 1920, sold by post offices, shall be attached to the accounts of sales of such certificates rendered to the Third Assistant Postmaster General, Division of Stamps, and forwarded by the Third Assistant Postmaster General to the Secretary of the Treasury, Division of Loans and Currency, Washington, so as to reach the Treasury Department not later than the month succeeding the month in which the certificate is sold.

24. *Transmission of registration stubs by other issuing agents.*—The original registration stubs detached from Treasury Savings Certificates, Series of 1920, sold by issuing agent banks and trust companies, shall be forwarded to the Federal Reserve Bank from which such certificates were obtained, with the monthly accounts of such agents as required by Treasury Department Circular No. 172, dated

December 10, 1919. The Federal Reserve Bank receiving such stubs will see that a registration stub is at hand for each such certificate reported sold and will forward monthly such stubs, together with the original registration stubs detached from all Treasury Savings Certificates, Series of 1920, issued and sold by it, to the Secretary of the Treasury, Division of Loans and Currency, Washington, so as to reach the Treasury Department not later than the month succeeding the month in which the certificate is sold. The original registration stubs detached from Treasury Savings Certificates, Series of 1920, sold by the Treasurer of the United States shall be forwarded to the Office of the Secretary of the Treasury, Division of Loans and Currency, at the end of each month so as to reach such office not later than the month succeeding the month in which the certificate is sold.

25. *Rights of holders of certificates.*—The provisions of Treasury Department Circular No. 108, dated January 21, 1918, further defining rights of holders of War-Savings Certificates, do not apply to or govern the rights of holders of Treasury Savings Certificates, Series of 1920. The provisions of Treasury Department Circular No. 149, dated July 31, 1919, further defining the rights of holders of Treasury Savings Certificates, Series of 1919, as amended and supplemented by Treasury Department Circular No. 169, dated December 10, 1919, will apply to and govern the rights of holders of Treasury Savings Certificates, Series of 1920, except as hereby further modified solely with respect to Treasury Savings Certificates, Series of 1920, to wit:

(a) In paragraph I of Treasury Department Circular No. 149, the maturity date specified shall read "January 1, 1925."

OTHER DETAILS.

26. United States War-Savings Certificates, Series of 1920, of whatever issue or denomination, including Treasury Savings Certificates, will not be receivable as security for deposits of public moneys and will not bear the circulation privilege.

27. The Secretary of the Treasury may at any time withdraw this circular as a whole, or make from time to time any supplemental or amendatory regulations which shall not modify or impair the terms and conditions of United States War-Savings Certificates of the Series of 1920, of whatever issue or denomination, issued in pursuance of said act of September 24, 1917, as amended and supplemented. The Secretary of the Treasury may also at any time withdraw Treasury Savings Certificates, Series of 1920, War-Savings Certificates, Series of 1920, War-Savings Certificate Stamps, Series of 1920, or United States Thrift Stamps, or any of them, from sale, refuse to issue or to permit to be issued any War-Savings Certificates, Series of 1920, or Thrift Cards, refuse to sell or to permit to be sold any such certificates or stamps, and refuse to sell or to permit to be sold any such certificates or stamps to any person, firm, corporation, or association.

28. Further details may be announced by the Secretary of the Treasury from time to time, information as to which will be promptly furnished to Federal Reserve Banks, postmasters, and to other agents.

CARTER GLASS,
Secretary of the Treasury.

[1919. Department Circular No. 169. Loans and Currency.]

**FURTHER REGULATIONS GOVERNING TREASURY SAVINGS
CERTIFICATES, SERIES OF 1919.**

TREASURY DEPARTMENT,
OFFICE OF THE SECRETARY,
Washington, December 10, 1919.

1. The issue and sale of Treasury Savings Certificates, Series of 1919, for cash, pursuant to the provisions of Treasury Department Circular No. 143, dated July 1, 1919, will cease at the close of business on December 31, 1919, but the issue of such certificates after December 31, 1919, in exchange for United States War-Savings Certificates, Series of 1919, with War-Savings Certificate Stamps, Series of 1919, affixed (hereinafter called War-Savings Certificates, Series of 1919), is hereby continued until further notice at post offices, Federal Reserve Banks, and the Treasury Department, Washington, upon the terms and conditions hereinafter prescribed. Treasury Savings Certificates issued pursuant to said Treasury Department Circular No. 143, dated July 1, 1919, shall be known as Treasury Savings Certificates, Series of 1919. The aggregate maturity value of United States War-Savings Certificates of the Series of 1919 outstanding will not be increased by reason of the issue of Treasury Savings Certificates, Series of 1919, pursuant to this circular.

2. All the provisions of Treasury Department Circulars No. 143, dated July 1, 1919, offering Treasury Savings Certificates, Series of 1919, as hereby modified with respect to the issue, distribution and sale of the certificates after December 31, 1919, and No. 149, dated July 31, 1919, as hereby amended and supplemented, as to the rights of holders of Treasury Savings Certificates, Series of 1919, shall apply to and govern Treasury Savings Certificates, Series of 1919, issued in exchange for War-Savings Certificates, Series of 1919, in pursuance of the provisions hereof. Treasury Savings Certificates, Series of 1919, issued pursuant to this circular, will be the same in form and terms as the Treasury Savings Certificates, Series of 1919, outstanding, except that certificates issued pursuant to this circular will provide that they may be issued only in exchange for War-Savings Certificates, Series of 1919, of the same maturity value, and not for cash.

3. Treasury Savings Certificates, Series of 1919, in the denomination of \$100 (maturity value) may be obtained after December 31, 1919, in exchange for unregistered War-Savings Certificates, Series of 1919, only at post offices of the first and second class, and such other post offices as the Postmaster General may from time to time designate for that purpose, at Federal Reserve Banks, and at the Office of the Secretary of the Treasury, Division of Loans and Currency, Washington. Treasury Savings Certificates, Series of 1919, may be obtained in exchange for registered War-Savings Certificates, Series of 1919, only in the denomination of \$100 (maturity value) and then only at the post office of registration, provided that such post office is authorized to issue Treasury Savings Certificates, Series

of 1919. Treasury Savings Certificates, Series of 1919, in the denomination of \$1,000 (maturity value) may be obtained, after December 31, 1919, in exchange for unregistered War-Savings Certificates, Series of 1919, only at Federal Reserve Banks and at the Office of the Secretary of the Treasury, Division of Loans and Currency, Washington. Treasury Savings Certificates, Series of 1919, may not be obtained after December 31, 1919, at incorporated banks and trust companies.

ISSUE ON SURRENDER OF WAR-SAVINGS CERTIFICATES, SERIES OF 1919.

4. One or more War-Savings Certificates, Series of 1919, issued pursuant to Treasury Department Circular No. 128, dated December 18, 1918, which have not been registered and which have an aggregate maturity value of \$100 or some multiple thereof, no more, no less, will be received after December 31, 1919, in exchange for Treasury Savings Certificates, Series of 1919, of the same aggregate maturity value, upon presentation and surrender for that purpose to any post office authorized to issue Treasury Savings Certificates, Series of 1919, to any Federal Reserve Bank, or to the Office of the Secretary of the Treasury, Division of Loans and Currency, Washington; provided, however, that Treasury Savings Certificates, Series of 1919, in the denomination of \$1,000 (maturity value) may be obtained after December 31, 1919, only at Federal Reserve Banks and at the Office of the Secretary of the Treasury, Division of Loans and Currency, Washington. One or more War-Savings Certificates, Series of 1919, which have been registered and which have an aggregate maturity value of \$100 or some multiple thereof, no more, no less, will in like manner be received after December 31, 1919, in exchange for Treasury Savings Certificates, Series of 1919, of the same aggregate maturity value, when presented and surrendered for that purpose by the registered owner to the post office of registration, provided that such post office is authorized to issue Treasury Savings Certificates, Series of 1919. In case two or more War-Savings Certificates, Series of 1919, are presented for exchange in accordance with this circular, the certificates so presented may be some registered and some unregistered, but in that event must be presented at the post office where the registered certificates are registered. If two or more War-Savings Certificates, Series of 1919, are presented for exchange in accordance with this circular, each such certificate presented need not bear the full complement of 20 War-Savings Certificate Stamps, Series of 1919, provided that the aggregate maturity value of the certificates presented is \$100, or some multiple thereof, no more, no less.

5. War-Savings Certificates, Series of 1919, presented and surrendered in exchange for Treasury Savings Certificates, Series of 1919, after December 31, 1919, must in each case be accompanied by a Request for Exchange on Form L. & C. 336, attached hereto (copies of which may be obtained from Federal Reserve Banks, issuing agent post offices, or the Treasury Department, Division of Loans and Currency, Washington). Requests for Exchange must bear the autograph signatures of the owners whose names are inscribed on the War-Savings Certificates so surrendered for exchange. The Treasury Savings Certificates, Series of 1919, issued on exchange, will be

inscribed in the same name as the War-Savings Certificates, Series of 1919, surrendered for exchange, unless another name and address shall be indicated in writing on the Request for Exchange, in which event the Treasury Savings Certificates will be inscribed in the name and address so indicated.

6. No previous demand for payment of War-Savings Certificates of the Series of 1919 surrendered in exchange for Treasury Savings Certificates, Series of 1919, in accordance with paragraphs 4 and 5 hereof, will be required, and the exchange will be made in each case without payment to or by the United States. The receipt form on the War-Savings Certificates, Series of 1919, so surrendered in exchange for Treasury Savings Certificates, Series of 1919, must, however, be duly executed by the owner of the War-Savings Certificates so surrendered, and appropriate notation shall be made by the issuing agent on the War-Savings Certificates so surrendered of their receipt in exchange for Treasury Savings Certificates, Series of 1919.

7. War-Savings Certificates of any other series (of whatever issue or denomination), Treasury Savings Certificates, detached War-Savings Certificate Stamps, War-Savings Certificates of the Series of 1919 having an aggregate maturity value not \$100 or some multiple thereof, Thrift Cards with Thrift Stamps affixed, and Thrift Stamps will not be received in exchange or payment for Treasury Savings Certificates, Series of 1919.

8. Treasury Savings Certificates, Series of 1919, will not be issued after December 31, 1919, for cash or in any other manner than in exchange for War-Savings Certificates, Series of 1919, as provided herein.

TRANSMISSION OF ORIGINAL REGISTRATION STUBS.

9. The original registration stubs detached from Treasury Savings Certificates, Series of 1919, issued by any Federal Reserve Bank pursuant to this circular, shall be attached in each case to the Request for Exchange submitted in connection with the issue of the Treasury Savings Certificate, and forwarded monthly to the Secretary of the Treasury, Division of Loans and Currency, Washington, with such Request for Exchange, so as to reach the Treasury Department not later than the month succeeding the month in which the Treasury Savings Certificate was issued. The War Savings Certificates received in exchange shall be canceled by the Federal Reserve Bank by punching a quarter-inch hole through each stamp affixed thereto, and transmitted to the Secretary of the Treasury, Division of Loans and Currency, Washington, at the end of each month.

10. Original registration stubs detached from Treasury Savings Certificates, Series of 1919, issued by post offices pursuant to this circular, shall be attached in each case to the Request for Exchange submitted in connection with the issue of the Treasury Savings Certificate, and forwarded with such Request for Exchange and the reports of issue of such certificates, to the Third Assistant Postmaster General, Division of Stamps, who will forward them to the Secretary of the Treasury, Division of Loans and Currency, Washington, so as to reach the Treasury Department not later than the month succeeding the month in which the Treasury Savings Certificate was issued. The War-Savings Certificates received in exchange shall be canceled

by postmasters in such manner as the Postmaster General may direct, and transmitted to the Secretary of the Treasury, Division of Loans and Currency, Washington, at the end of each month. War-Savings Certificates so received in exchange by postmasters must not be deposited with depositary banks.

MISCELLANEOUS PROVISIONS.

11. The provisions of Treasury Department Circular No. 149, dated July 31, 1919, further defining the rights of holders of Treasury Savings Certificates, Series of 1919, and prescribing rules and regulations under which Treasury Certificates, Series of 1919, will be payable in case of the death or disability of the owner, are hereby amended and supplemented by adding to Paragraph V thereof a new sentence reading as follows:

"In determining whether the \$1,000 limitation on the holdings of a single person has been exceeded, the full maturity value of Treasury Savings Certificates of any one series held for the benefit of such person in the name of a fiduciary or fiduciaries shall be added to the full maturity value of United States War-Savings Certificates, of the same series, of whatever issue or denomination, held by such person in his own name and the sum must not exceed \$1,000 (maturity value)."

12. The Secretary of the Treasury may at any time withdraw this circular as a whole or amend from time to time any of the provisions thereof. The Secretary of the Treasury may at any time withdraw Treasury Savings Certificates, Series of 1919, from issue, refuse to issue or to permit to be issued any such certificates, and refuse to issue or to permit to be issued any such certificates to any person, firm, corporation, or association.

13. The Secretary of the Treasury may make from time to time any supplemental or amendatory regulations which shall not modify or impair the terms and conditions of Treasury Savings Certificates, Series of 1919, issued in pursuance of said act of September 24, 1917, as amended and supplemented.

14. Further details may be announced by the Secretary of the Treasury from time to time, information as to which will be promptly furnished to postmasters and Federal Reserve Banks.

CARTER GLASS,
Secretary of the Treasury.

[Treasury Department. Loans and Currency. Form L & C 336.]

TREASURY SAVINGS CERTIFICATES, SERIES OF 1919.

REQUEST FOR EXCHANGE.

IMPORTANT.—If unregistered War-Savings Certificates, Series of 1919, are presented for exchange, this request may be presented to any post office of the first or second class, or other post office authorized by the Postmaster General to issue Treasury Savings Certificates, Series of 1919, to any Federal Reserve Bank, or to the Secretary of the Treasury, Division of Loans and Currency, Washington, D. C.; provided, however, that Treasury Savings Certificates, Series of 1919, in the denomination of \$1,000 (maturity value) may be obtained after December 31, 1919, only at Federal Reserve Banks and at the Treasury Department, Washington. If registered War-Savings Certificates, Series of 1919, are presented for exchange, this request may be presented only to the post office of registration, and then only if such post office is authorized to issue Treasury Savings Certificates, Series of 1919.

Dated....., 192..

To THE POSTMASTER,

Or—

The FEDERAL RESERVE BANK OF.....

Or—

Fiscal Agent of the United States.

The SECRETARY OF THE TREASURY,

Division of Loans and Currency, Washington, D. C.

The undersigned herewith present and surrender \$. aggregate maturity

(See Note 1.)

value, of (registered) (unregistered) United States War-Savings Certificates, Series of 1919, bearing the name of and duly receipted by the undersigned (see Note 2), and request that Treasury Savings Certificates of the Series of 1919 to the same maturity value, be issued in exchange therefor, all in accordance with the provisions of Treasury Department Circular No. 169, dated December 10, 1919. The following name and address shall be inscribed on the Treasury Savings Certificates to be issued hereon (see Note 3):

.....
 (First name in full. Indicate whether Mrs. or Miss, (Middle name or initials.) (Last name.)
 in cases of women.)

(Or complete legal name of corporation, partnership, or other person.)

Address.....

(Give full address.)

(Street.)

(City.)

(State.)

Autograph signatures of person or persons whose names are inscribed on War-Savings Certificates, Series of 1919, presented for exchange:

.....
 (To be filled in by issuing agent.)

....., 192..

The serial numbers of the Treasury Savings Certificates, Series of 1919, issued pursuant to above request are as follows:

.....
 (Signature of Issuing Agent.)

NOTE 1.—Treasury Savings Certificates, Series of 1919, may be issued after December 31, 1919, only in exchange for one or more War-Savings Certificates, Series of 1919, which have an aggregate maturity value of \$100 or some multiple thereof, no more, no less, and are not issued on cash sale. In case two or more War-Savings Certificates, Series of 1919, are presented for exchange, the certificates so presented may be some registered and some unregistered, but in that event must be presented to the post office where the registered certificates are registered. If two or more War-Savings Certificates, Series of 1919, are presented for exchange, each such certificate presented need not bear the full complement of 20 War-Savings Certificate Stamps, Series of 1919, provided that the aggregate maturity value of the certificates presented is \$100 or some multiple thereof, no more, no less.

NOTE 2.—The War-Savings Certificates, Series of 1919, presented in exchange must be duly receipted by the owner, in the same manner as if presented for payment. No previous demand for payment of such certificates will be required, however, and the exchange will be made in each case without payment to or by the United States.

NOTE 3.—The Treasury Savings Certificates, Series of 1919, issued on exchange will be inscribed in the same name as the War-Savings Certificates, Series of 1919, surrendered for exchange, unless another name and address shall be indicated in writing on this request, in which event the Treasury Savings Certificates will be inscribed in the name and address so indicated.

NOTE 4.—This request must be attached to the original registration stubs detached from the Treasury Savings Certificates, Series of 1919, issued on exchange, and forwarded by postmasters with their monthly reports of issue of such certificates, to the Third Assistant Postmaster General, Division of Stamps, and by Federal Reserve Banks to the Secretary of the Treasury, Division of Loans and Currency, Washington.

EXHIBIT 67.

[1919. Department Circular No. 171. Loans and Currency.]

TREASURY SAVINGS CERTIFICATES, SERIES OF 1918.

TREASURY DEPARTMENT,
OFFICE OF THE SECRETARY,
Washington, December 10, 1919.

To Holders of War-Savings Certificates, Series of 1918, and Others Concerned:

1. Under authority of an act of Congress approved September 24, 1917, as amended and supplemented, the Secretary of the Treasury offers, beginning January 2, 1920, upon the terms and conditions hereinafter prescribed, an issue of United States War-Savings Certificates, Series of 1918, Treasury Savings Certificate issue, in the denomination of \$100 (maturity value), hereinafter called Treasury Savings Certificates, Series of 1918, in exchange for United States War-Savings Certificates of the Series of 1918, issued pursuant to Treasury Department Circular No. 94, dated November 15, 1917, hereinafter called War-Savings Certificates, Series of 1918. Treasury Savings Certificates, Series of 1918, are not offered for cash sale, and may be issued only in exchange for War-Savings Certificates, Series of 1918, of the same aggregate maturity value. This issue of Treasury Savings Certificates, Series of 1918, is an addition to the issue of War-Savings Certificates, Series of 1918, offered pursuant to said Treasury Department Circular No. 94, dated November 15, 1917, but both issues of certificates are included within the Series of 1918 of United States War-Savings Certificates. The aggregate maturity value of United States War-Savings Certificates of the Series of 1918 outstanding will not be increased by reason of the issue of Treasury Savings Certificates, Series of 1918, pursuant to this circular. It shall not be lawful for any one person at any one time to hold United States War-Savings Certificates of the Series of 1918 (of whatever issue or denomination) to an aggregate amount exceeding \$1,000 (maturity value). The sum of United States War-Savings Certificates of all issues outstanding shall not at any one time exceed in the aggregate \$4,000,000,000 (maturity value).

2. Treasury Savings Certificates, Series of 1918, may be obtained in exchange for unregistered War-Savings Certificates, Series of 1918, at post offices of the first and second class, and such other post offices as the Postmaster General may from time to time designate for that purpose, at Federal Reserve Banks, and at the Office of the Secretary of the Treasury, Division of Loans and Currency, Washington. Treasury Savings Certificates, Series of 1918, may be obtained in exchange for registered War-Savings Certificates, Series of 1918, only at the post office of registration, and then only if such post office is authorized to issue Treasury Savings Certificates, Series of 1918.

DESCRIPTION OF TREASURY SAVINGS CERTIFICATES, SERIES OF 1918.

3. Treasury Savings Certificates, Series of 1918, will be issued only in registered form, in the denomination of \$100 (maturity value), and shall bear the name of the owner thereof, which shall be inscribed thereon by the issuing agent at the time of the issue thereof. At the time of issue of each such certificate the original registration stub attached thereto shall be inscribed in the same manner by the issuing agent, and shall be detached and forwarded in the manner hereinafter directed for transmission to the Treasury Department at Washington. The registration stubs will remain at the Treasury Department at Washington and will constitute the basis for the Department's record of the registered ownership of the certificates. In addition to the original registration stub above described, each certificate will be provided with an additional or duplicate stub, which shall be executed at the same time and in the same manner as the original registration stub and shall be retained by issuing post offices in such manner as the Postmaster General shall direct, and by Federal Reserve Banks subject to the order of the Secretary of the Treasury. The certificates will not be transferable, and will be payable only to the owner named thereon except in case of death or disability of the owner and in such case will be payable as provided in regulations prescribed by the Secretary of the Treasury. The certificates will not be valid unless the owner's name is duly inscribed thereon by an authorized agent at the time of issue thereof. Treasury Savings Certificates, Series of 1918, will be dated January 2, 1920, and will bear the facsimile signature of the present Secretary of the Treasury.

TAX EXEMPTION.

4. Treasury Savings Certificates, Series of 1918, shall be exempt, both as to principal and interest, from all taxation now or hereafter imposed by the United States, any State, or any of the possessions of the United States, or by any local taxing authority, except (a) estate or inheritance taxes, and (b) graduated additional income taxes, commonly known as surtaxes, and excess-profits and war-profits taxes, now or hereafter imposed by the United States, upon the income or profits of individuals, partnerships, associations, or corporations. The interest on an amount of bonds and certificates authorized by said act approved September 24, 1917, and amendments thereto, the principal of which does not exceed in the aggregate \$5,000, owned by any individual, partnership, association, or corporation, shall be exempt from the taxes provided for in clause (b) above.

PAYMENT AT MATURITY.

5. Owners of Treasury Savings Certificates, Series of 1918, will be entitled to receive on January 1, 1923, one hundred dollars (\$100) in respect of each such certificate. On and after January 1, 1923, payment of the certificates will be made upon presentation and surrender thereof by mail or otherwise at the Office of the Secretary of the Treasury, Division of Loans and Currency, Washington, and upon compliance with all other provisions thereof, provided the form of

demand for payment appearing on the back thereof shall be properly signed by the owner in the presence of, and duly certified by, a United States postmaster, an executive officer of an incorporated bank or trust company, or any other person duly designated by the Secretary of the Treasury for the purpose. In case of the death or disability of the owner a special form of demand for payment prescribed by the Secretary of the Treasury must be duly executed.

PAYMENT PRIOR TO MATURITY.

6. The owner of a Treasury Savings Certificate, Series of 1918, at his option, will be entitled to receive prior to January 1, 1923, the lesser amount indicated in the following table (and in the table appearing on the back of the certificate). Payment prior to January 1, 1923, of the amount payable in respect of any such certificate will be made upon such presentation, surrender, and demand, made as aforesaid at the Office of the Secretary of the Treasury, Division of Loans and Currency, Washington, and upon compliance with all other provisions thereof, but in no event prior to the second calendar month following the calendar month in which the certificate is issued to the owner.

ISSUE ON SURRENDER OF WAR-SAVINGS CERTIFICATES, SERIES OF 1918.

7. One or more War-Savings Certificates, Series of 1918, issued pursuant to Treasury Department Circular No. 94, dated November 15, 1917, which have not been registered and which have an aggregate maturity value of \$100 or some multiple thereof, no more, no less, will be received in exchange for Treasury Savings Certificates, Series of 1918, of the same aggregate maturity value, upon presentation and surrender for that purpose to any post office authorized to issue Treasury Savings Certificates, Series of 1918, to any Federal Reserve Bank, or to the Office of the Secretary of the Treasury, Division of Loans and Currency, Washington. One or more War-Savings Certificates, Series of 1918, which have been registered and which have an aggregate maturity value of \$100 or some multiple thereof, no more, no less, will in like manner be received in exchange for Treas-

ury Savings Certificates, Series of 1918, of the same aggregate maturity value, when presented and surrendered for that purpose by the registered owner to the post office of registration, provided that such post office is authorized to issue Treasury Savings Certificates, Series of 1918. In case two or more War-Savings Certificates, Series of 1918, are presented for exchange, in accordance with this circular, the certificates so presented may be some registered and some unregistered, but in that event must be presented at the post office where the registered certificates are registered. If two or more War-Savings Certificates, Series of 1918, are presented for exchange in accordance with this circular, each such certificate presented need not bear the full complement of 20 War-Savings Certificate Stamps, provided that the aggregate maturity value of the certificates presented is \$100 or some multiple thereof, no more, no less.

8. War-Savings Certificates, Series of 1918, presented and surrendered in exchange for Treasury Savings Certificates, Series of 1918, must in each case be accompanied by a Request for Exchange on Form L. & C. 335, attached hereto (copies of which may be obtained from Federal Reserve Banks, issuing agent post offices, or the Treasury Department, Division of Loans and Currency, Washington). Requests for Exchange must bear the autograph signatures of the owners whose names are inscribed on the War-Savings Certificates so surrendered for exchange. The Treasury Savings Certificates, Series of 1918, issued on exchange will be inscribed in the same name as the War-Savings Certificates, Series of 1918, surrendered for exchange, unless another name and address shall be indicated in writing on the Request for Exchange, in which event the Treasury Savings Certificates will be inscribed in the name and address so indicated.

9. No previous demand for payment of War-Savings Certificates of the Series of 1918 surrendered in exchange for Treasury Savings Certificates, Series of 1918, in accordance with paragraphs 7 and 8 hereof, will be required, and the exchange will be made in each case without payment to or by the United States. The receipt form on the War-Savings Certificates, Series of 1918, so surrendered in exchange for Treasury Savings Certificates, Series of 1918, must, however, be duly executed by the owner of the War-Savings Certificates so surrendered, and appropriate notation shall be made by the issuing agent on the War-Savings Certificates so surrendered of their receipt in exchange for Treasury Savings Certificates, Series of 1918.

10. War-Savings Certificates of any other series (of whatever issue or denomination), Treasury Savings Certificates, detached War-Savings Certificate Stamps, War-Savings Certificates of the Series of 1918 having an aggregate maturity value not \$100 or some multiple thereof, Thrift Cards with Thrift Stamps affixed, and Thrift Stamps will not be received in exchange or payment for Treasury Savings Certificates, Series of 1918.

11. Treasury Savings Certificates, Series of 1918, will not be issued for cash or in any other manner than in exchange for War-Savings Certificates, Series of 1918, as provided herein.

TRANSMISSION OF ORIGINAL REGISTRATION STUBS.

12. The original registration stubs detached from Treasury Savings Certificates, Series of 1918, issued by any Federal Reserve Bank, shall be attached in each case to the Request for Exchange submitted in connection with the issue of the Treasury Savings Certificate, and forwarded monthly to the Secretary of the Treasury, Division of Loans and Currency, Washington, with such Request for Exchange, so as to reach the Treasury Department not later than the month succeeding the month in which the Treasury Savings Certificate was issued. The War Savings Certificates received in exchange shall be canceled by the Federal Reserve Bank by punching a quarter-inch hole through each stamp affixed thereto, and transmitted to the Secretary of the Treasury, Division of Loans and Currency, Washington, at the end of each month.

13. The original registration stubs detached from Treasury Savings Certificates, Series of 1918, issued by post offices, shall be attached in each case to the Request for Exchange submitted in connection with the issue of the Treasury Savings Certificate, and forwarded with such Request for Exchange and the reports of issue of such certificates, to the Third Assistant Postmaster General, Division of Stamps, who will forward them to the Secretary of the Treasury, Division of Loans and Currency, Washington, so as to reach the Treasury Department not later than the month succeeding the month in which the Treasury Savings Certificate was issued. The War-Savings Certificates received in exchange shall be canceled by postmasters in such manner as the Postmaster General may direct, and transmitted to the Secretary of the Treasury, Division of Loans and Currency, Washington, at the end of each month. War-Savings Certificates so received in exchange by postmasters must not be deposited with depository banks.

MISCELLANEOUS PROVISIONS.

14. Treasury Savings Certificates, Series of 1918, will not be receivable as security for deposits of public moneys and will not bear the circulation privilege.

15. The provisions of Treasury Department Circular No. 108, dated January 21, 1918, further defining the rights of holders of War-Savings Certificates, and the provisions of Treasury Department Circular No. 143, dated July 1, 1919, offering for sale Treasury Savings Certificates, Series of 1919, do not apply to or govern the rights of holders of Treasury Savings Certificates, Series of 1918. All the provisions of Treasury Department Circular No. 149, dated July 31, 1919, as modified and extended by Treasury Department Circular No. 169, dated December 10, 1919, shall apply to and govern the rights of holders of Treasury Savings Certificates, Series of 1918, except as hereby further expressly modified solely with respect to Treasury Savings Certificates, Series of 1918, to wit:

(a) In paragraph I of Treasury Department Circular No. 149, the maturity date specified shall read "January 1, 1923."

16. The provisions of this circular do not apply to or govern War-Savings Certificates, Series of 1918, issued pursuant to Treasury Department Circular No. 94, dated November 15, 1917, except to

the extent that this circular provides for the exchange of such certificates for Treasury Savings Certificates, Series of 1918.

17. The Secretary of the Treasury may at any time withdraw this circular as a whole, or make from time to time any supplemental or amendatory regulations which shall not modify or impair the terms and conditions of Treasury Savings Certificates, Series of 1918, issued in pursuance of said act approved September 24, 1917, as amended and supplemented. The Secretary of the Treasury may at any time withdraw Treasury Savings Certificates, Series of 1918, from issue, refuse to issue or to permit to be issued any such certificates, and refuse to issue or to permit to be issued any such certificates to any person, firm, corporation, or association.

18. Further details may be announced by the Secretary of the Treasury from time to time, information as to which will be promptly furnished to postmasters and Federal Reserve Banks.

CARTER GLASS,
Secretary of the Treasury.

TREASURY SAVINGS CERTIFICATES, SERIES OF 1918.

[Treasury Department. Loans and Currency. Form L & C 335.]

REQUEST FOR EXCHANGE.

IMPORTANT.—If unregistered War-Savings Certificates, Series of 1918, are presented for exchange, this request may be presented to any post office of the first or second class, or other post office authorized by the Postmaster General to issue Treasury Savings Certificates, Series of 1918, to any Federal Reserve Bank, or to the Secretary of the Treasury, Division of Loans and Currency, Washington, D. C. If registered War-Savings Certificates, Series of 1918, are presented for exchange, this request may be presented only to the post office of registration, and then only if such post office is authorized to issue Treasury Savings Certificates, Series of 1918.

Dated, 192..

To the POSTMASTER,

Or—

The FEDERAL RESERVE BANK OF

Fiscal Agent of the United States.

Or—

The SECRETARY OF THE TREASURY,
Division of Loans and Currency, Washington, D. C.

The undersigned herewith present and surrender \$..... aggregate maturity
(See Note 1.)

value, of (registered) (unregistered) United States War-Savings Certificates, Series of 1918, bearing the name of and duly receipted by the undersigned (see Note 2), and request that Treasury Savings Certificates of the Series of 1918 to the same maturity value, be issued in exchange therefor, all in accordance with the provisions of Treasury Department Circular No. 171, dated December 10, 1919. The following name and address shall be inscribed on the Treasury Savings Certificates to be issued hereon (see Note 3):

(First name in full. Indicate whether Mrs. or Miss, (Middle name or initial.) (Last name.)
in cases of women.)

(Or complete legal name of corporation, partnership, or other person.)

Address

(Give full address.)

(Number.)

(Street.)

(City.)

(State.)

Autograph signatures of person or persons whose names are inscribed on War-Savings Certificates, Series of 1918, presented for exchange:

(To be filled in by Issuing Agent.)

....., 192..

The serial numbers of the Treasury Savings Certificates, Series of 1918, issued pursuant to above request are as follows:

.....

.....
 (Signature of Issuing Agent.)

NOTE 1.—Treasury Savings Certificates, Series of 1918, in the denomination of \$100, may be issued only in exchange for one or more War-Savings Certificates, Series of 1918, which have an aggregate maturity value of \$100 or some multiple thereof, no more, no less, and are not issued on cash sale. If two or more War-Savings Certificates, Series of 1918, are presented for exchange, each such certificate presented need not bear the full complement of 20 War-Savings Certificate Stamps, Series of 1918, provided that the aggregate maturity value of the certificates presented is \$100 or some multiple thereof, no more, no less. In case two or more War-Savings Certificates, Series of 1918, are presented for exchange, the certificates so presented may be some registered and some unregistered, but in that event must be presented at the post office where the registered certificates are registered.

NOTE 2.—The War-Savings Certificates, Series of 1918, presented in exchange must be duly receipted by the owner, in the same manner as if presented for payment. No previous demand for payment of such certificates will be required, however, and the exchange will be made in each case without payment to or by the United States.

NOTE 3.—The Treasury Savings Certificates, Series of 1918, issued on exchange will be inscribed in the same name as the War-Savings Certificates, Series of 1918, surrendered for exchange, unless another name and address shall be indicated in writing on this request, in which event the Treasury Savings Certificates will be inscribed in the name and address so indicated.

NOTE 4.—This request must be attached to the original registration stubs detached from the Treasury Savings Certificates, Series of 1918, issued on exchange, and forwarded by postmasters with their monthly reports of issue of such certificates, to the Third Assistant Postmaster General, Division of Stamps, and by Federal Reserve Banks to the Secretary of the Treasury, Division of Loans and Currency, Washington, D. C.

EXHIBIT 68.

[1919. Department Circular No. 172. Loans and Currency.]

AGENCIES FOR THE DISTRIBUTION AND SALE OF WAR-SAVINGS CERTIFICATES AND TREASURY SAVINGS CERTIFICATES, SERIES OF 1920.

TREASURY DEPARTMENT,
OFFICE OF THE SECRETARY,
Washington, December 10, 1919.

1. The following rules and regulations will govern agencies for the distribution and sale during the calendar year 1920 of War-Savings Certificates, Series of 1920, War-Savings Certificate Stamps, Series of 1920, and Treasury Savings Certificates, Series of 1920, issued pursuant to Treasury Department Circular No. 170, dated December 10, 1919, and United States Thrift Cards and Thrift Stamps issued at any time on or after December 3, 1917. United States War-Savings Certificates, payments for or on account of which are evidenced by War-Savings Certificate Stamps, are called in this circular War-Savings Certificates, and United States War-Savings Certificates, Treasury Savings Certificate issue, in denominations of \$100 and \$1,000 (maturity value), are called in this circular Treasury Savings Certificates.

2. Beginning January 1, 1920, the only authorized agencies for the issue or sale of Treasury Savings Certificates, War-Savings Certificates or Stamps, or Thrift Cards or Thrift Stamps (in addition to post offices, Federal Reserve Banks, duly designated bonded officers of the United States, and the Treasury Department, Washington), shall be (a) cash agents and (b) collateral agents, acting in accordance with the provisions of this circular. None of the provisions of Treasury Department Circulars No. 94, dated November 15, 1917; No. 95, dated November 30, 1917; No. 96, dated January 2, 1918; No. 101, dated February 19, 1918; No. 128, dated December 18, 1918; No. 130, dated December 23, 1918, and No. 143, dated July 1, 1919, shall apply to or govern the distribution and sale of Treasury Savings Certificates, Series of 1920, War-Savings Certificates or Stamps, Series of 1920, or Thrift Cards or Thrift Stamps during the calendar year 1920. Agents or sales stations for the sale of Treasury Savings Certificates, War-Savings Certificates, War-Savings Certificate Stamps, or Thrift Stamps pursuant to said circulars who do not become cash or collateral agents pursuant hereto, will not be authorized to issue or sell Treasury Savings Certificates, War-Savings Certificates or Stamps, or Thrift Stamps after December 31, 1919. Treasury Savings Certificates and War-Savings Certificates and Stamps of the Series of 1920, and Thrift Cards and Thrift Stamps will be distributed hereunder to duly qualified cash agents and collateral agents for the sale thereof only by Federal Reserve Banks, and will not be distributed to such agents, or to any other persons for the sale thereof, by post offices or by other cash or collateral agents.

3. Copies of all forms specified in this circular are attached hereto, and copies thereof, or of substantially similar forms, may be obtained, upon application, from the Federal Reserve Banks. Copies of this

circular and of all Treasury Department circulars referred to herein may be obtained, upon application, from the Secretary of the Treasury, Division of Loans and Currency, Washington, or from any Federal Reserve Bank.

CLASSIFICATION AND APPOINTMENT OF AGENTS.

4. *General provisions.*—Incorporated banks and trust companies may be designated by the Federal Reserve Bank of the district in which they are located, acting under the direction of the Secretary of the Treasury, as cash agents or collateral agents hereunder for the sale of Treasury Savings Certificates and War-Savings Certificate Stamps, Series of 1920, and Thrift Stamps, and the issue of War-Savings Certificates, Series of 1920, and Thrift Cards during the calendar year 1920. Upon application through the Federal Reserve Banks, other persons may be designated hereunder by the Secretary of the Treasury in special cases as cash agents or collateral agents for the sale of War-Savings Certificate Stamps, Series of 1920, and Thrift Stamps, and the issue of War-Savings Certificates, Series of 1920, and Thrift Cards, during the calendar year 1920, but not for the issue or sale of Treasury Savings Certificates. Incorporated banks and trust companies and other persons undertaking to act as agents for the sale of such certificates or stamps during the calendar year 1920, will, by the receipt or sale of Treasury Savings Certificates, Series of 1920, or War-Savings Certificates or Stamps, Series of 1920, or by the receipt or sale of Thrift Stamps after December 31, 1919, be conclusively presumed to have assented to, and will be bound by, all the terms and provisions of this circular, as from time to time amended and supplemented, and any collateral security pledged or to be pledged by such persons will be conclusively deemed to be pledged as collateral security hereunder.

5. *Cash agents.*—Any incorporated bank or trust company may make application to the Federal Reserve Bank of the district in which it is located for appointment as a cash agent hereunder, on Form L. & C. 337. Upon its approval of such application, the Federal Reserve Bank will issue a certificate of appointment in triplicate on Form L. & C. 354, the original to be issued to the agent, the duplicate forwarded to the Secretary of the Treasury, Division of Loans and Currency, and the triplicate retained by the Federal Reserve Bank. Each application hereunder for appointment as cash agent shall set forth the aggregate maturity value of Treasury Savings Certificates and War-Savings Certificate Stamps which the agent desires to hold at any one time for sale as such agent, not in any case to exceed \$50,000 without special authority from the Secretary of the Treasury. The Federal Reserve Bank may refuse to approve any such application, or may in its discretion approve the application for any lesser maturity value than that applied for, and the certificate of appointment of every such agent on Form L. & C. 354 shall show the aggregate maturity value of Treasury Savings Certificates and War-Savings Certificate Stamps which the agent shall be allowed to hold at any one time. In fixing such aggregate maturity value the Federal Reserve Bank shall be guided by the expected sales of such certificates and stamps by the agent within a reasonable period of time after the application.

6. *Collateral agents.*—The filing with the Federal Reserve Bank of the district of a duly executed pledge agreement on Form L. & C. 356 shall be deemed to constitute an application for appointment as a collateral agent hereunder. Upon its approval of such application, the Federal Reserve Bank will issue a certificate of appointment in triplicate on Form L. & C. 357, the original to be issued to the agent, the duplicate forwarded to the Secretary of the Treasury, Division of Loans and Currency, Washington, and the triplicate retained by the Federal Reserve Bank. Incorporated banks and trust companies duly qualified as collateral agents of the second class for the sale of War-Savings Certificates or Treasury Savings Certificates, Series of 1919, pursuant to Treasury Department Circulars No. 95, dated November 30, 1917, No. 130, dated December 23, 1918, and No. 143, dated July 1, 1919, who desire to act as collateral agents for the sale of War-Savings Certificates or Treasury Savings Certificates, Series of 1920, will be required to file with the Federal Reserve Bank of the district in like manner a duly executed pledge agreement on Form L. & C. 356, but in advance of the filing of such pledge agreement will be permitted, until February 1, 1920, to act as collateral agents hereunder, upon notification in writing to the Federal Reserve Bank, and they will, by such notification, or by the receipt or sale of Treasury Savings Certificates, Series of 1920, or War-Savings Certificates or Stamps, Series of 1920, or of Thrift Stamps after December 31, 1919, be conclusively presumed to have assented to all the terms and provisions of this circular and to the retention of the collateral security pledged or to be pledged as collateral security hereunder.

CASH AGENTS.

7. *Supply of certificates and stamps to cash agents.*—Duly qualified cash agents hereunder may obtain from the Federal Reserve Bank of the district Treasury Savings Certificates and War-Savings Certificate Stamps up to the aggregate maturity value fixed by the Federal Reserve Bank (not in excess of \$50,000, maturity value, at any one time outstanding, without special authority from the Secretary of the Treasury), together with an adequate supply of War-Savings Certificates, Thrift Stamps, and Thrift Cards, upon the deposit of the current issue price thereof for the month in which such certificates and stamps are obtained, for each Treasury Savings Certificate and War-Savings Certificate Stamp, and 25 cents for each Thrift Stamp, so obtained. Additional supplies of such certificates and stamps may be obtained by cash agents from the Federal Reserve Bank from time to time in like manner, provided that the aggregate maturity value of Treasury Savings Certificates and War-Savings Certificate Stamps held by any such cash agent for sale to the public shall not at any one time exceed the limit fixed as above described.

8. *Monthly reports and requisitions by cash agents.*—Every cash agent shall render to the Federal Reserve Bank from which it obtains such certificates and stamps on or before the tenth of each month a report, on Form L. & C. 355, or a substantially similar form prescribed by the Federal Reserve Bank, showing the amount of Treasury Savings Certificates, War-Savings Certificate Stamps, and Thrift Stamps sold by it during the preceding month and the amount of such certifi-

cates and stamps remaining in its hands unsold at the end of such month. This report must be accompanied by a schedule in the form prescribed by the Federal Reserve Bank showing the serial numbers of all Treasury Savings Certificates reported sold and of all such certificates reported on hand unsold at the close of the month. Requisition for additional supplies of certificates and stamps may be made at the time of the monthly report. Cash agents which have received, in exchange for War-Savings Certificate Stamps, Series of 1920, in accordance with the provisions of Treasury Department Circular No. 170, dated December 10, 1919, Thrift Cards with the full complement of 16 Thrift Stamps affixed, may receive from the Federal Reserve Bank from which such War-Savings Certificate Stamps were obtained, upon surrender of such filled Thrift Cards, War-Savings Certificate Stamps at the current issue price thereof during the month in which such exchange is effected and Thrift Stamps at 25 cents each, or cash, at the rate of \$4 for each filled Thrift Card. A cash agent for the sale of Treasury Savings Certificates, Series of 1920, which receives in exchange for such certificates War-Savings Certificates, Series of 1920, in accordance with the provisions of Treasury Department Circular No. 170, dated December 10, 1919, may secure cash reimbursement for such War-Savings Certificates from the Federal Reserve Bank upon the surrender of the War-Savings Certificates so received to such Federal Reserve Bank. The Federal Reserve Bank will thereupon pay to such agent the redemption value of such certificates on the date of their receipt in exchange for Treasury Savings Certificates, without previous demand for payment.

9. *Termination of cash agencies.*—The Secretary of the Treasury, or the Federal Reserve Bank by which any cash agent shall have been appointed hereunder, may terminate the agency at any time without previous demand or notice, and require the immediate surrender of all Treasury Savings Certificates, War-Savings Certificate Stamps, and Thrift Stamps, and all War-Savings Certificates and Thrift Cards held by such cash agent for sale to the public and not theretofore issued or sold.

10. *Voluntary surrender by cash agents.*—Any cash agent which shall have fully complied with the terms of its agency may at any time surrender such agency upon delivering to the Federal Reserve Bank from which such certificates and stamps were obtained all Treasury Savings Certificates, War-Savings Certificate Stamps, and Thrift Stamps held by it for sale to the public and remaining unsold, together with all War-Savings Certificates and Thrift Cards remaining unissued and all duplicate registration stubs from Treasury Savings Certificates issued by it, or may at any time, without surrendering the agency, surrender any portion of the Treasury Savings Certificates, War-Savings Certificate Stamps, or Thrift Stamps held by it for sale to the public and remaining in its hands unsold to the Federal Reserve Bank from which such certificates and stamps were obtained: *Provided, however,* That no such certificates or stamps shall be surrendered by any such agent prior to 20 days after the date on which such certificates or stamps shall have been obtained by such agent.

11. *Surrender by cash agents at close of year.*—All Treasury Savings Certificates and War-Savings Certificates and Stamps, Series of 1920, remaining unsold in the hands of any cash agent at the close of busi-

ness December 31, 1920, must be surrendered on or before January 31, 1921, to the Federal Reserve Bank from which such certificates and stamps were obtained.

12. *Reimbursement for certificates and stamps surrendered.*—Upon the surrender of Treasury Savings Certificates, War-Savings Certificate Stamps, or Thrift Stamps, by any cash agent hereunder, whether at the termination of the agency, on voluntary surrender, or at the close of the year, the Federal Reserve Bank will make reimbursement to such cash agent for the Treasury Savings Certificates and War-Savings Certificate Stamps so surrendered at a rate equivalent to the current redemption value thereof during the month in which such surrender is made, not later than the month in which the certificates and stamps are required to be surrendered, and for Thrift Stamps at 25 cents each, or in the case of surrender at the close of the year will issue to such cash agent, at its option, in exchange for the certificates and stamps so surrendered Treasury Savings Certificates and War-Savings Certificate Stamps of any subsequent series then offered for sale, at the current issue price thereof, and Thrift Stamps at 25 cents each, and cash, to an aggregate value not exceeding the amount due upon such surrender.

COLLATERAL AGENTS.

13. *Collateral security pledged by collateral agents.*—Any collateral agent duly appointed or acting hereunder in accordance with the provisions of paragraph 6 hereof may qualify by the deposit and pledge with the Federal Reserve Bank of the district, as fiscal agent of the United States (or, by the direction and subject to the order of such Federal Reserve Bank, with a custodian or custodians designated by it and under rules and regulations prescribed by it), as collateral security for the faithful performance of the obligations assumed by such agent, as provided herein, securities of the classes described in paragraphs (a), (b), and (c) of Treasury Department Circular No. 92, of April 17, 1919, as from time to time amended and supplemented, to an amount, taken at the rates therein provided, at least equivalent to the maturity value of the Treasury Savings Certificates and War Savings Certificate Stamps, plus the face value of the Thrift Stamps, to be obtained by such agent. The securities so deposited and pledged are sometimes referred to herein as "collateral security." The examination and approval of securities, the withdrawal of securities, the pledge of additional securities, and the substitution of securities are committed to the several Federal Reserve Banks, acting under the direction of the Secretary of the Treasury. All securities pledged must be in negotiable form, and no security shall be valued at more than par. Each collateral agent, so long as not in default in respect of any obligation assumed by such agent, as herein provided, shall be entitled to collect and retain any and all interest upon the collateral security deposited and pledged by such agent with the Federal Reserve Bank. The Secretary of the Treasury or the Federal Reserve Bank may at any time or from time to time call upon any collateral agent for the deposit and pledge of additional collateral security. Each Federal Reserve Bank, as fiscal agent of the United States, shall hold the collateral security deposited and pledged with such bank by each collateral agent as collateral security for the faithful

performance of its obligations as such agent, in accordance with the provisions of this circular, as from time to time amended and supplemented.

14. *Supply of certificates and stamps to collateral agents.*—Any collateral agent, upon depositing and pledging collateral security as herein provided, and upon executing and delivering to the Federal Reserve Bank a pledge agreement on Form L. & C. 356, approved by such Federal Reserve Bank, may obtain from time to time from such Federal Reserve Bank, Treasury Savings Certificates and War-Savings Certificate Stamps, Series of 1920, at maturity value, and Thrift Stamps at 25 cents each, up to the collateral value, computed as provided above, of such collateral security, but not in excess thereof. Any collateral agent continued in accordance with the provisions of paragraph 6 hereof may in like manner obtain such certificates and stamps, computed in the same manner, up to the collateral value of the collateral security pledged by it, provided such security is eligible hereunder. Any collateral agent may also obtain an adequate supply of War-Saving Certificates and Thrift Cards. Any collateral agent may from time to time voluntarily deposit and pledge additional collateral security with the Federal Reserve Bank, and thereupon obtain additional amounts of Treasury Savings Certificates, War-Savings Certificate Stamps and Thrift Stamps, up to the collateral value of such additional collateral security, upon like terms and conditions as upon the original deposit and pledge of collateral security. From time to time, as any collateral agent shall sell Treasury Savings Certificates, War-Savings Certificate Stamps or Thrift Stamps and shall pay over the proceeds of any such sales to the Federal Reserve Bank additional amounts of such certificates and stamps in lieu of such certificates and stamps so sold, may be obtained from such Federal Reserve Bank, upon like terms and conditions, not, however, in excess of the aggregate amount of such certificates and stamps theretofore sold and for which payment shall have been made and account rendered to such Federal Reserve Bank, unless additional collateral security shall be similarly deposited and pledged.

15. *Accounting by collateral agents.*—Each collateral agent, on or before the tenth day of each month, must render to the Federal Reserve Bank, with which such agent shall have deposited and pledged such collateral security, an account on Form L & C 358, or a substantially similar form prescribed by the Federal Reserve Bank, in respect of all Treasury Savings Certificates, War-Savings Certificate Stamps, and Thrift Stamps obtained by such agent from such Federal Reserve Bank and sold by such agent during the preceding calendar month, and stating the respective amounts of such certificates and stamps, if any, remaining unsold in the hands of such agent at the close of such calendar month. Each monthly account by such agent shall be accompanied by a schedule on a form to be prescribed by the Federal Reserve Bank, showing the serial numbers of Treasury Savings Certificates reported sold during the month, and the serial numbers of such certificates remaining unsold at the end of such month. The Secretary of the Treasury, or the Federal Reserve Bank to which the agent is required to account, may require any collateral agent to render any account and to make payment, at any time or times, in addition to the monthly account and payment, herein required, in

respect of the proceeds of all sales of such certificates and stamps theretofore made and not theretofore accounted for.

16. *Remittance of proceeds of sales by collateral agents.*—Each collateral agent, before or upon rendering any such account, must deposit the aggregate amount of the proceeds of all sales of Treasury Savings Certificates, War-Savings Certificate Stamps, and Thrift Stamps, obtained as provided above, with such Federal Reserve Bank, as fiscal agent of the United States; but each collateral agent in accounting for the proceeds of sales of War-Savings Certificate Stamps and Thrift Stamps, shall be entitled to a credit of \$4 in respect of each Thrift Card, bearing its full complement of 16 Thrift Stamps, received in exchange for War-Savings Certificate Stamps, pursuant to Treasury Department Circular No. 170, dated December 10, 1919, and transmitted to the Federal Reserve Bank, as fiscal agent of the United States, with any account rendered by such agent to such bank as provided above. Each collateral agent in accounting for the proceeds of sales of Treasury Savings Certificates, Series of 1920, shall also be entitled to receive appropriate credit for each War-Savings Certificate, Series of 1920, bearing the full complement of 20 War-Savings Certificate Stamps, Series of 1920, received in exchange for Treasury Savings Certificates in accordance with the provisions of Treasury Department Circular No. 170, dated December 10, 1919, and transmitted to such Federal Reserve Bank with its account.

17. *Termination of collateral agencies.*—The Secretary of the Treasury, or the Federal Reserve Bank to which the agent is required to account, may at any time terminate any collateral agency hereunder without previous demand or notice and require any collateral agent to surrender to the Federal Reserve Bank any and all Treasury Savings Certificates, War-Savings Certificate Stamps, Thrift Stamps, War-Savings Certificates, and Thrift Cards obtained from such Federal Reserve Bank but not theretofore issued or sold by such agent, and the proceeds of such sale duly accounted for and paid to the Federal Reserve Bank.

18. *Voluntary surrender by collateral agents.*—Any collateral agent which shall have fully complied with all the terms of its agency and pledge agreement may at any time surrender such agency and withdraw the collateral security deposited and pledged by such agent with the Federal Reserve Bank, upon delivering to such bank, as fiscal agent of the United States, all Treasury Savings Certificates, War-Savings Certificate Stamps, and Thrift Stamps (together with all unissued War-Savings Certificates and Thrift Cards, and all duplicate registration stubs from Treasury Savings Certificates issued by it) obtained from such Federal Reserve Bank and not theretofore sold by such agent, and upon duly accounting and making payment, as herein provided, in respect of all Treasury Savings Certificates, War-Savings Certificate Stamps, and Thrift Stamps so obtained and sold by such agent. Any collateral agent which shall have fully complied with the terms of such agency may at any time, without surrendering the agency, surrender any portion of the Treasury Savings Certificates, War-Savings Certificate Stamps, or Thrift Stamps not theretofore sold by such agent, to the Federal Reserve Bank to which it is required to account.

19. *Surrender by collateral agents at close of year.*—On or before January 31, 1921, every collateral agent shall surrender to the Federal

Reserve Bank from which they were obtained all Treasury Savings Certificates and War-Savings Certificate Stamps, Series of 1920, obtained from such Federal Reserve Bank and not sold before the close of business December 31, 1920, and the proceeds of such sale accounted for to the Federal Reserve Bank, together with all War-Savings Certificates, Series of 1920, remaining unissued at the close of business December 31, 1920.

20. *Credit for certificates and stamps surrendered.*—Upon the surrender by any collateral agent hereunder to the Federal Reserve Bank to which it is required to account of Treasury Savings Certificates, War-Savings Certificate Stamps, or Thrift Stamps, whether at the termination of the agency, on voluntary surrender, or at the close of the year, such collateral agent shall receive appropriate credit in its account with the Federal Reserve Bank for the certificates and stamps so surrendered.

MISCELLANEOUS PROVISIONS GOVERNING DISTRIBUTION AND SALE
BY AGENTS.

21. *Authority and obligations of agents.*—Treasury Savings Certificates, War-Savings Certificate Stamps, and Thrift Stamps obtained by agents acting under this circular shall be held by them solely as agents for the sale thereof to the public in accordance with the provisions of this circular and the circulars in pursuance of which such certificates and stamps are issued. Unless and until issued or sold pursuant to the provisions of this circular, the certificates and stamps obtained by agents hereunder shall remain unissued, and subject to withdrawal by the Federal Reserve Bank on demand. Every agent hereunder undertakes, as a patriotic service and without compensation, the faithful performance of the obligations imposed upon agents by the provisions of this circular. No agent shall have any authority hereunder to sell any certificates or stamps otherwise than for cash paid simultaneously with the delivery of the certificates or stamps, or in exchange for War-Savings Certificates or Thrift Cards (and cash), as the case may be, surrendered simultaneously therewith in accordance with the provisions of this circular. The United States will not be responsible for the failure of agents to deliver certificates or stamps after payment, and will incur no obligation in connection with the action of any agent except on the Treasury Savings Certificate, War-Savings Certificate or Stamp, or Thrift Stamp, as the case may be, after delivery thereof to the purchaser.

22. *Sale of certificates and stamps.*—No agent hereunder shall sell any Treasury Savings Certificates or War-Savings Certificate Stamps at a price other than the current issue price thereof during the month in which sold, nor any Thrift Stamps at a price other than 25 cents each. No agent hereunder shall sell any Treasury Savings Certificates or War-Savings Certificate Stamps, Series of 1920, after December 31, 1920. Agents must exercise great care in the issue and sale of Treasury Savings Certificates and War-Savings Certificates and Stamps of the Series of 1920, and Thrift Stamps during the calendar year 1920, to observe in all respects the provisions of Treasury Department Circular No. 170, dated December 10, 1919.

23. *Limit on holdings of United States War-Savings Certificates by one person.*—It is not lawful for any one person, firm, corporation or

association at any one time to hold United States War-Savings Certificates of any one series (of whatever issue or denomination) to an aggregate amount exceeding \$1,000 (maturity value). It is lawful, however, to hold United States War-Savings Certificates, Series of 1920, to an aggregate maturity value of \$1,000 regardless of any holdings of certificates of the series of 1918 or 1919. Agents must exercise great care not to sell Treasury Savings Certificates or War-Savings Certificates or Stamps to any person whose holdings of any one series would thereby be increased to an aggregate amount exceeding \$1,000 (maturity value).

24. *Issue of Treasury Savings Certificates, War-Savings Certificates, and Thrift Cards.*—No War-Savings Certificate shall be issued by any agent unless at the same time one or more War-Savings Certificate Stamps are purchased and affixed thereto, but no extra charge shall be made for the War-Savings Certificate. War-Savings Certificate Stamps of one series must not be affixed to War-Savings Certificates of another series. The name of the owner of a Treasury Savings Certificate or a War-Savings Certificate must be inscribed thereon by the issuing agent at the time of the issue thereof. Great care must be exercised to inscribe the name of the owner legibly on all Treasury Savings Certificates and War-Savings Certificates issued, and no erasures or alterations should be made thereon in the name of the owner. In no event will agents redeem Treasury Savings Certificates or War-Savings Certificates or Stamps. Thrift stamps are not directly redeemable in cash but a Thrift Card bearing its full complement of 16 Thrift Stamps may be exchanged for a War-Savings Certificate Stamp, Series of 1920, upon the payment of the difference between \$4 and the current issue price of War-Savings Certificate Stamps during the month in which the exchange is effected. No charge shall be made for Thrift Cards, but neither Thrift Cards nor War-Savings Certificates shall be distributed as publicity material.

25. *Exchanges of War-Savings Certificates for Treasury Savings Certificates.*—Unregistered War-Savings Certificates, Series of 1920, bearing the full complement of 20 War-Savings Certificate Stamps, Series of 1920, may be received by agents in exchange for Treasury Savings Certificates, Series of 1920, inscribed in the same name, in accordance with the provisions of Treasury Department Circular No. 170, dated December 10, 1919. Registered War-Savings Certificates, Series of 1920, are exchangeable for Treasury Savings Certificates only at the post office where registered and may not be received by other agencies in exchange for Treasury Savings Certificates. War-Savings Certificates, Series of 1918, and Series of 1919, detached War-Savings Certificate Stamps, War-Savings Certificates bearing less than 20 War-Savings Certificate Stamps, Treasury Savings Certificates, Thrift Cards with Thrift Stamps affixed, and Thrift Stamps will not be received in exchange or payment for Treasury Savings Certificates, Series of 1920. Agents must exercise great care to see that the receipt form on War-Savings Certificates, Series of 1920, received in exchange for Treasury Savings Certificates, is duly executed and that the Treasury Savings Certificates issued on such exchange are inscribed in the same name as the War-Savings Certificates in exchange for which such Treasury Savings Certificates are issued.

26. *Registration stubs from Treasury Savings Certificates.*—Every agent for the sale of Treasury Savings Certificates hereunder will

attach to its monthly account or report, as the case may be, to the Federal Reserve Bank from which such certificates were obtained, the original registration stubs detached from all Treasury Savings Certificates sold by it within the month. The Federal Reserve Bank receiving such stubs will see that a registration stub is at hand for each such certificate reported sold, and will forward all registration stubs to the Secretary of the Treasury, Division of Loans and Currency, Washington, so as to reach the Treasury Department not later than the month succeeding the month in which the certificate is sold.

OTHER DETAILS.

27. The Secretary of the Treasury may at any time withdraw this circular as a whole, or amend from time to time any of the provisions hereof, terminate any agency created or existing hereunder, revoke any or all appointments of agents, withdraw Treasury Savings Certificates, War-Savings Certificate Stamps, or Thrift Stamps from sale, refuse to issue or to permit to be issued any such certificates or stamps, and refuse to sell or to permit to be sold any such certificates or stamps to any person, firm, or corporation.

28. The Secretary of the Treasury may make from time to time any supplemental or amendatory regulations which shall not modify or impair the terms and conditions of Treasury Savings Certificates, War-Savings Certificates, War-Savings Certificate Stamps, or Thrift Stamps issued in pursuance of the act approved September 24, 1917, as amended and supplemented, and may amend or supplement this circular from time to time by Treasury Department Circular mailed to the Federal Reserve Banks and generally to banks and trust companies incorporated under the laws of the United States or of any State.

29. Further details may be announced by the Secretary of the Treasury from time to time, information as to which will be promptly furnished to Federal Reserve Banks and to agents.

CARTER GLASS,
Secretary of the Treasury.

PLEDGE AGREEMENT.

To the Federal Reserve Bank of
As fiscal agent of the United States:

The undersigned desires to become a collateral agent for the issue and sale of Treasury Savings Certificates, Series of 1920, War-Savings Certificates and Stamps, Series of 1920, and Thrift Stamps, in accordance with the provisions of Treasury Department Circulars No. 170 and No. 172, dated December 10, 1919, as from time to time amended and supplemented, and to obtain, from time to time, for sale to the public, as provided in said circulars, Treasury Savings Certificates, Series of 1920, War-Savings Certificate Stamps, Series of 1920, and Thrift Stamps, in the aggregate amount of \$..... (such Treasury Savings Certificates and War-Savings Certificate Stamps to be taken for this purpose at the maturity value thereof, and such Thrift Stamps at 25 cents each), and, as and when such certificates and stamps shall be sold and accounted and paid for, to obtain in lieu thereof, from time to time thereafter, additional Treasury Savings Certificates and War-Savings Certificate Stamps of the Series of 1920 (at maturity value), and Thrift Stamps (at 25 cents each), up to but not exceeding at any one time the total amount stated above.

The undersigned hereby agrees that none of such certificates and stamps obtained by the undersigned shall be sold or disposed of otherwise than as provided in said circulars, and further agrees faithfully to perform all other obligations to be performed by collateral agents as therein and herein provided.

The undersigned agrees, in accordance with the provisions of Treasury Department Circular No. 172, dated December 10, 1919, before or upon the delivery to the undersigned of Treasury Savings Certificates, War-Savings Certificate Stamps and Thrift Stamps, in the aggregate amount stated above, to deliver to such Federal Reserve Bank (or to a custodian designated by it), and to pledge with such Federal Reserve Bank, in negotiable form, and, in the case of coupon bonds, with all unmatured coupons attached, the following-described bonds and other securities, of the classes described in subdivisions (a), (b) and (c) of Treasury Department Circular No. 92, of April 17, 1919, authorized to be deposited as collateral security under the terms of said Treasury Department Circular No. 172:

Description of security.	Collateral value.
.....	\$.....
.....
.....
Total collateral value

to be held by such Federal Reserve Bank, as Fiscal Agent of the United States, as collateral security for the faithful performance of the obligations of the undersigned, now or hereafter from time to time arising, as a collateral agent for the issue and sale of Treasury Savings Certificates, War-Savings Certificates, War-Savings Certificate Stamps and Thrift Stamps, in accordance with the provisions of said Treasury Department Circulars No. 170 and No. 172, and of any supplemental or amendatory regulations made from time to time as therein provided; the undersigned, however, so long as not in default hereunder, to be entitled to collect from time to time and to retain any and all interest upon the above described collateral security.

In case of any default in the performance of any of the obligations of the undersigned as collateral agent for the sale of Treasury Savings Certificates, War-Savings Certificate Stamps and Thrift Stamps, and the issue of War-Savings Certificates and Thrift Cards hereunder or under said Treasury Department Circulars Nos. 170 and 172, dated December 10, 1919, said Federal Reserve Bank shall have full power to collect said collateral security or any part thereof then matured, or to sell, assign, and transfer said collateral security or any part thereof without notice, at public or private sale, free from any equity of redemption and without appraisement or valuation, and after deducting all legal and other costs, attorney's fees, and expenses for collection, sale, and delivery, to apply the proceeds of such sale or collection, in whole or in part, to the satisfaction of any damages, demands, or deficiency arising by reason of such default, as said Federal Reserve Bank may deem best. The undersigned hereby forself, heirs, administrators, executors, successors, and assigns, ratifies and confirms whatever said Federal Reserve Bank may do by virtue of these presents.

Upon delivery to the undersigned of any Treasury Savings Certificates, Series of 1920, War-Savings Certificate Stamps, Series of 1920, or Thrift Stamps, desired to be obtained hereunder, this Pledge Agreement shall come into full force and effect, and the undersigned shall become a collateral agent as aforesaid.

In witness whereof, the undersigned has caused this agreement to be executed under seal by the officer below named, thereunto duly authorized by action of its governing board.

EXHIBIT 69.

[1920. Department Circular No. 178. Loans and Currency.]

HOLDINGS OF UNITED STATES WAR-SAVINGS CERTIFICATES IN EXCESS OF LEGAL LIMIT.

TREASURY DEPARTMENT,
OFFICE OF THE SECRETARY,
Washington, January 15, 1920.

To Holders of United States War-Savings Certificates, and others concerned:

1. Under the provisions of section 6 of the act of Congress approved September 24, 1917, as amended, it is not lawful for any one person at any one time to hold United States War-Savings Certificates of any one series (of whatever issue or denomination) to an aggregate amount exceeding \$1,000 (maturity value). United States War-Savings Certificates, payments for or on account of which are evidenced by War-Savings Certificate Stamps, are called in this circular War-Savings Certificates; and United States War-Savings Certificates, in registered form, Treasury Savings Certificate issue, in denominations of \$100 and \$1,000 (maturity value), are called in this circular Treasury Savings Certificates. Three series of War-Savings Certificates and Treasury Savings Certificates have already been issued, namely, the Series of 1918, the Series of 1919, and the Series of 1920, pursuant to the provisions of Treasury Department Circulars No 94, dated November 15, 1917, No. 128, dated December 18, 1918, No. 143, dated July 1, 1919, No. 169, dated December 10, 1919, No. 170, dated December 10, 1919, and No. 171, dated December 10, 1919. As to each series, the issue of Treasury Savings Certificates and the issue of War-Savings Certificates are included within the same series of United States War-Savings Certificates for the purpose of determining whether the limitation on the holdings of a single person has been exceeded. The term United States War-Savings Certificates where it appears in this circular includes both War-Savings Certificates and Treasury Savings Certificates.

2. In accordance with the provisions of Treasury Department Circulars No. 108, dated January 21, 1918, and No. 149, dated July 31, 1919, as modified and extended, respectively, if in any case it appears by satisfactory proof that any person has received War-Savings Certificates or Treasury Savings Certificates issued to such person by way of gift, bonus, dividend, or in any other lawful manner except purchase by such person, whereby he holds United States War-Savings Certificates of any one series, of whatever issue or denomination, in excess of an aggregate of \$1,000 (maturity value), the amount of certificates held in excess of the legal limit shall be immediately surrendered and will be paid at their then value. Treasury Savings Certificates issued in exchange for War-Savings Certificates inscribed in another name shall be deemed, for the purposes of this circular, to be acquired by purchase.

3. If in any case not covered by paragraph 2 hereof it appears to the satisfaction of the Secretary of the Treasury that any person presenting War-Savings Certificates or Treasury Savings Certificates for

redemption holds United States War-Savings Certificates of any one series, of whatever issue or denomination, to an aggregate amount exceeding \$1,000 (maturity value), acquired by such person without intent to violate the law, and the amount of certificates held in excess of the legal limit is thereupon surrendered, the excess amount of certificates will be accepted for payment at the price at which they were purchased, not in excess of the current redemption value thereof during the month in which purchased. If in any such case it shall appear that Treasury Savings Certificates held in excess of the legal limit were issued in exchange for War-Savings Certificates of the same series inscribed in the same name and acquired without intent to violate the law, the excess amount of Treasury Savings Certificates will be redeemed at the price paid for such War-Savings Certificates (not in excess of the current redemption value thereof during the month in which purchased). If inscribed in a different name than the War-Savings Certificates surrendered in exchange, the amount of Treasury Savings Certificates held in excess of the legal limit will be redeemed at a rate equivalent to the current redemption value of the War-Savings Certificates during the month in which surrendered for such Treasury Savings Certificates, provided that it shall appear that the excess amount of Treasury Savings Certificates was acquired without intent to violate the law or the provisions of this circular.

4. If in any case not covered by paragraphs 2 and 3 hereof it shall appear at the time War-Savings Certificates or Treasury Savings Certificates are presented for redemption that the person presenting them holds United States War-Savings Certificates of the series presented for redemption to an aggregate amount exceeding \$1,000 (maturity value), payment of all certificates held in excess of the legal limit shall be refused, and all such excess certificates shall thereupon be surrendered in order that the holdings of certificates of said series by such person may be reduced to \$1,000 (maturity value). All excess holdings of certificates so surrendered shall be marked with appropriate notation of the fact of such surrender and of the name of the person by whom surrendered, and such certificates shall have no validity for any purpose. The certificates so surrendered shall be forwarded to the Secretary of the Treasury, Division of Loans and Currency, Washington, for appropriate disposition.

5. If it shall appear that any War-Savings Certificates presented for exchange for Treasury Savings Certificates are held in excess of the legal limit, or that Treasury Savings Certificates would be held in excess of the legal limit as a result of the exchange, such exchange shall be refused, and any excess amount of War-Savings Certificates shall be immediately surrendered in accordance with the provisions of this circular in the same manner as if such certificates had been presented for redemption. If in any case Treasury Savings Certificates shall be issued in exchange for War-Savings Certificates held in excess of the legal limit inscribed in the same name, such Treasury Savings Certificates shall be subject to the provisions of this circular to the same extent as the War-Savings Certificates would have been if the exchange had not been made. If in any case it shall appear that Treasury Savings Certificates inscribed in a different name have been issued in exchange for War-Savings Certificates held in excess of the legal limit in order to evade the law or the provisions of this circular, such Treasury Savings Certificates shall be subject to the provisions of this

circular to the same extent as the War-Savings Certificates held in excess of the legal limit would have been if the exchange had not been made.

6. The surrender of War-Savings Certificates pursuant to any of the provisions of this circular may be made to any money-order post office or to the Secretary of the Treasury, Division of Loans and Currency, Washington, except that registered War-Savings Certificates may be presented for redemption only to the post office of registration. The certificates surrendered under paragraphs 2 and 3 hereof should be accompanied by proof, so far as possible by affidavit, of the circumstances in which the excess holdings were received by the holder and, in case of purchase, the dates, places, and prices at which purchased. War-Savings Certificates surrendered to postmasters pursuant to paragraph 2 hereof, accompanied by proof thereunder satisfactory to the postmaster, may be paid by the postmaster in accordance with the terms and conditions of the certificates and of this circular. In every such case the postmaster should certify on the certificate or by statement attached thereto that the certificates were redeemed by him in accordance with the provisions of paragraph 2 hereof, and should attach to the certificates any proof submitted to him pursuant to said paragraph. In all other cases War-Savings Certificates surrendered to post offices will be forwarded by the postmaster, together with the proof submitted, and his recommendations thereon, to the Third Assistant Postmaster General, who will forward them to the Secretary of the Treasury, Division of Loans and Currency, with his recommendations.

7. The surrender of Treasury Savings Certificates pursuant to the provisions of this circular must be made at the Office of the Secretary of the Treasury, Division of Loans and Currency, Washington. The demand for payment on the certificates surrendered under paragraphs 2 and 3 hereof should be duly executed by the registered owner in accordance with the terms of the certificates, and the certificates forwarded, by mail or otherwise, at the risk and expense of the holder, accompanied by proof, so far as possible by affidavit and by the certificate of the issuing agent, showing the circumstances in which the excess holdings were received by the holder and, in case of purchase or exchange, the dates, places, and prices at which purchased or exchanged.

8. Nothing herein contained shall prevent the payment of a certificate owned by a deceased person to the person entitled thereto under the regulations prescribed by the Secretary of the Treasury, without regard to the amount of certificates already owned by such payee, unless it shall appear that the deceased owner himself held certificates of any one series to an aggregate amount exceeding \$1,000 (maturity value), or held Treasury Savings Certificates issued in exchange for War-Savings Certificates held in excess of the legal limit in order to evade the law or the provisions of this circular, in which event the provisions of paragraphs 2, 3, 4 and 5 of this circular shall govern. Nothing herein contained shall prevent the payment of a Treasury Savings Certificate registered in the name of a fiduciary or fiduciaries to the person beneficially entitled or to the fiduciary or fiduciaries on his behalf unless it shall appear that the aggregate maturity value of United States War-Savings Certificates of the series presented for payment, determined as provided in paragraph 9 hereof, held by

the beneficiary individually or for his benefit in the name of a fiduciary or fiduciaries exceeds \$1,000 (maturity value), or that the beneficiary individually or through a fiduciary holds Treasury Savings Certificates issued in exchange for War-Savings Certificates held in excess of the legal limit in order to evade the law or the provisions of this circular, in which event the provisions of paragraphs 2, 3, 4 and 5 of this circular shall govern.

9. In determining whether the \$1,000 limitation on the holdings of a single person has been exceeded, the word person shall be deemed to include an individual, firm, corporation, or association. For the purpose of determining whether the legal limit on the holdings of a single person has been exceeded, the full maturity value of Treasury Savings Certificates of any one series held for the benefit of a person in the name of a fiduciary or fiduciaries shall be added to the full maturity value of United States War-Savings Certificates of the same series, of whatever issue or denomination, held by such person in his own name, and the sum must not exceed \$1,000 (maturity value); and the full maturity value of United States War-Savings Certificates of any one series, of whatever issue or denomination, held with any other person, shall be added to the full maturity value of such certificates held individually, and the sum must not exceed \$1,000 (maturity value).

10. The provisions of this circular supersede the provisions of Treasury Department Circulars No. 108, dated January 21, 1918, and No. 149, dated July 31, 1919, as modified and extended, respectively, in so far as inconsistent herewith. The Secretary of the Treasury may at any time or from time to time amend this circular or prescribe any further or supplemental regulations which shall not modify the terms or conditions of United States War-Savings Certificates issued in pursuance of the act of Congress approved September 24, 1917, as amended and supplemented.

CARTER GLASS,
Secretary of the Treasury.

EXHIBIT 70.

[1920. Department Circular No. 181. Loans and Currency.]

SALES STATIONS FOR WAR-SAVINGS CERTIFICATE STAMPS, SERIES OF 1920, AND THRIFT STAMPS.

TREASURY DEPARTMENT,
OFFICE OF THE SECRETARY,
Washington, February 10, 1920.

To Federal Reserve Banks, Authorized Agents for the Sale of War-Savings Certificates, Postmasters, and Others Concerned:

1. Any person, firm, association or corporation, whether or not an authorized agent, may establish a sales station for the sale of War-Savings Certificate Stamps, Series of 1920, and United States Thrift Stamps, and the issue of War-Savings Certificates, Series of 1920, and Thrift Cards, during the calendar year 1920, pursuant to Treasury Department Circular No. 170, dated December 10, 1919, and may without becoming an authorized agent purchase such stamps, and secure the necessary supply of blank War-Savings Certificates and Thrift Cards, from a post-office, Federal Reserve Bank, or authorized cash or collateral agent for the sale of War-

Savings Certificates, in amounts not exceeding \$1,000 maturity value of War-Savings Certificate Stamps at any one time, upon presentation of a Sales Station Identification Card as provided below. No such person, firm, association or corporation shall, however, hold for resale more than \$1,000 maturity value of War-Savings Certificate Stamps of the Series of 1920, at any one time, or sell War-Savings Certificate Stamps, Series of 1920, after December 31, 1920, or at a price other than the current issue price thereof during the month in which sold, nor any Thrift Stamps at a price other than 25 cents each.

2. Notwithstanding the provisions of Treasury Department Circulars No. 170 and 172, dated December 10, 1919, postmasters, Federal Reserve Banks, and authorized cash and collateral agents are authorized to sell War-Savings Certificate Stamps, Series of 1920 (in amounts not exceeding \$1,000, maturity value, at any one time), and Thrift Stamps, and to issue the necessary supply of blank War-Savings Certificates and Thrift Cards, to persons, firms, associations and corporations establishing sales stations as provided in this circular, upon presentation in each case by such person, firm, association or corporation of a Sales Station Identification Card on Form L & C 382 (hereto attached), or a substantially similar form to be supplied by the Federal Reserve Bank. Such identification cards may be obtained by persons, firms, associations and corporations desiring to establish sales stations, upon application to the Director of the Government Savings Organization for the Federal Reserve District, and will be issued over the signature of such director, who may reject any application if not satisfied that the establishment of the sales station would be in the best interests of the War-Savings campaign. Blank War-Savings Certificates may be distributed to persons, firms, associations or corporations establishing sales stations as provided herein, only upon the understanding that the names of the owners will be properly inscribed thereon at the time of issue.

3. The provisions of this circular do not apply to the issue or sale of Treasury Savings Certificates.

4. The Secretary of the Treasury may at any time, or from time to time, amend or withdraw any or all the provisions of this circular.

D. F. HOUSTON,
Secretary of the Treasury.

[Treasury Department. Loans and Currency. Form L & C 382.]

SALES STATION—IDENTIFICATION CARD.

To Postmasters and other Authorized Agents:

You are hereby authorized, pursuant to Treasury Department Circular No. 181, dated February 10, 1920, to sell Thrift Stamps and War-Savings Certificate Stamps, Series of 1920 (in amounts not exceeding \$1,000, maturity value, at any one time), and to issue the necessary supply of Thrift Cards and blank War-Savings Certificates therefor, to

[1920. Supplement to Department Circular No. 172, of December 10, 1919. Loans and Currency.]

AGENCIES FOR THE DISTRIBUTION AND SALE OF WAR-SAVINGS CERTIFICATES AND TREASURY SAVINGS CERTIFICATES, SERIES OF 1920.

TREASURY DEPARTMENT,
OFFICE OF THE SECRETARY,
Washington, April 10, 1920.

Treasury Department Circular No. 172, dated December 10, 1919, governing agencies for the distribution and sale of War-Savings Certificates and Treasury Savings Certificates, Series of 1920, is hereby amended and supplemented by striking out at the end of the second sentence in paragraph 4 of said circular the words, "but not for the issue or sale of Treasury Savings Certificates," and inserting in lieu thereof a new sentence, reading as follows:

Upon application through the Federal Reserve Banks, other persons than incorporated banks and trust companies may be designated hereunder by the Secretary of the Treasury in special cases as cash agents or collateral agents for the issue and sale of Treasury Savings Certificates, Series of 1920, subject in all other respects and in the same manner as other cash or collateral agents to the provisions hereof and of Treasury Department Circular No. 170, dated December 10, 1919, anything herein or therein contained to the contrary notwithstanding.

D. F. HOUSTON,
Secretary of the Treasury.

EXHIBIT 72.

[1919. Department Circular No. 173. Loans and Currency.]

SURRENDER OF WAR-SAVINGS CERTIFICATES AND STAMPS, SERIES OF 1919, TREASURY SAVINGS CERTIFICATES, SERIES OF 1919, AND THRIFT STAMPS, HELD BY AGENTS AND SALES STATIONS.

TREASURY DEPARTMENT,
OFFICE OF THE SECRETARY,
Washington, December 10, 1919.

To Agents for the Sale of War-Savings Certificates and Stamps, Series of 1919, Agents for the Sale of Treasury Savings Certificates, Series of 1919, Federal Reserve Banks, and Others Concerned:

1. The sale of War-Savings Certificates and Stamps, Series of 1919, and of Treasury Savings Certificates, Series of 1919, will cease at the close of business on December 31, 1919. All agents of the first class and sales stations for the issue and sale of War-Savings Certificates and Stamps, Series of 1919, are required to surrender all such certificates and stamps held by them and remaining unsold at the close of business on December 31, 1919, to an incorporated bank or trust company on or before January 20, 1920, or to the Federal Reserve Bank of the district in which the agent or sales station is located, on or before January 31, 1920. All agents of the second class for the issue and sale of such certificates and stamps or for the issue and sale of Treasury Savings Certificates, Series of 1919, are required to surrender on or before January 31, 1920, all such certificates and stamps held by them and remaining unsold at the close of business December 31, 1919, in each case to the Federal Reserve Bank of the district in

which the agent is located. Rules and regulations governing the distribution and sale during the calendar year 1920 of Treasury Savings Certificates, Series of 1920, War-Savings Certificates and Stamps, Series of 1920, and Thrift Stamps, are prescribed in Treasury Department Circular No. 172, dated December 10, 1919.

2. The term "agent of the first class" where it appears in this circular refers to agents of the first class appointed pursuant to Treasury Department Circular No. 94, dated November 15, 1917, as modified and extended by Treasury Department Circular No. 130, dated December 23, 1918, who may neither obtain nor hold at any one time War-Savings Certificate Stamps in excess of \$1,000 (maturity value). The term "sales station" where it appears in this circular refers to stations established under the authority of Treasury Department Circular No. 101, dated February 19, 1918, as modified and extended by Treasury Department Circular No. 130, dated December 23, 1918. The term "collateral agent" where it appears in this circular refers to collateral agents of the second class appointed pursuant to Treasury Department Circular No. 95, dated November 30, 1917, as modified and extended by Treasury Department Circular No. 130, dated December 23, 1918, and, in the case of Treasury Savings Certificates, by Treasury Department Circular No. 143, dated July 1, 1919. The term "cash agent" where it appears in this circular refers to cash agents of the second class appointed pursuant to Treasury Department Circular No. 96, dated January 2, 1918, as modified and extended by Treasury Department Circular No. 130, dated December 23, 1918, and, in the case of Treasury Savings Certificates, by Treasury Department Circular No. 143, dated July 1, 1919.

AGENTS OF THE FIRST CLASS AND SALES STATIONS.

3. Every agent of the first class or sales station is required to surrender all unsold War-Savings Certificates and Stamps, Series of 1919, remaining in its hands at the close of business on December 31, 1919, to an incorporated bank or trust company in the Federal Reserve district in which it is located, on or before January 20, 1920, or to the Federal Reserve Bank of the district, on or before January 31, 1920. Federal Reserve Banks and incorporated banks and trust companies are hereby authorized to receive such certificates and stamps so surrendered and to make cash reimbursement in each case to the agent of the first class or sales station for the War-Savings Certificate Stamps, Series of 1919, so surrendered at the rate of \$4.24 for each stamp. The surrender of such stamps by an agent of the first class may be accepted by the Federal Reserve Bank or an incorporated bank or trust company only upon presentation by such agent of his certificate of appointment, or other satisfactory evidence of his appointment, as agent for the sale of War-Savings Certificates. Any incorporated bank or trust company so receiving War-Savings Certificates and Stamps, Series of 1919, must deliver such certificates and stamps on or before January 31, 1920, to the Federal Reserve Bank of its district, together with a statement setting forth the name of the authorized agent of the first class or sales station from which the stamps have been received and the number of stamps received from such agent or sales station. On receipt thereof, the Federal Reserve Bank, as fiscal agent of the United States, will make cash

reimbursement to such incorporated bank or trust company for the War-Savings Certificate Stamps, Series of 1919, so surrendered at the rate of \$4.24 for each stamp. No Federal Reserve Bank or incorporated bank or trust company shall accept from any agent of the first class or sales station the surrender of War-Savings Certificate Stamps, Series of 1919, in excess of \$1,000 (maturity value) without special authority from the Secretary of the Treasury.

AGENTS OF THE SECOND CLASS.

4. *Collateral agents.*—Each collateral agent is required to deliver to the Federal Reserve Bank to which such agent is required to account, on or before January 31, 1920, all Treasury Savings Certificates, Series of 1919, and all War-Savings Certificate Stamps, Series of 1919, obtained by such agent from such Federal Reserve Bank, and remaining unsold at the close of business December 31, 1919, and shall receive credit for such certificates and stamps (at the December, 1919, issue price thereof) in its account with such Federal Reserve Bank.

5. *Cash agents.*—Each cash agent is required to deliver on or before January 31, 1920, to the Federal Reserve Bank from which the certificates and stamps were received, all Treasury Savings Certificates, Series of 1919, and all War-Savings Certificate Stamps, Series of 1919, held by such agent for issue and sale to the public and remaining unsold at the close of business December 31, 1919. Upon such redelivery each such cash agent will be entitled to the return of the deposit made against the certificates and stamps so redelivered. In determining the amount deposited with such Federal Reserve Bank by such cash agent for Treasury Savings Certificates and War-Savings Certificate Stamps so redelivered, sales shall be deemed to have been made by such agent in the order in which deliveries of such certificates and stamps may have been obtained by such agent, so that earlier sales shall be deemed to have been made out of earlier deliveries. In lieu of the return of such deposit, any cash agent for the sale of War-Savings Certificate Stamps, Series of 1919, who shall have duly become a cash agent for the sale of Treasury Savings Certificates and War-Savings Certificates, Series of 1920, in accordance with the provisions of Treasury Department Circular No. 172, dated December 10, 1919, may, at the option of such agent, receive Treasury Savings Certificates, Series of 1920, and War-Savings Certificate Stamps, Series of 1920, computed at the January, 1920, issue price thereof, United States Thrift Stamps computed at 25 cents each, and cash, to an aggregate value so computed not exceeding the amount of the deposit to be refunded.

POST OFFICES.

6. Post offices will be required to surrender all Treasury Savings Certificates, Series of 1919, and War-Savings Certificates and Stamps, Series of 1919, held by them for cash sale and remaining in their hands unissued or unsold at the close of business on December 31, 1919, and all duplicate registration stubs for Treasury Savings Certificates, Series of 1919, issued by them during the calendar year 1919, in accordance with instructions issued by the Postmaster General. No

post office shall accept the surrender of any unissued Treasury Savings Certificates, War-Savings Certificate Stamps or Thrift Stamps from any agent or sales station for the sale of War-Savings Certificates or Treasury Savings Certificates other than a postal agent.

SURRENDER OF THRIFT STAMPS.

7. United States Thrift¹ Stamps, issued at any time on or after December 3, 1917, will be on sale during 1920, and appropriate arrangements will be made for the exchange of filled Thrift Cards for War-Savings Certificate Stamps, Series of 1920. Duly qualified agents for the sale of War-Savings Certificates, Series of 1920, in accordance with the provisions of Treasury Department Circular No. 172, dated December 10, 1919, will therefore not be required to surrender unsold Thrift Stamps remaining in their hands at the close of business on December 31, 1919. Agents and sales stations who do not become duly qualified agents for the sale of War-Savings Certificates, Series of 1920, are required to surrender, and other agents and sales stations at their option may surrender, unsold Thrift Stamps remaining in their hands at the close of business on December 31, 1919, to the Federal Reserve Bank of the district, on or before January 31, 1920, in the same manner as unsold War-Savings Certificate Stamps, Series of 1919, and will receive credit or cash reimbursement, as the case may be, from such Federal Reserve Bank, as fiscal agent of the United States, for the Thrift Stamps so surrendered at the rate of 25 cents each; provided, however, that agents of the first class and sales stations may surrender, and incorporated banks and trust companies and Federal Reserve Banks are authorized to accept, such unsold Thrift Stamps, with cash reimbursement therefor at the rate of 25 cents each, in accordance with the procedure applicable to War-Savings Certificate Stamps under paragraph 3 hereof.

SURRENDER OF BLANK WAR-SAVINGS CERTIFICATES, SERIES OF 1919.

8. Every agent of the first class and sales station and every collateral agent and cash agent shall surrender all blank War-Savings Certificates, Series of 1919, held by it at the close of business on December 31, 1919, at the same time and in the same manner as the War-Savings Certificate Stamps, Series of 1919, surrendered by it in accordance with this circular, provided, however, that no credit will be given nor reimbursement made for blank certificates so surrendered.

SURRENDER OF DUPLICATE REGISTRATION STUBS FROM TREASURY SAVINGS CERTIFICATES.

9. Every incorporated bank or trust company which qualified as an agent for the issue and sale of Treasury Savings Certificates, Series of 1919, in accordance with the provisions of Treasury Department Circular No. 143, dated July 1, 1919, is required to surrender on or before March 31, 1920, to the Federal Reserve Bank from which such certificates were obtained, all duplicate registration stubs from the Treasury Savings Certificates, Series of 1919, issued by such incorporated bank or trust company during the calendar year 1919. The Federal Reserve Bank receiving such stubs will forward them on or before April 10, 1920, to the Secretary of the Treasury, Division of Loans and Currency, Washington.

MISCELLANEOUS PROVISIONS.

10. The provisions of this circular as to the surrender of Treasury Savings Certificates, Series of 1919, War-Savings Certificate Stamps, Series of 1919, and United States Thrift Stamps apply only to unissued certificates and stamps and to duly authorized agents for the sale thereof and sales stations, and in the case of collateral or cash agents apply only to such certificates and stamps as were obtained by such agents from the Federal Reserve Bank to which they are presented for surrender. No Federal Reserve Bank or incorporated bank or trust company is authorized hereunder to accept the surrender of any such certificates or stamps from any other than a duly authorized agent or sales station for the sale thereof and no Federal Reserve Bank is authorized hereunder to accept the surrender of any Treasury Savings Certificates, War-Savings Certificate Stamps, or Thrift Stamps from any collateral or cash agent which were not obtained from it by such agent; provided, however, that Federal Reserve Banks are authorized to accept War-Savings Certificate Stamps and Thrift Stamps from incorporated banks and trust companies in accordance with the provisions of paragraphs 3 and 7 hereof. No Federal Reserve Bank is authorized hereunder to accept the surrender of any certificates or stamps (except blank War-Savings Certificates) presented to it after January 31, 1920, without special authority therefor in each case from the Secretary of the Treasury.

11. All cases in which Treasury Savings Certificates, Series of 1919, War-Savings Certificate Stamps, Series of 1919, or Thrift Stamps are presented for surrender hereunder contrary to the provisions of this circular should be promptly referred to the Secretary of the Treasury, Division of Loans and Currency, Washington, for instructions.

12. The Secretary of the Treasury may at any time withdraw this circular as a whole, or amend from time to time any of the provisions thereof, and may from time to time make any supplemental or amendatory regulations which shall not modify or impair the terms and conditions of War-Savings Certificates, Series of 1919, of whatever issue or denomination, issued in pursuance of the act of September 24, 1917, as amended and supplemented.

CARTER GLASS,
Secretary of the Treasury.

EXHIBIT 73.

[1919. Department Circular No. 166. Loans and Currency.]

**REDEMPTION OF WAR-SAVINGS CERTIFICATES CONTRIBUTED TO
RELIGIOUS, PHILANTHROPIC, OR CHARITABLE ORGANIZA-
TIONS.**

TREASURY DEPARTMENT,
OFFICE OF THE SECRETARY,
Washington, November 15, 1919.

*To Holders of War-Savings Certificates, Religious, Philanthropic, and
Charitable Organizations, and Others Concerned:*

1. War-Savings Certificates of all series and issues (including Treasury Savings Certificates), by their terms and the terms of the Treasury Department circulars under which they are respectively issued, are not transferable. By the express terms of the statute

under which War-Savings Certificates are issued, moreover, it is unlawful for any one person at any one time to hold War-Savings Certificates of any one series to an aggregate amount exceeding \$1,000, maturity value. War-Savings Certificates are therefore not appropriate to be given or received as contributions to religious, philanthropic, or charitable organizations. The following rules and regulations are, however, prescribed governing the payment of War-Savings Certificates contributed to religious, philanthropic, and charitable organizations:

2. No relief will be given to any religious, philanthropic, or charitable organization in respect of registered War-Savings Certificates contributed to it of which it is not the registered owner. Payment of registered War-Savings Certificates may be made only to the registered owner, unless in case of the death or disability of such owner and then only in accordance with the regulations prescribed by the Secretary of the Treasury.

3. The Secretary of the Treasury may give relief to religious, philanthropic, or charitable organizations upon application therefor signed by a responsible executive officer of the organization concerned, in respect of War-Savings Certificates which have not been registered but which bear some name other than that of the organization, provided that such certificates are received as voluntary contributions and surrendered as promptly as possible to the Secretary of the Treasury, Division of Loans and Currency, Washington. The War-Savings Certificates so surrendered must be accompanied by affidavits from the responsible executive officers of the organization concerned, proving in each case to the satisfaction of the Secretary of the Treasury that the certificate was received by the organization in good faith, as a voluntary contribution, without solicitation, that reasonable effort has been made by the organization to communicate with the person whose name is inscribed on the certificate, that at least three months have elapsed since the first effort to get into communication with such person and that notwithstanding such efforts it is impossible to locate the contributor of the certificate in order to return it for redemption in ordinary course. Each application must also be accompanied by a written statement, signed by a responsible executive officer of the organization concerned, to the effect that the organization will not thereafter accept War-Savings Certificates or Stamps as contributions to its funds. If the evidence submitted is satisfactory to the Secretary of the Treasury, relief may be given to the organization at a price for each unregistered War-Savings Stamp attached to certificates so surrendered not exceeding the January issue price for the year in which the certificates in question were offered for sale to the public. Application for the redemption of War-Savings Certificates pursuant to this paragraph must be made to the Secretary of the Treasury, Division of Loans and Currency, Washington, and relief in any case will be given only at the Treasury Department, Washington. Applications will not be received at post offices. The Secretary of the Treasury may withdraw or amend at any time or from time to time all or any of the provisions of this paragraph.

CARTER GLASS,
Secretary of the Treasury.

EXHIBIT 74.

[1920. Supplement to Department Circular No. 108 of January 21, 1918. Loans and Currency.]

TREASURY REGULATIONS FURTHER DEFINING RIGHTS OF HOLDERS OF WAR-SAVINGS CERTIFICATES.

TREASURY DEPARTMENT,
OFFICE OF THE SECRETARY,
Washington, August 20, 1920.

Treasury Department Circular No. 108, dated January 21, 1918, as amended by Treasury Department Circular No. 128, dated December 18, 1918, and Treasury Department Circular No. 170, dated December 10, 1919, further defining the rights of holders of War-Savings Certificates, is hereby amended by striking out paragraph X thereof, governing payment of War-Savings Certificates held by a deceased owner, and inserting in lieu thereof a new paragraph X, reading as follows:

In case of the death of the owner of a War-Savings Certificate (other than a certificate registered payable to a beneficiary), payment will be made to the persons and in the manner hereinafter provided:

1. If the decedent leave a will which is duly admitted to probate, or die intestate and the estate of such decedent is administered in a court of competent jurisdiction, payment of such certificate will be made only to the duly appointed representative of the estate. Administration will be required before payment of a War-Savings Certificate will be made in all cases where the gross personal estate of the deceased owner exceeds \$500 in value, unless it is shown by proof satisfactory to the Secretary of the Treasury that administration of the estate of such decedent is not required in the State of the decedent's domicile.

2. In case no legal representative of the decedent's estate is appointed and either the gross personal estate does not exceed \$500 in value or it is shown by proof satisfactory to the Secretary of the Treasury that administration of the estate of such decedent is not required in the State of the decedent's domicile, the certificate will be paid to and on the demand of persons equitably entitled thereto in the opinion of the Secretary of the Treasury, in the following order of classes:

First. Husband, wife, next of kin, or other person, who pays the reasonable funeral expenses, expenses of the last illness, or other preferred claims against the decedent's estate.

Second. Creditor for funeral expenses, expenses of the last illness, or other preferred claims.

Third. Husband, wife, or next of kin of the deceased, in the following order of preference:

- (1) Husband or wife;
- (2) Child or children;
- (3) Father;
- (4) Mother;
- (5) Any other of the next of kin of the deceased;

provided that nothing herein contained shall require the payment of a single certificate to more than one person.

D. F. HOUSTON,
Secretary of the Treasury.

TREASURY REGULATIONS FURTHER DEFINING RIGHTS OF HOLDERS OF TREASURY SAVINGS CERTIFICATES.

TREASURY DEPARTMENT,
OFFICE OF THE SECRETARY,
Washington, August 20, 1920.

Treasury Department Circular No. 149, dated July 31, 1919, as amended by Treasury Department Circular No. 169, dated December 10, 1919, and Treasury Department Circular No. 170, dated December 10, 1919, and Treasury Department Circular No. 171, dated December 10, 1919, further defining the rights of holders of Treasury Savings Certificates, is hereby amended by striking out paragraph X thereof, governing payment of Treasury Savings Certificates held by a deceased owner, and inserting in lieu thereof a new paragraph X, reading as follows:

In case of the death of the owner of a Treasury Savings Certificate (other than a certificate registered payable to a beneficiary), payment will be made to the persons and in the manner hereinafter provided:

1. If the decedent leave a will which is duly admitted to probate, or die intestate and the estate of such decedent is administered in a court of competent jurisdiction, payment of such certificate will be made only to the duly appointed representative of the estate. Administration will be required before payment of a Treasury Savings Certificate will be made in all cases where the gross personal estate of the deceased owner exceeds \$500 in value, unless it is shown by proof satisfactory to the Secretary of the Treasury that administration of the estate of such decedent is not required in the State of the decedent's domicile.

2. In case no legal representative of the decedent's estate is appointed and either the gross personal estate does not exceed \$500 in value or it is shown by proof satisfactory to the Secretary of the Treasury that administration of the estate of such decedent is not required in the State of the decedent's domicile, the certificate will be paid to and on the demand of persons equitably entitled thereto in the opinion of the Secretary of the Treasury, in the following order of classes:

First. Husband, wife, next of kin, or other person, who pays the reasonable funeral expenses, expenses of the last illness, or other preferred claims against the decedent's estate.

Second. Creditor for funeral expenses, expenses of last illness, or other preferred claims.

Third. Husband, wife, or next of kin of the deceased, in the following order of preference:

- (1) Husband or wife;
- (2) Child or children;
- (3) Father;
- (4) Mother;

(5) Any other of the next of kin of the deceased;
provided, however, that nothing herein contained shall require the payment of a single certificate to more than one person.

D. F. HOUSTON,
Secretary of the Treasury.

**DISCONTINUANCE OF THE UNITED STATES SUBTREASURY AT
BOSTON, MASS.**

TREASURY DEPARTMENT,
OFFICE OF THE SECRETARY,
Washington, October 23, 1920.

To All Concerned:

1. The Legislative, Executive, and Judicial Appropriation Act, approved May 29, 1920, provides in part as follows, with respect to the discontinuance of the Subtreasuries of the United States:

INDEPENDENT TREASURY.

Section 3595 of the Revised Statutes of the United States, as amended, providing for the appointment of an Assistant Treasurer of the United States at Boston, New York, Philadelphia, Baltimore, New Orleans, St. Louis, San Francisco, Cincinnati, and Chicago, and all laws or parts of laws so far as they authorize the establishment or maintenance of offices of such Assistant Treasurers or of Subtreasuries of the United States are hereby repealed from and after July 1, 1921; and the Secretary of the Treasury is authorized and directed to discontinue from and after such date, or at such earlier date or dates as he may deem advisable, such Subtreasuries and the exercise of all duties and functions by such Assistant Treasurers or their offices. The office of each Assistant Treasurer specified above and the services of any officers or other employees assigned to duty at his office shall terminate upon the discontinuance of the functions of that office by the Secretary of the Treasury.

2. By virtue of the authority vested in the Secretary of the Treasury under the provisions of the act above quoted, I hereby discontinue the Subtreasury of the United States at Boston, Mass., and the exercise of all duties and functions by the Assistant Treasurer of the United States at said Subtreasury, from and after the close of business on Monday, October 25, 1920. Upon such discontinuance the office of the Assistant Treasurer of the United States at Boston and the services of any and all officers or other employees assigned to duty at his office shall terminate in accordance with the statute.

3. The Secretary of the Treasury has made provision, pursuant to the authority conferred by said act approved May 29, 1920, to transfer the duties and functions performed or authorized to be performed by the Assistant Treasurer at Boston, or his office, to the Treasurer of the United States and the Mints and Assay Offices of the United States, and will utilize the Federal Reserve Bank of Boston, acting as depositary or fiscal agent of the United States, for the purpose of performing certain of such duties and functions. The Federal Reserve Bank of Boston will be prepared, on and after October 26, 1920, to handle exchanges of United States paper currency and United States coin, pursuant to rules and regulations prescribed by the Secretary of the Treasury. Upon the discontinuance of the Subtreasury at Boston, outstanding gold certificates payable to order, issued by the Assistant Treasurer of the United States at Boston, will be received for payment by the Federal Reserve Bank of Boston or the Treasurer of the United States at Washington.

D. F. HOUSTON,
Secretary of the Treasury.

[1920. Department Circular No. 210. Division of Public Moneys.]

DISCONTINUANCE OF THE UNITED STATES SUBTREASURY AT CHICAGO, ILL.

TREASURY DEPARTMENT,
OFFICE OF THE SECRETARY,
Washington, October 27, 1920.

To All Concerned:

1. The Legislative, Executive, and Judicial Appropriation Act, approved May 29, 1920, provides in part as follows, with respect to the discontinuance of the Subtreasuries of the United States:

INDEPENDENT TREASURY.

Section 3595 of the Revised Statutes of the United States, as amended, providing or the appointment of an Assistant Treasurer of the United States at Boston, New York, Philadelphia, Baltimore, New Orleans, St. Louis, San Francisco, Cincinnati, and Chicago, and all laws or parts of laws so far as they authorize the establishment or maintenance of offices of such Assistant Treasurers or of Subtreasuries of the United States are hereby repealed from and after July 1, 1921; and the Secretary of the Treasury is authorized and directed to discontinue from and after such date, or at such earlier date or dates as he may deem advisable, such Subtreasuries and the exercise of all duties and functions by such Assistant Treasurers or their offices. The office of each Assistant Treasurer specified above and the services of any officers or other employees assigned to duty at his office shall terminate upon the discontinuance of the functions of that office by the Secretary of the Treasury.

2. By virtue of the authority vested in the Secretary of the Treasury under the provisions of the act above quoted, I hereby discontinue the Subtreasury of the United States at Chicago, Illinois, and the exercise of all duties and functions by the Assistant Treasurer of the United States at said Subtreasury, from and after the close of business on Wednesday, November 3, 1920. Upon such discontinuance, the office of the Assistant Treasurer of the United States at Chicago, and the services of any and all officers or other employees assigned to duty at his office shall terminate in accordance with the statute.

3. The Secretary of the Treasury has made provision, pursuant to the authority conferred by said act approved May 29, 1920, to transfer the duties and functions performed or authorized to be performed by the Assistant Treasurer at Chicago, or his office, to the Treasurer of the United States and the Mints and Assay Offices of the United States, and will utilize the Federal Reserve Bank of Chicago, acting as depositary or fiscal agent of the United States, for the purpose of performing certain of such duties and functions. The Federal Reserve Bank of Chicago will be prepared, on and after November 3, 1920, to handle exchanges of United States paper currency and United States coin, pursuant to rules and regulations prescribed by the Secretary of the Treasury. Upon the discontinuance of the Subtreasury at Chicago, outstanding gold certificates payable to order, issued by the Assistant Treasurer of the United States at Chicago, will be received for payment by the Federal Reserve Bank of Chicago or the Treasurer of the United States at Washington.

D. F. HOUSTON,
Secretary of the Treasury.

EXHIBIT 79.

[1919. Department Circular No. 176. Public Moneys.]

**REGULATIONS GOVERNING DEPOSIT OF PUBLIC MONEYS AND
PAYMENT OF GOVERNMENT WARRANTS AND CHECKS.**

TREASURY DEPARTMENT,
OFFICE OF THE SECRETARY,
Washington, December 31, 1919.

To the Treasurer and Assistant Treasurers of the United States, Federal Reserve Banks, National Bank Depositories, Special Depositories of Public Moneys, Collectors of Internal Revenue, Collectors of Customs, Receivers of Public Moneys, Depository Postmasters, Marshals and Clerks of Courts, all other Officers or Agents of the United States engaged in collecting, depositing, or transmitting public moneys, and others concerned:

DEPOSIT OF PUBLIC MONEYS.

1. All public moneys shall be deposited with the Treasurer of the United States, Federal Reserve Banks and branches, Assistant Treasurers of the United States, and regular National bank depositories, and, as provided in paragraph 3 hereof, with special depositories under the act approved September 24, 1917, as amended and supplemented, all in accordance with the provisions of this circular and subject to the exceptions hereinafter provided. All deposits of public moneys hereunder (except with such special depositories) shall be for credit to the account of the Treasurer of the United States. The term "Federal Reserve Bank" where it appears in this circular, unless otherwise indicated by the context, includes branch Federal Reserve Banks with which deposits are authorized to be made. All collectors, receivers of public moneys of every description, and other persons having public money to pay to the United States are hereinafter sometimes called depositors of public moneys.

GENERAL PROVISIONS AS TO DEPOSITARIES.

2. *Classes of depositories.*—The established policy of the Treasury Department is to designate and maintain balances with regular National bank depositories of public moneys only at points where a depository is necessary to meet the requirements of Government officers for cash for pay-roll or other expenditures, and then only if there is no Federal Reserve Bank or branch located at or near the point. National banks when designated by the Secretary of the Treasury, however, may be depositories of public moneys with a maximum qualification, for the sole purpose of receiving deposits made by United States courts and their officers, by postmasters, or by other duly authorized Government officers, for credit to their official disbursing accounts elsewhere than with the Treasurer of the United States, provided that such depositories qualify, before receiving deposits, by pledging as collateral security for such deposits, including interest thereon, securities of the classes described in paragraph 26 hereof, to an amount, taken at the rates therein provided, at

least equal to such deposits. National bank depositaries designated with a maximum qualification for this purpose alone are not thereby authorized to accept any other deposits hereunder. Deposits arising from the proceeds of sales of bonds, notes, and Treasury certificates of indebtedness of the United States, and the payment of income and profits taxes, may be made from time to time with special depositaries of public moneys under the act of Congress approved September 24, 1917, as amended and supplemented. Other deposits of public moneys are maintained with the several Federal Reserve Banks, pursuant to the provisions of Section 15 of the Federal Reserve Act, as amended. All inactive National bank depositaries are being discontinued, pursuant to action already taken by the Secretary of the Treasury.

3. *Special depositaries.*—Any incorporated bank or trust company in the United States desiring to participate in deposits of public moneys arising from the sale of bonds, notes, or Treasury certificates of indebtedness of the United States, or from the payment of income or profits taxes, under Section 8 of the act approved September 24, 1917, as amended and supplemented, may make application for designation as a special depositary of public moneys to the Federal Reserve Bank of its district, pursuant to Treasury Department Circular No. 92, as from time to time amended and supplemented. Detailed regulations governing such depositaries are prescribed in said circular, to which reference is hereby made. The remaining provisions of this circular do not apply to or govern special depositaries under said circular, and such depositaries are not, by virtue of such designation or their qualification thereunder, authorized to accept deposits hereunder from collectors or other depositors of public moneys for credit to the account of the Treasurer of the United States, or to the official disbursing accounts of Government officers.

GENERAL PROVISIONS AS TO DEPOSITS.

4. *Cash deposits.*—All cash received by collectors of internal revenue, collectors of customs, depository postmasters, and other depositors of public moneys shall be deposited, if the depositor is located in the same city with a Federal Reserve Bank or branch bank, with such Federal Reserve Bank or branch bank, and in other cases with the regular national bank depository or depositaries with which the depositor has been making such deposits, unless and until otherwise instructed by the Secretary of the Treasury: *Provided, however,* That depositors located in the District of Columbia shall make such deposits direct with the Treasurer of the United States. Payments made by postal or express money order shall be handled, subject to collection, in the same manner as cash.

5. *Checks and drafts.*—All checks received by any Government officer are received subject to collection, and in the event that any check can not be collected or is lost or destroyed before collection, appropriate action must be taken by the depositor in the same manner as if no check had been received. Payments made by check are not effective unless and until the check has actually been duly collected and paid. All checks shall be deposited as hereinafter specifically provided. Bank drafts shall be handled hereunder in the same manner as checks.

6. *Certificates of deposit.*—Certificates of deposit shall be issued, until further notice, on the following forms: Internal Revenue, Form 15 (National Banks); Customs, Form 1 $\frac{3}{4}$ (National Banks); Public Lands, Surveys and Patent Fees, Form 1A (National Banks); Army, Navy, Judiciary, and Indian, Form 1 (National Banks); Surplus Money Order Funds, Forms 6594 and 6594A; Surplus Postal Funds, Form 6598; Deposits for official checking account with Treasurer of United States, Form 6599; and Sales of War-Savings securities, Form 1312. The original of each certificate of deposit (unless otherwise specifically instructed, as in cases where the funds represented thereby are not to be covered into the Treasury by warrant) shall be transmitted to the Secretary of the Treasury (Division of Public Moneys), through the office of the Treasurer of the United States, with the transcript on Form 17 (National Banks), on which the credit appears. The other certificates of deposit in the set should be disposed of in accordance with the instructions which appear on the certificate, and one copy may be retained by the depository for its own records. Federal Reserve Banks and branches shall see that the face of each certificate in any set of certificates of deposit covering in whole or in part items other than cash for which immediate credit is given, bears a legend reading as follows: "This certificate of deposit issued subject to deduction for uncollectible items." It is of the utmost importance that certificates of deposit be properly issued, and in this connection, depositories should give special attention to two points, viz: (1) The name and title (if any) of the depositor, as *John Doe, receiver of public moneys*, or, in cases where the deposit is made by one person for account of another person, *John Doe, receiver of public moneys, through Richard Roe*; and (2) the account or purpose for which the deposit is received, as *Sales of public lands*, or *Sales of War-Savings securities*, with a notation of the series, which should be clearly indicated in order to enable the Treasury Department to classify the deposit and credit the proper receipt account at the same time that the depository is charged with the amount of the deposit. Depositories receiving deposits of Internal Revenue receipts are particularly requested to use great care in specifying upon the face of certificates of deposit on Form 15 (National Banks) deposits of "Income and Profits Taxes" separate and distinct in each case from deposits of Miscellaneous Internal Revenue Collections (formerly called "Ordinary"). It is not necessary, however, to make any further separation of classes of Internal Revenue deposits on the face of certificates of deposit on Form 15 (National Banks).

7. *Unauthorized receipt or use of public money.*—Section 96 of the act of Congress approved March 4, 1909, provides the following penalties for the unauthorized receipt or use of public money:

Every banker, broker, or other person not an authorized depository of public moneys, who shall knowingly receive from any disbursing officer, or collector of internal revenue, or other agent of the United States, any public money on deposit, or by way of loan or accommodation, with or without interest, or otherwise than in payment of a debt against the United States, or shall use, transfer, convert, appropriate, or apply any portion of the public money for any purpose not prescribed by law; and every president, cashier, teller, director, or other officer of any bank or banking association who shall violate any provision of this section is guilty of embezzlement of the public money so deposited, loaned, transferred, used, converted, appropriated, or applied, and shall be fined not more than the amount embezzled, or imprisoned not more than ten years, or both.

8. *Deposit of checks.*—On and after March 1, 1920, and until otherwise directed by the Secretary of the Treasury, all checks (including bank drafts) received by collectors of internal revenue, collectors of customs, depository postmasters, and other depositors of public moneys (except checks for deposit in authorized official disbursing accounts maintained by Government officers elsewhere than with the Treasurer of the United States) shall be deposited pursuant to the following instructions:

FOR SPECIAL ATTENTION OF COLLECTORS OF INTERNAL REVENUE.

9. *Deposit of checks with Federal Reserve Banks and branches.*—All checks, whether certified or uncertified, and whether or not drawn on banks or trust companies located in the same city with the collector, received by collectors of internal revenue (hereinafter in this title called collectors) and their deputies in payment of internal revenue taxes, including income and profits taxes, shall be forwarded for deposit each day by collectors, unless otherwise specifically instructed by the Secretary of the Treasury, to the Federal Reserve Bank of the district in which the collector's head office is located (or, in case the head office is located in the same city with a branch Federal Reserve Bank, to such branch Federal Reserve Bank). Specific instructions may be given by the Secretary of the Treasury in certain instances for the deposit of checks with Federal Reserve Banks of other districts, and branches thereof. Collectors will make the necessary arrangements for deposits by their deputies in accordance herewith. Stamp deputy collectors who are located away from the head office and who receive checks in payment of internal revenue taxes will forward them to the collectors of internal revenue for their respective districts; provided, however, that if there is a Federal Reserve Bank or branch in the same city with the office of the stamp deputy collector, he shall at all times deposit such checks with such Federal Reserve Bank or branch.

10. *Classification of checks for deposit.*—Checks forwarded to the Federal Reserve Bank in accordance herewith must be accompanied by a letter of transmittal or a draft certificate of deposit (original, duplicate, and triplicate, in proper form, to be signed, dated, and numbered by the Federal Reserve Bank), and such letter of transmittal or draft certificate of deposit must, in all cases, specify the amount of the deposit representing Income and Profits Taxes separate and distinct from the amount representing Miscellaneous Internal Revenue Collections (formerly called "Ordinary"). The checks so forwarded may be inclosed under one outer wrapper, but must be separated into two classes, namely:

(1) Checks received exclusively in payment of income and profits taxes, inclosed in a separate package containing an inner wrapper or label plainly marked "Income and Profits Tax Checks only."

(2) All other checks received (in whole or in part) in payment of other internal-revenue taxes, inclosed in a separate package containing an inner wrapper or label plainly marked "Internal Revenue Collections."

Whenever practicable, collectors of internal revenue should arrange the checks so forwarded into at least two groups, namely:

(a) Checks drawn on banks and trust companies located in the same city with the Federal Reserve Bank or branch to which the checks are forwarded.

(b) Checks drawn on banks and trust companies located outside of the city in which is located the Federal Reserve Bank or branch to which the checks are forwarded.

11. *Indorsement, transmission, and collection of checks.*—The collector should stamp on the face of each check deposited the words, "This check is in payment of an obligation to the United States and must be paid at par. No protest," with his name and title. The Federal Reserve Bank will make an effort to collect every check on these terms. If the bank on which a check is drawn refuses to pay it at par, it will be returned to the collector in the same manner as a bad check. Checks received exclusively in payment of income and profits taxes, whether certified or uncertified, when forwarded to the Federal Reserve Bank, should be indorsed:

Pay to the order of the Federal Reserve Bank of.....
(Insert name of city in which Federal Reserve Bank, not branch, is located.)

Income and Profits Tax Account.

All other checks, whether certified or uncertified, when forwarded to the Federal Reserve Bank, should be indorsed:

Pay to the order of the Federal Reserve Bank of.....
(Insert name of city in which Federal Reserve Bank, not branch, is located.)

Internal Revenue Collections.

The checks must in all cases be forwarded by registered mail. Inasmuch as the indorsement is specific, it is not necessary that the checks be insured. Collectors and deputy collectors must, however, retain a record of the checks forwarded, so that if any checks are lost, payment may be immediately stopped and duplicates secured. Collectors are authorized by the Commissioner of Internal Revenue to incur any necessary expense from the appropriation "Collecting the War Revenue," for postage and registration charges. When transmitting the checks to the Federal Reserve Bank, the collector should request the Federal Reserve Bank to issue a certificate of deposit on Form 15 (National Banks) in his name, and to send the duplicate and triplicate of the certificate of deposit to his office, for disposition in accordance with the instructions which appear on the margin of the certificate.

12. *Uncollected and lost checks.*—Taxpayers whose checks are returned uncollected by a depository should be immediately notified by the collector to make the checks good. If any taxpayer should fail to comply, the collector should proceed to collect the taxes by the usual methods, as though no check had been given, and if he fails to make collection within thirty days will accept the return of the check from the Federal Reserve Bank and give receipt therefor on the reverse of Form N, copy attached. In the event that any checks for which a certificate of deposit has been given are reported lost after deposit, the collector will promptly notify the taxpayer that the check has been lost and request him to stop payment thereon and make payment by another check or cash in lieu of the original check. If the taxpayer refuses or neglects to comply, the collector should proceed to collect the taxes by the usual methods, as though no check had been given. If the taxpayer makes payment on account of the lost check, or the amount is otherwise collected, the amount should be delivered to the Federal Reserve Bank against the certificate of deposit already issued therefor. If at the expiration of thirty days

the matter has not been satisfactorily adjusted, the collector will make full report to the Secretary of the Treasury, Division of Public Monies, and receive specific instructions. Collectors are not authorized to give receipts to the depositary for lost checks.

FOR SPECIAL ATTENTION OF COLLECTORS OF CUSTOMS.

13. *Deposit of checks with Federal Reserve Banks and branches.*—All checks received by collectors of customs (hereinafter in this title called collectors and deputy collectors), whether or not such checks are drawn on banks and trust companies located in the same city with the collector, shall be forwarded for deposit each day by collectors, unless otherwise specifically instructed by the Secretary of the Treasury, to the Federal Reserve Bank of the district in which the collector's head office is located (or, in case the head office is located in the same city with a branch Federal Reserve Bank, to such branch Federal Reserve Bank). Specific instructions may be given by the Secretary of the Treasury in certain instances for the deposit of checks with Federal Reserve Banks of other districts, and branches thereof. Collectors will make the necessary arrangements for deposits by their deputies in accordance with this circular. Checks forwarded to the Federal Reserve Bank in accordance herewith must be accompanied by a letter of transmittal or a draft certificate of deposit (to consist of a full set, in proper form, to be signed, dated, and numbered by the Federal Reserve Bank), and such letter of transmittal or draft certificate of deposit must, in all cases, specify the amounts of the deposits representing collections for the Treasury Department, Department of Commerce and Department of Labor, separate and distinct from each other, and must make such further specification within each Department as shall be required.

14. *Indorsement, transmission, and collection of checks.*—The collector should stamp on the face of each check deposited the words, "This check is in payment of an obligation to the United States and must be paid at par. No protest," with his name and title. The Federal Reserve Bank will make an effort to collect every check on these terms. If the bank on which a check is drawn refuses to pay it at par, it will be returned to the collector in the same manner as a bad check. All checks forwarded by the collector to the Federal Reserve Bank should be indorsed:

Pay to the order of the Federal Reserve Bank of.....
(Insert name of city in which Federal Reserve Bank, not branch, is located.)

with appropriate specification as to the class of deposit. The checks must, in all cases, be forwarded by registered mail. Inasmuch as the indorsement is specific, it is not necessary that the checks be insured. Collectors and deputy collectors must, however, retain a record of the checks forwarded so that if any checks are lost, payment may be immediately stopped and duplicates secured. Collectors are authorized to incur any necessary expenses from the appropriation for Collecting the Revenue from Customs, for postage and registration charges. When transmitting the checks to the Federal Reserve Bank, the collector should request the Federal Reserve Bank to issue a certificate of deposit on Form 1 $\frac{3}{4}$ (National Banks) in his name, and to make disposition of the certificates in the set in accordance with the instructions which appear on the certificate.

FOR SPECIAL ATTENTION OF POSTMASTERS.

15. *Deposit of checks with Federal Reserve Banks and branches.*—All checks received by State depository postmasters representing surplus postal funds, surplus money-order funds, and receipts from sales of War-Savings securities (except to the extent that surplus postal funds and surplus money-order funds may be required for use by the depository postmaster for authorized postal expenditures, or the redemption of War-Savings Certificates), whether or not such checks are drawn on banks and trust companies located in the same city with the postmaster, shall be forwarded for deposit each day, unless otherwise specifically instructed, to the Federal Reserve Bank of the district in which the post office is located (or, in case the post office is located in the same city with a branch Federal Reserve Bank, to such branch Federal Reserve Bank). Specific instructions may be given by the Secretary of the Treasury in certain instances for the deposit of checks with Federal Reserve Banks of other districts, and branches thereof. The postmaster at Washington, D. C., shall make deposits hereunder with the Treasurer of the United States direct. Checks forwarded to the Federal Reserve Bank in accordance herewith must be accompanied by a letter of transmittal or a draft certificate of deposit (to consist of a full set, in proper form, to be signed, dated, and completed by the Federal Reserve Bank), and such letter of transmittal or draft certificate of deposit must, in all cases, make such specification as shall be required of postmasters by the Postmaster General, and by the instructions appearing on the certificate. The depository postmaster should stamp on the face of each check deposited the words, "This check is in payment of an obligation to the United States and must be paid at par. No protest," with his name and title. The Federal Reserve Bank will make an effort to collect every check on these terms. If the bank on which a check is drawn refuses to pay it at par, it will be returned to the postmaster in the same manner as a bad check. All checks forwarded by postmasters to the Federal Reserve Bank should be indorsed:

Pay to the order of the Federal Reserve Bank of.....
(Insert name of city in which Federal Reserve Bank, not branch, is located.)

with appropriate statement showing whether the deposit is made on account of surplus postal funds, surplus money-order funds, or receipts from sales of War-Savings securities. The checks must, in all cases, be forwarded by official registered mail. Inasmuch as the indorsement is specific, it is not necessary that the checks be insured. Postmasters must, however, retain a record of the checks forwarded so that if any checks are lost, payment may be immediately stopped and duplicates secured. When transmitting the checks to the Federal Reserve Bank, the postmaster should request the Federal Reserve Bank to issue a certificate of deposit on the appropriate form in his name, and to make disposition of the certificates in the set in accordance with the instructions which appear on the certificate.

FOR SPECIAL ATTENTION OF OTHER DEPOSITORS OF PUBLIC MONEYS.

16. *Deposit of checks with Federal Reserve Banks and branches.*—All checks received by other depositors of public moneys, whether or not drawn on banks and trust companies in the same city with the depositor, including checks for deposit to the official credit of the depositor

with the Treasurer of the United States (other than checks drawn on the Treasurer of the United States for deposit to the official credit of the depositor, which shall be deposited direct with the Treasurer), shall be forwarded for deposit each day, unless otherwise specifically instructed by the Secretary of the Treasury, to the Federal Reserve Bank of the district in which the depositor's head office is located (or, in case the head office is located in the same city with a branch Federal Reserve Bank, to such branch Federal Reserve Bank): *Provided, however,* That depositors located in the District of Columbia shall make deposits hereunder direct with the Treasurer of the United States: *And provided further,* That other depositors may in special cases make deposits hereunder with the Treasurer of the United States direct. Specific instructions may be given by the Secretary of the Treasury in certain instances for the deposit of checks with Federal Reserve Banks of other districts, and branches thereof. Checks forwarded to the Federal Reserve Bank in accordance herewith must be accompanied by a letter of transmittal or a draft certificate of deposit (to consist of a full set, in proper form, to be signed, dated, and completed by the Federal Reserve Bank), and such letter of transmittal or draft certificate of deposit must in all cases make such specification of the deposit as shall be required of the officer making the deposit. The depositor should stamp on the face of each check deposited the words, "This check is in payment of an obligation to the United States and must be paid at par. No protest," with his name and title. The Federal Reserve Bank will make an effort to collect every check on these terms. If the bank on which a check is drawn refuses to pay it at par, it will be returned to the depositor in the same manner as a bad check. All checks forwarded by the depositor to the Federal Reserve Bank should be indorsed:

Pay to the order of the Federal Reserve Bank of.....

(Insert name of city in which Federal Reserve Bank, not branch, is located.)

with appropriate statement showing the specific account for which the deposit is made. The checks, must, in all cases, be forwarded by registered mail. Inasmuch as the indorsement is specific, it is not necessary that the checks be insured. Depositors must, however, retain a record of the checks forwarded, so that if any checks are lost payment may be immediately stopped and duplicates secured. Necessary expenses for postage and registration charges should be borne by such appropriation as may be available, and should not in any event be deducted from the amount of the deposit. If the depositor has no appropriation available to pay such charges, he should make prompt report of the facts to the Secretary of the Treasury, Division of Public Moneys, and request instructions. When transmitting the checks to the Federal Reserve Bank, the depositor should request the Federal Reserve Bank to issue a certificate of deposit on the appropriate form in his name, the certificates in the set to be disposed of in accordance with the instructions which appear on the certificate.

17. *For special attention of officers of United States courts and United States attorneys.*—United States attorneys, marshals, and clerks of United States courts, who receive public moneys accruing to the United States from fines, penalties, and forfeitures, fees, costs, forfeitures of recognizances, moneys arising from unclaimed wages and effects of seamen that have remained in the registry of the courts

for more than six years, unclaimed moneys remaining in court registry five years or longer, debts due the United States, interest on such debts, sales of public property, or from any other sources, except as stated below, will deposit the same in accordance with the foregoing paragraphs. Moneys collected in cases for violation of customs, navigation, equipment of motor boats, steamboat-inspection, immigration and Chinese exclusion laws should be paid to the collector of customs in the district or port in which the case arose. Fines for importation of opium or having opium in possession under act of February 9, 1909, amended January 17, 1914, should also be paid to the collector of customs. Moneys collected in criminal cases under the internal revenue laws, including fines for making smoking opium under law of January 17, 1914, or under the antinarcotic act of December 17, 1914, should be paid to the collector of internal revenue in the district in which the case arose. But fines arising from violation of section 240, Criminal Code, should be deposited by the clerk of court collecting same to the credit of the Treasurer of the United States. Moneys collected as damages on account of trespass on the national forests should be paid to the fiscal agent of the forest service district in which the case arose. Fines and costs should be deposited to the credit of the Treasurer of the United States. Fines collected under sections 52 and 53, Criminal Code (setting fire to timber on public lands or failing to extinguish same), should be paid to the proper county officer for the public school fund of the county where the land is situated. Costs should be deposited to the credit of the Treasurer of the United States. Moneys collected in Indian suits involving rentals, leasing, damages, etc., of Indian property or allotments for use of the particular Indian owners, should be paid to the disbursing officer for the agency having jurisdiction over them. Costs should be deposited to the credit of the Treasurer of the United States. Moneys (including costs) collected in civil or criminal post-office cases should be transmitted to the Solicitor of the Treasury, by draft or check, made payable to the order of the Treasurer of the United States.

FOR SPECIAL ATTENTION OF FEDERAL RESERVE BANKS.

18. *General provisions.*—Federal Reserve Banks and branches will be expected to remain open during usual banking hours for the purpose of receiving deposits hereunder. Unless and until otherwise instructed by the Secretary of the Treasury, Federal Reserve Banks and branches will not receive deposits by postmasters or other Government officers for credit in their official disbursing accounts maintained elsewhere than with the Treasurer of the United States, nor deposits made by United States courts and their officers, unless for the depositor's credit through the account of the Treasurer of the United States with the Federal Reserve Bank or branch.

19. *Internal revenue checks.*—Federal Reserve Banks are requested, where possible, to give immediate credit in the Treasurer's general account and issue certificate of deposit for the full amount of all checks received from collectors of internal revenue pursuant to this circular. In the event that any checks for which a certificate of deposit has been given are returned to the Federal Reserve Bank as unpaid for any reason, the collector should be promptly notified and

the check or checks should be held in suspense for a few days while the collector makes an effort to collect the amount. If he fails to make collection within thirty days, the check or checks should be returned to the collector and his receipt taken therefor, on the reverse of Form N, copy attached. This receipt must show the date, number, and amount of each certificate of deposit in which the amount of the unpaid check (or checks) was included, and the class of the deposit, as Income and Profits Taxes, or Miscellaneous Internal Revenue. The Federal Reserve Bank, upon obtaining such receipt from the collector, will immediately charge the amount, with appropriate description, in its current transcript of the Treasurer's account on Form 17, and forward therewith in support of the entry the receipt given by the collector with a debit voucher, both on Form N, copy attached, a supply of which will be forwarded by the Treasury Department to each Federal Reserve Bank for this purpose. In the event that any checks for which a certificate of deposit has been given are lost after deposit, the collector should be promptly notified and the items held in suspense for not exceeding thirty days while the collector endeavors to have payment on the lost check stopped and to secure another check or cash in lieu of the original check. If the taxpayer refuses or neglects to make prompt payment, the collector will proceed as in the case of a delinquent taxpayer. If at the expiration of thirty days the matter has not been satisfactorily adjusted, the Federal Reserve Bank should make full report to the Secretary of the Treasury, Division of Public Moneys, and request specific instructions before making any charges for the lost item in the Treasurer's account. Checks received from collectors of internal revenue for which the Federal Reserve Bank is not willing to give immediate credit should be credited by the Federal Reserve Bank in a special collection account, for a period not in excess of five days, and when collection has been made or the five-day period has elapsed, the collection account should be charged and the Treasurer's account credited, and a certificate of deposit should be issued in the usual manner, unless the check has been returned unpaid. If a check deposited in the collection account should be returned unpaid, and no certificate of deposit has been issued therefor, it should be returned to the depositor and the amount charged to the collection account. Federal Reserve Banks are requested to use great care in observing the collector's classification of deposits of internal revenue collections, and in specifying upon the face of certificates of deposit on Form 15 (National Banks) deposits of "Income and Profits Taxes" separate and distinct in each case from deposits of Miscellaneous Internal Revenue Collections (formerly called "Ordinary"). In this connection Federal Reserve Banks will observe that checks forwarded in the separate package marked "Internal Revenue Collections" may contain items in payment of income and profits taxes as well as miscellaneous internal revenue collections.

20. *Customs checks.*—Federal Reserve Banks are requested, where possible, to give immediate credit in the Treasurer's general account and issue certificate of deposit for the full amount of all checks received from collectors of customs pursuant to this circular. In the event that any checks for which a certificate of deposit has been given are returned to the Federal Reserve Bank as unpaid for any reason, the collector should be promptly notified and the check or checks

should be held in suspense for a few days while the collector makes an effort to collect the amount. If he fails to make collection within a reasonable time, the check or checks should be returned to the collector and his receipt taken therefor, on the reverse of Form N, copy attached. This receipt must show the date, number, and amount of each certificate of deposit in which the amount of the unpaid check (or checks) was included, and the class of the deposit, as Customs, or the like. The Federal Reserve Bank, upon obtaining such receipt from the collector, will immediately charge the amount, with appropriate description, in its current transcript of the Treasurer's account on Form 17, and forward therewith in support of the entry the receipt given by the collector with a debit voucher, both on Form N, copy attached, a supply of which will be forwarded by the Treasury Department to each Federal Reserve Bank for this purpose. In the event that any checks for which a certificate of deposit has been given are lost after deposit, the collector should be promptly notified and the items held in suspense for not exceeding thirty days while the collector endeavors to have payment on the lost check stopped and to secure another check or cash in lieu of the original check. If at the expiration of thirty days the matter has not been satisfactorily adjusted, the Federal Reserve Bank should make full report to the Secretary of the Treasury, Division of Public Moneys, and request specific instructions before making any charges for the lost item in the Treasurer's account. Checks received from collectors of customs for which the Federal Reserve Bank is not willing to give immediate credit should be credited by the Federal Reserve Bank in a special collection account for a period not in excess of five days, and when collection has been made, or the five-day period has elapsed, a certificate of deposit should be issued in the usual manner, unless the check has been returned unpaid. Federal Reserve Banks are requested to use great care in observing the collector's classification of deposits of Customs collections, and in specifying upon the face of certificates of deposit on Form 1 $\frac{3}{4}$ (National Banks) deposits representing collections for the Treasury Department, Department of Commerce, and Department of Labor, separate and distinct from each other, and to make such further specification within each department as may be indicated by the collector.

21. *Other checks.*—Federal Reserve Banks are requested, where possible, to give immediate credit in the Treasurer's general account and issue certificate of deposit for the full amount of all other checks received from depositors of public moneys pursuant to this circular. In the event that any checks for which a certificate of deposit has been given are returned to the Federal Reserve Bank as unpaid for any reason, or are lost after deposit, the depositor should be promptly notified and the item or items should be held in suspense for not exceeding thirty days while the depositor makes an effort to collect the amount. If he fails to make collection within this time, the Federal Reserve Bank should make full report to the Secretary of the Treasury, Division of Public Moneys, and request specific instructions. The Federal Reserve Bank will not, without further authority therefor, charge the Treasurer's account with the amount of such checks. Checks received from such depositors for which the Federal Reserve Bank is not willing to give immediate credit should be credited by the Federal Reserve Bank in a special collection account, for a period not in excess of five days, and when collection has been made or the five-

day period has elapsed, a certificate of deposit should be issued in the usual manner, unless the check has been returned unpaid. Federal Reserve Banks are requested to use great care in observing the depositor's classification of deposits, and in specifying the classes of deposits upon the face of certificates of deposit on the appropriate form.

22. *Checks drawn on banks outside district.*—Checks received by Federal Reserve Banks in accordance with this circular which are drawn on banks in other Federal Reserve districts should be collected in the usual manner and should not be charged in the Treasurer's general account as transfers of funds to other Federal Reserve Banks.

FOR SPECIAL ATTENTION OF ASSISTANT TREASURERS OF THE UNITED STATES.

23. Collectors of internal revenue, collectors of customs, and depository postmasters are not authorized to make deposits hereunder with Assistant Treasurers of the United States. Inasmuch as there is a Federal Reserve Bank or branch located in every city except Washington in which an Assistant Treasurer is located, it is expected that so far as possible all deposits of public moneys will be made with the Federal Reserve Banks or branches rather than with Assistant Treasurers. Deposits on account of the five per cent redemption funds shall be made until further notice, with the Treasurer or an Assistant Treasurer of the United States.

FOR SPECIAL ATTENTION OF NATIONAL BANK DEPOSITARIES.

24. *General provisions.*—National bank depositaries are not authorized to maintain any collection account for deposits of public moneys, but are required to give immediate credit in the Treasurer's account and to issue certificate of deposit for the full amount of all public moneys deposited with them for credit in the Treasurer's account in accordance with this circular. Except pursuant to specific instructions to that effect from the Secretary of the Treasury, no deposits of checks will be made hereunder with National bank depositaries for credit to the account of the Treasurer of the United States.

25. *Excess balances.*—National bank depositaries, whenever they hold funds to the credit of the Treasurer of the United States in excess of the authorized balance, shall make immediate transfer of such excess funds to the Treasurer or an Assistant Treasurer of the United States, or to the Federal Reserve Bank of the district, or, in special cases, to branches of Federal Reserve Banks. National bank depositaries, whenever they hold funds to the credit of other Government officers, pursuant to paragraph 27 hereof, in excess of the collateral value of the security deposited therefor, shall promptly report the facts to the Secretary of the Treasury, Division of Public Moneys, and deposit additional security to cover such deposits.

26. *Collateral security for deposits with regular National bank depositaries.*—From the date of this circular, and until further notice, securities of the following classes, and no others, will be accepted as security for deposits of public moneys with regular National bank depositaries, and at the rates below provided:

(a) Bonds, notes, and Treasury certificates of indebtedness of the United States, of any issue, including outstanding interim certificates or receipts for payments therefor; all at par.

(b) Bonds of the Federal Land Banks, bonds of the War Finance Corporation, bonds of Porto Rico and the District of Columbia, and bonds and certificates of indebtedness of the Philippine Islands; all at par.

(c) The $3\frac{1}{2}$ per cent bonds of the Territory of Hawaii at 90 per cent of market value; and other bonds of said Territory at market value, not to exceed par.

All securities to be deposited as collateral security for such deposits must be deposited with the Treasurer of the United States. On or before June 30, 1920, National bank depositaries will be required to substitute securities of the classes above described for all securities not falling within said classes deposited with the Treasurer of the United States as security for such deposits.

27. *Court and post-office funds, etc.*—National bank depositaries designated with a maximum qualification for the sole purpose of receiving deposits made by United States courts and their officers, by postmasters for credit to their official disbursing accounts, and by other Government officers authorized to maintain disbursing accounts elsewhere than with the Treasurer of the United States are not authorized to receive deposits for credit to the account of the Treasurer of the United States. Such depositaries are required to forward to the Treasurer of the United States at the end of each week, and at the end of each month, a report on Form 17 (National Banks), showing the aggregate amounts of such deposits, and to the Secretary of the Treasury, Division of Public Moneys, at the end of each week, and at the end of each month, a report on Form 7 (National Banks), showing in detail the deposits to the credit of the local postmaster, the United States court or its officers, and other authorized special accounts. Bankruptcy funds and postal savings deposits should not be included in these reports.

28. *Interest on deposits.*—Each National bank depositary will be required to pay interest at the rate of 2 per cent per annum on daily balances, including deposits received pursuant to paragraph 27 hereof. Interest will be calculated on an actual day's basis, and shall be paid semiannually on January 1 and July 1 in each year, 1 per cent for each six-months' period.

PAYMENT OF GOVERNMENT WARRANTS AND CHECKS.

29. *Federal Reserve Banks and branches.*—Federal Reserve Banks and branches shall make arrangements to cash Government warrants and checks drawn on the Treasurer of the United States for disbursing officers of the War Department and Navy Department, and other Government officers, provided that satisfactory identification of the officer shall be furnished. The Treasurer will upon special request advise Federal Reserve Banks and branches as to the balances to the credit of such officers. Each Federal Reserve Bank and branch will cash Government warrants and checks drawn on the Treasurer of the United States when they are presented and properly indorsed by responsible incorporated banks and trust companies who guarantee all prior indorsements thereon, including the indorsement of the drawer when the check is drawn in his favor. Warrants and checks cashed by Federal Reserve Banks and branches shall be charged to the account of the Treasurer of the United States, subject to

examination and payment by the Treasurer. Federal Reserve Banks and branches will not be expected to cash Government warrants and checks presented direct to the bank by the general public.

30. *National bank depositaries and Assistant Treasurers.*—Each regular National bank depository with an authorized balance to the credit of the Treasurer of the United States, and each Assistant Treasurer of the United States will cash Government warrants and checks drawn on the Treasurer of the United States when they are presented and properly indorsed by responsible holders who guarantee all prior indorsements thereon, including the indorsement of the drawer when the check is drawn in his favor. Warrants and checks so cashed by Assistant Treasurers shall be charged to the account of the Treasurer of the United States, subject to examination and payment thereof by the Treasurer. Regular National bank depositaries are not required to charge Government warrants and checks cashed by them in the account of the Treasurer of the United States, except in cases where checks drawn on the Treasurer of the United States are deposited for the official credit of the drawer or the credit of other Government officers in the account of the Treasurer of the United States and in cases where cash is furnished to a Government officer upon the warrant or check for pay-roll or other expenditures.

31. *Payment by Treasurer.*—The Treasurer of the United States reserves the usual right of the drawee to examine, when received, all Government warrants and checks cashed by Assistant Treasurers, Federal Reserve Banks and branches, and National bank depositaries, and to refuse payment thereon. Three years after the close of the fiscal year (June 30) in which they are drawn, warrants and disbursing officer's checks are *not* payable by the Treasurer of the United States, but should be sent to the Secretary of the Treasury, Division of Public Moneys, for payment from the "Outstanding liabilities" appropriation.

OTHER PROVISIONS.

32. All previous regulations and instructions inconsistent herewith are hereby superseded, including, so far as inconsistent herewith, the provisions of Treasury Department Circulars No. 5, dated April 6, 1916, No. 105, dated December 27, 1917, and No. 144, dated May 20, 1919.

33. Except as herein otherwise specifically provided, nothing contained in this circular shall be deemed to affect deposits by postmasters to the credit of their official disbursing accounts, the deposit of court funds by United States courts and their officers, or the deposit of Postal Savings funds, in cases where such deposits are not for credit by the depository in the account of the Treasurer of the United States. Unless specifically extended thereto by the Secretary of the Treasury, nothing contained in this circular shall be deemed to apply to or govern the deposit of public moneys in Federal land banks or joint stock land banks under the act approved July 17, 1916, as amended.

34. The provisions of this circular do not apply to or govern the deposit of public moneys or the payment of Government warrants and checks outside of the continental United States, except to the extent specifically extended by the Secretary of the Treasury from time to time.

35. The Secretary of the Treasury may withdraw or amend at any time or from time to time any or all of the provisions of this circular.

EXHIBIT 80.

REGULATIONS GOVERNING SALES OF SILVER TO THE DIRECTOR OF THE MINT UNDER THE PITTMAN ACT.

Under authority of the Pittman Act, approved April 23, 1918, and pursuant to the public statements of the Director of the Mint of May 17, 1920, and June 18, 1920, copies of which, marked "Exhibit A" and "Exhibit B," respectively, are hereto attached, the following regulations are prescribed with reference to the proof required to be submitted to the Director of the Mint in connection with purchases of silver under said act:

UNMIXED SILVER.

(1) In the case of silver delivered for sale to the Director of the Mint, which is wholly the product of mines situated within the United States and of reduction works so located, without admixture of foreign silver, the vendor will be required to file at the time of such delivery a vendor's affidavit and affidavits by the miner, smelter, and refiner substantially in the forms prescribed by the Director of the Mint under date of May 17, 1920, revised copies of which are attached.

MIXED SILVER.

(2) In the case of silver delivered for sale to the Director of the Mint which forms part of a mixture of foreign silver and domestic silver the vendor will be required to file at the time of such delivery a vendor's affidavit substantially in the form prescribed by the Director of the Mint under date of June 18, 1920, a revised copy of which is attached.

(3) In addition to the affidavit prescribed by paragraph 2 above, and in accordance with the stipulations of the vendor's affidavit therein referred to, every vendor delivering for sale to the Director of the Mint silver which forms a part of a mixture of foreign silver and domestic silver will also be required to file with the Director of the Mint an affidavit by the miner from whom the domestic silver was purchased substantially in the form prescribed by the Director of the Mint under date of June 18, 1920, a revised copy of which is attached. Such vendor will also be required to file with the Director of the Mint sworn copies of the liquidation sheets of the smelters to which the domestic silver covered by the miners' affidavits was delivered by said miners. Such liquidation sheets must cover all deliveries of silver to said smelters from January 17, 1920, for the entire period within which such silver is delivered for sale to the Director of the Mint. Said copies of liquidation sheets must be filed with the Director of the Mint monthly and must be accompanied by sworn abstracts showing total deliveries of foreign silver and domestic silver to said smelters during the month, as shown by said liquidation sheets.

(4) In addition to the sworn copies of the liquidation sheets, referred to in paragraph 3 above, the vendor will also be required to file with the Director of the Mint not less frequently than quarterly sworn

abstracts from the books of account of the respective smelters and refineries by which said silver was treated, showing—

(a) The amount of silver on hand at such smelter or refinery at the beginning of the period covered by said abstract;

(b) The amounts of silver received at said smelter or refinery for smelting or refining during said period, and sources from which received;

(c) The amount of silver smelted or refined at said smelter or refinery during said period;

(d) The amounts and consignees of all silver delivered from said smelter or refinery during said period; and

(e) The amount of silver remaining on hand at said smelter or refinery at the end of said period.

Such abstracts must form a continuous record of receipts, production, and deliveries of silver at each said smelter or refinery from January 17, 1920, for the entire period within which silver is delivered for sale to the Director of the Mint under the Pittman Act.

(5) The Director of the Mint will purchase under the Pittman Act silver which forms a part of a mixture of domestic and foreign silver up to the proportion of such mixed product which represents silver wholly produced from mines situated in the United States and reduction works so located, provided, however, that the aggregate amount of silver purchased hereunder shall not exceed the amount of silver actually produced from mines situated in the United States and delivered to reduction works so located since January 17, 1920, as shown by the liquidation sheets of said reduction works, filed with the Director of the Mint as above required, and the supporting affidavits of the miners who delivered said silver to said reduction works; and provided further, that the aggregate amount of the total refined mixed product purchasable by the Director of the Mint under the Pittman Act shall not exceed the proportionate part thereof corresponding to the proportion in which silver actually produced from mines located within the United States entered into the aggregate amount of domestic and foreign silver received by the smelters concerned since January 17, 1920, as shown by the liquidation sheets of such smelters filed with the Director of the Mint as above required. All sales of mixed silver by the vendor prior to May 15, 1920, and all sales of mixed silver by the vendor after that date at a price exceeding \$1 per ounce, 1,000 fine, shall be deemed to be made out of domestic and foreign silver in the same proportion in which domestic and foreign silver are found to have entered into the mixed product pursuant to these regulations.

(6) All copies of liquidation sheets and abstracts from books of account filed as aforesaid with the Director of the Mint must be certified under oath by a duly authorized officer of the smelter or refinery rendering such statements to be true and correct copies or abstracts from the books of account of said smelter or refinery.

(7) Silver which has at any time been in the form of coined silver or sycee will not be deemed to be domestic silver for the purpose of purchases by the Director of the Mint under the provisions of the Pittman Act and the regulations prescribed hereunder.

(8) The Director of the Mint may withdraw or amend at any time or from time to time any or all of the regulations herein prescribed.

R. T. BAKER,
Director of the Mint.

Approved August 30, 1920:

S. P. GILBERT, Jr.,
Assistant Secretary of the Treasury.

EXHIBIT A TO FOREGOING REGULATIONS.

STATEMENT BY THE DIRECTOR OF THE MINT, MAY 16, 1920.

The provisions of the Pittman Act are mandatory, and in accordance with them the Secretary of the Treasury has given standing orders to the Director of the Mint to buy silver at \$1 per ounce 1,000 fine, delivered at the option of the Director of the Mint at the assay office in New York or the mints in Philadelphia, Denver, and San Francisco, up to the aggregate amount of 207,000,000 ounces. Under the terms of the act the silver so purchased must be the product both of mines situated in the United States and of reduction works so located, and clear and unequivocal proof to that effect will be required. Forms for such proof may be obtained at said assay office and mints.

EXHIBIT B TO FOREGOING REGULATIONS.

STATEMENT BY THE DIRECTOR OF THE MINT, JUNE 17, 1920.

Under the express terms of the Pittman Act, silver purchased by the Director of the Mint under the act at the fixed price of \$1 per ounce 1,000 fine must be the product both of mines situated in the United States and of reduction works so located. As previously announced, the Director of the Mint has received standing orders from the Secretary of the Treasury to purchase silver under the act up to an aggregate amount of 207,000,000 ounces, delivered at the option of the Director of the Mint at the assay office in New York or at the mints in Philadelphia, Denver, or San Francisco, and is making such purchases when satisfied by clear and unequivocal proof that the silver is the product of mines situated in the United States and of reduction works so located. Forms for such proof, appropriate for use in case of silver wholly produced and reduced in the United States without admixture of foreign silver, were furnished to said assay office and mints under date of May 15, 1920.

In order to cover the practical situation presented by the fact that a large proportion of the domestic production of silver is smelted and refined in conjunction with foreign silver and comes from the refineries as part of a mixed product of domestic and foreign silver, the Director of the Mint is further prepared to purchase under the act silver which forms part of a mixture of foreign silver and domestic silver up to the proportionate part of such mixed product which represents the product of mines located within the United States and of reduction works so located, upon clear and unequivocal proof as to the proportionate part of the mixed product which represents domestic production. Forms for such proof, appropriate for use in case of mixed silver, will be available at said assay office and mints, and in addition to a gen-

eral affidavit from the vendor in each case will include supporting affidavits from the miner, smelter, and refiner, together with such sworn statements and exhibits from their books of account as may be required by the Director of the Mint. The form of general affidavit from the vendor and of supporting affidavit from the miner are appended hereto for the information of all concerned; full information as to the additional supporting affidavits and proof will be available at said assay office and mints.

Deliveries of mixed silver under the act will be accepted upon the filing of a satisfactory general affidavit by the vendor, subject to the later filing of the necessary supporting proof. It will be noted that as to mixed silver already produced and refined it will be necessary to show that the silver mined in the United States which enters into the mixed product was delivered to reduction works located in the United States since January 17, 1920. It will be noted further that in order to have assurance that the benefits of the Pittman Act go to American producers, for whom they were intended, the Director of the Mint will require, in connection with the purchases, supporting affidavits from the miners to the effect that settlement has been made with them on the basis of the fixed price of \$1 per ounce, adjusted to the equivalent price for silver 999 fine and to the cost of delivery refinery to mint.

AFFIDAVITS BY VENDOR AND MINER IN CONNECTION WITH SALE OF MIXED SILVER
UNDER PITTMAN ACT.

STATE OF.....,
County of....., ss.

In order to make a sale of silver to the Director of the Mint in accordance with the provisions of the Pittman Act approved April 23, 1918, the undersigned hereby represents and certifies under oath that he is the.....of

(Title of office.)

....., owner of certain silver to the amount

(Name of vendor.)

of.....fine ounces, more or less, forwarded to the United States Mint at.....on the.....day of....., 1920, and delivered for sale to the Director of the Mint under the provisions of said act for account of said vendor; and that said silver is the product of mines situated in the United States and of reduction works so located, being either ¹ (1) wholly without admixture of the product of foreign mines or reduction works, or (2) part of a mixture of foreign silver and domestic silver delivered to domestic reduction works since January 17, 1920, and within the proportionate part of such mixed product which represents the product of mines located within the United States and of reduction works so located, delivered by such mines to such reduction works since January 17, 1920, after taking into account sales heretofore made to the Director of the Mint under said act. Payment for said silver was made to the miners at the fixed price of \$1 per ounce, adjusted to the equivalent price for silver 999 fine and to the cost of delivery, refinery to mint. The vendor will forthwith file with the superintendent of said mint such statements and exhibits from its books of account and also such supporting affidavits and sworn statements or exhibits by itself and by the miner, smelter, and refiner as may be demanded by the Director of the Mint under said act.

**SUPPLEMENTAL REGULATIONS GOVERNING SALES OF SILVER
TO THE DIRECTOR OF THE MINT UNDER THE PITTMAN ACT.**

The regulations of the Director of the Mint, approved August 30, 1920, with reference to the proof required to be submitted in connection with purchases of silver under authority of the Pittman Act, approved April 23, 1918, are hereby amended as follows:

Paragraph (3) of said regulations now requires that sworn copies of liquidation sheets be filed with the Director of the Mint, as follows:

Such vendor will also be required to file with the Director of the Mint sworn copies of the liquidation sheets of the smelters to which the domestic silver covered by the miners' affidavits was delivered by said miners. Such liquidation sheets must cover all deliveries of silver to said smelters from January 17, 1920, for the entire period within which such silver is delivered for sale to the Director of the Mint. Said copies of liquidation sheets must be filed with the Director of the Mint monthly and must be accompanied by sworn abstracts showing total deliveries of foreign silver and domestic silver to said smelters during the month, as shown by said liquidation sheets.

In lieu of the filing of sworn copies of the liquidation sheets, pursuant to this requirement, the vendor may file with the Director of

the Mint, not less frequently than quarterly, a sworn statement by the superintendent of each smelter receiving deliveries of domestic or foreign silver, covering each month during the period subsequent to January 17, 1920, and showing for each month the total deliveries of foreign silver and domestic silver to the smelter during the month and the names of the miners or other depositors from whom such deliveries of silver were received, with the amounts received from each such miner or other depositor. Such sworn statements from the superintendent of the smelter must state expressly that the information contained therein is based upon examination of liquidation sheets filed with the smelter, that such liquidation sheets are in the custody of the smelter and constitute part of its records, and that the names and figures given cover all deliveries of silver, both foreign and domestic, to the smelter during the month.

R. T. BAKER,
Director of the Mint.

Approved October 6, 1920:

S. P. GILBERT, Jr.,
Assistant Secretary of the Treasury.

[States of America. Treasury Department-Department of Agriculture. Joint Circular No. 5.]

SUPPLEMENTAL REGULATIONS RELATIVE TO EXPENSES INCURRED BY FEDERAL LAND BANKS IN ADMINISTERING FARMERS' SEED GRAIN LOANS IN DROUTH-STRICKEN AREAS.

WASHINGTON, D. C., *September 2, 1919.*

This circular is issued jointly by the Treasury Department and the Department of Agriculture to amend and supplement Joint Circular No. 1, dated August 2, 1918, and Joint Circular No. 2, dated November 1, 1918, of the Treasury Department and the Department of Agriculture. It covers the matter of expenses incurred by the several Federal Land Banks in administering the regulations relative to farmers' seed grain loans in drouth-stricken areas.

1. Paragraph 7 of the said Joint Circular No. 1, and paragraph 7 of the said Joint Circular No. 2, are hereby amended so that each shall read as follows:

Actual expenses of the several Federal Land Banks when shown by sworn vouchers to have been necessarily incurred for stationery, telegraphing, telephoning, printing, postage, the salaries or compensation of clerks, stenographers, or other personnel (but not including the salaries or compensation of any persons in the regular employment of the Federal Land Banks and whose services would have been continued regardless of the seed grain loans, unless the use of the services of such persons necessitated the employment by the bank of other persons not regularly employed to perform the services of such regular employees, in which case a reasonable amount not in excess of the salaries or compensation of such other persons or of such regular employees may be included), the rent of additional typewriting machines and of additional office space, and necessary traveling expenses and actual subsistence expenses while traveling not to exceed \$5 per day, all incident to and entirely on account of the administration of these regulations as to farmers' seed grain loans, will be allowed and paid, upon approval of the Federal Farm Loan Board, out of the fund for farmers' seed grain loans hereinabove referred to. Agencies of the Federal Land Banks appointed under these regulations shall not be entitled to incur any expense chargeable against the United States or its financial agents.

2. The right is reserved to make further supplemental or amendatory regulations relative to farmers' seed grain loans from time to time, or to withdraw these regulations at any time.

CARTER GLASS,
Secretary of the Treasury.

D. F. HOUSTON,
Secretary of Agriculture.

EXHIBIT 83.

[United States of America. Treasury Department-Department of Agriculture. Joint Circular No. 6.]

REGULATIONS RELATIVE TO RELEASE OF FARMERS' SEED-GRAIN LOANS FOR WHEAT PLANTING IN DROUTH-STRICKEN AREAS.

WASHINGTON, D. C., *August 10, 1920.*

This circular is issued jointly by the Treasury Department and the Department of Agriculture, and will define the procedure relative to the release of seed-grain loans for wheat planting to farmers in drouth-stricken areas pursuant to the act of Congress approved May 31, 1920,

making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1921, which provides as follows:

That a yield of five bushels or less per acre of wheat on lands owned by those in the drouth-stricken regions who borrowed money from the Government of the United States for the purchase of wheat for seed be, and the same is hereby, declared to be a failure, and the borrower whose yield was five bushels or less per acre be, and he is hereby, released from repayment of the amount borrowed by him from the Government: *Provided*, That nothing herein shall release the borrower who signed a guaranty fund agreement and whose crop was not a failure from making the contribution provided for in such agreement, but said guaranty fund shall be used as stipulated in the agreement to the settlement of the loans to those whose crop was a failure.

1. Applications for the release of seed-grain loans to farmers for wheat planting pursuant to said act must be filed with the Federal land bank from which the loan was obtained on Form 1B or a substantially similar form, copies of which may be obtained from the Federal land banks.

2. Each application must be examined by the Federal land bank, which, if it finds the statements contained therein are true and correct as shown by its records, must so certify on the application and transmit the application with its recommendations thereon to the Federal Farm Loan Board, accompanied by the sworn statement of the thresherman who threshed the crop, or by the certificate of the representative of the Department of Agriculture who examined the crop, or, in the absence of such evidence, by such other evidence as shall be deemed sufficient by the Farm Loan Board, showing the average yield per acre of the crop upon which the loan sought to be released was made.

3. The Farm Loan Board will examine each application and the accompanying evidence in order to determine whether in its opinion the applicant is entitled to the release of the loan under the provisions of the said act approved May 31, 1920, and will transmit the same, with its recommendation thereon, to the Secretary of the Treasury for approval.

4. Upon the approval of the application by the Secretary of the Treasury, the application will be returned to the Federal land bank through the Farm Loan Board and the Federal land bank will forthwith cancel and deliver up to the borrower the note for said loan and will deliver to the borrower a release of the mortgage given as security for said note in such form as to be capable of recordation. The release of any such mortgage shall not operate to release the right of the insurer to any lien thereunder for the amount of any premium or premiums due or to become due on any insurance policy taken out on the crop mortgaged the premiums on which may in any way have been included in the lien of such mortgage or be secured thereby, and the release of any such mortgage by the Federal land bank shall expressly reserve the rights of such insurer thereunder.

5. Pursuant to the said act of May 31, 1920, the approval of any such application by the Secretary of the Treasury and the release of any such loan, note or mortgage shall constitute a release only of the borrower's liability to repay to the United States or the Federal land bank, as financial agent of the United States, the amount of such loan so far as the same may not be discharged by payments from the guaranty fund applicable to such loans and shall in no case prejudice the right of the United States or of the Federal land bank, as financial agent of the United States, to apply to the payment of the principal

and interest of any such loan any moneys held in the guaranty fund and applicable to the payment of such loans, pursuant to the terms of the guaranty fund agreement, or to apply to the payment of the principal and interest on said loan the amount of any hail insurance paid on account of the damage or destruction of the crop mortgaged which may be applicable to such loan pursuant to the terms of the insurance policy or of the chattel mortgage given as security for such loan.

6. All fees and other necessary expenses incident to procuring the release of record of the chattel mortgage given as security for any such loan shall be paid by the borrower. Federal land banks will not be entitled to reimbursement out of the fund for farmers' seed-grain loans for any expenses incurred by them in connection with the release of seed-grain loans pursuant to the provisions of this circular.

7. The said act approved May 31, 1920, applies only to loans for wheat planting, and loans made to farmers for the planting of rye or other grains can not be released under said act.

8. Nothing herein contained shall authorize the repayment to any borrower of any sum or sums paid by such borrower prior to May 31, 1920, in discharge of his indebtedness on any loan made to him out of the funds made available for seed-grain loans to farmers in drouth-stricken regions or in discharge of his obligations under any guaranty fund agreement.

9. The Secretary of the Treasury and the Secretary of Agriculture may withdraw or amend at any time or from time to time any or all the provisions of this circular.

D. F. HOUSTON,
Secretary of the Treasury.
E. T. MEREDITH,
Secretary of Agriculture.

EXHIBIT 84.

[Form 1 B. United States of America. Treasury Department.]

APPLICATION FOR RELEASE FROM REPAYMENT OF SEED GRAIN LOAN.

The undersigned being duly sworn deposes and says that on the _____ day of _____ 19____, he did receive from the Federal Land Bank of _____, as Financial Agent of the United States, from funds made available for that purpose by the President of the United States under date of July 26, 1918, out of the appropriation for the national security and defense provided for under the act of Congress approved July 1, 1918, a loan of \$_____ upon _____ acres of wheat planted upon the following described land, situated in the County of _____, State of _____:

(Here insert description of land.)

that as security for the repayment of said loan the undersigned did execute and deliver to the said Federal Land Bank, as Financial Agent of the United States, on the _____ day of _____, 19____, his

promissory note for \$-----, payable on the ----- day of -----, 19--, with interest at six per centum (6%) per annum; a guaranty fund agreement duly executed and acknowledged by the undersigned, in form and in terms prescribed by the regulations of the Secretary of the Treasury and the Secretary of Agriculture, and a chattel mortgage, duly executed by the undersigned in such manner as to entitle it to recordation, upon the crops planted on the above-described land, to secure the payment of the above mentioned note and due performance of the obligations of the undersigned under said guaranty fund agreement; that the above-described land was planted to wheat in the ----- of 19--, using seeds and methods of agricul-

(Spring, fall.)

ture approved by the Department of Agriculture and a certificate of such planting signed by ----- was filed with said Federal Land Bank: that the average yield of wheat upon said land from said planting did not exceed five (5) bushels per acre and said crop is declared to be a failure under the regulations of the Secretary of the Treasury and the Secretary of Agriculture and under the provisions of the act approved May 31, 1920, making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1921, and a certificate of said failure, signed by -----, has been filed with the said Federal Land Bank; and that the undersigned hereby makes application pursuant to the said act approved May 31, 1920, to be released from repayment by him of the amount borrowed on said loan, so far as the same may not be discharged by payments heretofore or hereafter made from the guaranty fund applicable to said loan, and for the release and cancellation of the above-described note and the release of the chattel mortgage given by him as security for the repayment of said loan; and this affidavit is made by the undersigned for the purpose of inducing the said Federal Land Bank and the Secretary of the Treasury to release said loan and mortgage and cancel said note pursuant to said act. It is understood and agreed by the undersigned that the release of said note and mortgage shall in no wise prejudice the right of the United States or the Federal Land Bank of -----, as financial agent of the United States, to apply to the repayment of the principal and interest of said loan any moneys held in the guaranty fund applicable to said loans pursuant to the provisions of the Guaranty Fund Agreement and the said act approved May 31, 1920, or to apply to the repayment of the principal and interest of said loan the amount of any hail insurance paid on account of the damage or destruction of the crop mortgaged which may be applicable to said loan pursuant to the terms of the insurance policy or the chattel mortgage given as security for said loan. It is further understood and agreed by the undersigned that the release of said mortgage shall not operate to release the right of the insurer to any lien thereunder for the amount of any premium or premiums due or to become due on any insurance policy taken out on the crop mortgaged, the premiums on which may in any way have been included in the lien of said mortgage or be secured thereby.

(Signature of applicant.)

Subscribed and sworn to before me this ----- day of -----, 19--.

[SEAL.]

Notary Public.

CERTIFICATE AND RECOMMENDATION BY FEDERAL LAND BANK.

The undersigned Federal Land Bank of _____, as financial agent of the United States, hereby certifies that the statements contained in the foregoing affidavit by _____ are shown by its records to be true and correct; and hereby recommends that said application be granted and the note referred to therein be canceled and the mortgage released.

Federal Land Bank of _____
Financial Agent of the United States.

 (Official signature required.)

RECOMMENDATION BY FARM LOAN BOARD.

The Federal Farm Loan Board having examined the foregoing application by _____ and recommendation of the Federal Land Bank of _____, is of the opinion that the applicant is entitled to the relief requested pursuant to the act of May 31, 1920, making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1921, and hereby recommends that said application be granted.

Farm Loan Commissioner.

Secretary of the Treasury.

EXHIBIT 85.

[PUBLIC—No. 104—66TH CONGRESS.]

[H. R. 8778.]

An Act To amend and modify the War Risk Insurance Act.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the office of the Commissioner of Military and Naval Insurance and the office of the Commissioner of Marine and Seamen's Insurance created by the War Risk Insurance Act are hereby abolished and the powers and duties pertaining to such offices are hereby transferred to the Director of the Bureau of War Risk Insurance, who shall hereafter receive a salary at the rate of \$7,500 per annum. Until such time as the Secretary of the Treasury may direct otherwise, and subject to the provisions of section 9 of the War Risk Insurance Act, there shall be in the Bureau of War Risk Insurance a Division of Marine and Seamen's Insurance and a Division of Military and Naval Insurance. All laws inconsistent with this section are hereby so modified as to conform to the provisions hereof.

SEC. 2. That paragraph (b) of the second subdivision (1) of section 22 of the War Risk Insurance Act is hereby amended to read as follows:

"(b) A child legally adopted."

SEC. 3. That paragraph (d) of the second subdivision (1) of section 22 of the War Risk Insurance Act is hereby amended to read as follows:

"(d) An illegitimate child, but, as to the father only, if acknowledged in writing signed by him, or if he has been judicially ordered or decreed to contribute to such child's support, or has been judicially decreed to be the putative father of such child."

SEC. 4. That section 22 of the War Risk Insurance Act is hereby amended by inserting therein immediately following subdivisions (4) and (5), respectively, two new subdivisions to be known as subdivision (4a) and subdivision (5a) and to read as follows:

"(4a) The terms 'father' and 'mother' include stepfathers and stepmothers, fathers and mothers through adoption, and persons who have stood in loco parentis to a member of the military or naval forces at any time prior to his enlistment or induction for a period of not less than one year: *Provided*, That this subdivision shall be deemed to be in effect as of October 6, 1917."

"(5a) The terms 'brother' and 'sister' include the children of a person who, for a period of not less than one year, stood in loco parentis to a member of the military or naval forces of the United States at any time prior to his enlistment or induction, or another member of the same household as to whom such person during such period likewise stood in loco parentis: *Provided*, That this subdivision shall be deemed to be in effect as of October 6, 1917."

SEC. 5. That section 23 of the War Risk Insurance Act is hereby amended by the addition thereto of a new paragraph to read as follows:

"If any person entitled to receive payments under this Act shall be an inmate of any asylum or hospital for the insane maintained by the United States, or by any of the several States or Territories of the United States, or any political subdivision thereof, and no guardian or curator of the property of such person shall have been appointed by competent legal authority, the director, if satisfied after due investigation that any such person is mentally incompetent, may order that all moneys payable to him or her under this Act shall be held in the Treasury of the United States to the credit of such person. All funds so held shall be disbursed under the order of the director and subject to his discretion, either to the chief executive officer of the asylum or hospital in which such person is an inmate, to be used by such officer for the maintenance and comfort of such inmate, subject to the duty to account to the Bureau of War Risk Insurance and to repay any surplus at any time remaining in his hands in accordance with regulations to be prescribed by the director; or to the wife (or dependent husband if the inmate is a woman), minor children, and dependent parents of such inmate, in such amounts as the director shall find necessary for their support and maintenance, in the order named; or, if at any time such inmate shall be found to be mentally competent, or shall die, or a guardian or curator of his or her estate be appointed, any balance remaining to the credit of such inmate shall be paid to such inmate, if mentally competent, and otherwise to his or her guardian, curator or personal representatives."

SEC. 6. That the provisions of section 28 of the War Risk Insurance Act shall not be construed to prohibit the assignment by any person to whom converted insurance shall be payable under Article IV of such Act of his interest in such insurance to any other member of the permitted class of beneficiaries.

SEC. 7. That a new section is hereby added to the War Risk Insurance Act, to be known as section 31, and to read as follows:

"SEC. 31. That if after induction by the local draft board, but before being accepted and enrolled for active service, the person died or became disabled as a result of disease contracted or injury suffered in the line of duty and not due to his own willful misconduct involving moral turpitude, or as a result of the aggravation, in the line of duty and not because of his own willful misconduct involving moral turpitude, of an existing disease or injury, he or those entitled thereto shall receive the benefits of compensation payable under Article III: *Provided*, That any insurance application made by a person after induction by the local draft board but before being accepted and enrolled for active service shall be deemed valid."

SEC. 8. That the second paragraph of section 204 of the War Risk Insurance Act is hereby amended to read as follows:

"The family allowance shall be paid from the time of enlistment to death in or one month after discharge from the service, but not for more than four months after the termination of the present war emergency. No family allowance shall be made for any period preceding November 1, 1917. The payment shall be subject to such regulations as may be prescribed relative to cases of desertion and imprisonment and of missing men."

SEC. 9. That a new section is hereby added to Article II of the War Risk Insurance Act, to be known as section 211, and to read as follows:

"SEC. 211. That all family allowances and allotments payable by the Bureau of War Risk Insurance under the authority of this article shall be discontinued at the end of the fourth calendar month after the termination of the present war emergency, as declared by proclamation of the President of the United States, and thereafter all allotments of pay shall be voluntary and shall be made under such regulations as may be prescribed by the Secretary of War and the Secretary of the Navy, respectively."

SEC. 10. That the second paragraph of subdivision (g) of section 301 of the War Risk Insurance Act is hereby amended to read as follows:

"If death occur or shall have occurred subsequent to April 6, 1917, and before discharge or resignation from service, the United States shall pay for burial expenses and the return of the body to his home a sum not to exceed \$100, as may be fixed by regulations."

That section 301 of the War Risk Insurance Act, as amended, shall be deemed to be in effect as of April 6, 1917: *Provided, however,* That before compensation thereunder shall be paid there shall first be deducted from said sum so to be paid the amount of any payments such person may have received by way of gratuities or payments under pension laws in force and existence between April 6, 1917, and October 6, 1917.

SEC. 10a. That section 300 of the War Risk Insurance Act is hereby amended to read as follows:

"SEC. 300. That for death or disability resulting from personal injury suffered or disease contracted in the line of duty, by any commissioned officer or enlisted man, or by any member of the Army Nurse Corps (female) or of the Navy Nurse Corps (female) when employed in the active service under the War Department or Navy Department, the United States shall pay compensation as hereinafter provided; but no compensation shall be paid if the injury or disease has been caused by his own willful misconduct: *Provided,* That for the purposes of this section said officer, enlisted man, or other member shall be held and taken to have been in sound condition when examined, accepted, and enrolled for service: *Provided further,* That this section, as amended, shall be deemed to become effective as of April 6, 1917."

SEC. 11. That section 302 of the War Risk Insurance Act is hereby amended to read as follows:

"SEC. 302. That if disability results from the injury—

"(1) If and while the disability is rated as total and temporary, the monthly compensation shall be the following amounts:

"(a) If the disabled person has neither wife nor child living, \$80.

"(b) If he has a wife but no child living, \$90.

"(c) If he has a wife and one child living, \$95.

"(d) If he has a wife and two or more children living, \$100.

"(e) If he has no wife but one child living, \$90, with \$5 for each additional child.

"(f) If he has a mother or father, either or both dependent on him for support, then, in addition to the above amounts, \$10 for each parent so dependent.

"(2) If and while the disability is rated as partial and temporary, the monthly compensation shall be a percentage of the compensation that would be payable for his total and temporary disability, equal to the degree of the reduction in earning capacity resulting from the disability, but no compensation shall be payable for a reduction in earning capacity rated at less than 10 per centum.

"(3) If and while the disability is rated as total and permanent, the rate of compensation shall be \$100 per month: *Provided, however,* That the loss of both feet, or both hands, or the sight of both eyes, or the loss of one foot and one hand, or one foot and the sight of one eye, or one hand and the sight of one eye, or becoming helpless and permanently bedridden, shall be deemed to be total, permanent disability: *Provided further,* That for double, total, permanent disability the rate of compensation shall be \$200 per month.

"(4) If and while the disability is rated as partial and permanent, the monthly compensation shall be a percentage of the compensation that would be payable for his total and permanent disability equal to the degree of the reduction in earning capacity resulting from the disability, but no compensation shall be payable for a reduction in earning capacity rated at less than 10 per centum.

"A schedule of ratings of reductions in earning capacity from specific injuries or combinations of injuries of a permanent nature shall be adopted and applied by the bureau. Ratings may be as high as 100 per centum. The ratings shall be based, as far as practicable, upon the average impairments of earning capacity resulting from such injuries in civil occupations and not upon the impairment in earning capacity in each individual case, so that there shall be no reduction in the rate of compensation for individual success in overcoming the handicap of a permanent injury. The bureau in adopting the schedule of ratings of reduction in earning capacity shall consider the impairment in ability to secure employment which results from such injuries. The bureau shall from time to time readjust this schedule of ratings in accordance with actual experience.

"(5) If the disabled person is so helpless as to be in constant need of a nurse or attendant, such additional sum shall be paid, but not exceeding \$20 per month, as the director may deem reasonable.

"(6) In addition to the compensation above provided, the injured person shall be furnished by the United States such reasonable governmental medical, surgical, and hospital services and with such supplies, including wheeled chairs, artificial limbs, trusses, and similar appliances, as the director may determine to be useful and reasonably necessary, which wheeled chairs, artificial limbs, trusses, and similar appliances may be procured by the Bureau of War Risk Insurance in such manner, either by purchase or manufacture, as the director may determine to be advantageous and reasonably necessary: *Provided,* That nothing in this Act shall be construed to affect the necessary military control over any member of the military or naval establishments before he shall have been discharged from the military or naval service.

"(7) Where the disabled person and his wife are not living together, or where the children are not in the custody of the disabled person the amount of the compensation shall be apportioned as may be prescribed by regulations.

"(8) The term 'wife' as used in this section shall include 'husband' if the husband is dependant upon the wife for support.

"(9) That the Bureau of War Risk Insurance is hereby authorized to furnish transportation, also the medical, surgical, and hospital services and the supplies and appliances provided by subdivision (6) hereof, to discharged members of the military or naval forces of those Governments which have been associated in war with the United States since April 6, 1917, and come within the provisions of laws of such Governments similar to the War Risk Insurance Act, at such rates and under such regulations as the Director of the Bureau of War Risk Insurance may prescribe; and the Bureau of War Risk Insurance is hereby authorized to utilize the similar services, supplies, and appliances provided for the discharged members of the military and naval forces of those Governments which have been associated in war with the United States since April 6, 1917, by the laws of such Governments similar to the War Risk Insurance Act, in furnishing the discharged members of the military and naval forces of the United States who live within the territorial limits of such Governments and come within the provisions of subdivision (6) hereof, with the services, supplies, and appliances provided for in such subdivision; and any appropriations that have been or may hereafter be made for the purpose of furnishing the services, supplies, and appliances provided for by subdivision (6) hereof are hereby made available for the payment to such Governments or their agencies for the services, supplies, and appliances so furnished at such rates and under such regulations as the Director of the Bureau of War Risk Insurance may prescribe.

"(10) That section 302 of the War Risk Insurance Act as amended shall be deemed to be in effect as of April 6, 1917: *Provided*, That any person who is now receiving a gratuity or pension under existing law shall not receive compensation under this Act unless he shall first surrender all claim to such gratuity or pension."

SEC. 12. That section 401 of the War Risk Insurance Act is hereby amended to read as follows:

"SEC. 401. That such insurance must be applied for within one hundred and twenty days after enlistment or after entrance into or employment in the active service and before discharge or resignation, except that those persons who are in the active war service at the time of the publication of the terms and conditions of such contract of insurance may apply at any time within one hundred and twenty days thereafter and while in such service: *Provided*, That any person in the active service on or after the 6th day of April, 1917, and before the 11th day of November, 1918, who while in such active service made application for insurance after the expiration of more than one hundred and twenty days after October 15, 1917, or more than one hundred and twenty days after entrance into or employment in the active service, and whose application was accepted and a policy issued thereon, and from whom premiums were collected, and who becomes or had become totally and permanently disabled, or dies or has died, shall be deemed to have made legal application for such insurance and the policy issued on such application shall be valid. Any person in the active service on or after the 6th day of April, 1917, and before the 11th day of November, 1918, who, while in such service, and before the expiration of one hundred and twenty

days after October 15, 1917, or one hundred and twenty days after entrance into or employment in the active service, becomes or has become totally and permanently disabled, or dies or has died, without having applied for insurance, shall be deemed to have applied for and to have been granted insurance, payable to such person during his life in monthly installments of \$25 each; and any person inducted into the service by a local draft board after the 6th day of April, 1917, and before the 11th day of November, 1918, who, while in such service, and before being accepted and enrolled for active military or naval service, becomes or has become totally and permanently disabled, or dies or has died, without having applied for insurance, shall be deemed to have applied for and to have been granted insurance, payable to such person during his life in monthly installments of \$25 each. If he shall die either before he shall have received any of such monthly installments or before he shall have received two hundred and forty of such monthly installments, then \$25 per month shall be paid to his widow from the time of his death and during her widowhood; or if there is no widow surviving him, then to his child or children; or if there is no child surviving him, then to his mother; or if there be no mother surviving him, then to his father, if and while they survive him: *Provided, however*, That no more than two hundred and forty of such monthly installments, including those received by such person during his total and permanent disability, shall be so paid. The amount of the monthly installments shall be apportioned between children as may be provided by regulations: *Provided further*, That each officer and enlisted man attached to the United States ship Cyclops on the 4th day of March, 1918, and every officer and enlisted man who on said date was a passenger on said vessel shall be deemed to have been granted insurance in the sum of \$5,000 permitted under the War Risk Insurance Act."

SEC. 13. That the permitted class of beneficiaries for insurance as specified in section 402 of the War Risk Insurance Act is hereby enlarged so as to include, in addition to the persons therein enumerated, uncles, aunts, nephews, nieces, brothers-in-law and sisters-in-law of the insured. This section shall be deemed to be in effect as of October 6, 1917: *Provided*, That nothing herein shall be construed to interfere with the payment of the monthly installments authorized to be made under the provisions of said War Risk Insurance Act, as originally enacted and subsequently amended, up to and including the second calendar month after the passage of this Act: *Provided further*, That all awards of insurance under the provisions of the said War Risk Insurance Act, as originally enacted and subsequently amended, shall be revised as of the first day of the third calendar month after the passage of this Act, in accordance with the provisions of the said War Risk Insurance Act as modified by this amendatory Act.

SEC. 14. That if no person within the permitted class of beneficiaries survive the insured, then there shall be paid to the estate of the insured the monthly installments payable and applicable under the provisions of Article IV of the War Risk Insurance Act.

SEC. 15. That if any person to whom such yearly renewable term insurance has been awarded dies, or his rights are otherwise terminated after the death of the insured, but before all of the two hundred

and forty monthly installments have been paid, then the monthly installments payable and applicable shall be payable to such person or persons within the permitted class of beneficiaries as would, under the laws of the State of residence of the insured, be entitled to his personal property in case of intestacy; and if the permitted class of beneficiaries be exhausted before all of the two hundred and forty monthly installments have been paid, then there shall be paid to the estate of the last surviving person within the permitted class the remaining unpaid monthly installments.

SEC. 16. That if no beneficiary within the permitted class be designated by the insured as beneficiary for converted insurance, granted under the provisions of Article IV of the War Risk Insurance Act, either in his lifetime or by his last will and testament, or if the designated beneficiary does not survive the insured, then there shall be paid to the estate of the insured the remaining unpaid monthly installments; or if the designated beneficiary survives the insured and dies before receiving all of the installments of converted insurance payable and applicable, then there shall be paid to the estate of such beneficiary the remaining unpaid monthly installments.

SEC. 17. That the Bureau of War Risk Insurance may make provision in the contract for converted insurance for optional settlements, to be selected by the insured, whereby such insurance may be made payable either in one sum or in installments for thirty-six months or more. The bureau may also include in said contract a provision authorizing the beneficiary to elect to receive payment of the insurance in installments for thirty-six months or more, but only if the insured has not exercised the right of election as hereinbefore provided; and even though the insured may have exercised his right of election, the said contract may authorize the beneficiary to elect to receive such insurance in installments spread over a greater period of time than that selected by the insured.

SEC. 18. That all premiums paid on account of insurance converted under the provisions of Article IV of the War Risk Insurance Act shall be deposited and covered into the Treasury to the credit of the United States Government life insurance fund and shall be available for the payment of losses, dividends, refunds, and other benefits provided for under such insurance. Payments from this fund shall be made upon and in accordance with awards by the director.

The Bureau of War Risk Insurance is hereby authorized to set aside out of the fund so collected such reserve funds as may be required, under accepted actuarial principles, to meet all liabilities under such insurance; and the Secretary of the Treasury is hereby authorized to invest and reinvest the said United States Government life insurance fund, or any part thereof, in interest-bearing obligations of the United States and to sell the obligations for the purposes of the said fund.

SEC. 19. That the amount of the monthly installments of allotment and family allowance, compensation, or yearly renewable term insurance which has become payable under the provisions of the War Risk Insurance Act but which has not been paid prior to the death of the person entitled to receive the same may be payable to the personal representatives of the deceased person.

Approved, December 24, 1919.

[1920. Department Circular No. 190. Bureau of War Risk Insurance.]

**REGULATIONS UNDER ACT APPROVED JANUARY 15, 1920, FOR
THE RETIREMENT OF PUBLIC SCHOOL TEACHERS IN THE DISTRICT
OF COLUMBIA.**

TREASURY DEPARTMENT,
OFFICE OF THE SECRETARY,
Washington, May 25, 1920.

To Treasury Officers, and All Others Concerned:

By virtue of the authority contained in an "Act for the Retirement of Public School Teachers in the District of Columbia," (Public—No. 111—66th Congress), approved January 15, 1920, I hereby designate the Director of the Bureau of War Risk Insurance (hereinafter called the Director) to administer, under the direction of the Secretary of the Treasury, the duties conferred upon the Secretary of the Treasury by said Act, except with respect to the investment of the fund created thereunder. The District of Columbia Teachers' Retirement Fund so created shall be invested in interest bearing obligations of the United States, which will be registered in the name of "The Secretary of the Treasury, for account of the District of Columbia Teachers' Retirement Fund, Act approved January 15, 1920," and I hereby designate the Commissioner of the Public Debt to administer, under the direction of the Secretary of the Treasury, the duties conferred upon the Secretary of the Treasury by said act with respect to the investment of the fund.

There shall be established in the Bureau of War Risk Insurance a Section to be known as the "District of Columbia School Teachers' Retirement Section," and the Director of the Bureau of War Risk Insurance is hereby authorized to make such use of the facilities of said Bureau as, in his judgment, may be necessary in the administration of the Act. The following procedure shall, accordingly, be carried out:

1. It is directed that, for all purposes of the administration of said Act and in pursuance of Section 1, Paragraph 2 of said Act, annuity tables derived from the following mortality tables with the assumption of interest at 4 per cent per annum shall be used:

Service Pensioners Mortality Table, New York City Teachers' Retirement Fund—Men.

Service Pensioners Mortality Table, New York City Teachers' Retirement Fund—Women.

2. The Director shall from time to time cause to be filed with the Board of Education of the District of Columbia certificates showing the amount of deduction to be made from the salary of each teacher during the year, as prescribed by Section 1, paragraph 3, of the Act.

3. The Director shall cause to be kept, in and by the District of Columbia School Teachers' Retirement Section of the Bureau of War Risk Insurance, records showing the individual accounts of the teachers of the District of Columbia, as provided by Section 2 of the Act.

4. The amount deducted and withheld from the salary of each teacher shall be deposited with the Treasurer of the United States, to be covered into the United States Treasury, to the credit of "Miscellaneous Receipts, Deductions from Teachers' Salaries, District of Columbia," and the amounts so covered shall be carried by appropriation warrant and credited on the books of the Treasury to the fund known as the "Teachers' Retirement Fund, District of Columbia, Act approved January 15, 1920." Amounts received as income from investments of the fund shall likewise be deposited with the Treasurer of the United States, to be covered into the Treasury to the credit of "Miscellaneous Receipts, Interest upon Investments for District of Columbia Teachers' Retirement Fund," and the amounts so covered shall be carried by appropriation warrant and credited on the books of the Treasury to the fund above described. Immediately following the deposit of the amounts withheld from teachers' salaries, and of the sums deposited to the credit of the fund, the Director shall furnish to the Secretary of the Treasury, through the Commissioner of the Public Debt, a certificate as to the amounts available for investment under the Act.

5. All disbursements under the Act shall be made by the Disbursing Officer of the Bureau of War Risk Insurance, subject to the restrictions imposed by the Act and the accounting procedure of the Treasury. Payments by said Disbursing Officer pursuant to Sections 5, 6, 7, 8, 9 and 10 of the Act shall be made only upon appropriate certificate of the Board of Education of the District of Columbia as to the facts.

6. All accounts pertaining to the administration of the Act by the Treasury Department shall be audited by the Auditor for the Treasury Department.

7. The Director shall cause to be made all actuarial calculations necessary for carrying out the provisions of the Act, and is authorized to make use of the services of consulting actuaries from time to time, as may be found necessary, within the limitations of Section 16 of the Act.

8. The Director shall prepare, for submission to Congress, estimates of the amounts required to be appropriated for payment, as current expenses of the District of Columbia, of the second part of the annuities and of any deficiency in the first part, as provided in Section 7 of the Act.

9. All rules and regulations necessary for the administration of said Act shall, before becoming effective, be approved by the Secretary of the Treasury.

10. The Director shall submit to the Secretary of the Treasury, for transmission to Congress, an annual report and such other reports as prescribed in Section 15 of the Act, and shall maintain the records required under said section.

This circular shall be effective from January 15, 1920, and unless and until modified or superseded by the Secretary of the Treasury.

D. F. HOUSTON,
Secretary of the Treasury.

EXHIBIT 87.

[1920. Department Circular No. 205. (Superseding Department Circular No. 190, of May 25, 1920.)
Bureau of War Risk Insurance.]

**REGULATIONS UNDER ACT APPROVED JANUARY 15, 1920, AS
AMENDED BY ACT APPROVED JUNE 5, 1920, FOR THE RETIRE-
MENT OF PUBLIC SCHOOL TEACHERS IN THE DISTRICT OF
COLUMBIA.**

TREASURY DEPARTMENT,
OFFICE OF THE SECRETARY,
Washington, July 6, 1920.

To Treasury Offices, and All Others Concerned:

1. Pursuant to an Act of Congress approved June 5, 1920, entitled "An Act making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1921, and for other purposes," which provides:

That all the authority, duties, and discretion now vested in the Secretary of the Treasury under the provisions of the Act of Congress approved January 15, 1920, entitled "An Act for the retirement of public-school teachers in the District of Columbia" shall on and after July 1, 1920, vest in the Commissioners of the District of Columbia, except that the fund created by said Act shall be paid to the Treasurer of the United States by the Commissioners of the District of Columbia and said funds shall be held and invested by him; and all records and other data in the custody of the Secretary of the Treasury relating to the retirement of teachers under said Act shall, on or before July 1, 1920, be transferred to the Commissioners of the District of Columbia—

the provisions of Department Circular No. 190, dated May 25, 1920, are hereby superseded, effective July 1, 1920.

2. On July 1, 1920, the Director of the Bureau of War Risk Insurance will cease to administer the duties conferred upon him under said Department Circular No. 190 pursuant to the Act of Congress approved January 15, 1920, entitled "An Act for the retirement of public-school teachers in the District of Columbia," and on such date shall transfer all data and records in his custody in connection therewith to the Commissioners of the District of Columbia, in whom such duties, on and after July 1, 1920, are vested pursuant to the Act approved June 5, 1920, above quoted; and on the same day the Commissioner of the Public Debt shall cease to administer the duties conferred upon the Secretary of the Treasury by said Act approved January 15, 1920, with respect to investment of accumulated funds, and on such date shall transfer all data and records in his custody in connection therewith to the Treasurer of the United States, in whom such duties, on and after July 1, 1920, are vested pursuant to the Act approved June 5, 1920, above quoted.

3. The amount deducted and withheld from the salary of each teacher pursuant to said Act of January 15, 1920, will be deposited with the Treasurer of the United States, to be covered into the United States Treasury, to the credit of "Miscellaneous Receipts, Deductions from Teachers' Salaries, District of Columbia," and the amounts so covered will be carried by appropriation warrant and credited on the books of the Treasury to the fund known as the "Teachers' Retirement Fund, District of Columbia." Amounts received as income from investments of the fund will likewise be deposited with the Treasurer of the United States, to be covered

into the Treasury to the credit of "Miscellaneous Receipts, Interest upon Investments for District of Columbia Teachers' Retirement Fund," and the amounts so covered will be carried by appropriation warrant and credited on the books of the Treasury to the fund above described. Immediately following the deposit of the amounts withheld from teachers' salaries, and of the sums deposited to the credit of the fund, the Treasurer may present requisitions on the Secretary of the Treasury for the amounts available for investment under the Act.

4. All disbursements under the said Act of January 15, 1920, on or after July 1, 1920, will be made by the Disbursing Officer for the District of Columbia, under the direction of the Commissioners of the District of Columbia, subject to the restrictions imposed by the Act and the accounting procedure of the Treasury, and all accounts pertaining to the administration of the Act will be audited as are other accounts of the District of Columbia.

D. F. HOUSTON,
Secretary of the Treasury.

EXHIBIT 88.

[1920. Department Circular No. 195. Accounts and deposits.]

**PUBLIC MONIES AND OFFICIAL CHECKS OF UNITED STATES
DISBURSING OFFICERS.**

TREASURY DEPARTMENT,
OFFICE OF THE SECRETARY,
Washington, June 18, 1920.

The following statutory provisions are published for the information and guidance of all concerned:

Revised Statutes, section 3620.—It shall be the duty of every disbursing officer having any public money intrusted to him for disbursement, to deposit the same with the Treasurer or some one of the Assistant Treasurers of the United States and to draw for the same only as it may be required for payments to be made by him in pursuance of law (and draw for the same only in favor of the persons to whom payment is made); and all transfers from the Treasurer of the United States to a disbursing officer shall be by draft or warrant on the Treasury or an Assistant Treasurer of the United States. In places, however, where there is no Treasurer or Assistant Treasurer, the Secretary of the Treasury may, when he deems it essential to the public interest, specially authorize in writing the deposit of such public money in any other public depository, or, in writing, authorize the same to be kept in any other manner, and under such rules and regulations as he may deem most safe and effectual to facilitate the payments to public creditors.

Criminal Code, par. 87.—Whoever, being a disbursing officer of the United States, or a person acting as such, shall in any manner convert to his own use, or loan with or without interest, or deposit in any place or in any manner, except as authorized by law, any public money intrusted to him; or shall, for any purpose not prescribed by law, withdraw from the Treasurer or any Assistant Treasurer, or any authorized depository, or transfer, or apply, any portion of the public money intrusted to him, shall be deemed guilty of an embezzlement of the money so converted, loaned, deposited, withdrawn, transferred, or applied, and shall be fined not more than the amount embezzled, or imprisoned not more than ten years, or both.

1. In accordance with the provisions of the above sections, all funds advanced to Government disbursing officers for disbursement will be placed to their credit, subject to their official check, with the Treasurer of the United States in Washington, except in cases where the Secretary of the Treasury by special authority permits disbursing officers to carry official disbursing accounts with depository banks located beyond the continental limits of the United States, and with the further exceptions that—

(a) Any disbursing officer granted special authority by the Secretary of the Treasury may keep a definite or specified amount of cash at his own risk, under the provisions of section 3620 of the Revised Statutes of the United States. Quarterly reports shall be made to the Secretary of the Treasury, Division of Public Monies, by any such disbursing officer, through the head of the department or establishment to which he is attached, showing the amounts of cash kept at his own risk pursuant to such special authority.

(b) Any disbursing officer of the War Department, specially authorized by the Secretary of War, who himself is stationed on the extreme frontier or at places far remote from depositories of public monies, or who has an agent officer, duly authorized pursuant to

statute, so stationed, may keep, at his own risk, such moneys as may be intrusted to him for disbursement. Quarterly reports shall be made by the Secretary of War to the Secretary of the Treasury, Division of Public Moneys, showing the names and stations of the disbursing officers so authorized to keep moneys at their own risk, the amounts which they are authorized to keep, and the amounts so kept.

(c) Any officer receiving money remitted to him upon specific estimates may disburse it accordingly, without waiting to place it in a depository, provided the payments are due and he prefers this method to that of drawing checks.

2. For every deposit made by a disbursing officer to his official credit, where the account is carried with the Treasurer of the United States, a receipt on Form 6599 shall be filled out in duplicate by the depositor, but must be dated and signed by the depository, which will list the original in its daily transcript—Form 17—and forward it therewith. Any check drawn by a disbursing officer upon moneys deposited to his official credit must be in favor of the party, by name, to whom the payment is to be made, and payable to "order," with the following exceptions:

(a) To make payments at a distance from the depository,

(b) To make payments of fixed salaries due at a certain date,

(c) To obtain funds necessary to make current cash payments authorized by law not included in (a) and (b);

in which cases any disbursing officer may draw his check in favor of himself or "order" for such amount as may be necessary for such payment. The checks drawn under (b) must not be cashed more than two days in advance of the date when such payments are due. The checks drawn under (c) must not be cashed more than three days in advance of the date when such payments are due, in cases where the disbursing officer is located convenient to banking facilities, and not more than seven days in advance of the date when payment is due when the disbursing officer is so located that it requires more than one-half day's time to reach available banking facilities and return to his station. Cash obtained in each of the above cases must not be in excess of the amount estimated to cover the payment specified.

3. Collectors of Customs are authorized to accept United States disbursing officers' checks in payment of customs duties levied upon the importation of public property purchased abroad.

4. Any disbursing officer or agent drawing checks against balances to his official credit must state on the face of each check the object or purpose to which the avails are to be applied, or must give the voucher number for which the check is issued in payment, except upon checks issued in payment of individual pensions, the special form of such checks indicating sufficiently the character of disbursement.

5. The absence of a statement of the object or purpose or the voucher number for which any check of a public disbursing officer is drawn will be sufficient reason for refusing payment thereon, or if any reason exists for suspecting fraud the drawee of such check will refuse payment thereon. Such statement may be made in brief form, but must clearly indicate the object of the expenditure, as, for instance, "pay," "pay roll," "payment of troops," adding the fort or station; "purchase of subsistence," or other supplies; "on account

of construction," mentioning the fortification or other public work for which the payment is made; or, as above stated, give the number of the voucher (in his disbursing account) for which the particular check was issued in payment. The object or purpose to which the avails are to be applied in case of any check drawn by a disbursing officer of the Army for the amount to be retained in his possession by authority of the Secretary of War, given under the provisions of this circular, or by any disbursing officer given such special authority by the Secretary of the Treasury, under the provisions of section 3620, Revised Statutes of the United States, must be clearly indicated by a statement on the check that it is to obtain cash to hold in his personal possession and the date of authority given so to hold funds.

6. Checks will not be returned to the drawer after their payment, but those paid by the Treasurer of the United States will be forwarded to the proper auditor, and those paid by depositary banks will be forwarded to the office of the Secretary of the Treasury, Division of Public Moneys. Checks drawn against deposits of court funds with depositary banks by United States courts and their officers, not including checks drawn on the Treasurer of the United States, will be retained by the depositary, subject, however, to withdrawal against proper receipts by official order of the Attorney General or upon order of court in due form.

7. The Treasurer of the United States, or the depositary, will furnish each disbursing officer with a detailed monthly statement of his account.

8. All disbursing clerks and agents of the executive departments, independent offices and commissions, and offices under any part of the executive departments located in the District of Columbia who obtain cash for the purpose of paying the proper persons or employees in cash to avoid carrying unnecessary balances of cash are directed to deposit not later than at the expiration of 30 days from and after the period during which the services were rendered, with the Treasurer of the United States, to their official credit subject to check, any and all balances of cash drawn to meet pay rolls and remaining in their hands, and thereafter to make payments appropriate to be made by check and not in cash.

9. To enable them to make payment of salaries in cash at times other than regular pay days, disbursing officers in the District of Columbia may, upon written application through the head of the department or establishment to which they are attached, obtain from the Secretary of the Treasury permission to keep in their possession and at their own risk additional moneys not to exceed specific amounts fixed by him.

10. The Auditors of the Treasury for the respective Departments shall, in the examination of the accounts of disbursing officers generally, report to the Secretary of the Treasury any excessive cash balances discovered.

11. Deposits to the credit of the Treasurer of the United States on account of repayment of disbursing officers' funds must be made in accordance with the provisions of Department Circular No. 176, dated December 31, 1919, and there should be specified on the face or back of the certificate of deposit the particular appropriation or appropriations which are to be credited and the amounts which are to be credited to each of the appropriations mentioned.

12. Disbursing officers are not authorized to transfer funds standing to their credit with one depository to their credit with another depository; such transfers will be made by the Secretary of the Treasury upon the request of the head of the department or establishment under which the particular officer is serving.

13. No allowance will be made to any disbursing officer for expenses charged for collecting money on checks.

14. Whenever any disbursing officer of the United States shall cease to act in that capacity he shall at once inform the Secretary of the Treasury whether he has any public funds to his credit, and if so, what checks, if any, he has drawn against the same which are still outstanding and unpaid. Until satisfactory information of this character shall have been furnished, the whole amount of such moneys will be held to meet the payment of his checks properly payable therefrom.

15. All disbursing officers will be supplied by the Treasury Department with blank checks bearing the proper symbol number. Any officer not receiving a supply of such checks may use the checks of another disbursing officer by canceling the symbol appearing thereon and inserting his own number unless the symbol number has been previously changed. The absence of a proper symbol number on a check in connection with the signature of a disbursing officer will be sufficient reason for refusing payment thereon.

16. Every disbursing officer when opening his first account, before issuing any checks, shall furnish the Treasurer of the United States with his official signature duly verified.

17. These regulations do not apply to postal funds (except Post Office Department warrants) nor to court funds deposited under the provisions of sections 995 and 996, Revised Statutes, except as otherwise herein specified.

18. This circular supersedes Treasury Department Circular No. 102, dated December 7, 1906, as amended by Treasury Department Circular No. 17, dated March 19, 1908; No. 7, dated February 7, 1910; No. 71, dated December 11, 1911; No. 5, dated April 6, 1916, and No. 175, dated December 31, 1919.

19. The Secretary of the Treasury may withdraw or amend at any time or from time to time any or all of the provisions of this circular.

D. F. HOUSTON,
Secretary of the Treasury.

EXHIBIT 89.

[1920. Department Circular No. 194. Accounts and Deposits.]

**PAYMENT OF GOVERNMENT CHECKS DRAWN BY UNITED STATES
DISBURSING OFFICERS LOCATED IN THE PHILIPPINE ISLANDS.**

TREASURY DEPARTMENT,
OFFICE OF THE SECRETARY,
Washington, June 18, 1920.

To the Treasurer of the United States, Treasury of the Philippine Islands, Disbursing Officers of the Army, Navy and other Departments, and others concerned.

Beginning October 1, 1920, United States disbursing officers stationed in the Philippine Islands who have heretofore drawn checks on the Treasury of the Philippine Islands will draw checks on the Treasurer of the United States, in accordance with the following regulations:

1. All balances standing on the books of the Treasury of the Philippine Islands at the close of business on September 30, 1920, to the credit of United States disbursing officers shall be transferred to the official credit of such disbursing officers with the Treasurer of the United States. The Treasury of the Philippine Islands will issue certificates of deposit, Form 6599, for each such balance and credit the item in the transcript of the Treasurer's account, dated September 30, 1920. No action by the disbursing officer will be necessary to effect this transfer.

2. All funds advanced to such disbursing officers, on and after October 1, 1920, by requisition or otherwise, will be placed to their official credit with the Treasurer of the United States, who will advise the Treasury of the Philippine Islands, by cable, of such credits, except that cable advice will not be given of deposits made through the Treasury of the Philippine Islands.

3. When such a disbursing officer has funds in his possession which he desires to deposit with the Treasurer of the United States subject to the official check of himself or another disbursing officer, he may make the deposit, accompanied by Form 6599, with the Treasury of the Philippine Islands, which shall receipt for such deposit in duplicate under the date the deposit is received, list the original in its daily transcript of account with the Treasurer of the United States, Form 17, and forward it therewith, and deliver to the disbursing officer whose account is to be credited the duplicate, which may be taken by such officer as advice of credit.

4. All checks of such disbursing officers will be drawn on the Treasurer of the United States and will bear on the face of the check the following restriction: "In current funds at par, but only at the Treasury of the Philippine Islands, Manila, P. I." The Treasury of the Philippine Islands will charge in its daily transcript of account with the Treasurer of the United States all checks drawn on the Treasurer of the United States which bear the above restriction on the same

terms and conditions as checks drawn on the Treasurer of the United States direct and will forward all such checks with the transcript to the Treasurer of the United States. Checks drawn on the Treasury of the Philippine Islands prior to October 1, 1920, and presented after the balances against which they were drawn have been transferred, as required by paragraph 1 hereof, will likewise be listed in the daily transcript of the Treasury of the Philippine Islands and forwarded therewith to the Treasurer of the United States for payment. The Treasury of the Philippine Islands will be expected to make preliminary examination, subject to payment by the Treasurer of the United States, as hereinafter provided in paragraph 9, of all such checks drawn on the Treasury of the Philippine Islands or on the Treasurer of the United States bearing the above restriction, before charging them in the account of the Treasurer of the United States, such examination to cover the question of the genuineness of the drawer's signature, the balance standing to his credit with the Treasurer of the United States (as shown by memorandum accounts to be maintained by the Treasury of the Philippine Islands), and any notices of stoppage of payment. Checks drawn on the Treasury of the Philippine Islands and checks drawn on the Treasurer of the United States bearing the above restriction should not be forwarded to the Treasurer of the United States by any depositary other than the Treasury of the Philippine Islands.

5. Blank checks bearing the restriction referred to in paragraph 4 hereof will be furnished by the Division of Printing and Stationery, Office of the Secretary of the Treasury, Washington, D. C., upon requisition of the disbursing officer, who should give his symbol number and state that the checks are to be cashed through the Treasury of the Philippine Islands. Upon request, the Treasurer of the United States will assign to each such disbursing officer a symbol number which must appear under his signature on each check issued against his account.

6. Disbursing officers shall furnish certified specimen signatures to both the Treasury of the Philippine Islands and the Treasurer of the United States, and shall advise both the Treasury of the Philippine Islands and the Treasurer of the United States when they desire to place stoppage of payment on any check which they have issued.

7. A monthly statement of each active account will be prepared by the Treasurer of the United States and forwarded to the disbursing officer, who should advise the Treasurer promptly of change of address.

8. Those disbursing officers now stationed in the Philippine Islands who maintain balances with the Treasurer of the United States for the purpose of making payments in the United States will continue to keep such accounts separate from the accounts mentioned above.

9. The Treasury of the Philippine Islands will cash Government warrants and checks drawn thereon prior to October 1, 1920, and not presented for payment prior to that date, and Government warrants and checks drawn on the Treasurer of the United States, including those bearing the restriction described in paragraph 4 hereof, when they are presented and properly indorsed by responsible holders who guarantee all prior indorsements thereon, including the indorsement of the drawer when the check is drawn in his favor. Warrants and checks so cashed shall be charged to the account of the Treasurer of the United States, subject to examination and payment thereof by

the Treasurer. The Treasurer of the United States reserves the usual right of the drawee to examine, when received, all Government warrants and checks cashed by the Treasury of the Philippine Islands and to refuse payment thereon. Three years after the close of the fiscal year (June 30) in which they are drawn, warrants and disbursing officers' checks are *not* payable by the Treasurer of the United States, but should be sent to the Secretary of the Treasury, Division of Public Moneys, for payment from the "Outstanding liabilities" appropriation.

10. All previous regulations and instructions inconsistent herewith are hereby superseded, including, so far as inconsistent herewith, the provisions of Treasury Department Circular No. 5, dated April 6, 1916.

D. F. HOUSTON,
Secretary of the Treasury.

[1920. Department Circular No. 197. Bookkeeping and Warrants.]

DEDUCTIONS FROM APPROPRIATIONS FOR SALARIES, PAY, OR COMPENSATION, FOR TRANSFER TO "THE CIVIL SERVICE RETIREMENT AND DISABILITY FUND."

TREASURY DEPARTMENT,
OFFICE OF THE SECRETARY,
Washington, June 25, 1920.

To All Whom it may Concern:

The act of May 22, 1920, Public No. 215 (41 Stat., 614), for the retirement of employees in the classified civil service of the United States, requires (sec. 8) the Secretary of the Treasury to cause deductions of $2\frac{1}{2}$ per cent of the basic salaries, pay, or compensation of employees to whom the act applies to be withheld from all specific appropriations for salaries or compensation, and from all allotments of lump-sum appropriations for payment of such salaries or compensation, to be spent from August 1, 1920, to June 30, 1921, and for each fiscal year thereafter, such sums to be transferred on the books of the Treasury Department to the credit of a special fund to be known as "The Civil Service Retirement and Disability Fund," and the said fund is appropriated for the payment of the annuities, refunds, and allowances provided in said act.

As pay rolls for salaries and compensation earned on and after August 1, 1920, will show only amounts actually paid to employees—that is, $97\frac{1}{2}$ per cent of the basic salaries, pay, or compensation of employees to whom the act applies—it is necessary, in order to comply with the requirements of the law, that each executive department, Government establishment, etc., report to the Secretary of the Treasury at once as to such appropriations available for the fiscal year 1921, and thereafter immediately following an appropriation being made by Congress, stating specifically the amount representing $2\frac{1}{2}$ per cent of the amounts for salaries, etc., of specific appropriations and under lump-sum appropriations the $2\frac{1}{2}$ per cent of the allotments for salaries, etc., to be transferred from each appropriation as deductions from the salaries or compensation of employees subject to the act. In making reports to the Treasury Department care should be taken to specify each title of appropriation and the amount thereof that is certified for transfer to the retirement fund. While no specific form of report is prescribed, a suggested outline therefor is appended. The information should be complete, and such as to leave no doubt of the intention of the executive department, Government establishment, etc., making the report that the specific sum or sums certified therein for transfer from each appropriation to the retirement fund shall be taken to represent $2\frac{1}{2}$ per cent of all the money to be spent from August 1, 1920, to June 30, 1921, for basic salaries, pay, or compensation of persons to whom the act of May 22, 1920, applies.

No refunds will be made from amounts transferred to the retirement fund pursuant to said act on account of reductions in allotments, lapsed salaries, etc. In case of any increase in an allotment immediate

report as above must be made of the amount of said increase to be transferred to the retirement fund under the said act.

Further information desired on the subject may be obtained upon application to the Division of Bookkeeping and Warrants, Treasury Department, where the reports should be sent.

A copy of the decision of the Comptroller of the Treasury of June 21, 1920, on the subject is appended for the information of all concerned.

D. F. HOUSTON,
Secretary of the Treasury.

SUGGESTED FORM OF REPORT.

----- DEPARTMENT,
July -----, 1920.

Statement of appropriations for salaries, pay, or compensation of employees, from which deductions are to be made for transfer to "The Civil Service retirement and disability fund."

APPROPRIATIONS.		
Salaries, Office of.....	\$	\$
(Follow with appropriations and deductions in order, as above.)		
Total appropriations.....		
Total deductions certified to be transferred..		

Secretary.

DECISION OF THE COMPTROLLER OF THE TREASURY RELATIVE TO DEDUCTIONS BY THE SECRETARY OF THE TREASURY FROM APPROPRIATIONS FOR BASIC SALARIES, PAY, OR COMPENSATION, FOR TRANSFER TO "THE CIVIL SERVICE RETIREMENT AND DISABILITY FUND."

TREASURY DEPARTMENT,
OFFICE OF COMPTROLLER OF THE TREASURY,
Washington, June 21, 1920.

The honorable the SECRETARY OF THE TREASURY.

SIR: Your letter of June 12, 1920, is understood as submitting the question whether under the provisions of the act of May 22, 1920 (41 Stat., 614), for retirement of employees in the classified civil service the 2½ per cent deductions from basic salary, pay, or compensation, are to be carried to the retirement fund through the medium of the pay rolls and deposits by the disbursing officers paying such rolls, or by direct transfers to the retirement fund from the appropriations under which pay rolls are paid.

The enactment contains two sections from the provisions of which may be determined the procedure that should be followed, to wit:

SEC. 8. That beginning on the first day of the third month next following the passage of this act and monthly thereafter there shall be deducted and withheld from the basic salary, pay, or compensation of each employee to whom this act applies a sum equal to 2½ per centum of such employee's basic salary, pay, or compensation. The Secretary of the Treasury shall cause the said deductions to be withheld from all specific appropriations for the particular salaries or compensation from which the deductions are made and from all allotments out of lump-sum appropriations for payments of such salaries or compensation for each fiscal year, and said sums shall be transferred on the books of the Treasury Department to the credit of a special fund to be known as "the civil-service retirement and disability fund," and said fund is hereby appropriated for the payment of annuities, refunds, and allowances as provided in this act.

The Secretary of the Treasury is hereby directed to invest from time to time, in interest-bearing securities of the United States, such portions of the "civil-service retirement and disability fund" hereby created as in his judgment may not be immediately required for the payment of annuities, refunds, and allowances as herein provided, and the income derived from such investments shall constitute a part of said fund for the purpose of paying annuities and of carrying out the provisions of section 11 of this act.

The Secretary of the Treasury is hereby authorized and empowered in carrying out the provisions of this act to supplement the individual contributions of employees with moneys received in the form of donations, gifts, legacies, bequests, or otherwise, and to receive, invest, and disburse for the purposes of this act all moneys which may be contributed by private individuals or corporations or organizations for the benefit of civil-service employees generally or any special class of employees.

SEC. 13. That it shall be the duty of the head of each executive department and the head of each independent establishment of the Government not within the jurisdiction of any executive department to report to the Civil Service Commission in such manner as said commission may prescribe, the name and grade of each employee to whom this act applies in or under said department or establishment who shall be at any time in a nonpay status, showing the dates such employee was in a nonpay status, and the amount of salary, pay, or compensation lost by the employee by reason of such absence. The Civil Service Commission shall keep a record of appointments, transfers, changes in grade, separations from the service, reinstatements, loss of pay, and such other information concerning individual service as may be deemed essential to a proper determination of rights under this act, and shall furnish the Commissioner of Pensions such reports therefrom as he shall from time to time request as necessary to the proper adjustment of any claim hereunder, and shall prepare and keep all needful tables and records required for carrying out the provisions of this act, including data showing the mortality experience of the employees in the service and the percentage of withdrawal from such service, and any other information that may serve as a guide for future valuations and adjustments of the plan for the retirement of employees under this act.

The Commissioner of Pensions shall make a detailed comparative report annually showing all receipts and disbursements on account of refunds, allowances, and annuities, together with the total number of persons receiving annuities and the amounts paid them.

The first requirement of section 8, to withhold monthly a sum equal to 2½ per cent of the basic salary, pay, or compensation of the employee, relates to the payment to be made to the employee. It can only be complied with by paying no more than 97½ per cent of the basic salary, pay, or compensation to the employee, whenever paid, the monthly requirement not being so mandatory as to require such action once a month only. The pay roll is concerned with the amount to be paid the employee and with nothing further.

The direction of the act that the Secretary of the Treasury shall cause said deductions to be withheld from specific appropriations and allotments out of lump-sum appropriations for payment of salary, etc., operates directly upon the appropriations referred to. This appears from the direction to transfer the sums on the books of the Treasury to the credit of the special fund created by the act—the retirement fund.

This is a matter which can readily be accomplished by having all the executive departments, Government establishments, etc., report to the Secretary of the Treasury at once, and thereafter immediately following an appropriation being made by Congress, of the amounts for salary, etc., of such appropriations, and under lump-sum appropriations the amount of the allotments for salary, etc., of those subject to the act. These reports, if approved by the Secretary of the Treasury, may be referred to the proper auditor for adjustment of the appropriations and the special fund, subject to the time when the appropriation becomes available. By having the adjustments made through auditor's settlements the books of the Treasury will show the amounts transferred to the special fund as expenditures under the respective appropriations as in other cases.

Although section 8 would seem to contemplate merely a transfer on the books of the Treasury Department—to be accomplished by a simple appropriation transfer warrant—yet I see no objection except delay and unnecessary work to the procedure of action by the auditors if you think that best suited to maintaining your record of receipts and expenditures, but I do not recommend it. At any rate it is clearly the duty of the Secretary of the Treasury to have placed to the credit of the retirement fund on or before August 1, 1920, substantially all the money that will represent $2\frac{1}{2}$ per cent of the money to be spent from August 1, 1920, to June 30, 1921, for basic salary, pay, or compensation of persons to whom the act applies.

It may become necessary under lump-sum appropriations, where those to whom the act applies are paid on an hourly or piecework basis and allotments are made from time to time and for a lesser period than the fiscal year, to have reports made accordingly, but as a general rule the reports should be once for the fiscal year, and no refunds be made from the special fund by reason of reduction in allotments, lapsed salaries, etc., subsequent increases in allotments to be reported for deductions accordingly. The requirement of monthly deductions relates to payments to the employees and not to the transfer of appropriations.

While under this retirement law the Secretary of the Treasury has the same duty as that assigned to all heads of executive departments, I do not understand that he has any additional duties or responsibilities excepting those stated in section 8.

There is no requirement in the act which makes it necessary to keep individual accounts with employees of the amount of deductions from their individual salaries, etc. The provisions of section 13 make the service record of the employee, as kept by the Civil Service Commission from reports of the Government services, the record upon which adjustment of any claim under the act is to be made by the Commissioner of Pensions. Such records are now usually kept by the respective Government services, showing the employee's rate of pay, etc., and may form the basis of such reports.

For the period of actual service shown by the service record, no more than $97\frac{1}{2}$ per cent of the basic salary, etc., could legally have been paid and it is to be taken as a fact that no more was paid. In the case of fixed salaries, etc., the amount of the deductions can readily be computed from this record when any matter affecting the individual employee arises; and so also in the case of salary, etc., not fixed, as per hour, piecework, etc. The administrative offices

now keep records of such varying earnings, and the requirements of section 13 are such that this will necessarily be furnished in the reports to the Civil Service Commission.

The transfers from appropriations to the retirement fund, as herein referred to, are matters of regulation to be prescribed by the Secretary of the Treasury. The service records are matters for the heads of the respective Government services, having regard to the reports prescribed by the Civil Service Commission, and the information deemed proper by this office as herein stated.

Respectfully,

W. W. WARWICK,
Comptroller.

EXHIBIT 92.

[1920. Department Circular No. 196.]

FORMS OF PAY ROLLS FOR RETIREMENT DEDUCTIONS.

TREASURY DEPARTMENT,
OFFICE OF COMPTROLLER OF THE TREASURY,
Washington, June 25, 1920.

To all Accounting, Disbursing, and Auditing Officers:

The act of May 22, 1920 (41 Stat., 614), for the retirement of employees in the classified civil service, directs the withholding from the basic salary, pay, or compensation of each employee to whom the act applies of a sum equal to $2\frac{1}{2}$ per centum of such employee's basic salary, pay, or compensation. This becomes effective on the 1st day of the third month next following the passage of the act.

It is accordingly directed that on all pay rolls and individual vouchers paying salary, pay, or compensation, earned after July 31, 1920, no more than $97\frac{1}{2}$ per centum of the basic salary, pay, or compensation be paid to the employees to whom the act applies, and for the purpose of showing such payment the heading of the pay roll column "amount paid" is hereby directed to be changed to "Amount paid less $2\frac{1}{2}$ per centum base pay retirement deduction."

This change of the pay roll is authorized to be made without submission of forms to this office for approval.

Special forms of pay rolls will be authorized by this office upon application if it be found they are needed in particular cases involving other than the usual methods of fixing wages or salaries.

Those employees not within the act of May 22, 1920, should be paid on old forms of pay rolls as heretofore, or if paid on a new form as herein authorized a notation should be made in the "Remarks" column of "not within act of May 22, 1920."

Individual pay vouchers should make the same showing as herein prescribed for pay rolls.

Absences without pay do not involve retirement deductions.

The enactment specifically imposes upon the Secretary of the Treasury the duty of transferring retirement deductions from appropriations to the civil-service retirement and disability fund, and no disbursing officer is authorized to withdraw such deductions from the appropriations.

The enactment specifically directs that the payment of all annuities, refunds, and allowances shall be made by the disbursing clerk for the payment of pensions, and no other disbursing officer is authorized to make such payments.

W. W. WARWICK,
Comptroller.

Approved:

R. C. LEFFINGWELL,
Acting Secretary of the Treasury.

ABSTRACTS OF REPORTS OF BUREAUS AND DIVISIONS.

ABSTRACTS OF REPORTS OF BUREAUS AND DIVISIONS.

The following is a summary of the reports of the various bureaus and divisions of the Treasury Department:

TREASURER OF THE UNITED STATES.

The ordinary receipts during the fiscal year 1920 were \$6,695,374,766.68, an increase of \$2,047,770,914.22, as compared with those of the fiscal year 1919. On the basis of warrants drawn by the Secretary, the ordinary disbursements (not cash expenditures) were \$5,687,489,392.02, a decrease of \$9,677,873,349.74 by like comparison. The net result for the year on ordinary account was an excess of receipts over warrants drawn in the amount of \$1,007,885,374.66.

The disbursements made on account of the Panama Canal during the fiscal year on the basis of warrants drawn (not cash expenditures) were \$6,031,463.72, while the receipts from tolls, etc., were \$9,039,670.95. The net excess of the receipts over warrants drawn was \$3,008,207.23.

Extraordinary expenditures of public moneys were made during the fiscal year 1920 under provisions of law as follows: Purchase of obligations of foreign Governments engaged in war with the enemies of the United States, \$421,337,028.09; and purchase of Federal farm loan bonds \$26,887,356.25, making a total of \$448,224,384.34.

The transactions affecting the principal of the public debt during the fiscal year 1920 are set forth in the statement following:

Receipts on account of—

Postal-savings bonds.....	\$189,400.00
National-bank notes.....	17,071,987.50
Certificates of indebtedness.....	14,728,725,968.53
First Liberty loan (counter entry).....	230.00
Second Liberty loan (counter entry).....	920.00
Third Liberty loan.....	498,492.50
Fourth Liberty loan.....	5,078,726.00
Victory Liberty loan.....	1,027,542,058.23
War savings and thrift stamps.....	73,240,467.03
Total.....	15,852,345,949.79

Disbursements on account of—

Certificates of indebtedness.....	\$15,588,704,458.53
War savings securities.....	199,818,880.44
Old debt items retired.....	442,417.78
First Liberty bonds.....	32,337,700.00
Second Liberty bonds.....	241,150,400.00
Third Liberty bonds.....	296,338,250.00
Fourth Liberty bonds.....	405,221,500.00
Victory notes.....	249,006,500.00
National bank notes and Federal Reserve bank notes retired.....	23,424,164.50

Total disbursements.....\$17,036,444,271.25

Net excess of disbursements.....1,184,098,321.46

The balance in the general fund on June 30, 1920 (on a cash receipt and cash payment basis), was \$359,947,020.33. The amount of pay warrants drawn during the fiscal year exceeded the receipts by \$621,429,123.91. The warrants outstanding at the close of the fiscal year on June 30, 1920, however, were \$9,556,884.62 in excess of those outstanding on June 30, 1919, leaving a net excess of warrant payments over receipts in the fiscal year 1920 of \$611,872,239.29. The book credits of disbursing officers and agencies with the Treasurer at the close of the fiscal year 1920 were \$254,345,675.64 less than at the close of the previous fiscal year. The net decrease in the general fund balance of \$1,226,164,935.26 at the close of the fiscal year 1919 was, therefore, \$866,217,914.93 (on a cash receipt and cash payment basis).

* At the beginning of the fiscal year 1920 the gold in the Treasury amounted to \$2,516,441,004.60. There was a noticeable monthly decrease until May 1, 1920, when the Treasury holding of the precious metal had been reduced to \$2,121,747,409.92. Thereafter the accumulation in the Treasury was gradual to the close of the fiscal year, when it amounted to \$2,171,959,922.86. Set apart for the respective uses, it was held on the following accounts: Reserve fund, \$152,979,025.63; trust funds (for redemption of gold certificates in actual circulation), \$584,723,645; gold settlement fund of Federal Reserve Board, \$1,184,275,551.87, and in general fund (belonging to the Treasury), \$249,981,700.36.

The imports of gold during the year were \$150,540,200, the exports \$466,592,606, and the net excess of exports \$316,052,406.

During the fiscal year 1920 the currency distributed from the Treasury in Washington to the subtreasuries, banks, and others amounted to \$428,485,015, a decrease of \$64,481,581, as compared with that of 12 months earlier.

The balance of public moneys on deposit in designated depositories at the close of the fiscal year 1920 was as follows:

	To credit of Treasurer of the United States.	To credit of other Govern- ment officers.	Total.
In Federal land banks.....	\$5,950,000.00	\$5,950,000.00
In Federal reserve banks.....	30,483,519.22	30,483,519.22
In special depositories.....	273,428,577.33	273,428,577.33
In national banks.....	11,863,207.11	\$15,138,161.88	27,001,368.99
In foreign depositories.....	8,301,507.40	8,301,507.40
In treasury of Philippine Islands.....	¹ 1,986,669.06	2,785,579.60	798,910.54
Total.....	328,040,142.00	17,923,741.48	345,963,883.48

¹ Credit balance.

The balance in national banks designated as depositories, to the credit of the Treasurer on June 30, 1919, was \$41,123,406.30, and like credit on June 30, 1920, was \$11,863,207.11, making a reduction in balances of \$29,260,199.19.

The general stock of money in the United States at the close of the fiscal year 1920 amounted to \$7,894,498,099, an increase of \$375,709,-099, as compared with that of 12 months earlier. The growth in subsidiary silver coin was \$15,984,801, in Federal reserve notes \$718,320,135, in Federal reserve bank notes \$13,558,820, while gold decreased \$332,627,390, standard silver dollars \$39,288,265, and national-bank notes \$239,002. The money in circulation increased in volume by \$321,525,114 and amounted to \$6,087,555,087 on June 30, 1920. The circulation per capita was \$58.30, and the share of gold to whole circulation 20.20 per cent. Money in circulation includes money in banks, but does not include money held at Federal reserve banks and in Treasury against outstanding issues of Federal reserve notes.

The notes and certificates of United States paper currency issued during the fiscal year numbered 284,853,221 pieces, of the total value of \$398,018,000. The redemptions were 319,844,159 pieces, of the total value of \$652,415,700. The pieces outstanding number 299,556,877, of the total value of \$1,849,239,985. The average cost of each piece of United States paper currency issued and redeemed is about 1.526 cents, and the annual cost of maintenance of the currency issued by the National Government averages slightly more than one-fifth of 1 per cent of the amount outstanding.

National-bank notes amounting to \$429,174,804.74 were presented for redemption during the fiscal year 1920. This sum was 59 per cent of the average circulation outstanding. Of the notes received at the Treasury, \$3,324,600 were fit for use and were returned to the banks of issue for further circulation.

Federal reserve notes amounting to \$268,031,428 were presented for redemption during the year, of which \$30,780,650 were fit for use and were returned to banks and agents for further circulation.

Federal reserve bank notes amounting to \$206,683,922 were presented for redemption, of which \$390,750 were fit for use and were returned to banks of issue for further circulation.

In addition to the currency actually redeemed and taken into the cash, the National Bank Redemption Agency received, counted, and delivered during the year \$1,722,882,472.50 in Federal reserve notes, canceled and uncanceled, which were sent in by Federal reserve banks and branches for credit of their respective Federal reserve agents.

The expenses of redemption, amounting to \$982,503.44, have been assessed upon the national and Federal reserve banks, as follows:

National bank notes:	Rate per
5 per cent fund—	\$1,000.
Fit for use.....	\$0. 64823
Unfit for use.....	. 94490
Retirement account.....	. 76864
Federal reserve notes:	
5 per cent fund—	
Fit for use.....	. 54137
Unfit for use.....	. 38637
Canceled and uncanceled.....	. 09437
Federal reserve bank notes:	
5 per cent fund—	
Fit for use.....	. 95741
Unfit for use.....	1. 15854
Retirement account.....	1. 15854

The United States bonds and certificates in the custody of the Treasurer pledged to secure bank circulation amounted to \$984,488,600, of which \$276,525,200 was on account of Federal reserve bank notes. United States bonds and other securities amounting to \$37,637,500 were held to secure public deposits in national banks. The securities held for the safe-keeping of deposits in postal-savings depositaries amounted to \$199,263,584.12.

The stock of standard silver dollars in the United States at the close of the fiscal year 1920 was \$268,857,494, of which \$134,007,710 were in circulation and \$134,849,784 were held in the Treasury, against which Treasury notes and silver certificates to the amount of \$119,914,110 were outstanding. The stock of subsidiary coin in the country is \$258,855,239, of which \$6,605,094 was held in the Treasury and the balance, \$252,250,145, was in circulation on June 30, 1920.

The minor coins are not included in the stated stock of money in the country though in circulation in every section of the several States. Such coins are shipped to depositors therefor at the expense of the consignee for transportation, and they are also paid over the counter at Treasury offices in exchange for other kinds of money.

At the close of the fiscal year 1920 the trust funds, gold and silver held to redeem notes and certificates in circulation amounted to \$704,637,755, a decrease of \$202,035,192, as compared with like holdings in 1919. The decrease in gold was \$151,055,846, and in silver \$50,979,346.

The balance in the gold settlement fund July 1, 1919, was \$1,416,086,099.10. The deposits therein during the fiscal year 1920 were \$1,455,066,707.52, while the withdrawals were \$1,686,877,254.75, leaving a balance in said fund of \$1,184,275,551.87 on June 30, 1920.

During the fiscal year 1920 special purchases of interest-bearing obligations of the United States for retirement were made out of repayments of principal by foreign Governments, as follows:

Title.	Principal.	Interest.	Total.
Third Liberty loan	\$70,154,950.00	\$837,780.76	\$70,992,730.76
Fourth Liberty loan	2,514,950.00	51,690.47	2,566,640.47
Total	72,669,900.00	889,471.23	73,559,371.23

The foregoing figures represent the par amounts of bonds purchased; and the purchase was made at the market rate at time of purchase. The interest payments made, in such cases, were charges against the general fund balance and not included as a part of the receipts so used for the purchase of the bonds.

The purchases were made under the provisions of section 3 of the act approved April 24, 1917, viz:

SEC. 3. That the Secretary of the Treasury, * * * under such terms and conditions as he may prescribe, is hereby authorized to receive on or before maturity payment for any obligations of such foreign Governments purchased on behalf of the United States, and to sell at not less than the purchase price any of such obligations and to apply the proceeds thereof, and any payments made by foreign Governments on account of their said obligations to the redemption or purchase at not more than par and accrued interest of any bonds of the United States issued under authority of this act; and if such bonds are not available for this purpose the Secretary of the Treasury shall redeem or purchase any other outstanding interest-bearing obligations of the United States which may at such time be subject to call or which may be purchased at not more than par and accrued interest.

The net earnings derived by the United States from Federal reserve banks as franchise tax during for the fiscal year 1920 amounted to \$2,703,850.74 and were applied by the Secretary of the Treasury to the purchase of \$2,922,450 of the second Liberty loan converted 4½ per cent bonds, under the provisions of section 7 of the Federal reserve act, viz:

* * * The net earnings derived by the United States from Federal reserve banks shall, in the discretion of the Secretary, be used to supplement the gold reserve held against outstanding United States notes, or shall be applied to the reduction of the outstanding bonded indebtedness of the United States under regulations to be prescribed by the Secretary of the Treasury. * * *

The foregoing figures represent the par amounts of bonds purchased. The purchases were made at the market rate at the time of purchase.

Liberty bonds and Victory notes were purchased and received in payment on other accounts as here stated:

Liberty bonds and Victory notes purchased for bond purchase fund, under act of Sept. 24, 1917, as amended by the act of Apr. 4, 1918..	\$1, 145, 259, 650
Liberty bonds and Victory notes accepted in payment of estate and inheritance taxes.....	3, 189, 400
Liberty bonds accepted as donations to the Government.....	12, 850
Liberty bonds forfeited to the United States on various accounts...	100
Total.....	1, 148, 462, 000

District of Columbia.

The transactions of the Treasurer of the United States, ex officio commissioner of the sinking fund of the District of Columbia, are set forth in a separate statement.

During the fiscal year 1920 the District of Columbia 3.65 per cent bonded debt retired amounted to \$96,250, thus reducing the bonded debt of the District of Columbia to \$5,481,450. A net purchase for the sinking fund of \$800,000 in United States bonds was made during the year, making a total of \$3,292,500 of such obligations held in trust as an offset against the outstanding debt of the District of Columbia.

The old securities of the District of Columbia held in the care and custody of the Treasurer are:

Chesapeake & Ohio Canal bonds.....	\$84, 285. 00
Board of audit certificates.....	20, 134. 72
Total.....	104, 419. 72
District of Columbia contractors' guarantee fund:	
Cash on hand.....	132. 51
Premiums account District of Columbia contract investments.....	386. 89
Total.....	519. 40

COMPTROLLER OF THE CURRENCY.

On June 30, 1920, there were in operation 8,030 national banks, as shown by the returns to the Comptroller of the Currency for that date. This was an increase of 245 over the number of reporting banks on the corresponding date in 1919. The volume of business of the banks, as represented by the aggregate assets, increased in the year \$1,397,187,000, rising to \$22,196,737,000 on June 30, 1920. Loans and discounts, exclusive of overdrafts, customers' liabilities on account of letters of credit, and acceptances and rediscounts, amounted to \$12,396,900,000, the greatest amount ever reached in the history of the system and an increase for the year of \$1,822,062,000.

While on May 12, 1919, the banks reached the maximum in their investments in United States securities—some \$4,028,000,000—there was a reduction by June 30 of that year to \$3,172,000,000, and by June 30, 1920, these investments had been further reduced to \$2,269,575,000. Included in this amount are bonds deposited to secure circulation, approximately \$700,000,000. Other bonds and securities, exclusive of \$65,287,000 of Federal reserve bank stock, represent an investment of \$1,851,603,000, approximately \$35,000,000 more than at the corresponding period in 1919.

The foregoing data indicate that 55.84 per cent of the banks' assets are invested in loans and discounts, and approximately 19 per cent in United States, railroad, municipal, and other bonds and securities. The banks' loans and discounts on June 30, 1920, were 72.26 per cent of the deposits, as compared with 66.40 per cent in June, 1919.

Their lawful reserve and items in process of collection with Federal reserve banks, together with \$450,351,000 cash on hand, amounted to \$2,177,693,000, an increase over the amount of the corresponding items on June 30, 1919, of \$256,854,000. The reserve held with Federal reserve banks on June 30, 1920, was \$1,247,096,000, or \$42,595,000 in excess of the amount required.

Including paid-in capital stock of \$1,224,166,000, the stockholders' share-interest, as measured by capital, surplus, and other undivided profits, is \$2,622,075,000, a net increase during the year of \$258,597,000.

During the last year the banks' outstanding circulating notes increased from \$677,162,000 to \$688,178,000. Under the law the banks are authorized to issue circulation to the extent of their paid-in capital stock upon deposit with the Treasurer of the United States of bonds eligible as security therefor. At this time the only bonds legally available for that purpose are the 4 per cents of 1925, consols of 1930, and 2 per cent Panama Canal bonds; these issues outstanding aggregate only \$793,115,530, and hence that amount measures the volume of national-bank circulation issuable.

The total deposits of national banks on June 30, 1920, were \$17,155,421,000, of which \$10,395,612,000, including United States deposits, were on demand, \$3,485,501,000 on time, and the remainder \$3,274,308,000 represented balances due to banks and bankers. On the date named deposits exceeded by \$1,230,556,000 the amount held on the corresponding date in 1919. Total deposits in the banks include \$175,788,000 of Government funds, which is a reduction of \$391,005,000 since June, 1919.

Of the liabilities of the national banks, their bills payable amounted to \$991,552,000, of which \$876,095,000 were with the Federal reserve banks. Their rediscounts aggregated \$1,214,516,000, of which the amount placed with the Federal reserve banks was \$1,033,239,000.

These figures indicate that 86.54 per cent of the banks' borrowings, including rediscounts, were with the Federal reserve banks. During the year the reduction of bills payable was \$57,849,000, but there was an increase in rediscounts of \$779,148,000.

The amount due to other banks and bankers was reported at \$3,274,308,000, while the amount due from other banks and bankers was \$3,121,201,000. The amount due to banks, etc., decreased during the year \$192,632,000, while the amount due from banks increased \$43,738,000 in the same period.

The paid-in capital, aggregate amount of assets, and the number of national banks in each State and geographical division, based upon reports of condition for June 30, 1920, are shown in the following table:

In his annual reports to Congress, in addition to general and statistical information relative to national banks and the national banking system, the Comptroller of the Currency is required by law to include data regarding State banking institutions. Through the courtesy and cooperation of the banking departments of the States, the comptroller is enabled to incorporate in his reports detailed statements regarding the volume of assets and liabilities of practically all banks and banking institutions operating under State charters. The last reports received by the comptroller were for the year ended June 30, 1920, and in the following statement is shown the amount of loans, cash in vault, deposits, and aggregate assets on June 30, 1920 and 1919, and corresponding items for the same dates for national banks and the totals for all banks. (As to the State institutions these figures are preliminary and subject to revision.)

Comparative statement of the number of banks reporting, loans, cash in vault, total deposits, and aggregate resources of all reporting banks of the United States, as shown by reports on dates nearest to June 30, for the years 1920 and 1919.

STATE, SAVINGS, AND PRIVATE BANKS, AND LOAN AND TRUST COMPANIES.

Increase (85.33 per cent).....	13,659,410

From 1863, the year the national-banking system was established, to June 30, 1920, there have been issued 11,774 national bank charters, and at the close of this period the number of banks in existence was at the highest point ever reached—8,093. This is a net increase of 269 over the number in existence on June 30, 1919. Of the total number of banks chartered since 1863, 3,681 have been closed, of which 3,088 went into voluntary liquidation, 38 were consolidated with other national banks under the provisions of the act of November 7, 1918, and 555 were placed in charge of receivers.

In the year ended June 30, 1919, there were two national-bank failures, the combined capital of which was \$225,000. One of these banks, however, paid depositors in full before the end of the year, leaving but one failure from which the creditors may suffer loss. In the year ended June 30, 1920, there were three small failures, the aggregate capital of the banks being \$130,000—one in Ohio, capital of \$50,000; one in California, capital of \$50,000; and one in Arkansas, capital of \$30,000. Before the end of the year the receiver of one of these banks had distributed dividends to the extent of 70 per cent on claims proved, and 20 per cent in dividends was distributed by the receiver

¹ Exclusive of rediscounts.

of one of the other banks. As the third failure did not occur until about the close of the fiscal year, no dividends had been paid up to that time.

During the year ended June 30, 1920, preliminary reports received by the comptroller's office showed the failures of 44 banks and trust companies under State supervision in 23 different States.

Since the passage of the Federal reserve act December 23, 1913, up to and including June 30, 1920, there have been chartered 1,305 national banks, with aggregate authorized capital of \$103,947,000, of which 804 were chartered with individual capital of less than \$50,000, the aggregate of the capital of banks in this class being \$21,012,000, and 501 were banks with individual capital of \$50,000 or more, their capital aggregating \$82,935,000.

In the last fiscal year 385 national banks were chartered, of which 90 were conversions of State banks, 22 were reorganizations of State and private banks, one a reorganization of a national bank, the charter of which expired by limitation, and 272 were banks of primary organization. The aggregate capital of the 385 banks was \$31,417,500. The number of banks chartered with capital less than \$50,000 was 203, the aggregate capital being \$5,327,500, making the average capital approximately \$26,250. There were 182 banks with individual capital of \$50,000 or more, the aggregate capital being \$26,090,000, and the average capital per bank \$143,350. Of the 385 banks chartered 103 have deposited bonds and become banks of issue.

To provide for their rapidly growing business 595 national banks during the fiscal year increased their capital to the extent of \$89,648,100. In the year 1919 increases were made by 224 banks, the increase being \$27,464,100. During the fiscal year ended June 30, 1920, there was a reduction of capital on the part of four banks in the aggregate sum of \$250,000. This compares with a reduction of \$210,000 capital by four national banks in the fiscal year ended June 30, 1919.

Including 3 banks, the corporate existence of which expired by limitation, 90 national banks went into voluntary liquidation during the year, of which 13, with an aggregate capital of \$2,275,000, were consolidated under section 5223, United States Revised Statutes, or their business acquired by other national banks, and 77, with aggregate capital of \$10,675,000, were absorbed by or reorganized as State banks.

In the following table are shown by States and geographical divisions the number of national banks organized, the number closed voluntarily and by reason of insolvency, together with the number in existence on June 30, 1920.

Number of national banks organized, insolvent, in voluntary liquidation, and in existence on June 30, 1920.

¹ Exclusive of 37 banks which were restored to solvency.

² Includes 38 banks consolidated with other national banks under act of Nov. 7, 1918.

³ Includes 63 banks chartered but not yet open for business.

Under the act of November 7, 1918, providing for the consolidation of national banking associations, 36 consolidations have been effected, involving 74 banks, with combined capital of \$58,735,000. The capital of these banks after consolidation was \$58,315,000, hence \$420,000 less than the combined capital of the banks prior to the consolidation. In the year ended June 30 there were 22 consolidations under this act in which 45 banks were interested, their aggregate capital being \$46,490,000. The combined capital of these banks after consolidation was \$48,240,000, an increase of \$1,750,000.

Banks under State supervision.

The compilation of the reports of all banks other than national in all of the 48 States of the Union and the island possessions and Alaska as of June 30, 1920, has not been finally completed, but the following preliminary figures are stated, subject to revision. These figures include the reports of the State banks and trust companies, savings banks, mutual and stock, and reporting private banks.

The total resources of all the banking institutions under State supervision, as reported June 30, 1920, amounted to \$29,667,855,000, an increase for the year of \$3,287,326,000.

The total deposits, other than bank deposits, were reported at \$23,694,372,000, an increase for the year of \$2,855,825,000. The amount due to banks and bankers was reported at \$864,282,000, a reduction for the year of \$41,217,000.

Loans and discounts and overdrafts, June 30, 1920, amounted to \$17,263,796,000, an increase for the year of \$3,202,098,000.

Investments were reported June 30, 1920, at \$7,201,060,000, an increase for the year of \$23,455,000.

The cash in vault reported by the State banks, savings banks, trust companies, and private banks June 30, 1920, was \$626,027,000, an increase during the year of \$53,129,000. The amount due from other banks June 30, 1920, was \$2,712,040,000, a reduction over June 30, 1919, of \$75,911,000.

The proportion of loans and discounts to total resources June 30, 1920, was 57.8 per cent and on June 30, 1919, was 53 per cent. The total of notes and bills rediscounted and bills payable June 30, 1920, was \$1,078,792,000, an increase during the year of \$263,070,000. Other liabilities June 30, 1920, were reported at \$698,501,000, a decrease since June 30, 1919, of \$150,058,000.

All banks in United States, national and other.

The total resources of all reporting banks of the United States June 30, 1920, national banks, State banks, savings banks, trust companies, and reporting private banks (including \$1,214,516,000 rediscounts of national banks) amount to \$53,079,108,000, not including Federal reserve banks.

The total loans and discounts, including overdrafts and rediscounts, of all banks (national and State, including savings banks and reporting private banks) were \$30,891,693,000, an increase over June 30, 1919, of \$5,805,736,000.

The total deposits, including bank deposits, were \$41,714,075,000, an increase of \$4,045,164,000 over June 30, 1919.

Capital, surplus, and profits of all banks were reported at \$5,953,-983,000, an increase since June 30, 1919, of \$618,303,000.

Cash in vaults June 30, 1920, amounted to \$1,076,378,000, of which \$450,351,000 was with the national banks and \$626,027,000 with State banks, savings banks, and private banks. The amount carried in Federal reserve banks June 30, 1920, to the credit of national banks was \$1,727,342,000. The balances in Federal reserve banks June 30, 1920, to the credit of State member banks and trust companies were \$726,422,000.

These figures are subject to slight changes on account of incomplete returns from certain States, but the variation from the figures here submitted will probably not be large.

MINT SERVICE.

Operations of the mints and assay offices.

The fiscal year ended June 30, 1920, was another record year for the Mint Service as regards the number of pieces of coin manufactured, the domestic coinage totaling 733,583,150 pieces, as compared with 434,028,458 in the prior year and 714,139,119 in the fiscal year 1917-18, the latter year having made the previous high record. As in other recent years the demand for 1-cent pieces was chiefly responsible for the large output, this year's total being 512,607,000 pieces (over 1,757 tons), compared with 343,070,300 and 445,628,201 pieces in 1919 and 1918, respectively. The coinage executed for foreign Governments totaled, in the fiscal year under review, 76,125,334 pieces, compared with 103,114,195 and 32,748,341 pieces in 1919 and 1918, respectively. For the first time since 1916 gold coins (other than memorial issues) were executed, the value of same being \$16,990,000.

In order to meet the enormous demand for coin made upon the Mint Service during recent years, which demand has not yet shown signs of diminishing, the director has given much time during the past fiscal year to personally devising and supervising the installation of improved methods and appliances for increasing the capacity of the coinage mints. These improvements include the use of large capacity electric melting furnaces in lieu of small gas and oil burning furnaces; mechanical conveyers in lieu of hand-propelled, heavily loaded trucks; rearrangement of floor space and of machinery so as to

facilitate and expedite operations; addition of new machinery, etc. Partial results of these improvements are evidenced by the materially increased output of the Philadelphia mint, where the coin manufactured exceeded the prior year's product by 46 per cent and exceeded the output of the year 1917-18 by over 16 per cent. As compared with the 1915 record, that for 1920 gives increase of coinage output, in number of pieces, as follows: Philadelphia mint, 468 per cent; San Francisco mint, 904 per cent; Denver mint, 179 per cent; combined, 446 per cent. At the Philadelphia mint alone the output during the fiscal year just closed, in number of pieces, exceeded three and eight-tenths times the combined output of all three coinage mints in the fiscal year 1915, the figures compared being 565,549,584 and 148,205,097 pieces, respectively. These increases were made with but 31 per cent increase in number of employees (536 on June 30, 1915, and 704 on June 30, 1920), and operating two shifts—some of the processes running 16 hours daily and others 24 hours—part of the time. At the San Francisco and Denver mints methods similar to those in use at the Philadelphia mint are being installed, and improvements are also being made at the New York assay office.

Subsidiary silver coin demands necessitated melting, under the terms of the Pittman Act of April 23, 1918, of an additional 10,000,000 silver dollars at the Philadelphia mint, which operation was begun December 5, 1919, and completed March 22, 1920. These dollars were allocated or sold to the Director of the Mint at face value; their manufacture into subsidiary silver coin will produce a profit of \$692,068.43. This operation gives a total of 270,121,554 dollars melted under this act.

The repurchase of silver under the terms of the Pittman Act, to replace the dollars melted, was begun in the latter part of May, 1920, when the market price of silver dropped below \$1 per fine ounce, the minimum price provided in that act for Government sales and the fixed price provided for Government purchases. By June 30, 4,087,080 ounces, fine, had been repurchased and stored under the terms of the act. The law provides for the repurchase of the same quantity as contained in the dollars melted, about 208,000,000 ounces, fine. While the Government will neither gain nor lose on the sale and repurchase of the silver taken as a whole, the producer of domestic silver gets the benefit of the fixed price of \$1 per fine ounce, when the market price goes below that point, thus tending to increase domestic production.

The price of silver rose with considerable regularity from the beginning of the fiscal year until a price surpassing all definitely known records was reached, in New York, on November 25, 1919, the rise being from \$1.08 to \$1.38½. The maximum price in London, 89½ pence, was reached February 11, 1920. The principal cause for the

rise appears to have been the demand in China. It is understood, however, that sales were made as high as \$1.42 per ounce in San Francisco. The lowest price of the fiscal year for other than product of the United States mines was reached, in New York, on June 16, 1920, 81½ cents; in London, on June 15, 1920, 44 pence. The coining value of silver, for United States dollars, is \$1.29+ per ounce; and for United States coins below the dollar, \$1.38+ per ounce; therefore the price of silver reached the point where our principal metallic circulating medium was menaced by the prospect of going to the melting pot for realization to the holder thereof of the profit incident to greater bullion value than face value. At this time, the Treasury, acting in cooperation with the Federal Reserve Board and the Federal reserve banks, arranged to release silver dollars to be employed in regulating our exchanges with countries having a silver monetary standard. A copy of the public statement announcing these arrangements, dated December 6, 1919, is as follows:

Announcement was made to-day that under arrangements made between the Treasury and the Federal Reserve Board, standard silver dollars that are free in the Treasury will until further notice be delivered against other forms of money to the Division of Foreign Exchange of the Federal Reserve Board, which will, through the Federal Reserve Bank of New York, cooperating with the branches of American banks in the Orient, employ such dollars in regulating our exchanges with silver standard countries.

This arrangement does not, of course, affect the redemption of outstanding silver certificates in standard silver dollars.

About 13,000,000 dollars of silver went to the Orient under these arrangements, while from November, 1919, to May, 1920, the silver dollars leaving the country totaled over 29,000,000. The silver coins of many European and other countries are understood to have practically disappeared from circulation during this period of high silver prices. The price of silver remained above the melting point, for dollars, until early in March, 1920, then gradually receded until, in May, it went below the price of \$1, fixed in the Pittman Act for the purchase of bullion to replace the dollars melted under the terms of that act. The price for other than domestic product remained below \$1 for the remainder of the fiscal year, the lowest point, 81½ cents, being reached June 16, 1920, as stated above.

The new assay office building at New York, begun last year after many years' delay, has been completed and at the time of writing this report is occupied, subject, however, to the making of the repairs necessitated by damage due to the explosion in Wall street on September 16, 1920. This building will very materially relieve the unsatisfactory conditions so long prevailing at the institution, as it permits moving the administrative, clerical, and assaying divisions from the factory building, first occupied in 1911, into quarters designed and suitably equipped for their use, while much-needed additional space for the melting and refining operations thereby becomes

available in the older building. The large and modern storage vault provides ample space and facility for safeguarding the large quantity of gold bullion, now exceeding a billion dollars in value, stored at this institution.

Many experienced and valued employees, particularly those with statutory compensation, have been lost to the Mint Service during the past year by reason of the inadequate compensation which it was possible to allow. Patriotism kept them during the war, but the increasing living costs, with but very inadequate increases of compensation, has finally driven them to seek and obtain larger income in private employ. It has been possible and necessary to make material increases in the pay of per diem employees, but the salaried employees, who were supervising and directing the work of those on a per diem basis, could not be increased beyond the small bonus of \$240 per annum also paid to per diem workers. This situation should be adequately remedied at the earliest practicable date to avoid further embarrassment to the service. On June 30, 1920, 117 fewer persons were employed in the mints and assay offices than on the corresponding date of the prior year; since the above date further material decreases in the number of employees have been made.

No change has been made for several years in the number of institutions operated—coinage mints at Philadelphia, San Francisco, and Denver; assay office at New York, which has had an unusually large trade in bars of fine gold; mints at New Orleans and Carson City, conducted as assay offices; and assay offices at Seattle, Boise, Helena, Salt Lake City, and Deadwood, these being bullion-purchasing agencies for the large institutions. Refineries were operated at the New York, San Francisco, and Denver institutions.

The value of the gold acquired by the Government at the mints and assay offices during the fiscal year 1920 was \$224,431,664.04. United States coin received for recoinage was of value \$5,079,372.59; transfers of gold between Mint Service offices totaled \$8,841,214.55, making an aggregate of gold handled by the Mint Service during the fiscal year 1920 of \$238,352,251.18.

Silver purchased during the fiscal year 1920 totaled 6,105,541.83 fine ounces, costing \$6,725,014.11, at an average price of \$1.10 + per fine ounce; the silver received for repayment to the depositors thereof in bars bearing the Government stamp totaled 5,654,110.33 fine ounces; the United States silver coin received for recoinage totaled 541,315.12 fine ounces, with recoinage value of \$748,318.81; silver deposited in trust by other governments totaled 1,469,813.52 fine ounces; the transfers of silver between Mint Service offices totaled 1,838,070.65 fine ounces, making an aggregate quantity of silver handled by the Mint Service during the fiscal year 1920 of

15,608,851.45 fine ounces. The above item of silver purchased includes 4,087,079.91 fine ounces purchased under the terms of the Pittman Act.

The domestic coinage of the fiscal year 1920 was of value \$46,-446,420, namely, \$16,990,000 in gold, \$19,763,600 subsidiary silver, \$4,566,750 nickel, and \$5,126,070 bronze coin. The coinage other than domestic included 325,000 gold libra blanks for Peru, 300,000 of which were made at the Denver Mint and 25,000 at the Philadelphia Mint; the Philadelphia Mint also manufactured 3,200,000 silver pieces for Venezuela, 6,135,000 silver pieces and 11,100,000 nickel pieces for Cuba, 6,492,000 nickel pieces for Salvador, 16,463,334 nickel blanks for Argentina, 150,000 nickel pieces and 700,000 bronze pieces for Nicaragua, and 6,825,000 bronze pieces for Siam, or a total of 51,090,334 foreign pieces made at the Philadelphia Mint. At the San Francisco Mint 14,000,000 silver pieces and 8,235,000 bronze pieces were made for Indo-China, and 2,500,000 bronze pieces for the Philippine Islands.

The seigniorage on United States coinage executed totaled \$12,-115,242.70, of which \$3,896,534.75 was on subsidiary silver coins and \$8,218,707.95 was on nickel and bronze coins. The seigniorage was about 45 per cent greater than that of the previous year, \$8,371,202.33.

Stock of coin and bullion in the United States.

On June 30, 1920, the estimated stock of domestic coin in the United States was \$1,425,767,521, of which \$898,054,788 was gold, \$268,857,494 was silver dollar coin, and \$258,855,239 was subsidiary silver coin.

The stock of gold bullion in the mints and assay offices on the same date was valued at \$1,794,311,486.20, a decrease over last year of \$8,539,487.52, and the stock of silver bullion was 19,663,305.93 fine ounces, an increase over last year of 2,176,926.23 fine ounces.

Production of gold and silver.

The production of gold and silver in the United States during the calendar year 1919 was as follows: Gold, \$60,333,400, a reduction from last year of over \$8,000,000; and silver, 56,682,445 fine ounces, a reduction from last year of over 11,000,000 fine ounces.

Industrial arts.

The amount of gold consumed in the industrial arts during the calendar year 1919 was \$75,490,349, of which \$56,135,951 was new material. Silver consumed amounted to 32,700,521 fine ounces, of which 26,237,519 fine ounces were new material.

Export of gold coin.

The net export of United States gold coin for the fiscal year ended June 30, 1920, was \$333,134,489.

Appropriations, expenses, and income.

The appropriated amounts available for Mint Service use during the fiscal year 1920 totaled \$2,022,433.04; reimbursements to appropriations for services rendered amounted to \$273,844.72; making an available total of \$2,296,277.76.

The expenses chargeable to appropriations were \$2,213,632.67; those chargeable to income, \$162,913.91; total, \$2,376,546.58.

The income realized by the Treasury from the Mint Service totaled \$12,900,604.24, of which \$12,115,242.70 was seigniorage.

Income and expenses are itemized as follows:

INCOME.	
Earnings:	
Credited to appropriations—	
Charges on foreign coinage executed.....	\$247, 841. 54
Charges for manufacture of special medals.....	17, 946. 77
Charges for work done for other institutions, etc.....	8, 052. 49
Total earnings credited to appropriations.....	\$273, 840. 80
Credited to revenues—	
Mint charges on bullion.....	383, 876. 25
Proceeds of medals and proof coins sold.....	6, 465. 33
Receipts from special assays of bullion and ores.....	3, 772. 00
Total earnings credited to revenues.....	394, 113. 58
Total earnings.....	\$667, 954. 38
Profits:	
Gain on bullion shipment to refineries.....	
Less contra losses.....	\$1, 874. 89
	698. 89
	1, 176. 00
Surplus bullion recovered.....	50, 786. 44
Proceeds of sale by-products (platinum, etc.).....	63, 968. 51
Proceeds of sale of old materials.....	1, 473. 78
Commission on telephone calls.....	2. 43
Total profits other than seigniorage.....	117, 407. 16
Seigniorage on subsidiary silver coinage.....	3, 896, 534. 75
Seigniorage on minor coinage—	
Nickel.....	4, 154, 069. 63
Bronze.....	4, 064, 638. 32
Total seigniorage.....	12, 115, 242. 70
Total profits.....	12, 232, 649. 86
Total income.....	12, 900, 604. 24

EXPENSES.

Chargeable to appropriations:

Compensation of employees—

Mint Bureau, salaries appropriation.....	\$23, 208. 37
Mint Bureau, increase compensation appropriation.....	2, 548. 66
Mints and assay offices, salaries, appropriations.....	237, 837. 57
Mints and assay offices, wages, appropriations ..	1, 130, 654. 99
Mints and assay offices, increase compensation appropriation.....	218, 450. 71
Total compensation of employees	\$1, 612, 700. 30

Equipment, stores, and other expenses—

Mint Bureau, contingent appropriation.....	5, 199. 27
Mints and assay offices, contingent and permanent appropriations (including \$14,164.99 wastage of gold and silver in operative departments, and \$5,711.27 loss on assay value of operative sweeps sold).....	585, 135. 49
Transportation of bullion and coin between mints and assay offices; freight appropriation ..	10, 597. 61

Total miscellaneous expenses chargeable to appropriations.....	600, 932. 37
--	--------------

Total expenses chargeable to appropriations.....	2, 213, 632. 67
--	-----------------

Chargeable to revenue:

Seigniorage on minor coinage—

Expenses of distributing minor coin to Treasury offices.....	158, 018. 57
Wastage of minor metals in operative departments.....	4, 895. 34

Total chargeable to revenue.....	162, 913. 91
----------------------------------	--------------

Total expenses.....	2, 376, 546. 58
---------------------	-----------------

Net income of the Government from the Mint Service.....	10, 524, 057. 66
---	------------------

Total.....	12, 900, 604. 24
------------	------------------

The number and value of deposits, the income (including seigniorage), the expenses of the fiscal year 1920, and the number of employees on June 30, 1920, at each institution follow:

BUREAU OF INTERNAL REVENUE.^a

The receipts from internal-revenue taxes for the fiscal year 1920 were as follows:

Income and profits tax.....	\$3,956,936,003.60	
Miscellaneous taxes.....	1,450,644,248.21	
		\$5,407,580,251.81
Fiscal year 1919:		
Income and profits tax.....	2,600,783,902.70	
Miscellaneous taxes.....	1,249,366,175.86	
		3,850,150,078.56
Net increase over 1919.....		1,557,430,173.25

The following comparative statement shows in greater detail the internal-revenue receipts for the fiscal years 1919 and 1920:

Sources.	1919	1920	Increase (+) or decrease (—).
Income and profits.....	\$2,600,783,902.70	\$3,956,936,003.60	+ \$1,356,152,100.90
Estates of decedents.....	82,029,983.13	103,635,563.24	+ 21,605,580.11
Distilled spirits and alcoholic beverages.....	483,050,854.47	139,871,149.80	— 343,179,704.67

Excise taxes (sales by consumers or dealers), including sculpture and paintings; carpets, picture frames, and wearing apparel; perfumes, cosmetics, and medicinal articles; soft drinks, ice cream, etc.....	6,147,269.45	109,199,188.42	+ 103,051,918.97
Corporations on capital stock.....	28,775,749.66	93,020,420.50	+ 64,244,670.84
Brokers, theaters, museums, bowling alleys, billiard and pool tables, shooting galleries, riding academies, passenger automobiles for hire, etc.....	4,721,298.16	9,913,280.85	+ 5,191,982.69
Admissions to places of amusement and entertainment, and club dues.....	54,992,157.01	81,918,556.74	+ 26,926,399.73
Narcotics: Importers, manufacturers, compounders, dealers, etc.....	693,686.30	1,513,919.50	+ 820,233.20
Sales of condemned Government property and other miscellaneous receipts.....	1,501,004.15	3,045,492.81	+ 1,544,488.66
Total miscellaneous taxes.....	1,249,366,175.86	1,450,644,248.21	+ 201,278,072.35
Total receipts from all sources.....	3,850,150,078.56	5,407,580,251.81	+ 1,557,430,173.25

¹ Includes \$24,437,893.75 from internal-revenue stamp sales by postmasters.

² Includes \$2,380.20 from child-labor tax.

Cost of administration.

The cost of administering the internal-revenue laws for the fiscal year 1920 aggregated \$29,647,439.71. This does not include \$184,803.55 returned to taxpayers on account of rejected offers in

^a The figures concerning internal-revenue receipts as given in this abstract differ from such figures carried in other Treasury statements showing the financial condition of the Government, because the former represent collections by internal-revenue officers throughout the country, including deposits by postmasters of amounts received from sale of internal-revenue documentary stamps, while the latter represent the deposits of these collections in the Treasury or depositories during the fiscal year concerned, the differences being due to the fact that some of the collections in the latter part of the fiscal year can not be deposited, or are not reported to the Treasury as deposited, until after June 30, thus carrying them into the following fiscal year as recorded in the statements showing the condition of the Treasury (Department Circular No. 176, par. 19).

compromise, as such refunds do not represent administrative expenses. The total expenditures incurred in operating the service were equivalent to 55 cents for each \$100 of collections. For the fiscal year 1919, the corresponding cost was 53.4 cents per \$100 collected.

Included in the expenditures for the fiscal year 1920 is the cost of enforcing the prohibition, narcotic, and child-labor tax laws. There was expended \$2,059,774.32 in administering the national prohibition act, \$460,827.24 for enforcing the narcotic law, and \$89,703.65 on account of the child-labor tax law, a total of \$2,610,305.21. Deducting this amount from the aggregate expenditure from all appropriations leaves \$27,037,134.50 as the cost of collecting internal-revenue taxes for the fiscal year 1920. This is equivalent to 50 cents for each \$100 collected.

Income and profits taxes.

Improvement in the administration of the income and profits tax laws has been accomplished in the several directions indicated in the last annual report. Reorganization of the collection force has given each State at least one independent district in charge of a collector of internal revenue. Well-equipped branch offices for the transaction of internal revenue business have been opened in important centers of population. Deputy collectors have been provided with correspondence study courses in the revenue laws, regulations, and procedure. Careful attention has been given to the qualifications of new appointees.

The increased efficiency of the officers who are called upon to advise taxpayers and the issuance of a printed service of information available to the public have reduced the number and seriousness of errors appearing in original returns and facilitated the subsequent review of tax liability by the bureau.

In expanding and developing a force adequate for the audit and verification of the vast number of income and profits returns the principle has been followed of segregating the entire subject matter as far as possible in one unit of the bureau. A high degree of specialization has been worked out in the Income Tax Unit so that the returns of each industry or business have been reviewed by a single group of auditors, and special technical problems arising in cases of various kinds have likewise received the attention of experts. The personnel of the Income Tax Unit has been increased during the year from 2,672 to 4,317. Assessments aggregating \$376,977,667.49 of additional taxes resulting from completed audits have been certified for collection. Satisfactory disposition is being made of the accumulation of returns for 1917 and prior years which were on hand at the beginning of the year and the 1918 audit is well in hand.

With the solution of the principal problems arising under the Revenue Act of 1918 the Advisory Tax Board created to assist the commissioner in these matters was discontinued. The incidental function of that board of hearing appeals addressed to the commissioner has been carried on satisfactorily by a special group of bureau officers organized as the committee on appeals and review.

Estate tax.

The estate tax provision of the Revenue Act of 1918 remained unchanged during the last fiscal year, but numerous changes in interpretations of the law necessitated the publication of comprehensive revised regulations. As a result taxpayers are filing more complete and accurate returns. A Charitable Bequest Section was established to pass on deductions claimed under this section of the law and to consider claims for exemption in the case of estates of persons who died in the military service or as the result of wounds or disease contracted in the service.

The total number of estate tax returns filed in 1920 was 10,171, showing aggregate tax liability of \$107,957,766.18. Collections from this source during the year amounted to \$103,635,563.24, an increase of \$21,605,580.11 over 1919. Additional tax liability amounting to \$13,926,206.73 was disclosed as a result of investigation and audit of returns in the field and in the office at Washington.

Capital stock tax.

The amount of capital stock tax collected during the fiscal year 1920 was \$93,020,420.50, compared with \$28,775,749.66 the year before. This large increase is due primarily to an increase in the rate of taxation from 50 cents to \$1 for each \$1,000 of the fair value of the capital stock and to the fact that the legal exemption was reduced from \$99,000 to \$5,000. The change in the amount of exemption increased the number of corporations subject to the tax from approximately 65,000 to over 325,000.

Child-labor tax law.

The child-labor tax law became effective April 25, 1919, but under its provisions no tax could be imposed until a taxpayer subject to tax had completed his fiscal year. During the past year Federal age certificates have been issued by child-labor tax inspectors in five States and in one State by school authorities. In 37 States employment certificates or similar documents attesting the age of a child are issued by State authorities and are accepted by the Bureau of Internal Revenue in lieu of Federal age certificates.

Information disclosing tax liability is obtained by bureau inspectors, deputy internal-revenue collectors, and through the cooperation of officers engaged in enforcing State child-labor laws. During the year liability to this tax has been established in 20 States and action has been initiated for its collection. As the law gives the taxpayer two months after the close of his business year in which to file return of the amount of tax due, and as a careful audit of all such returns is necessary, no assessment was possible until after March 1, 1920.

Taxes on sales, special and miscellaneous commodities, occupations, and admissions and dues.

In comparing collections of revenue from the several sources included under the general designation of sales taxes it should be borne in mind that under the Revenue Act of 1918 increased rates of taxation on many commodities and services became effective during the closing months of the fiscal year 1919. These higher rates were in effect throughout the entire fiscal year 1920 and account for the greater part of the large increases shown in collections over the corresponding collections for the preceding year.

A considerable portion of the increase, however, is directly traceable to a higher degree of specilization and efficiency in administration.

During the year, collections from the transportation tax aggregated \$289,348,087.35 compared with \$237,839,572.30 in the preceding year. The excise taxes on automobiles, automobile trucks, motor cycles, and automobile tires, parts, and accessories yielded \$143,922,792.01, compared with \$48,834,271.47 in 1919. The excise taxes on musical instruments, works of art, perfumes, cosmetics, medicinal articles, carpets and rugs, wearing apparel, and other miscellaneous commodities taxed under Title IX of the act amounted to \$123,959,810.24, compared with \$30,431,411.45 in 1919. The tax on admissions and dues yielded in 1920, \$81,918,556.74, and in 1919, \$54,992,157.01.

National prohibition.

The purpose stated in the last annual report of establishing a separate unit of the bureau for the administration of laws enacted pursuant to the eighteenth amendment has been carried out by the organization of the prohibition unit under the direction of a Prohibition Commissioner. One branch of this unit administers the regulatory and police provisions and another the permissive provisions of the law. A field organization has been created comprising a Federal prohibition director for each State and a supervising Federal prohibition agent in each of 12 territorial departments embracing the United States, Hawaii, Porto Rico, and Alaska. The

duties of the directors are to advise with State and local peace officers regarding measures for encouraging the observance of the law and for repressing violations and to issue permits for legitimate traffic in industrial alcohol and in intoxicating liquors for permissible purposes. The directors are assisted by a force of inspectors and may call, when necessary, upon the supervising agents for assistance in conducting investigations. The supervising agents enforce the regulatory and police provisions of the statute and conduct inquiries into the activities of persons suspected of offenses against the law.

The many technical problems arising under the law have necessitated considerable expansion of the facilities of the prohibition unit for making chemical analyses.

The activities of the prohibition unit can not be expected to suppress entirely the persistent attempts at various evasions of the law, but general observance of the law is increasing and may be taken as an indication that violations will be kept within narrow limits by the continued vigilance of this arm of the Federal Government in cooperation with local and State officials.

BUREAU OF WAR RISK INSURANCE.

The following is a summary of the report of the Director of the Bureau of War Risk Insurance covering the operations of the bureau for the fiscal year ended June 30, 1920:

Insurance Division.

During the year the work of the Insurance Division was performed on what might be termed a functional basis. For instance, the premium posting was done in one section, correspondence answered in another, reinstatement effected in a third, and applications filed in a fourth. A close study of this method showed that what was considered an excessive average time consumed in answering correspondence and in handling individual cases was largely due to the organization. There were too many opportunities for lost motion and multiplication of errors. It was soon recognized that the unit system—that is to say, the principle of localizing the entire routine required to handle a given case within a restricted area—should be put into effect. As a result, by the end of the fiscal year most of the work involved in each individual case, including the preparation and filing of correspondence, as well as necessary changes of record, was being accomplished with accuracy and dispatch within the unit.

At the beginning of the fiscal year the Insurance Division was housed in two separate buildings. On January 25, 1920, the entire Insurance Division had been installed in the Arlington Building. This was by no means an unimportant contribution toward the greatly increased efficiency manifested at the end of the fiscal period.

Term-insurance applications.

The total number of applications for term insurance received during the fiscal year was 93,877, amounting to \$623,245,000. The following table shows the number and amount of applications received each month during the year:

Number and amount of applications for term insurance received, by months, from July 1, 1919, to June 30, 1920, inclusive.

Date.	Applications received.	
	Number.	Amount.
1919.		
July.....	7,299	\$43,047,500
August.....	7,864	52,811,000
September.....	8,695	59,835,500
October.....	14,631	101,370,000
November.....	9,930	68,259,000
December.....	9,635	61,176,000
1920.		
January.....	7,689	50,231,500
February.....	6,529	42,805,500
March.....	6,210	41,302,000
April.....	6,216	43,078,500
May.....	4,433	28,725,000
June.....	4,746	30,553,500
Total for year.....	93,877	623,245,000
Grand total.....	4,631,993	40,284,892,500

The total number of term-insurance applications received from the enactment of the war-risk insurance act, October 6, 1917, to June 30, 1920, was 4,631,993, representing \$40,284,892,500, the amount of insurance requested. These figures do not represent the exact number of certificates and amount of insurance actually issued, due to duplicate and voided applications withdrawn. A fair estimate of the average amount of insurance applied for was \$8,697.

The bureau has issued approximately 4,610,185 term-insurance certificates. In some instances two or more certificates were issued due to duplicate applications, so that this figure must be taken as an estimate.

Reinstatements.

The gross number of reinstatements of term insurance received by the Bureau of War Risk Insurance during the year was 90,026. The amount reinstated was \$641,213,000.

The following table shows the number and amount of reinstatements received each month, during the fiscal year ended June 30, 1920, and the total received to that date:

Number and amount of term-insurance reinstatements effected each month, and cumulated monthly from July, 1919, to June 30, 1920.

Date.	Reinstatements effected.			
	During month.		Total to end of month.	
	Number.	Amount.	Number.	Amount.
Total to July 1, 1919.....			2,205	\$17,458,000
1919.				
July.....	1,543	\$12,950,000	3,748	30,408,000
August.....	883	6,742,000	4,631	37,150,000
September.....	590	5,067,500	5,221	42,217,500
October.....	3,997	30,898,000	9,218	73,115,500
November.....	7,774	58,410,000	16,992	131,525,500
December.....	8,976	67,688,500	25,968	199,214,000
1920.				
January.....	5,221	38,767,500	31,189	237,981,500
February.....	2,642	19,940,500	33,831	257,922,000
March.....	7,281	53,874,500	41,112	311,796,500

May.....	14,316	91,329,000	72,124	519,477,500
June.....	20,107	139,193,500	92,231	658,671,000
Total for fiscal year.....	90,026	641,213,000		

Premium remittances.

In the year ended June 30, 1920, 3,849,658 premium remittances, amounting to \$28,125,475.55 were paid direct to the bureau. This amount includes money which had not been credited to the military and naval insurance appropriation, as well as that credited. With few exceptions, these were paid by ex-service men.

The following table shows the number and amount of term-insurance premium remittances paid direct to the bureau each month during the year and the total number and amount received from the beginning of the bureau to that date. The amount is a gross figure, including funds turned over to the Treasury, received and held for recording and checking against accounts, as well as refunds:

Number and amount of term-insurance premium remittances paid direct each month from July, 1919, to June 30, 1920, and the total to June 30, 1920.

Date.	Premium remittances received.	
	Number.	Amount.
1919.		
July.....	390,622	\$3,209,202.20
August.....	338,981	2,730,169.78
September.....	374,199	2,820,450.22
October.....	404,015	3,072,411.30
November.....	282,572	2,122,187.00
December.....	178,344	1,280,092.75
1920.		
January.....	395,734	2,930,606.72
February.....	348,330	2,469,752.30
March.....	314,560	1,957,154.86
April.....	291,837	1,951,860.81
May.....	277,901	1,896,990.72
June.....	252,563	1,684,596.89
Total for year.....	3,849,658	28,125,475.55
Grand total.....	5,466,350	41,140,979.75

Net term-insurance premiums paid direct and credited to the military and naval insurance appropriation totaled \$39,829,642.40 on June 30, 1920. Of this amount \$28,778,036.32 was credited during the fiscal year 1920. This includes money received prior to June 30, 1919, but credited during the year 1920.

Premium notices are monthly notices or bills which the bureau plans to send to all insurance certificate holders paying currently and whose insurance has not lapsed more than three months. Five million four hundred forty-eight thousand three hundred and sixteen of these notices were mailed in the fiscal year, making a total of 11,446,086 to June 30, 1920.

Premiums received from all sources and credited to the military and naval insurance appropriation by the Treasury Department to June 30, 1920, totaled \$298,864,307.07 and the amount of premiums refunded was \$108,299.41. The premiums received by sources to June 30, 1919, and to June 30, 1920, are shown in the following table:

Analysis of premiums received and credited to military and naval insurance appropriation to June 30, 1919, and to June 30, 1920.

United States Government life insurance.

A section of the Insurance Division was organized on May 8, 1919, to execute the conversions of term insurance to such forms of permanent or United States Government life insurance as the insured request. As the work of this section prior to July 1, 1919, was largely preliminary, the data here given accordingly covers the whole period from May 8, 1919, to June 30, 1920. One hundred and sixty-three thousand two hundred and ten applications, amounting to \$538,578,000, were received and registered, and the average amount applied for was \$3,299.90 per policy. There were also 4,413 applications received but not registered.

Permanent insurance policies numbering 152,979 and amounting to \$511,821,500 were approved to June 30, 1920. The average face value per policy was \$3,345.70.

The amount of term insurance originally carried by applicants whose applications for United States Government life insurance were approved to June 30, 1920, was \$1,011,461,000.

Fourteen thousand one hundred and ninety-two pending applications for conversion had not been approved to June 30, 1920. These applications were awaiting complete information or sufficient premium payments to effect conversion.

The following table affords a comparison of the number of applications received and registered and the number approved from July, 1919, to June 30, 1920.

Number and amount of applications for permanent insurance registered, approved, disapproved, and pending, by months, from July, 1919, to June 30, 1920.

On December 24, 1919, Congress authorized the Bureau of War Risk Insurance to create a fund to be known as the United States Government life insurance fund, to which all converted insurance premiums are credited. This fund amounted to \$10,294,330.07 on June 30, 1920. It is available for the purpose of investment and the payment of converted insurance claims.

The following table shows the condition of this fund monthly from January, 1920, to June, 1920, inclusive. Deposits shown for January include all premiums accumulated prior to December 24, 1919, when the investment of funds was authorized by act of Congress, and from that date to the end of January.

Options for payment of insurance.

The following table shows the number of each option requested in the original applications for converted insurance as far as the tabulation is completed. This covers approximately 30 per cent of the applications approved to date. Forty-four thousand nine hundred and seventy-five, or 95 per cent of the total number, specify the lump-sum payment:

Number of requests for each of the optional payments of insurance received and tabulated to June 30, 1920.

Option.	Number of requests.
Option 1 (lump sum)	44,975
Option 2 (limited installments)	2,190
Option 3 (continuous installments).....	202
Total	47,367

At the close of business June 30, 1920, there were 10,846 unanswered letters in the Insurance Division, compared with over 120,000 in October, 1919, the peak for the fiscal year.

Compensation and Insurance Claims Division.

During the fiscal year the work of the Compensation and Insurance Claims Division related principally to disability claims for military and naval compensation as distinguished from claims on account of death. The amendatory act approved December 24, 1919, also necessitated the readjustment of all claims for compensation on account of disability, since the basis upon which awards had been made was changed from \$30 to \$80 in the case of temporary total disability and \$100 in the case of total permanent disability. Claims numbering 127,000 were reviewed, and retroactive payments were dispatched within 30 days after the passage of the amendment.

Official or informal advice received by the bureau giving notice of the death or disability of an ex-service man is regarded as a potential claim. It therefore develops that sometimes where there is a formal

disallowance of a compensation claim there never in fact was a valid claim. This will explain the fact that up to date there have been 123,109 compensation death and disability claims disallowed, including 53,047 during the fiscal year. It should be understood, however, that no disallowance operates as a final bar to the allowance of a claim. It is possible for all disallowed claims to be reopened, additional evidence submitted, the disallowance removed, and an award made on the claim if the additional evidence submitted justifies such action.

Compensation death claims are disallowed where a soldier dies and is survived by no persons entitled to compensation, where death was not in line of duty and due to the soldier's own willful misconduct, or where claimant fails to submit proof in support of his claim. During the period ending June 30, 1920, there were 80,480 compensation death claims disallowed, including 18,581 during the fiscal year 1920.

Compensation disability claims are disallowed where the injury or disease is not of a compensable degree—that is, 10 per cent of total disability, where the injury or disease was not contracted in line of duty and due to soldier's own misconduct—where it is impossible to communicate with claimant, or when communications remain unanswered by the claimant. During the period ended June 30, 1920, 42,629 compensation disability claims were disallowed, including 34,466 during the fiscal year 1920.

One hundred and thirty-one thousand four hundred and fifty-two term insurance claims have been awarded to June 30, 1920. Their commuted value is \$1,169,976,673.48. The beneficiaries will receive this insurance in monthly payments over a period of years. One hundred and five awards were made to the beneficiaries of persons who had converted their term insurance to United States Government life insurance.

During the fiscal year the Compensation and Insurance Claims Division received 3,098,117 and dispatched 3,067,484 pieces of mail. On June 30, 1920, 25,716 pieces of unanswered mail, or about two days' receipts, were on hand.

Insurance claims and their settlement.

During the year 20,522 claims for both term and permanent insurance were received. Twenty-six thousand nine hundred and fourteen claims were allowed and 1,115 disallowed during the year. The following table shows the comparison of the disposition of all insurance claims received as of June 30, 1919, and as of June 30, 1920:

Disposition of term and United States Government life insurance claims received from Oct. 6, 1917, to June 30, 1919, and to June 30, 1920.

Action taken.	Number.		Commuted value.	
	To June 30, 1919.	To June 30, 1920.	To June 30, 1919.	To June 30, 1920.
Term insurance:

Claims disallowed.....	1,818	2,917		
Claims pending.....	12,239	4,633		
United States Government life insurance:				
Claims allowed.....		105		378,000.00
Claims disallowed.....		16		
Claims pending.....		99		
Total.....	118,700	139,222	941,314,211.00	1,170,354,673.48

It will be noted that there were 4,633 war-risk insurance claims and 99 United States Government life insurance claims pending on June 30, 1920. Delays in settlement were due to the following reasons: (1) Beneficiaries live in foreign countries; (2) beneficiaries fail to submit required proof; (3) address of beneficiary unknown; (4) communications unanswered by claimant; (5) legal decision as to rights of contending beneficiaries.

The total number of insurance claims received from the beginning of the bureau to June 30, 1920, was 139,222. Of this number, 139,002 are war-risk term insurance and 220 are United States Government life insurance claims.

The total number of insurance claims on which current monthly payments were being made on June 30, 1920, was 129,238 with a commuted value* of \$1,150,512,087.48. Of this number, 105 are claims for United States Government life insurance with a commuted value of \$378,000. Payments have been discontinued on 2,319 term insurance claims.

The following table shows whether or not payments were being made on both death and disability insurance claims allowed to June 30, 1919, and to June 30, 1920:

Analysis of insurance claims allowed to June 30, 1919, and to June 30, 1920.

Nature of claims.	Number.		Commuted value.	
	To June 30, 1919.	To June 30, 1920.	Total to June 30, 1919.	Total to June 30, 1920.

¹ Adjusted.

The following table gives the gross terminated payments from January 1, 1920, to June 30, 1920, analyzed as to reasons for termination. While no analysis was kept prior to January 1, 1920, it is believed that this table is sufficient to show why awards were terminated. It should be kept in mind that cases are all subject to reaward. The total analyzed is a gross figure, including all cases that have been closed in this period.

Gross number of insurance claims on which payments have been terminated, for the period from Jan. 1, 1920, to June 30, 1920, analyzed as to reasons for termination.

Reasons.	Number.	Reasons.	Number.
Erroneous award.....	43	Insurance lapsed.....	2

Pending adjustment.....	35	Total from Jan. 1 to June 30, 1920..	1,346
Misconduct of payee.....	10	Grand total.....	2,319

Analysis of disallowed insurance claims.

To June 30, 1920, 2,933 insurance claims had been disallowed. The gross claims disallowed from January 1, 1920, to July 1, 1920, have been analyzed as to reasons for disallowance and are given in the table below. As stated in the analysis of terminated payments above, it is believed that the data here given is sufficient to show why claims were disallowed.

Gross number of disallowed insurance claims, for the period from Jan. 1, 1920, to June 30, 1920, analyzed as to reasons for termination.

Reasons.	Number.	Reasons.	Number.
Insurance lapsed.....	834	No claim made.....	12

Disability not permanent and total.....	11	Grand total.....	2,933

Returned insurance award checks.

The number of insurance award checks returned to June 30, 1920, was 16,938, amounting to \$1,659,844.47.

The principal reasons why checks have been returned are given in the following table:

Analysis of reasons for returning insurance award checks as of June 30, 1920.

Reasons.	Number returned to June 30, 1920.	Reasons.	Number returned to June 30, 1920.
Incorrect address.....	11,476	Wrongly reported dead.....	43
Payee deceased.....	3,528	Change of guardian.....	107
Clerical errors.....	571	Amounts or title questioned.....	137
Overpayment.....	291	Miscellaneous.....	504
Payee remarried.....	200		
Duplicate awards.....	81	Total.....	16,938

Analysis showing disposition of insurance award checks returned to June 30, 1920.

Disposition.	Total to June 30, 1920.	
	Number.	Amount.
Canceled.....	5,541	\$493,764.70
Remailed.....	10,928	1,079,011.03
Filed.....	469	87,068.74
Total returned.....	16,938	1,659,844.47

The amount of cash refunded because of overpayments of insurance awards was \$71,802.16 to June 30, 1920. This is in addition to the checks returned. Fifty-one thousand one hundred and fifty-nine dollars and ninety-three cents was refunded during the year ending June 30, 1920, because of overpayments of insurance awards.

Term insurance premiums compared with awards.

The total amount received in term insurance premiums as of June 30, 1920, was \$298,756,007.66 (subtracting refunds), and payments of term insurance awards amounted to \$130,564,846.80, leaving a balance of \$168,191,160.86. While this is interesting in relation to the status of the military and naval insurance appropriation and the

bureau's insurance operations as of June 30, 1920, it should not be considered apart from the fact that the commuted value or latent liability of all term insurance claims active as of that date was \$1,150,512,087.48.

United States Government life insurance premiums compared with awards.

Premiums paid on United States Government life insurance policies amounted to \$10,292,842.50 (subtracting refunds) on June 30, 1920, and the amount paid out in awards was \$47,868.32, leaving \$10,244,974.18 available for investment and the payment of claims. The total amount of insurance involved in the claims for United States Government life insurance allowed and active on June 30, 1920, was \$378,000.

Compensation claims and their settlement.

During the year ended June 30, 1920, 198,485 compensation claims (including reassigned claims) were received, including 15,534 death and 182,951 disability claims. The net total number filed from the beginning of the bureau to June 30, 1920, was 435,448. Previous to July 1, 1919, no separate records of death and disability claims received were kept.

The following table shows the number of claims filed monthly during the year and the total number filed to June 30, 1920:

Number of compensation, death, and disability claims filed monthly from July, 1919, to June, 1920, and the total number filed to date.

Date.	Number of claims filed.		
	Death.	Disability.	Total.
1919.

¹ Includes reassigned claim numbers.

Compensation claims acted upon.

Approximately 228,825 claims for compensation were acted upon during the fiscal year. This figure is a close estimate inasmuch as the same case may be recorded in both the allowed and the dis-

allowed column. This happens when further investigation or developments make a rerating necessary.

The following table shows the claims allowed and disallowed monthly during the fiscal year ended June 30, 1920, and also the total number acted upon to that date:

Comparison of the number of claims allowed and disallowed, monthly, from July, 1919, to June, 1920, and the total number acted upon to date.

¹ Adjusted.

The disposition of all compensation claims received to June 30, 1920, and the amount of monthly payments as originally awarded are shown in the following table:

Disposition of compensation claims (except burial claims) filed from Oct. 6, 1917, to June 30, 1919, and to June 30, 1920.

Action taken.	To June 30, 1919.	To June 30, 1920.	Amount of monthly payments awarded.	
			To June 30, 1919.	To June 30, 1920.
Claims allowed.....	53,173	228,951	\$1,554,784.75	\$9,011,946.26
Claims disallowed.....	70,062	123,109		
Claims pending.....	120,425	83,388		
Total.....	243,660	435,448		

Pending compensation claims.

Out of the 435,448 compensation claims received to June 30, 1920, there were 83,388 pending. The following are the reasons why the awards had not been made: (1) Awaiting official information as to line of duty and misconduct status; (2) claimant's failure to present required proof; (3) awaiting appointment of guardian; (4) delay in reporting for physical examination on the part of claimant or in receiving the report of physical examination; (5) address of claimant

unknown; (6) communications unanswered by claimant; (7) death claims delayed because awaiting official notice of date and cause of death.

Death and disability claims.

Of the 228,951 compensation claims allowed to June 30, 1920, 45,267 were death and 183,684 disability claims. The following table shows the number of disability and death claims granted monthly during the fiscal year and the total number granted to June 30, 1920:

Number of death and disability claims allowed, monthly, during fiscal year ended June 30, 1920, and the total to June 30, 1920.

Date.	Claims allowed.

Grand total.....	45,267	183,684	228,951

Active and closed claims.

Of the 228,951 claims allowed to June 30, 1920, 2,322 death claims and 49,276 disability claims have been closed. The number of active death and disability claims has increased from 49,405 on June 30, 1919, to 177,353 on June 30, 1920.

The following table shows the number of active and closed claims to June 30, 1919, and to June 30, 1920:

Analysis of compensation claims (except burial) allowed, showing whether payments are being made or whether cases are closed, to June 30, 1919, and to June 30, 1920.

Nature of claim.	Compensation claims allowed.	
	To June 30, 1919.	To June 30, 1920.
Death claims:		
Active.....	24,458	42,945
Closed.....	431	2,322
Disability claims:

Total active.....	49,405	177,353

Compensation claims on which payments have been terminated.

To June 30, 1920, payments had been terminated on 51,598 compensation claims. The following table gives the gross number of terminated payments for the period of January 1, 1920, to June 30, 1920, analyzed as to reasons for termination. While no analysis has been made of claims closed prior to January 1, 1920, which numbered 27,357, the following table is believed to be sufficient to show the principal reasons for closing claims. It may in some instances be necessary to reopen the award as a result of further investigation or developments.

Gross number of compensation claims on which payments have been terminated, from Jan. 1, 1920, to June 30, 1920, analyzed as to reasons for termination.

Reason.	Number.	Reason.	Number.
Accepted vocational training.....	15,714	Pending investigation.....	243
Claimant recovered.....	2,337	Reenlisted.....	81
Payee remarried.....	658	Disability less than 10 per cent.....	2,341

Refuses compensation.....	83	Total from Jan. 1, 1920, to June	
Failure to cooperate.....	409	30, 1920.....	24,241
Pending appointment of guardian.....	142	Grand total.....	51,598
Can not locate claimant.....	227		

Active disability claims.

Current monthly payments were being made on 134,408 compensation disability claims on June 30, 1920. The degrees of disability of these claims on June 30, 1920, are given in the table which follows, with the value of the monthly payments:

Analysis of compensation disability claims active on June 30, 1920, showing disability ratings and value of monthly payments.

Degree of disability.	Number.	Value of monthly payments on June 30, 1920.	
		Total.	Average per claim.
Temporary total.....	31,476	\$2,732,950.14	\$86.82
Temporary partial.....	87,865	1,678,853.19	19.10
Specific indemnity or permanent partial.....	11,863	295,924.58	24.94
Permanent total.....	3,204	328,376.00	102.48
Grand total.....	134,408	5,036,103.91

It will be noted that the value of the monthly payments of compensation for disability was \$5,036,103.91 on June 30, 1920. The actual amount disbursed for this reason in the month of June, 1920, however, was \$8,152,361.70. This difference is due to the fact that the "face value" figure, \$5,036,103.91, as of the end of the month obviously can not include awards terminated during the month, amounts involved in reratings, retroactive awards, awards changed from disability to death, awards made of necessity after the period of disa-

bility had ceased, all of which are included in the gross amount, \$8,152,361.70, disbursed during the month of June.

Monthly ratings are shown in the following analysis of active disability claims. The figures here given represent the status as of the end of each month during the fiscal year ended June 30, 1920.

Analysis of the total number of compensation disability claims active at the end of each month from July, 1919, to June, 1920, inclusive.

Date.	Degree of disability.				Grand total.
	Temporary total.	Temporary partial.	Permanent partial.	Permanent total.	
1919.					
July	31,254	3,855	2,044	601	37,754

June	31,476	87,865	11,863	3,204	134,408

Disallowed compensation claims.

To June 30, 1920, 123,109 claims for compensation had been disallowed. The following analysis is of the claims disallowed from January 1, 1920, to June 30, 1920, prior to which date no record of reasons for disallowances was kept. While this data covers only a six-month period it is believed that the percentages shown indicate the reasons for all disallowances.

Number of disallowed compensation claims, analyzed as to reasons for disallowance from Jan. 1, 1920, to June 30, 1920.

Reason.	Number.	Reason.	Number.
Claim not submitted or withdrawn.....	8,314	Reenlisted.....	20
Refused examination or treatment.....	187	Misconduct.....	180
Disability less than 10 per cent.....	7,365	Dependency not shown.....	237
No relative in permitted class.....	1,352	No response.....	633
Unable to locate claimant.....	2,703	Miscellaneous.....	94
Still in service.....	180		
Not in service.....	250	Total from Jan. 1, 1920, to June	
Not result of service.....	2,415	30, 1920.....	25,098
Man not dead.....	239		
Dishonorable discharge.....	25	Grand total.....	123,109
No dependents.....	904		

Compensation payments.

During the year \$103,122,714.92 was disbursed in payment of compensation awards. This amount includes \$558,189.53 paid out in burial awards and \$2,136,562.85 expended for medical care. The amount disbursed in payment of compensation awards, including burial awards and medical care, from the beginning of the bureau

to June 30, 1920, was \$114,765,422.84. Thirty thousand eight hundred and sixty-one burial awards had been made by the bureau to June 30, 1920, with a value of \$2,175,270.06.

Compensation checks returned.

Returned compensation checks numbered 41,115 and amounted to \$3,344,810.32 to June 30, 1920. The following table shows the disposition made of such returned checks:

Analysis showing disposition of compensation award checks returned to June 30, 1920.

Disposition.	Checks returned to June 30, 1920.	
	Number.	Amount.
Canceled.....	15,687	\$1,324,660.45
Remained ¹	23,316	1,884,462.97
Filed.....	2,112	135,686.90
Total returned.....	41,115	3,344,810.32

¹ Estimated.

The following table shows the reasons for returning compensation checks:

Reasons for returning compensation award checks to June 30, 1920.

Reason.	Number returned.	Reason.	Number returned.
Incorrect address.....	23,600	Compensation not accepted.....	207
Payee deceased.....	4,678	Amount questioned.....	865
Clerical errors.....	909	Title questioned.....	606
Overpayments.....	1,922	Vocational training.....	5,873
Duplicate awards made.....	156	Miscellaneous.....	1,578
Payee remarried.....	716		
Wrongly reported dead.....	5	Total.....	41,115

In addition to the returned checks, \$209,597.20 in cash, personal checks, etc., had been refunded to the bureau to June 30, 1920, for checks sent out in payment of compensation awards, and returned for the reasons shown in the above analysis. Cash refunds on compensation awards totaled \$189,687.72 for the year ended June 30, 1920.

Allotment and Allowance Division.

Allotments and allowances.—Requests for allotments and allowances from October 6, 1917, to June 30, 1920, numbered 1,666,607. There were, in addition, 2,807,093 application blanks returned on which no allotments or allowances were requested.

The total number of award applications received during the fiscal year was 17,633. These applications were received from three principal sources; (1) reenlisted men; (2) men in service who developed

dependents; (3) War and Navy Departments where applications had been delayed.

Due to many reawards, it is impossible to give other than the gross number of awards made during the year.

The following table shows, monthly, the number of applications received and the awards made for the year:

Number of allotment and allowance applications received versus awards made, monthly, from July, 1919, to June, 1920.

Date.	Applications received.	Awards made.
1919.		
July.....	493	4,346
August.....	759	2,353

June.....	1,387	3,024
Total for fiscal year.....	17,633	34,987
Grand total.....	1,666,607	2,090,893

Awards closed during year.—The number of allotment and allowance awards closed during the fiscal year was 587,193. The total number closed to June 30, 1920, was 1,994,946. Due to the reopening during the month of many previously closed awards, the figures here given are approximate. The following table shows the number of awards closed, monthly, from July, 1919, to June, 1920, inclusive:

Number of allotment and allowance awards closed each month, and total closed to date, from July, 1919, to June, 1920.

Date.	Number closed.	
	During month.	To date.
1919.		
July.....	138,862	1,549,934
August.....	138,861	1,688,795

1920.		
January.....	22,845	1,966,120
February.....	13,341	1,979,461
March.....	8,192	1,987,653
April.....	8,754	1,996,407
May.....	1,876	1,998,283
June.....	13,337	1,994,946
Total for fiscal year.....	583,874
Grand total.....	1,994,946

¹ Awards reopened.

Awards outstanding June 30, 1920.—Out of 2,090,893 awards made to June 30, 1920, 1,994,946 had been closed, leaving 95,947 outstanding. The following table shows the general reasons why awards have not been closed, as indicated by the nature of the files in which they are held:

Number of active award cards in each file, allotment and allowance division, showing whether payment was being made or suspended, on June 30, 1920.

Name of file.	Number of awards.	
	Payments suspended.	Payments current.
Death of allottee	16, 137
Discharge units	2, 307
Suspense	16, 760
Current payment		60, 743
Total	35, 204	60, 743
Grand total	95, 947	

Allotment and allowance disbursements.—In the fiscal year ended June 30, 1920, \$53,568,637.08 was paid out in allotments and allowances, including \$20,748,709.14 in allotments and \$32,819,927.94 in allowances.

The following table shows the amounts paid, monthly, from July, 1919, to June, 1920, and the total amounts paid, to June 30, 1920:

Amounts paid out in allotments and allowances, monthly, from July 1, 1919, to June 30, 1920.

Date.	Amounts paid out.		
	Allotments.	Allowances.	Total.
1919.

Grand total.....	1,034,157	472,662	515,699
Balance on hand June 30, 1920.....	1 43,920		

¹ Adjusted.

In addition to the checks returned to the bureau, cash refunds amounted to \$5,427,797.04 to June 30, 1920. The amount credited to allotments was \$3,424,028.49 and \$2,003,768.55 to allowances. During the fiscal year ended June 30, 1920, \$3,002,531.03 was paid in cash refunds to the bureau. Of this amount, \$975,778.62 was credited to allowances and \$2,026,752.41 to allotments.

The following table shows the money refunded monthly from July, 1919, to June, 1920, and the total amount refunded to June 30, 1920:

Refunds on allotment and allowance payments, monthly, from July, 1919, to June, 1920.

Date.	Amounts refunded.		
	Allotments.	Allowances.	Total.

Grand total.....	3,424,028.49	2,003,768.55	5,427,797.04

The number of unanswered letters in the Allotment and Allowance Division was 27,336 on June 30, 1920, as compared with 56,960 on June 30, 1919.

The total number of employees in the division on June 30, 1920, was 747; on June 30, 1919, the employees numbered 2,655.

Marine and Seamen's Division.

Insurance against war risk was provided for vessels and their cargoes by an act of Congress approved September 2, 1914. In an amendment approved June 12, 1917, war-risk protection was granted to masters and crews against loss of life, injury, and detention. The rates for both types of insurance were withdrawn on January 4, 1919.

Total administration expenses of the marine section from July 1, 1919, to June 30, 1920.....	\$10, 619. 92

Medical Division.

Organization.—On July 1, 1919, the Medical Division of the Bureau of War Risk Insurance, after a recent and extensive reorganization, consisted of seven medical sections or units, in addition to the executive office of the chief medical adviser. These seven sections were: (1) General military surgery; (2) internal medicine and dermatology; (3) tuberculosis; (4) eye, ear, nose, throat, and dental; (5) neuropsychiatry; (6) prosthetics; (7) miscellaneous.

On June 30, 1920, because of the increased volume of work and because of the many new problems which had evolved during the year, the work of the Medical Division had become further differentiated through the establishment of seven additional sections. These new sections were: (1) Statistical; (2) no record, (3) dental, (4) medical accounts, (5) complaint, (6) medical insurance, (7) foreign relations. The titles of these sections are descriptive of their functions.

The Miscellaneous Section as such was discontinued during the first half of the year and the greater part of its work was assumed by the No Record Section, which acts on all material coming to the Medical Division on which there is no record of prior action having been taken.

With the great increase in the number of applications for reinstatement or conversion of Government insurance, it became necessary to refer reports from the field regarding an applicant's physical condition for a medical opinion as to his acceptability as a risk. These reports of physical examinations were first reviewed by the General Medicine Section until the volume of work became so great

as seriously to handicap the regular work of that section. The Medical Insurance Section was therefore created for the specific purpose of handling the medical phases of the insurance work.

Foreign Relations Section.—The amendatory act approved December 24, 1919, authorized the Bureau of War Risk Insurance to furnish transportation and medical, surgical, and hospital services and supplies and appliances to discharged members of the military or naval forces of Governments which were associated with the United States in the war and who come within the provisions of laws of such Governments similar to the war-risk insurance act. The bureau also was authorized to utilize the similar services, supplies, and appliances provided for the discharged members of the military and naval forces of such governments by laws similar to the war-risk insurance act in furnishing eligible discharged members of the military and naval forces of the United States who live within the territorial limits of such foreign countries.

This work was committed to the Foreign Relations Section. Efforts were instituted to accomplish reciprocal arrangements between the United States Government and the Governments of the allied nations in the matter of physical examination, hospitalization, and medical treatment of veterans of the allied armies who were living in the United States, and veterans of the United States Army who were living in foreign countries.

Up to the end of the fiscal year satisfactory arrangements had been completed with the British colonies of Canada, New Zealand, New Foundland, Nova Scotia, and with England itself, acting through the Canadian authorities at Ottawa, Canada. By that same date drafts of a proposed agreement concerning this subject had been submitted through the State Department for proper transmittal to the Governments of England, France, Italy, Belgium, Portugal, Poland, Roumania, Czechoslovakia, and the Serb, Croate, and Slovene State, for their approval.

In the meantime, at the expense of the United States Government, ex-service men of the United States Army and Navy were being treated, largely in private institutions, in the following foreign countries: British-American colonies, England, Ireland, Scotland, Wales, Africa, India, British Guiana, West Indies, France, Italy, Belgium, Holland, Denmark, Norway, Sweden, Poland, Roumania, Czechoslovakia, Turkey, Portugal, Honduras, China, Brazil, Argentina, and Mexico.

Medical relief room for War Risk employees.—On October 27, 1919, the Bureau of War Risk Insurance employees' medical relief room service was placed under the control and supervision of the chief medical adviser, and an officer of the Medical Division was assigned

to duty as physician in charge. There was also established a sanitary inspection service, under the direction of a sanitary officer, whose functions were to prevent the spread of communicable and contagious diseases among employees of the bureau; to make sanitary inspections of the bureau, and to render hygienic and sanitary advice. In March, 1920, coincident with the subsidence of the acute respiratory infections, these two services were combined and placed under joint direction of a single medical officer.

Personnel.—On July 1, 1919, there were assigned to the Medical Division by the United States Public Health Service 35 medical officers. New assignments throughout the year increased this figure to 72 medical officers on duty on June 30, 1920.

There was a corresponding increase in the clerical personnel. On July 1, 1919, there were 196 employees of the Medical Division. This figure gradually rose with the increased work to a maximum of 526 employees on May 26, 1920. By June 30, 1920, following the general policy of reduction in personnel, the number of employees had been reduced to 478.

Hospitalization.—In providing examinations, medical care, treatment, and hospitalization for beneficiaries under the war-risk insurance act the services and facilities of the United States Public Health Service were utilized to the fullest extent.

Civil noncontract hospitals.—For the first part of the reported fiscal period a large number of civil institutions were treating war-risk insurance patients sent to them directly by the Bureau of War Risk Insurance and paid directly by that bureau. With the perfection of the district organization and the realization of the plans of the Hospital Division, these hospitals were gradually taken over as contract hospitals by the United States Public Health Service, and the number of civil noncontract hospitals in June, 1920, treating Bureau of War Risk Insurance patients had diminished to a very small figure, limited largely to a few State sanatoriums and State insane hospitals.

Cases acted upon by the Medical Division.—During the fiscal year ended June 30, 1920, compensation cases acted upon by the Medical Division numbered 1,088,201. Medical ratings, reratings, requests for examination, and hospitalization cases are all included in this number. The same case may have required attention two or more times. During the last quarter, for example, in which 397,570 cases were passed upon, the number which came to the attention of the Medical Division for the first time was but 93,898. The following table shows the total number of cases acted upon by the various sections during each quarter of the fiscal year:

Statement showing number of cases acted upon by medical sections, quarterly, during the fiscal year ended June 30, 1920.

Name of section.	Number of cases acted upon.				Total.

Cases referred to district examiners during year.—The records of the Medical Division show the exact number of claimants' cases referred to the Public Health Service district medical examiners during all except the first quarter of the fiscal year ended June 30, 1920. On that basis it is conservatively estimated that approximately 430,000 cases were referred for examination and report during the year. The number referred quarterly increased from 106,099 in the second quarter, when the record was first tabulated, to 126,838 in the last quarter.

The following table shows the number referred to each district during the second, third, and fourth quarters of the fiscal year:

Number of claimants' cases referred to examiners, by United States Public Health Service districts during the second, third, and fourth quarters of the fiscal year ended June 30, 1920.

District No.	Number of cases referred.			District No.	Number of cases referred.		
	Second quarter.	Third quarter.	Fourth quarter.		Second quarter.	Third quarter.	Fourth quarter.

Permanent total.....	1,207	2,121	3,430
Cases rated above 10 per cent.....	65,395	94,383	159,768
Cases rated below 10 per cent.....	4,147	7,072	12,047
Total cases rated.....	69,542	101,455	171,815

Patients admitted to hospitals during year.—There were 48,983 War Risk Insurance Bureau patients admitted to all hospitals during the fiscal year ended June 30, 1920. Twenty-four per cent of this number, or 11,819, were admitted because of tuberculosis; 12 per cent, or 5,707, because of diseases of the digestive system; and 11 per cent, or 5,203, because of diseases of the mind.

The number of patients admitted to hospitals each quarter during the year, by principal diseases, is shown in the following table:

Classification of admissions to hospitals, by classes of diseases, quarterly, during the fiscal year ended June 30, 1920.

Class of disease.	Number of patients admitted to hospitals.				
	First quarter.	Second quarter.	Third quarter.	Fourth quarter.	Total.

Legal Division.

The Legal Division, in charge of the general counsel, is divided into the following sections:

1. Office of the General Counsel.
2. Exemption Section.
3. Section of Prosecutions.
4. Subrogation Section.
5. Precedent and Codification Section.

Office of the General Counsel.—In addition to the general counsel, the personnel of the office consists of a staff of attorneys designated as associate counsel and a board of review composed of three associate counsel. To this office are referred all requests for opinions received from the other divisions of the bureau, and from all persons who are affected by the provisions of the war-risk insurance act. During the fiscal year the act of December 24, 1919, became law, and of necessity the many resultant changes in the war-risk insurance act brought up hundreds of new legal points for decision. The following is a record of the matters disposed of by the Office of the General Counsel during the year:

General submissions pending July 1, 1919.....	110
General submissions received during the fiscal year.....	1,824
General submissions disposed of during fiscal year.....	1,925
General submissions on hand June 30, 1920.....	9
Compensation and claims cases on hand July 1, 1919.....	353
Compensation and claims cases received during the fiscal year.....	5,589
Compensation and claims cases disposed of during the fiscal year.....	5,726
Compensation and claims cases on hand June 30, 1920.....	216
Correspondence:	
On hand July 1, 1919.....	2,938
Received.....	228,873
Letters written.....	237,717
On hand June 30, 1920.....	450

Exemption section.—This section deals with claims for exemption from compulsory allotment made by the enlisted man or implied from the facts of the case. The implied claims are those in which the enlisted man originally stated that he did not have a wife or child, and in which a claim is subsequently received from a person on whose behalf a compulsory allotment should have been made. These are the so-called "none" cases. There has been a steady flow of cases into the Exemption Section, due in part to the large number of reenlistments. There are also a number of "rehearing" cases because of applications for rehearings made by men after their discharge from the service. The following is a summary of the work done by this section during the year:

Exemption cases.

Pending July 1, 1919.....	3, 431
Received during fiscal year.....	11, 747

Total.....	15, 178
Decided during fiscal year.....	13, 581

Balance on hand June 30, 1920.....	1, 597
------------------------------------	--------

NOTE.—“None” cases are included in the above, 1,501 of which were decided during the year, leaving a balance of 443.

Rehearing pending July 1, 1919.....	483
Received during fiscal year.....	7, 327

Total.....	7, 810
Decided during fiscal year.....	7, 455

Balance on hand June 30, 1920.....	355
Finished cases returned to allotment and allowance files.....	89, 735

Correspondence:

On hand July 1, 1919.....	2, 687
Received during fiscal year.....	104, 935

Total.....	107, 622
------------	----------

Letters written during fiscal year.....	108, 065
---	----------

On hand June 30, 1920.....	260
----------------------------	-----

Personnel:

Employees in Exemption Section July 1, 1919.....	325
Employees transferred, resigned, and discontinued.....	250

Total on rolls June 30, 1920.....	75
-----------------------------------	----

Section of Prosecutions.—The Section of Prosecutions has jurisdiction over all cases before the bureau in which it appears that there has been a violation of law, with the exception of cases involving forgery. During year the section disposed of the following matters:

Cases considered.....	4, 426
Cases submitted to Department of Justice.....	1, 368
Cases pending June 30, 1920.....	280

Disposition of cases forwarded to Department of Justice:

Prosecution not advisable.....	145
Defendant dead or can not be located.....	26
Whole or partial refund made by defendant.....	55
Prosecution considered advisable by Department of Justice.....	174
No report yet received.....	968
Total.....	1, 368

In those cases in which prosecution was considered advisable by the Department of Justice the following results have been obtained:

Convictions.....	46
Acquitted after trial.....	7
Indictment ignored by grand jury.....	15
Indictment, trial pending.....	13
Not yet reported.....	93
Total.....	174

Subrogation Section.—This section has charge of cases and questions arising by virtue of the provisions of section 313 of the act which provides that if death or an injury for which compensation is payable is caused in circumstances creating a legal liability upon some person other than the United States or the enemy to pay damage therefor, the director, as a condition to payment of compensation, may require the beneficiary to assign to the United States any right of action he may have. During the fiscal year this section received 435 cases for attention and made final disposition of 558. The total recoveries and judgments amounted to \$101,976.40. The section had 582 cases pending at the end of the fiscal year. Settlements made by persons entitled to compensation amounted to \$17,889. These settlements were made in 24 cases, and the Compensation and Claims Division is deducting the net amount of the recovery in each case from future payments of compensation. Settlements totaling \$121,565.71 have been made in 89 cases by persons who have not as yet claimed compensation, but who may hereafter be entitled thereto. Provision has been made to deduct these amounts from any future awards of compensation.

There have been 40 cases in which recovery has been made on account of the death or injury of a person where a claim for compensation might have been made, but where the persons in interest elected to retain the recovery rather than to claim compensation. The amount recovered in these 40 cases totaled \$103,529.79.

Precedent and Codification Section.—This section collects and indexes all material which may serve as precedents in the interpretation of the act or which may have a bearing on questions which may arise.

Finance and Administration.

Finance Division.—The functions of the Finance Division consist of the administrative examination, recording, and approval of expenditures chargeable to the appropriations and trust funds administered by the Bureau of War Risk Insurance.

The following is a summary of what has been accomplished by the audit and reviewing force of the division during the year:

Adjusted and new awards examined and approved for payment.....	1, 974, 580
Miscellaneous vouchers.....	201, 386
Meal tickets.....	51, 649
Transportation requests audited.....	253, 783

In addition there were 4,400,000 individual payments of regular monthly awards checked and approved for payment in the computing unit.

The following is a comparative statement of expenditures for the fiscal years 1919 and 1920:

	Expenditures, fiscal year—	
	1919	1920
APPROPRIATION.		
Losses on war-risk insurance on American vessels, their cargoes, etc....	\$7,706,896.37	\$514,881.79
Military and naval family allowance.....	191,128,912.00	32,819,927.94
Military and naval insurance.....	43,798,357.93	85,926,099.99
Military and naval compensation.....	11,301,342.65	103,122,714.92
Salaries and expenses, Bureau of War Risk Insurance.....	13,151,158.10	15,323,680.41
National security and defense allotments.....	3,119,099.28	17,444.90
Expenses, retirement of teachers, District of Columbia.....		1,133.97
Total.....	270,205,766.33	237,725,883.92
TRUST FUND.		
Army allotments.....	173,952,596.25	13,343,261.60
Navy allotments.....	25,135,117.19	6,390,507.59
Marine Corps allotments.....	2,090,826.15	619,781.02
Coast Guard allotments.....	575,042.74	395,158.93
United States Government life insurance.....		47,868.32
Total.....	201,753,582.33	20,796,577.46
Grand total.....	471,959,348.66	258,522,461.38

The records relating to payments covering compensation, care, and treatment of disabled members of the military and naval forces are as interesting as any in the bureau, and there follows an analysis of expenditures from the appropriation "Military and naval compensation" during the fiscal year:

Analysis of expenditures from the appropriation "Military and naval compensation" during the fiscal year ended June 30, 1920.

Regular awards:		Miscellaneous—Continued.	
Death.....	\$15,932,803.61	Physical examination.....	273,835.61
Disability.....	84,414,639.84	Medical and surgical.....	255,266.60
Miscellaneous:		Supplies.....	357,841.57
Accrued awards....	66,761.22	Subrogation.....	27.95
Transportation.....	558,262.72	Suspended items....	13,729.92
Traveling expenses..	105,458.17		
Burial awards.....	558,189.53	Total.....	103,122,714.92
Hospital services....	585,898.18		

Administration Division.

The year ended June 30, 1920, was the first complete fiscal year of existence of the Administration Division. Prior to July 1, 1919, the sections and units now composing it were scattered throughout the various other divisions of the bureau. Only when the bureau moved into the Arlington Building was it possible to gather these together into a single organization and thereby prevent duplication. Certain of the present functions are entirely new, as, for instance, the reading, classifying, and routing of all incoming mail by one section, and the sorting by States of all outgoing mail. The division

consists of these sections: Translations, information, regulations, mails, duplicating, and record verification.

The Mails Section has centralized and taken over all of the work previously performed in mail rooms of the various divisions. In this section all mail for the bureau, including premium remittances, is now opened, stamped, read, analyzed, classified, numericalized, sorted alphabetically, counted, and dispatched to the various units, sections, and divisions. During the year 32,000,000 letters were sealed, sorted by States and sent to the post office.

Receipts and Disbursements Division.

During the year the following results have been achieved by the Receipts and Disbursements Division:

A system has been installed for the protection of blank checks which has resulted in every check being accounted for. No losses occurred during this period.

Many labor-saving devices have been installed, including an automatic "signagraph" machine, which was devised by an employee of this division, by means of which one person can sign 15 checks at once and 6,000 checks per hour. Improvements have been made in the addressograph equipment, resulting in a material reduction of force and a consequent lowering of the cost of check production. A total number of 5,641,831 checks, representing an expenditure of \$288,661,877.22, was issued by this division during the fiscal year.

The miscellaneous disbursements made have materially increased, a total of approximately 434,000 checks having been issued, amounting to approximately \$33,000,000.

Among improvements made in the accounting system are vouchers for regular payments of allotment and allowance, compensation, and insurance. The new vouchers are made mechanically, resulting in a saving of over \$10,000 per annum in labor and material.

Personnel Division.

Decrease in number of employees.—The total number of employees in the Bureau of War Risk Insurance decreased from 13,771 on July 1, 1919, to 7,862 on June 30, 1920, a reduction of 5,909, or 42 per cent for the fiscal year. This resulted from a program for the readjustment of personnel which was put into effect in November, 1919. The program included elimination of contract employees and retention of efficient regular employees along with the reduction in total personnel. The term "contract" as here used refers to those employed for emergencies, often working at night, and paid on either an hourly or annual basis. The term "regular" refers to those who had either complied or were eligible to comply with the requirements

of the Civil Service Commission and were employed on a full-time basis.

The following table shows the number of employees in each division on July 1, 1919, and on June 30, 1920:

Number of regular and contract employees, by divisions, in the Bureau of War Risk Insurance on July 1, 1919, and June 30, 1920.

In accord with the policy to retain only employees having permanent civil-service status all employees were given opportunities to take civil-service examinations for certification to this bureau, and plans were put in motion to accomplish a gradual replacement of temporary and contract employees by civil-service employees. During the year 2,380 employees so qualified and were given permanent status.

Reduction in number of employees absent.

Policies reducing the total number of absences in the various divisions of the bureau were established during the year, with the result that the average per cent of the total number of employees absent was reduced from 19 per cent during the first quarterly period to 11 per cent during the fourth quarter. Particular attention was given to absentees on leave without pay and a bulletin was issued relative to this subject on January 30, 1920, with successful results.

The following table shows, by monthly and quarterly periods, the reduction effected in the number of regular and contract employees absent during the fiscal year ended June 30, 1920:

Statement showing absences of regular employees, classified by reasons, number of absences of contract employees, unclassified, and number and per cent of total personnel absent monthly, quarterly, and annually during fiscal year ended June 30, 1920.

Period.	Total absences of regular employees.				Total absences contract employees (unclassified).	Grand total absences.

Average per capita annual salary \$1,227.—The average amount per capita of the annual authorized salary for regular employees was \$1,227 for the fiscal year ended June 30, 1920. The average salary for the first semiannual period was \$1,208, as compared with \$1,253 in the second semiannual period.

The following table shows, by divisions, the per capita annual authorized salary for regular employees as of the 5th of each month, and the average per capita for semiannual and annual periods during the fiscal year ended June 30, 1920:

¹ In floating division having semiannual and annual per capita averages for only the months the division was in existence.

Liaison Division.

The Liaison Division of the bureau is charged with the establishment and maintenance of national cooperation with agencies, organizations, and individuals in a position to aid the approximately 5,000,000 former service men and women in matters arising under the war-risk insurance act.

The Special Service Section, designed and established to expedite the handling of complicated or delayed cases, is an important feature of the Liaison Division.

The preparation, promulgation, and distribution of pamphlets and other explanatory material covering various features of the war-risk insurance act are functions of this division. During the fiscal year year 13,881,528 circulars and pamphlets were distributed.

The division maintains a close contact with the American Legion the American Red Cross, the Young Men's Christian Association, the Knights of Columbus, the Jewish Welfare Board, and other representative welfare agencies, with a view to the dissemination of accurate information concerning the rights of ex-service men and women under the war-risk insurance act.

District of Columbia school-teachers' retirement.

There follows a brief report of the administration by this bureau of the District of Columbia school-teachers' retirement act from the date of its passage, January 15, 1920, to June 30, 1920, when, pursuant to a provision contained in the act of June 5, 1920 (District of Columbia appropriation act), the administrative functions pertaining to the teachers' retirement fund were transferred to the jurisdiction of the Commissioners of the District of Columbia.

The law of January 15 contained a provision that within 60 days from its passage

There shall be deducted and withheld from the basic salary of every teacher in the public schools of the District of Columbia an amount computed to the nearest tenth of a dollar that will be sufficient, with interest thereon at 4 per centum per annum, compounded annually, to purchase, under the provisions of this act, an annuity equal to 1 per centum of his average annual basic salary received since the passage of Public Act No. 254, approved June 20, 1906, for each year of his whole term of service, payable monthly throughout life, for every such teacher who shall be retired as herein provided.

The act applied to all teachers permanently employed by the board of education in public day schools of the District of Columbia, including the superintendent of public schools, the assistant superintendents, supervisors and directors of instruction, group principals, principals, special teachers and librarians.

For the purpose of carrying out the provisions of the act during the fiscal year ended June 30, 1920, the sum of \$30,000 was appropriated, and the function of administering the act vested in the Secretary of the Treasury, who, by a departmental circular, No. 190, dated May 25, 1920, designated the Director of the Bureau of War Risk Insurance to administer under his direction the duties conferred upon him by the law, excepting those with respect to the investment of the fund created thereunder.

In view of the several intricate actuarial problems presented by the act, the services of a consulting actuary were obtained to review the law, prepare provisional annuity mortality tables and make recommendations concerning the manner of application of the measure. This he did commendably.

The first deduction from teachers' pay was made on the March pay roll. The amount of deductions ranged from \$4.30 to \$12, affecting 2,051 teachers and aggregating \$14,394.10.

For the month of April, deductions were made from the salaries of 2,111 teachers, aggregating \$14,673.50; May, 2,092 teachers, aggregating \$14,664.12; and June, 2,100 teachers, aggregating \$14,635.06, making a grand total of \$58,366.78 for the period during which the act was administered by the bureau.

Of the foregoing total amount of deductions for the four months, investments were made in $4\frac{1}{4}$ per cent United States Liberty bonds in the sum of \$43,284.36, representing a par value of \$48,350, leaving a gross balance of \$15,082.42 in the Treasury for further investment and payment of accruing annuities.

Thirty-nine teachers from whose salaries deductions had been made subsequently resigned, and refunds were made in the sum of \$182.30, leaving a net balance of \$14,900.12 in the trust fund proper.

To June 30, 1920, the sum of \$1,114.11 had been disbursed out of the appropriation of \$30,000, leaving an unexpended balance of \$28,885.89 in the Treasury.

The data compiled from the questionnaires submitted by each teacher indicated that there were 78 teachers carried on the rolls of the board of education who have had, or will have had before the end of the calendar year 1920, a sufficient number of years of service to enable them to retire with annuity benefits ranging from \$480 to \$1,210. Of these, 4 were retired in April, 4 in May, and 3 in June. Nine teachers were retired by reason of superannuation, with annuity benefits, and 2 were retired with benefits on account of disability.

Two applications of retired teachers for annuities were denied. In each instance, the disallowance was based upon failure to show a sufficient period of service or to show a continuity of service sufficient to bring them within the terms of the act.

BUREAU OF ENGRAVING AND PRINTING.

The output of the Bureau of Engraving and Printing during the fiscal year was slightly smaller than the banner output of last year. There were engraved, printed, and delivered 402,711,759 sheets of finished work, of which 70,112,000 sheets of United States notes and certificates were delivered to the Treasurer of the United States; 8,000 sheets of 2 per cent and 4 per cent United States registered

bonds, 17,760,682 sheets, of Liberty bonds, 1,889,997 sheets of Victory notes, and 541,700 sheets of certificates of indebtedness to the Division of Loans and Currency; 14,529,548 sheets of national-bank currency, 34,659,000 sheets of Federal reserve bank notes, and 44,560,200 sheets of Federal reserve notes to the Comptroller of the Currency; 87,313,707 sheets of internal-revenue stamps (7,394,325,975 stamps) to the Commissioner of Internal Revenue; 191,000 sheets of customs stamps to the Division of Printing and Stationery; 121,444,311 sheets of United States postage and parcel-post stamps to postmasters on orders of the Postmaster General; 284,534 sheets of Philippine postage stamps to the Bureau of Posts, Manila, P. I., on orders of the Secretary of War; 1,193,650 sheets of Philippine national bank notes for the bank of the Philippine Islands, Philippine treasury certificates, and postal cards to the government of the Philippine Islands on orders of the Secretary of War; 5,215 sheets of bonds and interim certificates for bonds, and 397,858 sheets of cigarette stamps and narcotic strip stamps, to the Government of Porto Rico on orders of the Secretary of War; 73,433 sheets of postal-savings certificates of deposit to postmasters; 7,661 sheets of postal-savings bonds and interim transfer certificates for bonds, to the Division of Loans and Currency; 124,518 sheets of Federal farm loan bonds and interim certificates for Federal farm loan bonds, and 143,061 sheets of bonds and interim certificates for joint-stock land banks to the Federal Farm Loan Bureau; 801,618 sheets of war-savings stamps and Treasury savings certificates, including carbon stubs, to the Treasurer of the United States, Federal reserve banks and post offices; 402,917 sheets of war-savings certificate folders to Post Office Department; and 6,267,149 sheets of checks, drafts, and miscellaneous to the Division of Printing and Stationery of the Office of the Secretary of the Treasury, aggregating 402,711,759 sheets. In addition to these impressions delivered, miscellaneous work was executed to the value of \$495,606.68, of which amount \$363,279.80 was reimbursed to the appropriations, \$13,706.39 charged to the appropriations, and \$118,620.49 deposited in the United States Treasury on account of miscellaneous receipts.

Compared with the deliveries in the fiscal year 1919 there was an increase of 8.95 per cent in United States notes, certificates, and bonds; a decrease of 17.69 per cent in national bank notes, Federal reserve bank notes and Federal reserve notes, 14.67 per cent in United States postage and parcel post stamps, 45.15 per cent in checks, drafts, and miscellaneous, and 29.32 per cent in customs stamps; an increase of 13.98 per cent in internal revenue stamps; a decrease of 94.75 per cent in war savings stamps, or an average decrease for all classes of 10.001 per cent, representing 44,752,346 sheets.

The face value of all the sheets delivered aggregated the vast sum of \$27,738,032,147.91.

The acts of March 1, 1919, and July 19, 1919, contained \$7,204,-033.66 for the Bureau, and repayments for services and materials furnished the several executive departments and bureaus amounted to \$5,121,046.61, making the total available for the operations of the Bureau \$12,325,080.27.

The expenditures for statutory salaries were \$255,327.63, for compensation of employees \$4,223,939.30, for wages of plate printers and printers' assistants \$3,024,924.92, for materials and miscellaneous expenses \$2,904,253.42, and for increase of compensation \$1,445,-726.18, making a total expenditure of \$11,854,171.45 and leaving an unexpended balance of \$470,908.82, distributed as follows: Statutory salaries, \$33,582.37; compensation of employees, \$271,378.38; plate printing, \$162,914.38; and materials and miscellaneous expenses, \$3,033.69.

There was expended \$32,245.23 for employees detailed to other bureaus of the department, of which \$28,045.23 was reimbursed and \$261.582.99 was expended for new machinery.

DIVISION OF CUSTOMS.

The aggregate receipts from all sources for the past fiscal year, according to the annual reports of transactions received from collectors of customs, amounted to \$328,633,392, which represented an increase of \$142,391,956 as compared with the preceding fiscal year, and \$29,720,157 as compared with the aggregate receipts collected during the fiscal year ended June 30, 1914, immediately prior to the outbreak of the European war.

The collections from duties and tonnage, covered into the Treasury by warrants during the past fiscal year, the aggregate of which represents the "official customs receipts" for 1920, amounted to \$323,536,559, which amount was but \$10,146,886 less than the official customs receipts of 1910, the largest collections in any fiscal year in the history of the Customs Service. At the port of New York alone the customs receipts from all sources for the past fiscal year amounted to \$229,325,368, which is \$43,083,933 in excess of the aggregate receipts of the entire Customs Service for the fiscal year 1919.

The total expense of conducting the Customs Service during the past fiscal year was \$10,098,808, which amount represented a decrease of \$48,768 from the total expenses of the preceding fiscal year. The value of imports for 1920 (inclusive of Porto Rico) amounted to \$5,238,621,668 an increase of \$2,142,901,600 over that of 1919, while the value of exports during 1920 amounted to \$8,111,-039,733, an increase of \$878,757,047 over that of 1919.

In keeping with the increase in customs collections, there was a corresponding unprecedented increase in all of the various lines of customs activity, as will be seen from the following table showing a comparison of the principal customs transactions during the fiscal years 1914, 1919, and 1920, viz:

Items.	1914	1919	1920
Vessels entered foreign.....	43,867	43,486	44,833
Vessels cleared foreign.....	43,167	40,388	44,282
Entries of merchandise.....	1,850,329	5,061,450	6,061,369
Drawback paid.....	\$3,271,933	\$7,749,839	\$20,224,654

With the removal of many of the war restrictions upon trans-oceanic travel there was a large increase in the number of passengers arriving in the United States during 1920, as evidenced by 201,038 baggage declarations and \$2,456,565 in head tax collected in 1920, as compared with 95,063 baggage declarations and \$877,776 head tax collected in 1919.

The enforcement of the Federal prohibition law along the seaboard and the Mexican and Canadian borders also increased the duties of customs officers during the past year. A large number of seizures, arrests, and prosecutions were made in connection with attempts to smuggle intoxicating liquor into this country, and every possible means was taken to stamp out violations of this character with the limited force available for the purpose. The increase in the volume of customs business during the year, however, has necessitated the return of a considerable number of employees to their regular customs assignments whose services had been largely devoted to prohibition enforcement work, and the enactment of legislation to provide an adequate force for the customs enforcement of the eighteenth amendment is urgently recommended.

Attention is particularly invited to the fact that this enormous volume of business was transacted with a steadily decreasing force of customs employees, there being on the rolls at the close of the fiscal year 1920 but 6,633 as compared with 8,060 in 1910. As above noted, the duties collected during 1920 amounted to \$323,536,559 on importations, exclusive of Porto Rico (free and dutiable), valued at \$5,232,957,393, making the average ad valorem rate on the free and dutiable merchandise 6 per cent. In the fiscal year 1910 the customs receipts were approximately \$333,600,000, and the value of imports, dutiable and free, \$1,556,947,430, the average ad valorem rate being over 21 per cent.

It will be seen from the foregoing, therefore, that notwithstanding the growth in the value of importations, and the consequent increase in work devolving upon the Customs Service, the administration

has thus far been conducted with approximately a reduction of 1,427 employees from the number in 1910, the peak in the customs business in the history of the Government in the amount of duties collected and, up to that time, in the volume and value of imports.

During the period of the war the policy was consistently followed throughout the Customs Service of reducing the personnel whenever opportunity afforded, with the result that the department is now embarrassed by not having a sufficient force to take care of the rapidly increasing volume of imports. While the department has thus far endeavored to administer the customs laws with an obviously inadequate force, in view of the unprecedented increase in customs business above referred to, it is now confronted with two exigent conditions: First, an absolute need of a large increase in force at the various ports throughout the country, and, second, an urgent need for a substantial increase in the salaries of employees in order to retain the services of men who by years of experience have become trained in a highly technical service, and who are now forced by reason of the present high cost of living to better their financial condition by accepting more lucrative positions offered them by commercial concerns. Defections from the personnel to private employment have become a serious impediment to the effectiveness of the customs organization. Salaries that were considered attractive 5 or 10 years ago do not appeal to men at the present time, and consequently the high-class men formerly competing for positions in the Customs Service are now conspicuous by their absence. At the present time the Customs Service is placed in an embarrassing position on account of the low salaries paid its employees as compared with the salaries paid for similar work in commercial life. It is hoped, however, that this situation will, to some extent at least, be met by the increase of \$1,000,000 authorized in the customs appropriation for the current fiscal year.

By reason of the large customs collections during the past fiscal year the cost of collection decreased from 0.0579 for 1919 to 0.0307 for 1920. As heretofore pointed out, the cost to collect \$1 at each port of entry and for the service as a whole does not constitute a fair basis of comparison of the relative efficiency of the various ports of entry or of the Customs Service as a whole, on account of the amount of work performed for the Departments of Commerce, Labor, and Agriculture, the Public Health, Custodian and Coast Guard Services, and for other Government bureaus. Judging from the volume of work performed by the Customs Service for these various branches of the Government service, that bears no relation to the collection of customs revenue, it is quite obvious that even if all the tariff laws were repealed and all merchandise were admitted

free of duty into the United States it would, nevertheless, be necessary to maintain an extensive organization at our seaports to enter, clear, admeasure, and license vessels, assign and discharge the crews thereof, compile statistics of imports and exports, enforce the Public Health regulations, secure compliance with pure food laws, so far as they relate to imports, and carry out various other activities which now devolve upon the Customs Service. It is quite probable, too, that the cost of maintaining a service for the performance of these various activities would be nearly one-half of the present operating cost of the Customs Service.

A Manual for the Guidance of the Outdoor Force of the Customs Service was published during the past fiscal year. This manual, designed for the use of the outdoor force of inspectors, weighers, gaugers, admeasurers, customs guards, and night inspectors, as a ready reference to the laws and regulations which relate to their respective duties, is in convenient pocket form and will be of inestimable benefit to the above class of employees in posting them in the correct and efficient discharge of their duties.

On account of the increased number of applications received during the past fiscal year for the establishment of bonded warehouses and for the assignment of customs men to special duties for the accommodation of railroad companies, the following recommendation made in last year's annual report is renewed:

That action be taken to secure an amendment to the act of March 4, 1907, so as to exclude the services of storekeepers and other officers therefrom, and permit the handling of the moneys received on this account in the same manner as reimbursable services rendered under the night unloading act of February 13, 1911; that is, payments made from this source be placed in the collectors' special deposit accounts, and disbursements made direct therefrom by check to the storekeeper, inspector, or other officer performing the service.

While the salaries of the above classes of officers are reimbursed to the Government, they are actually paid from the fixed customs appropriation, and the enactment of the above-recommended legislation would result in relieving officers charged with the administration of the customs appropriation of considerable embarrassment at times when there are no funds available in the appropriation for the employment of this special force of employees.

Tea inspection.

According to the annual report of the supervising tea examiner, a total of 96,862,858 pounds of tea was examined during the past fiscal year. Of this a total of 145,246 pounds, or 0.15 per cent, was rejected as follows: One thousand five hundred and ninety-two pounds on account of impurities and 143,654 pounds because not equal to the Government standards with respect to quality. In the

one line that was rejected for impurities the chemist found most of the impurities to consist of artificial color. It is of interest to note that this is the first instance in two years where artificially colored teas were offered for admission. The low percentage of rejections for the year is due to several causes, the most important of which is that very little, if any, of the teas intended for manufacturing purposes were entered for human consumption. Previously such teas frequently were entered for human consumption with the hope that they would pass the Government standard and thereby escape the 1 cent per pound duty placed on teas entered for manufacturing purposes. In the report for the fiscal year 1919 it was estimated that 65 per cent of the rejections for that year were teas that should have been entered for manufacturing purposes in the beginning, and that they were so entered after having been rejected.

The amount of tea imported during this fiscal year was considerably less than the average of the previous three or four years. However, this does not necessarily indicate any decrease in consumption of tea in the United States. During the war importations were above normal in anticipation of possible embargoes or import duties on tea. This left a large holdover for distribution in 1920.

The table showing the comparison for the last four fiscal years reveals that the people of the United States are gradually shifting from green to black teas. Of course, a part of this falling off in the use of greens was due to the high price of tea in the green tea-producing countries and the short crop in Japan. The falling off of the importation of Oolongs, it is believed, was influenced more by the short crop than by any other factor. Teas from the Dutch East Indies (Java and Sumatra), the consumption of which reached its height in this country during the war, when Great Britain and Australia had an embargo on all teas except those produced in the British Colonies, are being replaced by Ceylon and Indias. Strange to say, notwithstanding the high rate of exchange with China, a much larger percentage of the teas imported into the United States during 1920 came from that country than during the preceding year. This increase was apparent among all varieties of China tea. The falling off in the importations of Japan and Formosa teas was caused to some extent by the increased cost of these teas, which, in turn, was due to the increased cost of labor in those countries and to the crop shortage.

During the fiscal year only nine appeals were taken from the action of the tea examiners to the United States Board of Tea Appeals. Of these, two were withdrawn by the appellants; in six the findings of the tea examiners were sustained, and in only one were they reversed.

For the purpose of simplifying and making more accurate the comparison of teas with samples constituting the Government standards, the number of such standard samples was reduced from 12 to 8.

In 1913 the Secretary of the Treasury, perceiving that under the existing statutes the Department of Agriculture had jurisdiction to determine the fitness for human consumption and admissibility of all foods, drugs, and liquors offered for importation into the United States, with the single exception of tea, which remained partly in the Treasury Department, under the act of March 2, 1897, and partly in the Department of Agriculture, under the food and drug act, June 30, 1906, requested the Secretary of Agriculture to have prepared a bill transferring the tea inspection service from the jurisdiction of the Treasury Department to that of the Department of Agriculture. A provision was drawn for insertion in the agricultural appropriation bill for 1915, and had the approval of both departments. Later the Treasury Department requested that the submission of this provision to Congress be postponed until a suit then pending in the Federal courts testing the legality of a certain regulation then enforced by the Treasury Department under the tea act had been decided by the courts. This case was not finally settled until 1918.

In July, 1919, the Chief of the Division of Customs again brought this matter to the attention of the Secretary of the Treasury. Following this a joint letter signed by the Secretary of the Treasury and the Secretary of Agriculture, inclosing the provision concurred in by the two departments in 1914, and recommending its adoption, was transmitted to the Agricultural Committees of the Senate and House. The provision making the transfer effective July, 1920, inserted in the agricultural appropriation bill for 1921, passed both houses of Congress, and was approved by the President May 31, 1920.

Although the administration of the tea act has been placed under the Secretary of Agriculture, the act requires that the Customs Service shall hold the tea in bond until it meets the requirements of the law, and since the customs also draws all tea samples at ports where no tea examiners are stationed, the Treasury Department is still vitally interested in the law. Recognizing this dual trusteeship, the two departments have cooperated in formulating the new regulations with the idea that they serve the best interest of the public, and after nearly two months of operation under the Agricultural Department, with the assistance given by the Treasury Department, the Tea Inspection Service is working satisfactorily.

A recapitulation of the supervising tea examiner's report of the various kinds and quantities of teas passed and rejected during the fiscal year 1920 follows:

Recapitulation of supervising tea examiner's monthly report.

REPORT OF THE VARIOUS KINDS AND QUANTITIES PASSED AND REJECTED, AND WHY REJECTED, DURING THE FISCAL YEAR ENDED JUNE 30, 1920.

Under this authority 53 buildings received attention. In 26 of these buildings the contracts ranged from \$2,050 to \$17,000, totaling \$204,186.30, as follows:

Place.	Amount of contract.	Space gained, in square feet.
1. Ann Arbor, Mich., post office.....	\$3,658.30	350
2. Bloomington, Ill., post office.....	4,588.00	672
3. Chester, Pa., post office.....	5,453.00	380
4. Dallas, Tex., post office.....	2,774.00	1,400
5. Denver, Colo., mint.....	16,976.00	1,672
6. Elkhart, Ind., post office.....	8,352.00	800
7. Fargo, N. Dak., post office.....	5,430.00	350
8. Fitchburg, Mass., post office.....	6,970.00	1,210
9. Fort Worth, Tex., post office.....	16,100.00	2,346
10. Hammond, Ind., post office.....	4,855.00	875
11. Harrisonburg, Va., post office.....	12,900.00	2,100
12. Louisville, Ky., post office.....	11,267.00	1,830
13. McKeesport, Pa., post office.....	11,872.00	2,850
14. Monroe, La., post office.....	6,850.00	527
15. Moreantown, W. Va., post office.....	3,750.00	240
16. Pittsburgh, Pa., post office, old.....	14,400.00	3,400
17. Rock Island, Ill., post office.....	7,650.00	820
18. Rome, N. Y., post office.....	5,255.00	400
19. St. Paul, Minn., customhouse.....	6,322.00	1,400
20. San Francisco, Calif., custom house.....	11,647.00	7,453
21. Springfield, Ill., post office.....	2,370.00	208
22. Springfield, Ohio, post office.....	14,100.00	3,550
23. Waco, Tex., post office.....	8,100.00	1,080
24. Waterloo, Iowa, post office.....	4,850.00	300
25. Wilkes-Barre, Pa., post office.....	2,050.00	234
26. Williamsport, Pa., post office.....	5,647.00	250
Miscellaneous and minor items.....	15,391.50
Total.....	219,577.80	36,697

¹ Work at these buildings being performed by purchase of materials and contracts for labor.

	Square feet.
Total space gained under above contracts (26 buildings).....	36, 697
Total space gained under minor contracts (27 buildings).....	2, 837
	<hr/>
Total space gained (53 buildings).....	39, 534
Rate per square foot of space gained in the 53 buildings is \$5.57 per square foot.	

HOSPITALS, SANATORIUM, ETC., BEING CARRIED OUT BY THE OFFICE OF THE SUPERVISING ARCHITECT FOR THE PUBLIC HEALTH SERVICE.

Contracts placed during the fiscal year 1920:

Chicago Broadview Hospital, 8 buildings.

Dawson Springs, Ky., Sanatorium, 22 buildings in all; 8 under contract, the remaining 14 to be constructed later.

Stapleton, N. Y. (New York Marine Hospital), mess hall and kitchen.

HOSPITALS FOR THE PUBLIC HEALTH SERVICE NOT UNDER CONTRACT JULY 1, 1920.

Norfolk, Va., hospital.

Mount Alto Sanatorium, Washington, D. C. (National School of Domestic Arts and Science).

Status, up to June 30, 1920, of claims filed under act of Congress approved Aug. 25, 1919, for reimbursement for losses sustained on account of war conditions in the performance of contracts and subcontracts in connection with public works under the control of the Treasury Department.

Total number of claims filed.....	331
Number of claims withdrawn, and claims filed out of the period of the law..	27
	<hr/>
Net number of claims for examination.....	304
Number of claims audited.....	45
	<hr/> <hr/>
Aggregate amount of all claims, total.....	\$3, 362, 000
Amount disallowed.....	\$289, 332
Total amount paid by Government on claims.....	506, 853
	<hr/>
	796, 185
	<hr/>
Leaving a net amount still pending of.....	2, 565, 815

Auditing on these claims was commenced on or about December 1, 1919, but final progress of instructions to examiners was not made out until March 12, 1920.

During the period from April 15, 1920, to May 1, 1920, all claimants were notified to present their sustaining evidence immediately in accordance with instructions furnished at that time.

Some delay in auditing the claims has occurred by reason of the negligence of the claimants in furnishing the data called for.

Statement of appropriations made during the fiscal year ended June 30, 1920.

The deficiency act approved July 11, 1919, carried an appropriation for "Operating supplies," in amount..... \$285, 000. 00

PUBLIC HEALTH SERVICE.

The operations of the Public Health Service during the fiscal year 1920 are summarized by the Surgeon General as follows:

Division of Scientific Research.

The Scientific Research Division conducted during the past fiscal year scientific field and laboratory studies of the diseases of man and other public health problems. Among the diseases studied were anthrax, botulism, deer-fly fever, influenza, leprosy, malaria, meningitis, pellagra, pneumonia, poliomyelitis, trachoma, tuberculosis, and typhoid fever. Studies and investigations were also made of matters relating to child hygiene, industrial sanitation, public health organization and administration, pollution of streams, excreta disposal, and studies conducted at the Hygienic Laboratory. In addition to these studies the division continued the following lines of work: Demonstration work in rural sanitation, treatment of cases of trachoma at hospitals and field clinics for the purpose of suppressing that disease, medical and surgical care of beneficiaries of the United States Em-

ployees' Compensation Commission, and the supervision of the sale of biologic products in interstate traffic.

Malaria.—Investigations of malaria control during the past year were carried on along the following lines: (a) Advisory supervision of malaria control demonstrations previously made; (b) investigations of malaria as affecting railroads engaged in interstate traffic; and (c) cooperative demonstration studies of malaria control.

Eighteen communities are continuing the antimalaria control work which was initiated by the Service as an extracantonment health measure. From incomplete reports received 41 other communities interested in malaria control through Service demonstrations are continuing active work. Expenditures amounting to approximately \$300,000 by these local communities have been reported. One hundred and one places are doing work under the supervision of the United States Public Health Service, and have already appropriated about \$350,000 therefor.

Two southern railroads have undertaken malaria control on an extensive scale, and three other interstate railroads have made requests for malaria surveys.

Under a cooperative agreement between the Public Health Service, State and local health departments, and the International Health Board, malaria control investigations were extended during the past fiscal year into 11 States. One hundred and thirty-three communities were surveyed; in 43 of these malaria demonstrations are in progress. The Service has definitely demonstrated that many localities can eliminate malaria at a reasonable cost and that the best way of inducing the public to do so is to carry on carefully planned demonstration campaigns in badly infected areas.

The following biological studies were conducted at the malaria laboratory: Longevity of mosquito life; viability of malaria parasites in mosquitoes; and the ultimate seasonal infection of malaria mosquitoes.

Field investigations during the year included rice-field studies, studies of impounded waters, study of the economic loss from rural malaria and quinine administration in its control, investigation of plants affecting mosquito production, investigation of fish in mosquito control, and observations of feeding habits of *Anopheles* mosquitoes.

Epidemiological and statistical studies of influenza.—The epidemiological and statistical studies of influenza were conducted along three general lines. One was the continuation of the statistical analysis of the results of the field studies made in 1918 and the early part of 1919 of certain data lent to the Public Health Service by State departments of health and of published data relating to the mortality from the epidemic of 1918–19. A second line of study was made

necessary by the reappearance of epidemic influenza in January, 1920. In order to have a basis for comparison of the epidemic of 1918-19 with that of 1920, a field force was organized in Baltimore for a resurvey of about 35,000 persons who had been included in the surveys made in 1918-19. The results of this survey are now being tabulated. A third line of study was also made possible by the recrudescence of influenza, namely, some specific inquiries into certain clinical and epidemiological phases of the disease in 1920. Epidemiologic aids detailed by the Public Health Service to several State health departments were utilized for this purpose.

Pellagra.—The study of the pellagra-preventive value of certain single foods when supplementing the ration of a group of inmates in an asylum in which cases of pellagra were ordinarily of frequent occurrence was continued during the year. This study has afforded well-nigh conclusive evidence that a deficiency in neither the anti-neuritic nor the fat soluble vitamine is an essential factor in the production of the disease, thus contributing to the eventual determination of the essential dietary factors in this disease. Further studies of factors affecting pellagra incidence in textile-mill communities were made during the year, and a number of reports embodying the results of these studies and other field data were published or are now in press.

As in previous years, clinical and laboratory investigations were conducted at the Service pellagra hospital at Spartanburg, S. C., consisting of dietary treatment of 100 patients and 7 out-patients, and studies of saliva, urine, alkali reserve of the blood, and the tolerance of sodium bicarbonate. The results of these studies are partly in press and partly in preparation for publication.

Trachoma.—The five hospitals in operation during the past year in Kentucky, Tennessee, and North Dakota were used as a base for the treatment of the more chronic cases of trachoma. The work has been carried more extensively than ever before, by means of trachoma surveys and field clinics, into a number of States, including Missouri, Texas, Ohio, Alabama, Florida, South Carolina, Kentucky, Tennessee, North Dakota, and Nebraska. Ten thousand three hundred and ninety-five cases have received treatment at the hospital dispensaries during the year and 2,500 cases have been operated on at the hospitals and field clinics. In connection with the field clinics, instructions were given to physicians in the diagnosis and treatment of trachoma and methods for the prevention of the spread of the disease made known to the public.

Rural sanitation.—Studies of and demonstrations in rural sanitation were continued under a special appropriation from Congress. The demonstrations have been conducted in the following counties: Charleston County, S. C.; Cumberland, Edgecombe, Wake, and Dur-

ham counties, N. C.; Glynn, Muscogee, and Walker counties, Ga.; Lauderdale, Madison, Talladega, and Walker counties, Ala.; Davidson and Hamilton counties, Tenn.; Harrison County, Miss.; Mason County, Ky.; Cherokee County, Kans.; Ottawa County, Okla.; Jasper and Greene counties, Mo.; and 12 counties in Virginia.

In 22 of the counties the local health authorities were appointed health officers, the Service cooperating only to the extent of paying part of the salaries of such officers. The expenditures of the Service for the demonstration phases of the work in the remaining counties were met by the Service paying from one-sixth to one-half of the cost, the balance being furnished by State and local authorities. The aim of the Service has been to aid in the establishment of permanent health organizations in the counties in which demonstrations were carried on, such organizations to be financed wholly or in great part by the counties.

Public health organization and administration.—Upon the request of State and local health authorities, surveys of public health organization and administration have been made of the cities of Alliance and Canton, Ohio; Memphis, Tenn.; Monroe, N. C.; Shreveport, La.; of five counties of Texas; and of the Pennsylvania State health department. The Service has detailed an officer to act temporarily as State health commissioner of New Mexico, and officers have been lent to act as city health officers of Minneapolis, Minn., and Dallas, Tex.

Industrial hygiene and medicine.—At the opening of the fiscal year the cooperative agreement in effect during 1918-19 with the Working Conditions Service of the Department of Labor became inoperative and the Office of Industrial Hygiene and Sanitation returned to its prewar activities. Studies directed by this office included (1) surveys in industrial plants into occupational health hazards, (2) studies of special occupational diseases, (3) investigations of working conditions in Government buildings, (4) supervision of the medical and surgical relief work in certain plants and stations under the jurisdiction of the United States Employees' Compensation Commission, (5) consulting service to industries and industrial workers, State and municipal authorities on occupational diseases and health safeguards.

Surveys in industrial plants of occupational health hazards have included an industrial cross-section study of New York Harbor, a study of the foundry trades, and a series of studies regarding air conditioning.

Surveys of occupational diseases were directed along the following lines: Plumbism in pottery production, cutting oil dermatoses, dermatoses among plate and press printers, and tellurium as an industrial poison.

Investigations in industrial fatigue were continued during the year. The field work on the rythm problem was completed. In the laboratory studies attention was given to the general problem of the chemical phenomena of fatigue.

At the request of the United States Employees' Compensation Commission, physicians have been placed at the following stations to give medical and surgical care for injuries received by civilian employees: Old Hickory Powder Plant, Jacksonville, Tenn.; Amatol Arsenal, Hammonton, N. J.; Curtis Bay general ordnance depot, South Baltimore, Md.; Muscle Shoals district, Ala.; Morgan general ordnance depot, South Amboy, N. J.; general ordnance depot, Fort Wingate, N. Mex.; Rock Island Arsenal, Rock Island, Ill.; Army supply base, Brooklyn, N. Y.; Army reserve depot, New Cumberland, Pa.; general supply depot, Jeffersonville, Ind.

During the fiscal year, plant working conditions were also summarized, reports prepared, and recommendations made to 110 manufacturing establishments. In addition, consulting service has been given to approximately 125 State and municipal health and labor departments, industrial establishments, universities, and other groups.

On request of the Bureau of Mines an officer of the Service was detailed to act as Chief Surgeon of that Bureau, and in accordance with the law Service officers have been placed on mine cars as in previous years.

Child hygiene.—The Public Health Service engaged in intensive studies and investigations of health problems of infants and children in seven States and in the District of Columbia during the past fiscal year.

An investigation to determine the safety, usefulness, and comparative value of dried milk powder in infant feeding was conducted in Boston, Mass. The studies thus far made indicate that the dried milk powder is safe and useful as a food for infants and that in certain respects it may have points of distinct advantage.

The Service assisted in organizing a division of child hygiene in the Missouri State board of health, and in cooperation with that board a State wide field investigation of child hygiene is now in progress. At the close of the year 20 cities had established or were establishing baby health centers under permanent community nurses.

Other studies and investigations begun during the year and now under way are as follows: Studies in malnutrition of school children in Baltimore, Md.; health work in the schools of Cecil County, Md.; cooperation with the Delaware reconstruction commission; investigations of mouth hygiene in West Virginia and Delaware; mental and physical examinations of juvenile delinquents in the District of

Columbia; and a survey of delinquency, dependency, and feeble-mindedness in the State of Oregon.

Pollution of streams.—Compilation of data relating to the survey of the Ohio River watershed has been nearly completed. Preliminary surveys of the Mahoning River, Ohio, and the Chicago Drainage Canal and Illinois River were made with the view of undertaking studies of stream pollution along those rivers.

A survey of creamery waste disposal as it relates to the pollution of streams was made in Minnesota in connection with studies of creamery waste purification.

At the close of the year arrangements were completed for the making of surveys of the larger sewage treatment plants of this country for the purpose of collecting engineering and chemical data and establishing uniform methods of analyzing sewage and effluents.

Statistical Office.—There have been conducted by the Statistical Office during the year studies of industrial morbidity statistics, morbidity reports, pulmonary tuberculosis, epidemic influenza, venereal diseases, child hygiene, pellagra, and industrial fatigue. These studies are being carried on in cooperation with other divisions and offices of the Service.

Hygienic Laboratory.—Technical studies of importance were conducted during the year at the Hygienic Laboratory. Extensive researches in tuberculosis are being undertaken along three general lines: Chemotherapeutic studies, specific immunity studies, and studies of the relation between nutrition and tuberculosis. Special studies were made of serums and vaccines for diseases, such as pneumonia, cerebrospinal meningitis, botulism, anthrax, and rabies. Other studies have related to influenza, deer-fly fever, Felix Weil reaction, chemotherapy of syphilis and related diseases, hookworm remedies, food value of dried milk, disposal of chemical wastes; detection and estimation of poisonous nitro compounds, and the control of biologic products. Specimens, to the number of 9,215, exclusive of biologics, were examined during the year and 1,733 antirabic treatments were distributed.

The laboratory quarters were greatly enlarged during the year by the erection of the new south building.

Control of biologic products.—In connection with the enforcement of the law of July 1, 1902, regulating the sale of viruses, serums, etc., 3,525 samples of products were examined at the Hygienic Laboratory. Thirty-seven concerns (30 American, 7 foreign) held licenses at the end of the fiscal year.

Leprosy investigation station.—Activities of the Service leprosy investigation station in Hawaii during the year were directed chiefly to the intensive experimental treatment of patients at the Kalihi

Hospital. It has been established that chaulmoogra^{oil} contains one or more agents which exert a marked therapeutic action in many cases of leprosy. Since July 1, 1919, there have been released on parole by the board of health 31 patients in whom it is believed the disease is absolutely arrested.

Division of Interstate Quarantine.

The activities of the division during the year included plague-suppressive measures—control of water supplies used by interstate carriers, and the carrying out of the bureau policies for the prevention of epidemics and interstate contact of disease by building up and improving divisions of communicable disease and sanitary engineering in State health departments.

Plague-suppressive measures.—The operations for the control of plague in ground squirrels in California throughout the year continued. The infected area was delimited by laboratory examination of squirrels resulting from intensive squirrel destruction at the borders of the known infected territory. Squirrel-free zones were maintained between the infected territory and the rat population of the cities of San Francisco, Oakland, and Berkeley.

A new outbreak of plague occurred in New Orleans, the first human case being discovered October 29, 1919. It was necessary to place in the field a large force of trappers, fumigators, and other personnel. Fifteen human cases occurred up to June 30, and 558 infected rats were demonstrated during this period. Over 250,000 rats have been trapped and examined in the laboratory, and the infection may now be said to be under control, although intensive trapping and other field measures should be maintained through the ensuing fiscal year.

Plague appeared in Pensacola June 14, in Galveston June 16, and Beaumont June 26, the first human cases occurring on these dates mentioned. Active field operations were at once instituted similar to those employed successfully at New Orleans, and the control of the infection in these new foci will not, it is believed, be difficult, provided sufficient funds are available.

The sudden outbreak in New Orleans made necessary a deficiency appropriation to carry on the work for the entire fiscal year. An appropriation of \$200,000 was asked for, but only \$100,000 was granted, and, as a consequence, it was necessary to suspend operations to a large extent at New Orleans during the month of June and to secure the transfer of funds from other appropriations to keep within the funds allowed.

It was carefully explained to the appropriation committee at the time the deficiency was requested that \$400,000 was inadequate for successful plague operations on such a scale, and it was recommended

that the appropriation for 1921 be made \$800,000 instead of \$400,000. Congress appropriated \$355,000, and as a result there will be no funds to continue after October 15. This condition of affairs is especially serious because Congress does not convene until December.

Prevention of the spread of communicable diseases.—The ideal prevention of epidemics should be based upon early reporting of cases; that is, reliable, prompt morbidity reports. Unfortunately, morbidity reports are so meager or unreliable that many health departments are compelled to use mortality statistics as a basis for action. Obviously such reports are received to aid in the prevention of disease. The obligation of preventing the spread of communicable disease from one State to another is placed upon the Public Health Service by Congress with the understanding that State and local machinery is to be utilized in so far as possible. The Service policy is therefore to build up a strong division of communicable disease control in each State health department rather than to expand the Federal activities within the States. Aid by the Public Health Service is therefore rendered in communicable disease control with this policy clearly in mind.

Control of interstate water supplies.—The policy of utilizing existing State machinery for control of water supplies used in interstate traffic was followed during the year. The responsibility of examining and certifying these supplies is placed on the Public Health Service by Congress; but to avoid duplication of work it seems wise to encourage and develop sanitary engineering divisions in States to the limit of their possibilities for furnishing the basic data for the certificates.

Where State engineering machinery does not exist or is inadequate, Federal assistance has been given, so that a double service is rendered; the necessary data upon which to base certificates of quality secured, and divisions of sanitary engineering established or strengthened in such States.

The great majority of municipal supplies are used by interstate carriers, and hence come under Federal jurisdiction. As a result, the check maintained results in the correction of defects and improvement in nearly all water supplies.

Federal home for lepers.—The Louisiana Legislature, on July 6, 1920, passed an act providing for the transfer of the Louisiana State Leper Home, at Carville, La., to the Federal Government for a consideration of \$35,000. The details of transfer will doubtless soon be completed, and the Public Health Service will assume control in the near future. The necessary alterations and expansion of the institution to meet Federal needs will be made from the \$250,000 fund

available for the purpose, and lepers will be transferred to the home within the coming fiscal year.

It is believed to be the more economical policy to supervise and maintain this institution as a part of the Hospital Division of the bureau. Orders have consequently been issued transferring the activities relating to the National Leprosarium from the Domestic Quarantine Division to the Marine Hospital Division.

Division of Foreign and Insular Quarantine and Immigration.

The operations of the Public Health Service with reference to the administration of quarantine stations and enforcement of quarantine laws and regulations were conducted on the same general lines as formerly. During the year service officers inspected 14,171 vessels and 818,506 passengers and crew at maritime stations. At border quarantine stations 90,651 travelers were inspected, exclusive of the local interurban traffic. There were detained 2,628 vessels, either because of disease on board or because the vessel came from an infected port, and 2,492 vessels were disinfected.

At foreign and insular stations Public Health Service officers inspected 5,989 vessels and 586,457 passengers and crew and fumigated 838 vessels.

During the year Congress made provision for the purchase of the New York quarantine station, the Baltimore quarantine station, and various quarantine stations formerly operated under the jurisdiction of the State of Texas. Appropriations were made for this purpose in the sundry civil act for the fiscal year 1921, available July 1, 1920, and, as soon as the respective jurisdictions furnish evidence of clear title to the property involved the latter will be transferred to national control and operated by the Public Health Service. However, at present the Baltimore station and the Texas stations are already being operated by the Public Health Service under terms of a lease, and the acquisition of title will not materially change conditions from those obtaining during the past fiscal year. With the passing of the New York quarantine station from State to Federal control there will have been completed the national quarantine system; all quarantines at ports of entry and international ports on the frontiers will be operated by the United States Public Health Service, and there will be thus brought to a consummation the objective contemplated in the act of February 15, 1893, to provide for the national control of all quarantine stations at ports of entry.

The United States quarantine regulations were revised during the year and several important changes were made therein, which will result in greater efficiency and additional protection to the public

health of the country and, at the same time, probably prove less obstructive to commerce than the former regulations. Material changes were made in the provisions relating to measures designed for preventing the introduction of plague, cholera, yellow fever, and typhus. On account of a number of cases of anthrax occurring throughout the country, the infection for the most part being due to imported bristles that enter into shaving brushes, certain safeguards were provided to prevent the introduction of this kind of infected material from foreign countries, more especially from the Orient. Methods for the fumigation and disinfection of ships and the examination of passengers were standardized, and certain requirements proven to be of small practical value were eliminated from the regulations.

The department took action through the proper channels to effect the revision of the Sanitary Convention of Paris of 1912. At the time of the ratification of this convention the terms were deemed not entirely satisfactory and as containing provisions which would very inadequately safeguard the public health of the United States, and this Government, therefore, included in that convention a reservation which afforded very considerable latitude in applying any special quarantine measures against infected ports. The Sanitary Convention of 1912 also signally failed to take into consideration modern advances in sanitary science, more particularly that relating to the rôle of cholera carriers and the transmission of bubonic plague almost exclusively by rodents; and typhus, which in recent years has proven to be even a greater scourge than cholera or plague, was wholly omitted from the sanitary treaties. The alterations contemplated in the event of a consideration of a new convention will include measures to prevent the spread of typhus fever, a greater importance will be attached to the rôle of the rat in the spread of plague, and greater attention given to the healthy cholera carrier as a means of disseminating cholera infection.

Recommendations will also be offered that the signatories to the treaty shall be empowered to enforce quarantine measures against any port or area which from reliable reports is known to be infected, and this without awaiting the receipt of information through diplomatic channels. This latter provision will be especially important, since experience has demonstrated that the signatories to the existing convention have not always complied with their responsibilities relative to the reporting of infected ports and areas, the omission apparently being due in some cases to the desire of local authorities to suppress the information and thus avoid quarantine restrictions and in other instances to the fact that some of the governments have no one agency vested with the responsibility of transmitting sanitary information to other governments.

With the cessation of hostilities in the European zone and the resumption of maritime commerce, the danger of the introduction of epidemic diseases increased. During the war the public mind of the various nations party to the conflict and all their energies and resources were directed along military channels, and sanitation and public hygiene, as a consequence, were greatly neglected. In the countries of central Europe conditions became very favorable for the outbreak of epidemic diseases, and in many areas infection of typhus, plague, and cholera kept smoldering, only to burst forth under conditions that were subsequently sure to arise. The saving feature of the whole situation was the restriction of travel from one country to another. The spread of epidemic diseases is proportionate to the volume of travel from one district to another, and as overland and maritime commerce was reduced to a minimum during the war, the prevalence of epidemic scourge diseases was more or less reduced to small local outbreaks. On the resumption of commercial intercourse, the expected happened. Typhus spread throughout continental Europe by means of returning soldiers, repatriated prisoners, and, to a less extent, by commercial travelers. The ravages of typhus were more especially noted in Poland, eastern and southern Russia, and the Balkans, and the lack of the necessities of life incident to the drain of warfare, with inability to secure equipment or supplies to combat the disease, resulted in a tremendous outbreak and great loss of life. Even before the armistice this condition of affairs was foreseen, and medical officers of the Public Health Service were sent to Europe for the purpose of investigation and to make preparation for the application of preventive measures at the European ports of departure whenever trans-Atlantic travel should be resumed. At present officers of the Public Health Service are stationed at practically all of the important ports of continental Europe for the purpose of inspecting vessels and personnel prior to their departure for ports of the United States. All verminous persons or those coming from typhus-infected areas are required to undergo appropriate treatment and detention when deemed necessary before they embark on the steamer. Notwithstanding these precautions, however, typhus has broken out on several vessels bound for ports of the United States, but, with detection of the disease on the arrival of the vessel and appropriate treatment of the personnel, the efforts to prevent the introduction of typhus from Europe have been entirely successful. Measures enforced along the Texas-Mexican border to prevent the introduction of typhus from Mexico into the United States have been equally successful.

Bubonic plague has been on the increase throughout the world, and on account of cases of plague, either rodent or human, being reported in Spain, Italy, and Greece, all vessels from the Medi-

terranean upon their arrival at ports of the United States are required to be fumigated throughout for the destruction of rats. While India continues to be the chief reservoir of plague infection for the rest of the world, the disease was also reported as prevalent throughout the Orient and in Argentina, Brazil, Chile, Ecuador (Guayaquil especially), and Peru, and more recently an outbreak of considerable proportion occurred in Vera Cruz, Mexico. Passed Asst. Surg. Michel, attached to the American consulate at Vera Cruz, by reason of his previous experience in antiplague work in New Orleans, was tendered an appointment as technical adviser to the local authorities, and outlined a plan for plague suppression in Vera Cruz, which was adopted and adhered to with most satisfactory results. Later on, Dr. Michel, at the request of the Supreme Board of Health, proceeded to Mexico City and drafted a plan for the control of yellow fever in Vera Cruz. The spirit of the Mexican authorities in seeking and applying the most modern preventive measures against plague and yellow fever has been gratifying. Tampico was likewise infected, but not so severely as Vera Cruz. Of all the epidemic diseases, the spread of plague is the most difficult to prevent, since it is primarily a disease of rats and may remain undetected in a port over a considerable period of time, confined to the rodent population with only occasional human plague, its presence even unknown to the authorities or deliberately suppressed to prevent commercial prejudice against the port. It is no difficult matter for rodents, hidden away in articles of freight, to be transported from an infected warehouse in some port not known to be infected and carried across the sea and the infection thus implanted in some other city or country not previously infected, which, in turn, might well become a distributing center of infection while the disease is spreading amongst the rats and before it appears amongst the human population. The only measure that seems to promise the successful exclusion of plague from our ports is the systematic fumigation of vessels for the destruction of rats. During the year past there were 2,530 vessels fumigated for this purpose.

Cholera was reported chiefly from various oriental countries and the interior of Europe, and, thus far, has not seriously threatened ports of the United States. Should the disease, however, extend to the Atlantic seaports of Europe, then it will be necessary to enforce precautionary measures similar in scope to those that were so successfully utilized in preventing the introduction of cholera in 1911, the date of the last European outbreak.

Yellow fever was reported in epidemic proportion in Salvador during May and June, 1920, and later spread to the Atlantic seaboard

of Guatemala. Sporadic cases, however, had been reported in the previous year on the eastern coast of Central America. The infection was also reported in a number of cities in Peru and in a few localities in Brazil. It continued endemic in Yucatan, and was reported in epidemic proportion in Vera Cruz during June, 1920. Quite an outbreak occurred in Progreso the latter part of the fiscal year. During the active quarantine season each year—from April 1 to November 1—vessels from the Yucatan Peninsula have been treated as though from a known infected port, and the wisdom of this has been supported on several occasions by the apprehension and exclusion of cases of yellow fever on vessels from that region. A case of yellow fever in the person of a returning American occurred on a vessel bound from Progreso to New Orleans in December, 1919, and shortly thereafter another case was detected on a vessel from the eastern coast of Guatemala and held up at the New Orleans quarantine station. Notwithstanding the various epidemics of yellow fever in Mexico, Central and South America, and the reported detection of the disease on vessels at ports of the United States, the infection has been successfully excluded from this country during the past 14 years. If the quarantine service had accomplished no more than this, it would have repaid many times the cost of its maintenance.

The International Health Board has mapped out an elaborate campaign for the eradication of yellow fever from the world, and appears to regard the project with some degree of optimism. Until some reliable diagnostic criteria are available for the detection of mild cases, and until various ports of Mexico, Central America, and South America are better organized as to public health matters, and until authorities here and there are willing to make immediately public the appearance of the disease, notwithstanding the commercial prejudice for the moment, then, and not until then, will the roseate expectations of the International Health Board seem to have some basis of justification.

Smallpox of a virulent type continued to prevail in Mexico. Because of the opposition of the mass of the population to vaccination, it is not expected that the smallpox situation in that country will improve materially for many years to come. Chief reliance was placed on the vaccination of incoming travelers to prevent the introduction of the infection into the United States, and in the course of the year 56,463 persons were vaccinated at the different border points. During the winter of 1919-20 smallpox threatened from the north, as an epidemic of considerable proportion occurred in the Province of Ontario, more especially in the city of Toronto. The total number of cases of smallpox reported from the Province of

Ontario was 5,673. While there were only some 28 deaths, the type of the disease varied from the mild to the severe. Absolute protection to the United States would have necessitated the total cessation of border travel. This was not only impracticable but also deemed to be unjustifiable. To meet the situation and afford a relative safeguard against the introduction of the disease, the routine vaccination of all incoming travelers was instituted at border points, especially Buffalo, Niagara Falls, Detroit, Port Huron, Sault Ste. Marie, and Ogdensburg. Medical officers and employees of the Public Health Service during the period of December to March, inclusive, vaccinated 52,921 persons. In addition to this number many thousands more were vaccinated by Canadian authorities and private physicians. As the number of cases in Ontario had very materially subsided and the epidemic practically abated by March, vaccination requirements were suspended. The enforcement of this requirement, however, seemed to have very successfully served its purpose, as no smallpox was reported in the northern United States other than the mild and occasional sporadic cases that occur each winter.

Medical inspection of aliens.—During the fiscal year officers of the Public Health Service examined 1,450,033 aliens for the purpose of detecting either mental or physical conditions that would render them subject to deportation under the provisions of the immigration law. This included both alien passengers and alien seamen. Of the total number of aliens examined 24,000 were certified to by Public Health officers as having either mental or physical defect, and of this number 329 were suffering from conditions that would render them mandatorily subject to deportation on account of mental defects and 5,337 on account of disease. Fourteen thousand three hundred twenty-four were certified to as having some physical condition that would materially interfere with their ability to earn a living and 4,010 were certified to as having some minor physical defect.

The one aspect of this subject of most serious concern is that pertaining to the enforcement of immigration examination and restrictions on the Mexican border. Under existing conditions it is exceedingly doubtful if the examination of immigrants along the Rio Grande serves any very practical purpose on account of the facilities for clandestine entry into the United States. Immigration ports of entry have been established at the main border cities and towns, and here medical examinations are performed, as well as inquiry into other conditions affecting the admissibility of aliens. Those who are rejected have only to proceed a short distance above or below the port of entry and there gain entry with comparative ease because of the long stretch of unguarded border. Until some arrangement shall have been effected for a border patrol from Brownsville, on the Gulf, to Tia Juana, on the west, any prohibition against travelers from

Mexico, whether it be of quarantine, immigration, or customs nature, will fall far short of the objective. During the previous four years, on account of war conditions, there was a very marked subsidence in immigration, but in the latter part of the fiscal year there was evidence of a very sharp increase in the immigration, and it seems probable that there will be a tremendous immigration to the United States during the coming year and, probably, for several years following.

Division of Sanitary Reports and Statistics.

Industrial morbidity reports.—Continuing its plan of obtaining industrial morbidity reports, the Public Health Service communicated with a number of industrial establishments during the past year, and 64 establishments, with 240,000 employees, have agreed to make regular reports to the Service.

Judging from the requests for personal interviews and assistance and from the general willingness of establishments to cooperate with the Public Health Service in this respect whenever some system of recording disease prevalence already exists, there seems to be a rather well-defined movement for keeping such records for the analysis of health conditions in plants.

Collaborating epidemiologists and assistant collaborating epidemiologists.—With a view to extending Federal aid and cooperation to State and local health authorities in the work of securing reports of dangerous communicable diseases, the Public Health Service appointed during the year 32 collaborating epidemiologists in 32 States and 2,803 assistant collaborating epidemiologists in local health jurisdictions. Under this plan the physicians forward their reports daily to the assistant collaborating epidemiologists who, in turn, transmit them weekly to the collaborating epidemiologist at the State capital. The collaborating epidemiologist of each State summarizes the information contained in the reports and dispatches it to the Public Health Service. In addition to this weekly report, telegraphic advice is received of any unusual health conditions occurring in the State immediately upon its appearance.

State and city morbidity reports.—Weekly telegraphic reports of the prevalence of communicable diseases were received from State health officers and published currently in the Public Health Reports, 31 States reporting at the close of the year.

Forty States, the District of Columbia, and Hawaii furnished monthly reports of the prevalence of preventable diseases, and annual summaries of the reported morbidity were received from 41 States, and of mortality from 39 States.

At the end of the year, reports of the prevalence of communicable diseases from 512 cities in all parts of the United States were being

received and published weekly in the Public Health Reports, an increase of 37 cities as compared with the previous fiscal year.

Public Health Reports.—During the year the weekly Public Health Reports contained 3,144 pages, or 407 more than during the preceding year. Sixty articles appearing in this publication were reprinted as separate pamphlets, in order to make possible the economical distribution of the same to interested persons.

Reports of prevalence of diseases.—Again it is recommended that appropriations be increased in order that the present system may be extended and the reports made more complete. No health agency can effectively prevent or control disease without knowledge of when, where, and under what conditions cases are occurring. The \$25,000 now appropriated for this purpose should be increased to \$100,000 for the next fiscal year. The \$100,000 will be used in those States which are willing to cooperate with the Public Health Service to the greatest advantage. As the plan develops, it will be necessary very materially to increase the amount of \$100,000. With adequate appropriations it will be possible to establish a registration area for morbidity reports and in time extend the area to cover most of the population of the United States.

Provision should be made for the issuance of a weekly mimeographed bulletin for immediate distribution to health officers, giving information of the prevalence of communicable diseases in cities in different parts of the United States. The data for such a bulletin can be secured by telegraph from city health officers.

Division of Marine Hospitals and Relief.

The fiscal year 1920 marked an important epoch in the history of the Hospital Division. The increase in the activities of this division due to the war, and, following the war period, by Public Act No. 326, Sixty-fifth Congress, continued to be administered throughout the fiscal year. During the year 22 new hospitals were opened by the Service, giving an additional capacity of about 8,000 beds.

At the beginning of the fiscal year there were only about 2,800 in-patients in Service hospitals. On June 30, 1920, the number of patients in Service hospitals was over 8,500. Even a more striking increase took place in the number of patients in contract hospitals. The Service was not able to purchase or lease hospitals fast enough to keep pace with the tremendous need for hospital facilities, and it was necessary to utilize other public and private institutions to a very large extent. At the end of the fiscal year 1919 only 380 in-patients were hospitalized in contract institutions, but by the end of the fiscal year 1920 this number had grown to about 9,900. The total net increase in the number of in-patients during the fiscal year 1920 was over 15,000.

A clearer idea of the increased volume in the work of the Hospital Division will be obtained from figures showing actual relief. Over 4,000,000 hospital relief days were furnished to all beneficiaries of the Service during the year. In addition to this, about 600,000 office treatments and 375,000 physical examinations were furnished at all stations of the Service. For the purpose of comparison, it might be stated that in the preceding fiscal year only 757,018 hospital relief days were furnished, and the number of office treatments and physical examinations were 104,763 and 41,185, respectively.

In June, 1919, the number of relief days furnished at all stations of the Service was about 137,000. This number grew from month to month until in June, 1920, it was over 500,000. In 12 months the number of hospital days increased nearly four times. Office treatments and physical examinations increased in the same proportion.

These increased activities required a reorganization of the Division, and a number of new sections were formed, namely, personnel, finance, hospital construction, laboratories and X-ray, dentistry, district supervision, tuberculosis, neuro-psychiatry, reconstruction and social service, dietetics, statistics, medical and surgical, and dispensary. The work of the nursing section, which had already been established, was greatly increased. The increased work of this division made necessary a considerable expansion of the office force in Washington, including the detail of two officers as executive officers to assist the chief of the division.

Division of Personnel and Accounts.

The Division of Personnel and Accounts has been required to meet a large part of the burden thrown on the Service by the examination and treatment of beneficiaries of the Bureau of War Risk Insurance. The Service is the principal agency in affording this relief, and the expenses for this purpose have risen to large proportions. This has necessitated securing additional personnel, not only professional and scientific, but also attendants for duty in the hospitals and in connection with the supervisors' offices. This has not only increased markedly the work of the Personnel Section, but also that relating to accounts. It has been necessary to increase the number of clerks from 11 to 37 in order to keep the work of the division current.

Commissioned and other officers.—There has occurred during the fiscal year a reduction in the number of commissioned officers of the Regular corps due to resignations. At the commencement of the fiscal year the corps consisted of the Surgeon General, 1 Assistant Surgeon General at Large, 16 senior surgeons, 70 surgeons, 60 passed assistant surgeons, and 70 assistant surgeons, a total of 218. The changes that have occurred during the year show the Regular corps

to consist of on June 30, 1920, the Surgeon General, 4 Assistant Surgeons General at Large, 16 senior surgeons, 72 surgeons, 71 passed assistant surgeons, and 36 assistant surgeons, a total of 200.

The additional medical personnel required in the hospitals and relief stations and supervisors' offices has been furnished from the Reserve Corps, and on June 30, 1920, 483 officers had been called to duty for this purpose.

It was also necessary during the year to appoint a large number of attending specialists in order to provide skilled treatment and advice in certain specialties. These physicians are serving on a part-time basis, and have accepted appointment more from a desire to render aid to ex-service men than for the compensation given, as this is nominal and is not an incentive for these men to serve.

To meet the increased activities that pertain to the examination and treatment of beneficiaries of the Bureau of War Risk Insurance, the number of acting assistant surgeons was increased from 701 to 1,511. This increase was due to the opening of United States Public Health Service hospitals and to the establishment and expansion of 18 districts for the examination and care of these beneficiaries. Acting assistant surgeons are appointed locally when there is a sufficient number of beneficiaries in a locality to warrant such appointments.

In addition, a large number of physicians have been appointed as designated examiners on a fee basis in order that there will always be available some physician in every locality for the examination and treatment of ex-service men.

The total number of medical officers, Regular Corps and the Reserve, attending specialists, and acting assistant surgeons on duty at the close of the fiscal year was 3,001.

The total personnel of the Service is recapitulated as follows: Commissioned medical officers, 200; Commissioned Officers' Reserve Corps (active), 483; chiefs of divisions, Hygienic Laboratory, 3; advisory board, Hygienic Laboratory, 5; acting assistant surgeons, 1,511; attending specialists, 807; collaborating epidemiologists, 2,832; pharmacists, 42; sanitary engineers, scientific assistants, bacteriologists, and other scientific employees, 178; attendants, 11,226—making a total of 17,287.

Expenditures.—The appropriations for the ordinary maintenance of the Public Health Service were \$3,126,500. The receipts from all sources, repayments for care of foreign seamen, etc., were \$171,337.56. The expenditures, including outstanding liabilities, were \$3,066,947.11, leaving an estimated balance of \$230,890.45.

The appropriation for preventing the introduction and spread of epidemic diseases was \$500,000. The repayments were \$11,351.49.

The expenditures, including outstanding liabilities, were \$504,871.83, leaving an estimated balance of \$6,479.66.

The appropriation for the maintenance of the quarantine service was \$200,000. The amount of repayments was \$65,191.34. The expenditures were \$223,643.74, including outstanding liabilities, leaving an estimated balance of \$41,547.60.

The appropriation for field investigations of Public Health Service was \$300,000. The expenditures were \$274,416.50, including estimated outstanding liabilities, leaving an estimated balance of \$25,583.50.

The appropriations for interstate quarantine service were \$25,000. The expenditures were \$18,173.92, including outstanding liabilities, leaving an estimated balance of \$6,826.08.

The appropriation for special studies of pellagra was \$30,000. The expenditures were \$28,040.20, including outstanding liabilities, leaving an estimated balance of \$1,959.80.

The appropriation for studies of rural sanitation was \$50,000. The expenditures were \$48,148.06, including outstanding liabilities, leaving an estimated balance of \$1,851.94.

The appropriation for control of biologic products was \$50,000. The expenditures were \$49,629.97, including outstanding liabilities, leaving an estimated balance of \$370.03.

The appropriation for expenses, Division of Venereal Diseases, was \$200,000. The expenditures were \$181,408.73, including outstanding liabilities, leaving an estimated balance of \$18,591.27.

The appropriation for pay of personnel and maintenance of hospitals was \$19,326,187.14. The repayments were \$122,729.43. The expenditures were \$19,148,916.57, including outstanding liabilities, leaving an estimated balance of \$300,000.

Division of Venereal Diseases.

During the year the work of venereal-disease control has been carried on extensively through the State boards of health, the work of the division being principally to plan, direct, and advise, and to act as coordinating center for the States. At the close of the year, 46 States have again qualified for Federal funds by raising an amount from State funds equal to their Federal allotment. The District of Columbia, Nevada, and New Mexico alone failed to qualify by providing local funds. Results of the past year's activities show the greatest development in the medical phases of the work.

Inspection Section.

With the enlargement of the hospital facilities of the Public Health Service to take care of the increased number of beneficiaries of the War Risk Insurance Bureau, complaints regarding the ad-

ministration of hospitals and the personal conduct of officers of this Service began to be received in the bureau to an increasing extent. Although the Public Health Service has previously assigned inspectors to the field to investigate reports of alleged mismanagement, it was felt that only by the establishment of an independent inspection service reporting directly to the Surgeon General could the maximum efficiency be hoped for in the administration of all Service activities. Accordingly, on February 16, 1920, upon the recommendation of the Surgeon General of the Public Health Service, an Inspection Section of the Public Health Service was created, with a commissioned medical officer of this Service holding the rank of Assistant Surgeon General in direct charge.

In addition to a corps of special inspectors located in Washington, it was found necessary to establish zone inspectors in the field in order to cover systematically and efficiently the vast activities of the Service throughout the country. The United States, for inspection purposes, has been divided into zones comprising a number of States each, and a zone inspector has been detailed to duty in each of these zones. This zone inspection service has been recently organized. Nine of the fourteen districts are covered at the present time, and within the near future the one remaining zone in the eastern part of the United States will receive a similar detail.

It is the duty of the inspectors of this section to make routine inspections of both Government-owned and contract hospitals and all other stations and activities of the Service. In addition, every complaint which is received in the bureau regarding mismanagement or the lack of proper medical or hospital facilities receives the personal attention of an inspector, who takes testimony under oath to ascertain the truth of the charges, making a report in writing to the Surgeon General on which that official can base necessary action toward remedying the conditions disclosed. From the date of the creation of the Inspection Section up to the close of the fiscal year, a period of a little over four months, the following inspections have been made by this section:

January 1, 1920 to June 30, 1920, inclusive.

Number of hospitals, first class, inspected.....	51
Number of contract hospitals and second-class stations inspected.....	832
Number of special investigations completed.....	123
Number of annual inspections of unserviceable property.....	18

The salutary effect upon the administration of the Service activities by having frequent and impartial inspections made already manifests itself in increased efficiency. The work of the Inspection Section at the time of its creation or in the early days of its existence was extremely heavy, but at the present time complaints of the lack

of care and treatment are largely diminishing in number, and it has even been found possible, therefore, to devote more time to routine inspections.

Education Section.

Among the new activities successfully carried on by the Section of Public Health Education during the past year was the inauguration of a daily health column supplied for publication in newspapers throughout the country. Combined with a system of questions and answers, this has met with a very cordial reception by the public, and has been an effective vehicle for the promotion of public-health education.

The foreign-language press has been furnished with a series of authoritative health articles which have been extensively utilized by these newspapers. This work undoubtedly has been of great value in educating alien immigrants in the work of American institutions.

Owing to the restrictions imposed on Government bureaus in regard to publications, it has been impossible to continue supplying Members of Congress with public-health bulletins for distribution to their constituents. So far as one of the publications is concerned, the Health Almanac for 1920, a large supply for distribution was made available through the kindness of the American Red Cross.

Efforts made by the section to find a permanent place in Washington for displaying the health exhibit originally shown at the Panama Exposition were unavailing, and the exhibit was finally sent to the bureau's station in Perryville for use in the local health office there.

In cooperation with the United States Reclamation Service, the Bureau of Fisheries and the American Museum of National History, the section succeeded in producing an educational motion picture dealing with mosquitoes and malaria. Copies of this picture have been made available for State and local health officers and others interested in this important health problem.

Toward the end of the fiscal year an extensive revision of the bureau's various mailing lists was undertaken, a proceeding which effected a considerable saving in publications through a reduction in the number of names on the mailing lists.

The limitation in the number of copies of bulletins which may be printed by Government bureaus has made it necessary also to discontinue publishing the Monthly List of Publications.

During the fiscal year 53 new publications were issued, compared with 161 during the preceding year. The total number of copies of these publications and of reprints of previous documents aggregated 5,806,220, as compared with 9,532,392 copies during the preceding year, and with 4,364,850 the year before. This number of leaflets

sent in response to public requests is entirely additional to the publications printed and distributed by the Division of Venereal Diseases.

The section has administered the Stereopticon Loan Library, sending out lantern slides to the amount of 5,357 in response to 89 requests. The demand has very greatly exceeded the number of slides available, and there have been no available funds to make additions to the library.

The work of the section is hampered by the lack of funds for developing important educational activities by means of lectures, exhibits, posters, motion pictures, and other recognized vehicles of public health education.

Chief Clerk's Office.

Bureau of Personnel.—The continued growth of the Service at large made it necessary to add steadily to the number of employees on duty in the administrative bureau in Washington. During the year the personnel on duty increased from 220 to 529. The field establishment is still growing rapidly, and it is inevitable that the bureau in Washington must continue to enlarge for some time to come.

The work of improving and developing the office organization has more than kept pace with this expansion, and it is gratifying to report that the Bureau is now in much better shape to discharge its increasing responsibilities than it was one year ago. The effort in this direction will be continued without relaxation until the Bureau is in an entirely satisfactory condition from an administrative standpoint.

Bureau office quarters.—The Hospital Division of the bureau has several times outgrown its quarters during the past year, and the resulting removal to other buildings caused some temporary dislocation of its work. However, all parts of the bureau are now concentrated in two buildings—viz, the Butler Building, at New Jersey Avenue and B Streets, SE., and building C, a temporary structure at Seventh and B Streets, SW. This is a great improvement over former conditions, which, it is expected, will be reflected in improved economy and efficiency. Nevertheless, it will always be unsatisfactory to have important Government records and activities housed in a building of flimsy and nonfireproof construction. In the event of destruction many of these records could not be replaced, and the resulting confusion and loss would be so serious that the matter is one of constant concern. It is hoped that conditions will soon be such as to make it practicable to submit a recommendation to Congress for an appropriation for a separate, modern, fireproof building for the Public Health Service.

Such a building should be carefully planned with a view to the peculiar needs of the Federal Health Service, and should be expres-

sive of the broad views entertained by the General Government as to the value and importance of the national health organization.

Public Health library.—The bureau library has been recently installed in new quarters, which have added greatly to its usefulness. The extensive work of recataloguing and rearranging has proceeded throughout the year. Many important additions have been made, both by gift and purchase, and the librarian is now engaged in digesting a mass of unorganized material accumulated in former years, when the bureau had no library employees. It is expected that many useful and historical documents will be obtained from this source. A further important expansion of the library is under contemplation.

Purveying depot.

On account of the greatly increased amount of work in connection with the purchase, care, and issue of property, which naturally accompanied the great increase in the number of beneficiaries of the Service and the opening of new hospitals, together with the fact that the purveying depot is the supply agency for all activities of the Service, it was deemed advisable during the past fiscal year to separate the purveying depot from the Marine Hospital Division and make it an independent section responsible direct to the Surgeon General. With the approval of the Secretary of the Treasury this was effected on April 9, 1920.

Within the last year the activities and the personnel of the purveying depot have increased manyfold, and in order to carry on the work expeditiously the purveying depot was reorganized and divided into certain logical sections, the whole in charge of a commissioned medical officer of the Service, with a pharmacist as an assistant and executive officer. These sections are as follows:

- Purchase and Issue Section.
- Financial Section.
- Dental Section.
- Motor Transportation Section.
- X-ray Section.
- Property Returns Section.
- Supply Depot at Perryville.
- Supply Depot at North Chicago.

These sections, which constitute the executive office of the purveying depot, are all located in Washington. At the present time, with the exception of office furniture secured from the General Supply Committee, which is received, crated, and immediately shipped, no stock or supply is kept or issued from Washington.

The main supply and shipping depot is located at Perryville, Md., and contains the bulk of the stock of the Public Health Service, which has been secured either through purchase or by transfer from

the Army and Navy. From this depot stock is issued to the various stations of the Service. In addition to this supply depot, there is also another smaller one at North Chicago, occupying those buildings at Camp Lawrence which were transferred by the Navy Department to the Public Health Service.

The following tabulations will indicate statistically the transactions of the Purveying Section during the past fiscal year:

Summary of transactions of the purveying depot during fiscal year ending June 30, 1920.

Number of requisitions filled.....	5,584
Number of packages shipped from purveying depot.....	14,815
Number of packages shipped from one station to another.....	3,211
Number of orders placed for direct shipment of supplies to field stations..	5,586

SUPPLY DEPOT, PERRYVILLE, MD.

Number of packages shipped.....	17,526
Total weight of supplies shipped.....pounds..	2,674,933

Expenditures of the purveying depot for fiscal year 1920, classified by subject matter.

1. Drugs and chemicals.....	\$137,758.94
2. Surgical instruments and appliances.....	18,757.03
3. Hospital furniture and equipment.....	483,119.00
4. Quarter's furniture and equipment.....	100,478.32
5. Office furniture and supplies.....	181,156.53
6. Typewriters and adding machines.....	88,929.36
7. Hospital supplies.....	102,160.80
8. X-ray supplies and equipment.....	60,084.71
9. Laboratory supplies and equipment.....	89,614.71
10. Kitchen and dining-room equipment.....	283,455.25
11. Bedding, clothing, and towelings.....	113,658.68
12. Hardware, plumbers' supplies, lumber.....	95,577.44
13. Books and journals.....	6,713.26
14. Dental supplies.....	173,776.81
15. Physiotherapy.....	58,918.61
16. Occupational therapy.....	58,281.00
17. Prosthetic and orthopedic.....	3,635.25
18. Auto vehicles and accessories.....	162,494.39
19. Electrical supplies.....	63,361.87
20. Live stock.....	34,024.31
21. Miscellaneous.....	78,218.08
Total.....	2,394,174.35

Recommendations.

Field investigation.—It is deemed highly desirable to recommend that additional appropriation be secured for furthering investigative work of the Public Health Service. The work of the Service along these lines has met with success in the past. Its necessity can be appreciated to some extent when it is remembered that one-fifth of all deaths take place in children less than 5 years of age; that pneu-

monia claims one-tenth of all persons who die each year in the United States; that one hundred and fifty thousand deaths are due to tuberculosis; that seven or eight million cases of malaria occur annually, causing an economic loss of about \$800,000,000 to \$1,000,000,000; that the recent epidemic of influenza carried off in the space of six weeks some 500,000 lives. It would seem, therefore, in the interest of national health and prosperity that funds should be appropriated by the Congress in increasing amounts to further investigation and prevention of disease.

Plague operations.—Plague operations continued throughout the past fiscal year at New Orleans, La., and San Francisco, Calif. Shortly after the close of the year a new outbreak of plague occurred in New Orleans. Following the New Orleans outbreak plague made its appearance in Pensacola, Fla., and in two localities in Texas. Mention is made of these outbreaks because of the necessity of urging at this time that steps be taken at the next session of the Congress to secure additional appropriations with which to combat this disease. The epidemic fund at the disposal of the bureau for the purpose of combating this and other diseases is nearly exhausted, despite the fact that plague operations must be carried on for several more months. The present outbreak of plague is considered by the bureau to present a serious problem; and it is urgently recommended that immediate steps be taken to obtain legislative relief from the Congress.

Improvements in the quarantine service.—Quarantine facilities at the port of Providence are wholly inadequate for the protection of that port, and on several occasions it has been necessary to remand infected vessels to New York, with resulting commercial prejudice to Providence. There should be provided at Narragansett Bay a quarantine station not only for the protection of Providence, but for Fall River and various other ports in that vicinity. This plant should have quarters for operating personnel, barracks for cabin passengers, and steerage passengers that are held in detention, small hospital building, necessary utilities, heating and lighting, and provisions for the disinfection of infected vessels and crew or passengers. It is contemplated that such a plant would cost in the neighborhood of \$600,000, including site.

A quarantine station is also required at the port of Mobile, and the Public Health Service has already obtained from the State of Alabama title to 12 acres of land located on an artificial island in Mobile Bay near the mouth of the river. This affords ample space for a modern quarantine station, including detention barracks, quarters for the operating personnel, and disinfecting facilities. There is a quarantine station at present near the mouth of the bay, some 30

miles from Mobile. It is lacking in disinfection facilities, and the provisions for detention of infected cases or contacts are wholly inadequate. The station, moreover, is constructed on piling, which results in a most excessive cost for preservation and repair, and because of its open exposure has on several occasions been severely damaged and at one time was entirely destroyed.

Reports of prevalence of disease.—One of the functions of the Public Health Service, in addition to preventing the introduction of diseases into the United States, is to prevent the spread of disease from State to State. To perform this duty efficiently, however, it is necessary that the Service have complete information of the presence of diseases in the United States. If reports of the presence of diseases are promptly received by the Service, State and local authorities throughout the country can be notified of the presence of these conditions and necessary steps taken to prevent interstate epidemics. State authorities throughout the country look to the Public Health Service as the one central agency which is capable of performing this function. Up to the present time, however, the necessary funds have been lacking for collecting and disseminating this information, and the Service has not been able fully to meet its responsibilities in this particular. To enable this work to be carried on in a proper manner during the next fiscal year, it is recommended that representations be made to the Congress for additional funds for this extremely important work.

Educational material.—For a number of years the Public Health Service, because of inadequate appropriation, has been unable satisfactorily to perform the task of publishing and distributing educational health material for the use of the public. The existence of certain legislative restrictions, which prohibit the printing and distribution of these documents in sufficient quantities, also has militated against the endeavors of the Service to meet its responsibilities in this important public health field. In addition to printed material, it is necessary, in order to carry the message of public health to the American public, that exhibit material, moving pictures, lantern slides, and posters of various kinds be obtained and distributed. State boards of health throughout the country have for years secured appropriations for the purchase of material of this character, and are, in many instances, really in advance of the Federal Public Health Service in matters of this kind. The Federal Service is, however, looked to for leadership, and it is earnestly recommended that additional appropriations be secured from the Congress during the next fiscal year to carry on this educational work.

National health program.—It is again strongly recommended that the estimates presented by the department to meet the needs of the national health program be granted to the fullest possible extent, in

order that constructive work along these lines may be carried forward during the next fiscal year.

Hospital facilities.—In addition to increasing existing facilities by the construction of new hospitals, it is desired to bring to the attention of the Congress the dilapidated and unsatisfactory condition of many of the hospitals now owned and operated by the Public Health Service. Some of these hospitals have been owned by the Government for years, and were used for the treatment of seamen of the merchant marine and other beneficiaries of the Service prior to the act which admitted ex-service men of the recent war as beneficiaries. It is presumed that these institutions will be made use of for years to come for these beneficiaries. It is therefore necessary that these institutions be placed in first-class condition. All of the marine hospitals at the present time, with but few exceptions, are of antiquated construction and badly in need of repair. But a few years will elapse before it will be necessary to discontinue entirely the use of these institutions, unless steps are taken to reconstruct and remodel them to meet modern ideas of hospital construction and management.

Personnel.—Attention is invited to the urgent necessity for provision by the Congress of legislation which will provide adequate and suitable personnel for the important public health and other duties of the Public Health Service, particularly those involved in furnishing medical and surgical care to ex-service men and women who are patients of the Bureau of War Risk Insurance, trainees of the Federal Board for Vocational Education, patients of the Employees' Compensation Commission, disabled officers and men of the Coast Guard, Coast and Geodetic Survey, and American merchant marine, and other beneficiaries of the Public Health Service.

Despite the temporary increase in compensation granted by the Congress during its last session, the Public Health Service, in common with the Medical Corps of the Army and Navy, finds it impossible to secure candidates for admission to the entrance grade of its regular corps and the attractions offered its scientific personnel are such that the resignations have actually exceeded the admissions during the past 12 months.

It would have been impossible for this Service to have met these grave responsibilities had it not been for the wise provision by the Congress for the Reserve Corps, which made it practicable to secure the services of medical men who had entered the Army and Navy and were leaving those services after the war.

It is impracticable to retain the best of the men who are occupying important positions under the present uncertainties of Reserve conditions. Appropriate legislation is recommended which will allow the admission of a limited number of competent persons into the

Regular corps under proper regulations similar to those recently enacted for the Medical Department of the Army.

Such legislation will involve no additional expense and will insure the high class of personnel essential for the duties devolving upon the Public Health Service.

COAST GUARD.

The commandant summarizes the operations of the Service as follows:

From the beginning of the fiscal year until August 28, 1919, the Coast Guard, under the provisions of the act of January 28, 1915, continued to operate as a part of the Navy, to which it passed upon the declaration of war on April 6, 1917. The Service was returned to the jurisdiction of the Treasury Department on August 28, 1919, by Executive order.

The participation of the Coast Guard in the war was marked with commendable distinction and credit, and its resources of personnel and equipment constituted a valuable addition to the fighting forces of the country. The officers and men, to whatever duty they were assigned, proved their efficiency and worth, upheld the best traditions of the Service, and supplemented, by deeds of heroism, valor and self-sacrifice, and by their steadfast devotion to duty, the already notable record of Service achievements in peace and in war.

In speaking of the Coast Guard's service with the Navy during the war, the Secretary of the Navy in his annual report for the fiscal year 1919, which includes operations to December 1, 1919, gives gratifying testimony to the excellent record made by the Coast Guard while operating with the Navy, and expresses his appreciation of the hearty cooperation of the officers and men of the Service.

The Coast Guard continued to carry on, so far as practicable, during the active operations of the war, its usual peace-time duties in connection with the saving of life and property. The record for each of the fiscal years 1918 and 1919 compares favorably with that of any former year.

The return of the Service to its parent department was accomplished with a minimum disturbance of the administrative machinery. As an aftermath of the war, however, the Service has encountered problems affecting the personnel and material which have taxed its best resources to meet. The increased cost of living, the abnormal industrial conditions, the higher wages being paid in civil pursuits, all have made it a difficult matter to enlist suitable recruits for the vessels and stations. Then, the Service equipment afloat, used during the strenuous season of naval activities, without time or opportunity to give attention to its upkeep, fell into a condition of disrepair. The necessities of the Service and the limited

number of craft, made it impossible to proceed at once with any general plan for repair or rehabilitation. Fortunately, the first mentioned condition—that of depleted personnel—is in process of being remedied, it is hoped, following legislation carrying pay increases generally, granted during the latest session of Congress. Perhaps it is too much to hope at this time that the Service will respond at once to the benefits accruing from this legislation, but it is believed that as industrial affairs settle down to a more nearly normal condition, some of the difficulties at least with which the Service is confronted in this regard will disappear. The repair and improvement of vessels and their equipment is proceeding as rapidly as available funds will permit.

Notwithstanding these adverse conditions, the work accomplished by the Coast Guard during the year has been highly gratifying. In some respects it has far exceeded in volume that which was done during any preceding year in the history of the Service. For instance, the number of persons saved, or taken from situations of peril, during the year was 2,417, a record never before attained. The value of vessels (with their cargoes) assisted by the crews of cutters and stations was \$65,479,705. The record in this respect for any preceding year never exceeded \$20,000,000.

In the course of the year the various Service units were called upon to render assistance upon 2,721 occasions. Of these cases, 719 were of material importance, resulting in the saving of life or of property, or of both. Instances of service, more or less minor in character, but frequently of moment to those benefited, numbered 1,002. Service of this character, classified under the head of miscellaneous assistance, includes aid given to the sick and injured; fighting neighborhood fires; recovering lost property; sheltering wayfarers overtaken by storms, etc. The total number of persons given succor by the Service corps was 561.

The foregoing and other data pertaining to the year's operations are contained in the following tabulated summary:

Lives saved or persons rescued from peril.....	2,417
Persons on board vessels assisted.....	8,427
Persons in distress cared for.....	561
Vessels boarded and papers examined.....	2,005
Vessels seized or reported for violations of law.....	601
Fines and penalties incurred by vessels reported.....	\$65,025.00
Regattas and marine parades patrolled in accordance with law.....	2
Instances of lives saved and vessels assisted.....	1,719
Instances of miscellaneous assistance.....	1,002
Dereelicts and obstructions to navigation removed or destroyed.....	7
Value of vessels assisted (including cargoes).....	\$65,479,705.00
Value of derelicts recovered and delivered to owners.....	\$630,000.00
Persons examined for certificates as lifeboat men.....	1,399

Appropriation for 1920, repairs to cutters.....	\$360,000.00
Net expenditure.....	357,318.19
Estimated unexpended balance.....	2,681.81
Appropriation, construction of new cutters:	
Balance on hand July 1, 1919.....	493,502.90
Appropriation.....	2,850,000.00
Net expenditure.....	3,261,652.43
Estimated unexpended balance.....	81,850.47
Appropriation for 1920 for maintenance of Coast Guard.....	8,618,050.00
Transferred from appropriations for Naval establishment.....	821,299.21
Net expenditure.....	9,183,888.69
Estimated unexpended balance.....	255,460.52

The above statement does not by any means comprise all the activities of, or items of assistance rendered by, the Coast Guard. Many of its duties, having for their object the protection of seafarers and others, can not be given tabulated appraisement, as, for example, the annual ice patrol of the Grand Banks; the carrying of medical aid to deep-sea fishermen; the patrol of the north Pacific Ocean and Bering Sea; the patrol and watch system rigorously maintained at stations, etc. The watchmen and patrolmen on duty at the stations and on the beaches warned away from the shore, by pyrotechnic lights and other means, 95 vessels in danger of stranding or going upon outlying rocks and shoals. Doubtless through this preventive service much property was saved, and it reasonably may be assumed also that loss of life as well was averted.

There was not a day throughout the year when service was not performed by cutter or by station crews designed to assist, relieve, or comfort humanity in one way or another. The greatest number of instances of assistance rendered in any single day was 45.

Ice patrol.

The international service of ice patrol, which was temporarily suspended during the seasons of 1917 and 1918 on account of conditions existing at the time and which was resumed in 1919, was carried on during the past season by the Coast Guard cutters *Seneca*, *Ossipee*, and *Androscoggin*. The greater portion of the work of the cutters was performed off the Grand Banks and along the transatlantic steamship lanes, where during certain periods floating icebergs form a menace to navigation. The protective work of the cutters comprised the finding of these floating dangers from day to day, reporting them to the Hydrographic Office of the Navy, and broadcasting the warnings of their location by wireless for the information of shipping. Other duties performed included the removing of obstructions to navigation, such as derelicts, floating wreckage, masts and spars, etc., and the giving of medical aid to the crews of passing vessels.

Winter cruising.

In order to provide for the safety of shipping during the season of the year when the weather renders ocean navigation more than ordinarily hazardous, certain Coast Guard vessels are designated annually by the President for special cruising along the coast. In the performance of this duty a number of Coast Guard cutters, having their headquarters at various ports, respond to the calls of vessels in distress. In answering such calls, the cutters frequently are required to cruise hundreds of miles, and, at times, under sea and weather conditions that tax to the utmost the seaworthiness of the vessels, as well as to call for the display by officers and men of the greatest skill in seamanship. They are of necessity compelled to disregard the elements, for it is the rule that the worse the weather the greater the need of the ship they set out to find and assist on the trackless ocean wastes.

During the year the winter cruising on the Atlantic coast was performed by the following vessels: *Apache*, *Androscoggin*, *Gresham*, *Acushnet*, *Seneca*, *Manning*, *Ossipee*, *Pamlico*, *Seminole*, *Itasca*, and *Yamacraw*. In the course of their work these cutters traveled thousands of miles and were instrumental in bringing safely into port many crippled vessels. It is reasonable to assume that had it not been for the timely aid extended these vessels some would have been lost.

It is not practicable here to present a detailed statement showing in full the results of the work accomplished in this regard during the past year, but it may be stated that the record is especially gratifying. One very notable instance, that of the U. S. A. T. *Powhatan*, may be cited, however, as showing the hardships and dangers frequently encountered in the prosecution of this work. This steamer, a vessel of over 10,000 tons, ran into a violent January storm while en route from New York to Antwerp. Her list of passengers and crew numbered over 500. The value of the vessel and cargo combined was estimated at \$5,000,000. With pumps choked by coal, her fireroom flooded, and her engines disabled, the vessel was at the mercy of the tempest. In responding to her wireless calls for help, the cutters *Gresham*, *Acushnet*, and *Ossipee* found the unfortunate steamer more than 500 miles east of Boston, drifting in a blinding snowstorm, under convoy of United States destroyers *Leary* and *Sharkey*, the Canadian Government steamer *Lady Laurier*, and the steamer *Northern Pacific*. After several days of indefatigable effort, during which 102 passengers were transferred, by means of small boats, to the *Northern Pacific*, the cutters, in cooperation with the tug *Relief* and the *Lady Laurier*, berthed the *Powhatan* safely in the harbor of Halifax.

The number of persons rescued from peril in the course of the winter's cruising reached nearly 1,000, and the value of property saved (ships and cargoes) ran well into the millions of dollars. This record is especially worthy of note because of the fact that the cutters frequently were undermanned, owing to the inability of the Service to secure suitable recruits to replace the men whose terms of enlistment had expired and who would not remain in the service on account of the greater pecuniary inducements being offered in other pursuits.

Cruises in northern waters.

The customary annual patrol of the waters of the north Pacific Ocean, Bering Sea, and southeastern Alaska was performed during the year by an interdepartmental fleet of 11 vessels, four of which (*Bear*, *Unalga*, *Algonquin*, and *Bothwell*) were Coast Guard vessels, three were naval vessels, and four vessels of the Department of Commerce (Coast and Geodetic Survey). While the work performed by the fleet was undertaken within the fiscal year, it will run well into the fiscal year 1921. For this reason reference to the work of the Coast Guard vessels while on this patrol properly comes within the purview of the next annual report. The Coast Guard vessels participating in these annual cruises perform a multitude of services during the brief season permitting navigation in the region covered by their itinerary. Their operations from year to year touch the lives of many persons. To some the coming of the vessels means the renewal of depleted stores of food and fuel, clothing, and household supplies; to others, medical and surgical attention; to others, protection and justice; and to others, still, rescue and succor and relief from well-nigh intolerable conditions. Occasions sometimes arise, also, in which the officers and crews are called upon to face situations of desperate human need which put their resourcefulness and energy, and even their courage, to the severest test.

The officers and men attached to the cutter *Unalga* faced just such a situation during the cruise of 1919 in combating an epidemic of Spanish influenza that occurred in the summer and autumn among the natives of Unalaska, in the region of Nushagak River, and in other localities upon and contiguous to the Alaskan peninsula. The services of the *Unalga* in battling with and finally overcoming this scourge extended through a period of several weeks, during which the force attached to the cutter sacrificed every bodily comfort, risked health, and even seriously hazarded their lives. But for their timely appearance in the regions affected, the native population would, in all probability, have been decimated and the number of deaths among the white population undoubtedly would have been far greater. Their work in this connection contributes an illuminating chapter to the his-

tory of the establishment. The officers and men on the *Bear* participated also in the fight waged in overcoming the influenza, but their services, while of importance, were of shorter duration and less extended.

Anchorage and movements of vessels.

During the fiscal year the personnel and equipment of the Coast Guard has been utilized in the enforcement of the regulations promulgated by the Secretary of the Treasury, under Title II of the act approved June 15, 1917, regulating the anchorage and movements of vessels, in the following-named localities:

- New York Harbor and vicinity.
- Hampton Roads and the harbors of Norfolk and Newport News.
- Delaware River between the northern limits of Philadelphia Harbor and the southerly limits of Newcastle, Del.
- St. Marys River from Point Iroquois on Lake Superior to Point Detour on Lake Huron, except those waters including the St. Marys Falls Canals.
- Chicago Harbor.

The office of captain of the port at New York, Philadelphia, Norfolk, and Sault Ste. Marie continued to be filled by officers of the Coast Guard. The personnel and equipment of Coast Guard Station No. 247, upon a request of the War Department, assumed charge, April 14, 1920, of the enforcement of the regulations prescribed for the use of the harbor of refuge, Harbor Beach, Lake Huron, Mich., which regulations were issued under authority of the act approved June 19, 1882. Under date of November 14, 1919, the Secretary of War defined and established anchorage grounds in Buzzards Bay, Mass., in the vicinity of the entrance to the approach channel to the Cape Cod Canal; this was in conformity with the river and harbor act approved March 4, 1915, and, in accordance with that law, cutters of the Coast Guard stationed in the vicinity have been charged with the enforcement of the regulations.

During the season of navigation, from April to December, 1919, a total of 17,587 vessels passed through the locks of the St. Marys River, and the Coast Guard cutters in regulating the shipping in that locality traveled a total of 38,972 miles.

In view of the great increase in the volume of the American merchant marine, the regulation of the anchorage and movements of vessels, particularly at the seaboard ports, has become a task of great importance, requiring for the execution of these duties officers of wide experience, good judgment, and resourcefulness. It is gratifying to note that wherever this duty has fallen to the Coast Guard to perform it has been accomplished in a highly satisfactory manner.

Florida coast patrol.

The patrol of the Florida coast has been continued by vessels of the Service in the prosecution of the usual duties with which the Coast Guard is charged—rendering assistance to vessels in distress; saving life and property; enforcing the customs, navigation, and motor-boat laws; protecting the revenue; preventing the illegal importation of prohibited merchandise, etc.

Medical aid to deep-sea fishermen.

Pursuant to the provisions of the act of June 24, 1914, the Coast Guard cutter *Algonquin* was detailed for the season of 1920 for the purpose of affording medical and surgical aid to the crews of American vessels engaged in deep-sea fishing. A medical officer of the Public Health Service accompanied the *Algonquin* on its cruises.

Coastal communication.

The rapid transmission of information is absolutely essential to the efficient and expeditious conduct of modern-day commerce. This observation applies with equal force to the business of the Coast Guard. The rescue of a ship's company imperilled on rocky shores or outlying sands often depends upon the speedy appearance of a Service cutter or the crew of a Service station upon the scene of disaster. A coastal telephone system comprising more than 2,000 miles of lines affords the Coast Guard this indispensable facility. The system has been improved and extended during the year as the exigencies of the Service have required. All except two Coast Guard stations are now furnished communication with the telephone or telegraph system of the country, making it possible for the stations to transmit information of marine casualties directly to maritime centers, and to call Service cutters, and other aid if need be, into cooperation with them. In addition, the Coast Guard now furnishes telephone service to about 150 lighthouses, including the most important ones on the Atlantic, Pacific, and Gulf coasts. Twenty-two Navy radio compass stations are furnished telegraph and telephone communication over Service lines, and it is planned to furnish service to a number of radio compass stations which it is understood are to be constructed in the near future. Eight Navy radio stations are connected with the Coast Guard lines. The Service has at present approximately 1,800 miles of overhead lines and 440 miles of cable, making a total of 2,240 miles. The usefulness of this system of communication both for the peace-time duties of the Service and as a protective agency of the Government along our coasts in time of war can not be overstated. The former long ago became an established fact. In the latter relation it has met every expectation.

Aviation.

The application of aviation to the uses of the Coast Guard in the direction of saving life and property from the perils of the sea, in locating floating derelicts along our coasts, and in rendering other kindred service, can now be regarded as an assured proposition. A Coast Guard aviation station has been established at Morehead City, N. C., at practically no expense to the Government. The buildings and equipment were acquired from the Navy Department. The aircraft in use there are the Navy H-S flying boats, and the station is conducting experiments with the view of furthering the effectiveness of aircraft to life and property saving purposes. As funds become available, it is proposed to establish similar stations elsewhere. It is earnestly recommended that Congress give its support to the development of this activity for Coast Guard purposes. A number of officers of the Coast Guard are already qualified pilots of aircraft.

Recruiting.

The plan hitherto employed of making enlistments directly on board the vessels and at stations to which recruits were to be assigned, has been extended to include the establishment of recruiting stations at some of the principal sea and lake ports of the country. It has become necessary to add this means on account of the difficulty which has been experienced in recent months in securing suitable recruits, due, in a large measure, to the prevailing high wages paid in the merchant service and in practically all other civil occupations. The modified plan has brought fairly good returns, and it is thought that, if the Service is able to adopt further measures to bring to the public notice, in a graphic way, the attractions of the Coast Guard as a field of employment, greater success will result. To this end it is recommended that such funds as may be necessary be appropriated.

Coast Guard Academy.

At the close of the year there were under instruction at the Coast Guard Academy, at New London, Conn., 23 line cadets, but no cadet engineers. During the year covered by this report, 14 line cadets and 1 cadet engineer have been appointed; 6 line cadets and 2 cadet engineers have resigned; 2 cadet engineers were graduated. The system of intensive training for enlisted men previously established at New London has been continued. On account of the difficulty experienced recently in obtaining the necessary number of recruits from the usual sources of supply, owing to higher rates of pay in commercial activities, it will be necessary to continue the enlistment of inexperienced men and train them at New London. It is imperative that facilities for the proper accommodation, training and instruc-

tion, both of officers and enlisted men, be provided. The physical conditions obtaining at the academy should be improved so that all essential facilities may be available. This matter will be inquired into by a board which will be convened for the specific purpose. It is urged, in view of the important purposes of this institution, that sufficient funds be provided by Congress for the needed betterments.

Coast Guard repair depot.

The facilities of the Coast Guard repair depot at Arundel Cove, South Baltimore, Md., were employed during the war in overhauling and repairing not only vessels of the Coast Guard, but small craft of the Navy. Repairs have also been made to vessels belonging to other departments of the Government. The Coast Guard cutters *Pamlico*, *Tioga*, *Manning*, *Apache*, *Itasca*, *Seneca*, *Algonquin*, *Pequot*, and *Gresham* were extensively repaired at the depot during the year. The plan of constructing the small boats of the Service at the depot, for use at stations and on vessels, has been continued, and in this regard, also, the plant is giving excellent results. Certain repairs and improvements have been made to the officers' quarters, boat shop, and wharf.

Commissioned personnel.

The slow and very limited promotion confronting the commissioned personnel of the Coast Guard constitutes a harmful situation that militates against the efficiency and best interests of the Service. The number of officers is small and promotion can, under existing law, be made only upon the occurrence of a vacancy in the next higher grade. This results in very slow advancement, and defers to an unreasonable extent the time when the younger officers can expect to attain to command rank. Furthermore, owing to the fact that the Coast Guard organization does not include those higher grades that are essential to a well rounded military organization, officers well advanced in life and of many years' service, find themselves holding a rank entirely inappropriate to their age and experience, and greatly below that attained by officers of the same age, experience, and ability in other military services. These conditions injure the morale of the commissioned force and make it extremely difficult to obtain, and retain, young officers. It is earnestly recommended that this matter be brought to the attention of Congress with the view of securing legislation that will bring about a just and reasonable flow of promotion for officers of the Coast Guard, more commensurate with that obtaining in the other military services of the country.

Civilian personnel.

It is earnestly recommended that the items included in the estimates of the Coast Guard for the fiscal year 1922, proposing certain additional clerical assistance for Coast Guard headquarters at Washington and increasing the pay, both of the present clerical force and of the civilian personnel in the field, receive favorable consideration. These measures are necessary for the proper administration and conduct of Service affairs.

Discipline.

During the fiscal year final action was taken on 242 general court cases, 315 minor court cases, and 115 deck court cases. The system of probation inaugurated by the department several years ago has been continued with satisfactory results.

Vessels.
